of Refuge at Picton Tuesday.  
 The body of Levi Taylor, an aged citizen of Cobourg, was found in the water. He left a note expressing his intention of committing suicide.  
 All kinds of heating apparatus, properly installed, and satisfaction guaranteed.  
**MADOLE & WILSON.**  
 The steamer Dundurn carried away two gates in the Lachine Canal at Montreal and the rush of water flooded several business places. The damage is estimated at \$10,000.

Through the indefatigable efforts of the Rev. J. W. Jones, of Tamworth, the rectory debt has been nearly wiped out, and a new organ installed and paid for.

Archibald Hamilton Knight and Mabel Evelina Gendron both of Arden were married by the Rev. J. W. Jones in Christ Church, Tamworth, on July 18th, 1906.

A Sheffield township farmer treated an English immigrant shamefully, and was ordered by police magistrate Almsworth of Tamworth to pay the man \$40 and costs. The magistrate also dismissed the young man from his employ.

Mr. H. B. Sherwood, Superintendent of the Bay of Quinte Railway has presented a handsome gold watch to the Ladies in charge of St. Patrick Church Bazaar. Tickets will be sold and the watch drawn for at the Bazaar.

Citizens on seeing the fire engine going to the station, made many unfavorable remarks as to the condition of the engine. Some polish and an unlimited amount of elbow grease would do much to improve its appearance.

Miss Edith Dafeo, A. T. C. M., (honorary graduate in piano-forte, teachers' course and organ) will resume her classes Sept. 10th. Pupils prepared for all Conservatory examinations in piano, organ and theory—special attention given to beginners for whom the Virgil Method is used.

Will put on sale Saturday morning August 4th, two case containing six hundred pieces of China, all useful articles for household use in endless variety direct from the manufacturers in Europe, and at prices never heard of here before for such goods. See show window.

**THE COXALL CO.**

The Frontenac Business College, Kingston, has just closed the most successful term in its history—not only as regards numbers enrolled but from the success of our graduates in carrying off the best positions available. The fall term opens Sept. 4th and promises to bring together a larger number than ever to prepare for the ever increasing demands of the Business world. No time in the past was there such opportunities offered to young men and women who had acquired a thorough knowledge of business methods and their essential subjects. Are you at present drawing a good salary? If not write us for particulars. T. N. STOCKDALE, Principal.

**"WHEN WOMEN LOVE."**

"The plot of 'When Women Love,' comes to Biggo Opera House for Friday, August 31st. The engagement, revolves around a factory girl, who is charged with a crime and is hounded almost to death, but in the end, outwits her enemies, and triumphs over their dastardly schemes. This play is true to life, and is making a terrific hit throughout the country.

**Musie**

Owing to several cases of misapprehension being recently brought before Miss McHenry's notice, she wishes to state that the opinion, which seems to be maintained, that she receives for instruction ONLY ADVANCED pupils, is erroneous. She will discontinue teaching through July and August, resuming it September first. Residence, Centre St.

**CANTORIA.**

at 3 p. m. and Camden East, St. Luke's church at 7.30 p. m., when the Rev. L. Norman Tucker, D. C. L. General Secretary of the Missionary Society of the Church of England in Canada, will preach (D. V.) All are welcome.

**Warning to house Keepers.**

The time for making catsup and pickles is at hand, and we desire to render all possible assistance toward making this part of the seasons work a complete success. Our Specialties—Pure Spices (full flavor strength) Garlic (fresh) Gem Jar Rings (best quality), Corks (all sizes), Proof Vinegar (Chemically pure), Fruit Vinegar (Crab Apple Brand), Bottle Wax Mixture (ready for use) Paraffine, Currie, Turmeric &c. Have you used Parke's Catsup Flavor and Preserver? It is good. The Medical Hall—FREDL. HOOPER.

**Mr. George Lott**

One of the most prominent farmers of the Township of Richmond, passed away at his home on the Newburgh road, on Sunday, August 19th, in his eighty-third year. Mr. Lott was an unusually keen and intelligent farmer, and business man, and was for years engaged in the lumbering business with the late Hon. John Stevenson, also with the late J. D. Ham. He leaves besides his widow, two sons, Albert, in Mexico, and W. R., on the homestead. He was a lifelong reformer, and a member of the Methodist church. The funeral took place on Tuesday of last week to the Eastern cemetery, Napanee.

**Moving Pictures.**

There will be a great exhibition of moving pictures given at the Salvation Army Barracks by Staff-Captain McLean, of Toronto, on Friday night, Sept. 7th. These pictures are new and most interesting, and have created the greatest sensation wherever shown, for clearness and effect they have been highly commented upon by experts. Each figure looks like real life, in fact, the service is promised to be the very best that has ever been given in this part. Staff-Captain McLean has visited our town on several occasions, and has always given the public good satisfaction. He will speak on the work of General Booth in India, also the great immigration work of the Salvation Army, and illustrate the same with moving pictures. The public are welcome to attend this service.

**Get your School Books at Paul's.**

**Died at Deseronto.**

Last Wednesday evening Conrad Simmons finished a long life, he having been 80 years 4 months and 22 days old when the grim reaper called him. He was born in South Fredericksburg, where he was married to Miss Eva Scrimshaw in his youth. One son, since deceased, and two daughters, Mrs. George Gonn and Mrs. James Hearn, were the fruit of this union. Mr. Simmons came to Deseronto forty-four years ago. He first started a blacksmith shop of his own, but afterwards went to work for the Rathbun Company, in whose forge he labored for over thirty years. He retired from active labor nine or ten years ago, since which time he had lived with his daughter, Mrs. Hearn, Napanee road. The funeral took place last Friday afternoon at 2.30 from the residence of Mr. and Mrs. Sidney Hearn, Napanee road. Rev. J. R. Reel, of Napanee, conducted service at the house, in the absence of Rev. A. J. H. Spike, pastor of the Methodist church.

**A Good Brush for 25c.**

No more loose hairs in the month if you use the Peerless Tooth Brush. Every one guaranteed secure—Wallace's Drug Store stampal on each Brush.

E. LOYST has large stock of flour, Royal Household and all other grades, all kinds of feed, large quantities at the lowest prices. He wishes to sell out in the next month. Salt, Coal Oil Groceries. Highest price for eggs cash or trade. A call solicited,

secured the position of retired man and fireman with the Napanee Canning Company.

## THE FIRST SHOWING OF THE NEW FURS.

A Collection Second to None at  
Prices Peculiarly Our Own.

Our Fur Stock this season will maintain the high standard they have always held in the past,—quality, style and reasonable prices. Our Furs are manufactured in modernly equipped factories from skins purchased in the best Fur markets in the world. We know Furs and Styles in Furs, and we give you the very best in both, at a fair and reasonable figure. The selection surpasses any previous season's collection. We are in close intimate touch with the leading Fur markets, and our experience and taste are respected on two continents. To become acquainted with the styles, to consider our business methods, certainly convince the shopping Public that what you see at MADILL'S is right.

P. S.—In connection with our extensive Fur Department arrangements have been made, and we have engaged an expert Lady Furrier, to superintend all alteration work.

Men's Black Lamb, Buffalo, and Coon Coats all sizes.

### HORSE RACES.

The Labor day races in the park on Monday afternoon drew a large crowd of spectators and the races and sports were all that could be desired. Rain on Sunday made the track somewhat heavy but by dint of hard work and delaying the races for an hour the track was put in good shape.

Following are the results of the races:

Named race half-mile heats—

|                             |   |   |   |
|-----------------------------|---|---|---|
| Black Maud (W. H. Reynolds) | 1 | 4 | 1 |
| Edith C. C. Hawley          | 2 | 3 | 2 |
| Nelly G. D. Graves          | 3 | 1 | 4 |
| Thurstell, W. J. Lyons      | 4 | 2 | 4 |
| My Candidate, Dr. Benson    | 5 | 5 | 5 |

Time—1.11½, 1.14, 1.14, 1.12.

Free-for-all—

|                              |   |   |   |    |
|------------------------------|---|---|---|----|
| Devers, Jas. Powell          | 1 | 1 | 2 | 1  |
| Minnie Keswick, G. W. Curtis | 2 | 1 | 1 | 2  |
| Muriel Wilkes, Coyle & Coyle | 3 | 3 | 3 | 3  |
| Starkey, E. Francisco        | 5 | 4 | 4 | dr |
| Maud Wilkes, D. Lake         | 4 | 5 | 5 | dr |

Time—2.20½, 2.18½, 2.19½, 2.21.

2.40 class, half-mile heats—

|                                |   |   |   |
|--------------------------------|---|---|---|
| Iris K. E. Kaylor              | 1 | 1 | 2 |
| Jim K., L. Ketcheson           | 2 | 3 | 1 |
| Rio Dee, J. Anderson           | 3 | 2 | 4 |
| Lady Hamburg Ashley Stock Farm | 4 | 4 | 3 |

Time—1.07, 1.09, 1.07.

On Tuesday morning the race in the 2.40 class was completed, Iris K. winning first money, Jim K. second and Rio D. third.

The baseball match between Newburgh and Yarker resulted in a victory for Newburgh by 11 runs to 4.

The Newburgh v Picton game resulted in a win for the Picton Team by 8 runs to 5.

BOYLE & SON.

County Constable Mallory sued Warden Platt of Kingston Penitentiary for \$100 reward offered for the capture of Charlbram, a prisoner. The action was dismissed.

### A Visit to London and a Little Lesson in Etiquette.

"I ran over for a short visit to London," said a globe trotter. "On the boat was a pretty widow from Altona who disgusted and amused all hands one day by saying:

"I am surprised that a fast and expensive boat like this should fail to supply us with toothpicks."

"She thought toothpicks indispensable, like napkins or forks. For thinking so we set her down as a hecker. But wait.

"I dined during my visit in London at Prince's, in Piccadilly, and at the Savoy, in the room that overlooks the embankment and the river, and at the Carlton, where I paid a dollar for a plate of soup, and at all these restaurants, which are admittedly the finest and the smartest and the most fashionable in the world. At all of them there were toothpicks on the table, each toothpick done up in a sterilized envelope.

"This taught me a lesson. It taught me that it is narrow and provincial to despise people for their disregard of certain small rules of etiquette. The things we despise them for, which may be glaring errors in Seattle or New York, may be again, as like as not, the

## READY - TO - WEARS.

New York Styles.

To be on the ground floor, to visit the metropolis on business, to see the styles as they are, in that great fashionable centre, to consider and think that you are, in looking at Madill's Coats seeing the Identical Garments as shown in the 6th Avenue Stores. The leading, the most Fashionable Coats are here, come and look. Also the New Silk Waists, a choice selection in colors of Black, Cream, and White, beautifully made with Pleats, Tucks and Lace Insertion.

# MADILL BROS.

### Gettin' Wisdom

Is a comparatively easy task if you start it while you are young. Don't allow your children's eyes to be ruined for all time because "they look too 'dud' with glasses on."

We'll tell you the truth as to whether they need glasses or not, and charge you nothing for the telling.

Headaches in children are suspicious.

We are also the best people to guarantee the quality of our frames, it being part of our Jewelry business to acquire that ability and knowledge.

me that it is narrow and provincial to despise people for their disregard of certain small rules of etiquette. The things we despise them for, which may be glaring errors in Seattle or New York, may be again, as like as not, the correct thing in Paris and London."

### How Sound Waves Move.

The speed with which sound waves are transmitted through the atmosphere depends on several conditions. When the temperature is at 32 degrees F., sounds move with a speed of 1,090 feet per second, the velocity increasing with the temperature at the rate of about one foot of speed per second for each degree above the freezing point. Then, again, in damp air sound moves with a greater velocity than it does in dry air, no odds if the dry air be warm and the damp cold. In water sound moves more than four times as fast as it does in air, or, say, at about the rate of 4,700 feet per second.

### Wooden Spoons.

A curious industry in Russia and one which nevertheless finds employment for thousands of men is that of making wooden spoons. In the district of Semenovsk, where they chiefly come from, no fewer than 7,000 men make a living at the trade. The spoons are generally made from birchwood, and a skilled workman can turn out several hundred a day. No fewer than 12,000,000 spoons are manufactured during the course of the year, which are sold at 6 to 8 rubles per thousand. They find a ready market and penetrate as far as Persia, Khiva, Bokhara and Khokand.

### Husbands.

A woman who shall be nameless furnishes the following essay on husbands:

"There are three kinds of husbands—the young husbands who make us unhappy because we are so jealous of them, the middle aged husbands who break our hearts because they would rather make money or play golf than devote any attention to us and the old husbands who sicken us with their silly objections whenever we turn to look at younger men."

### Different Times.

Sarasate once found his memory deserting him at a recital, but he discovered the reason of the mishap in time to prevent a failure. A lady was fanning herself in the front row of the stalls. The violinist stopped playing. "Madam," he said, "how can I play in two-four time when you are beating six-eight?" The lady shut up her fan, and the recital was concluded successfully.

### Impudent Dog.

A dog had the audacity to bark at the deputy commissioner of Purulia, in Bengal, when he came to the house of the master of the dog on a bike. The owners of the dog were sent up for trial under section 289, and one of them, Karusha, was fined 20 rupees.—**Lahore Tribune.**

### A Stove Talk.

The stove season is nearly here again and you are beginning to plan for that new up-to-date Range and thinking of the comforts, which it will bring to you. We wish to announce to you that we find ourselves in a much better position than formerly to accommodate this growing trade. Increased floor space and light enables us to make a much larger exhibit of this class of goods. Imperial Oxford Ranges still lead, but we have several other good and up-to-date lines. Sizes and prices to suit everyone. Be sure and inspect our stock before you purchase. It will be a pleasure for us to show you the goods.

## TOWN COUNCIL.

Council Chamber  
Napanee Sept. 4th 1906.

Councilmet in regular session Mayor Lowry presiding.

Councillors present Kimmerly, Simpson, Normile, Meng, and Williams. Minutes of previous meeting were read and on motion adopted.

Communications were read from—Hydro Electric Commission re Electric power enclosing reports &c. Filed.

From the Clerk of the Town of Deseronto, thanking the town officials and fire brigade for their services on the occasion of the Deseronto fire also enclosing cheque for \$50.00. On motion the cheque was placed in the hands of the secy of the fire brigade.

From John English acting for Dr. Stratton notifying the town that unless the town take action to remove the nuisance of the sewer near his place he will take such action as he deems necessary for its removal. Laid on the table.

From the Robb Engineering Co. asking for second installment of payment of plant \$1100. Laid on the table.

From Saddler and Hayworth re Belts for Electric Light plant informing the council that their man would place the belts on the engines when the engines are ready.

On motion communication was ordered filed and that the clerk notify Saddler and Hayworth that the plant is ready for the belts.

From Robb Engineering Co advising shipment of sundry goods. Fyled.

From R. S. Kelsh asking for order on General Electric Co for some wire. Fyled.

From the G. N. W. Telegraph Co re agreements for pole rental asking an increase of twenty dollars also a second letter in reference to the same matter. Fyled.

From Packard Electric Co. Hamilton, re Electric Machinery and supplies. Fyled.

Monarch Paint Co re paint. Fyled. From R. S. Kelsch re transformers informing the Council that same would be shipped this week. Fyled.

From Harvey Warner re Culvert A. on corner John and Bridge streets. Referred to street committee.

From Inland Revenue Department re certificate of registration of Electric Light plant. Laid on table until next meeting of Council.

## PETITIONS

From W. T. Gibbard H. Fitzpatrick and others for a granolithic walk on Thomas street between Centre and Robert streets. Petition granted on usual terms.

From Clarence M. Warner for cement walk on bridge street in front of his residence. Petition Granted.

The finance Committee reported re Mr. Moore's taxes that no action be taken at present as the town did not receive the taxes more than once and asked further time to report on the matter if Mr. Wilson produces another receipt.

The street committee reported re County grant that the money must be used on the streets and not on the bridges.

Re cement walk around E. M. Church the church wish an eight foot walk on both streets of the town to pay for same. Re Dundas street crossing the committee recommend the construction of two crossings at John street crossing.

Re Canning factory sewer, the committee can do nothing further without consulting an engineer.

Mrs. Horace Denyes and children are spending this week with friends in Belleville.

Among those who are attending Toronto exhibition this week are Mr. and Mrs. J. C. Parrott and Ross, H. G. Denyes and John Hagerman and bride.

## DIAMONDS. For Every Home

Diamonds for every Canadian home are not the gems which the wealthy alone can purchase; they are those invaluable gems known as DIAMOND DYES which have been for twenty-five years true money savers for the women of Canada.

DIAMOND DYES wherever used, have proved their superiority over all other package dyes in richness, fullness and durability of colors.

Certain speculators, jealous of the popularity of DIAMOND DYES, are putting up adulterated and crude dyes to imitate the DIAMOND DYES. These common and cheaply prepared dyes produce blotchy and muddy colors and ruin good materials.

When you have dresses, skirts, blouses, jackets, capes, stockings and other articles of wearing apparel to recolor, use the DIAMOND DYES only, and you will have results which will fill your heart with joy. DIAMOND DYES make old things look like new.

Always ask your dealer for the DIAMOND DYES and refuse any other make that may be offered to you. The common dyes are sold by merchants simply for the sake of big profits. New Diamond Dye Direction Book, Diamond Dye Cook Book and Illustrated Booklet, entitled "Diamond Dye Longjohns," Winter and Summer sports sent FREE to any lady who sends her address to Wells & Richardson Co., Limited, 200 Mountain Street, Montreal.

It is sent post free in dainty satin-lined case.

**Ryrie Bros**  
LIMITED.

134-138 Yonge Street.

# KAI WANG;

## A TALE OF SOUTHERN CHINA.

### CHAPTER XXXI.—(Continued).

Avis had not uttered one word. Larry glanced up at his cousin as soon as the light appeared up on the scene.

He was baffled in his desire to see her face, since she had protected herself in some way with the folds of the garment she wore, which was a way Chinese women had of screening their faces against impertinent glances.

Larry would have given something could he have known what the thoughts of his cousin were.

Did she really suspect the truth, and that they had hoped the prisoner of the palace might prove to be Dr. Jack?

Not by a sign did she betray the fact. Still, this was only what he would have expected of Avis, whose extraordinary resolution he had on more than one occasion found cause to fervently admire.

Brave heart he thought, which would carry her through in spite of all obstacles. Surely, if ever woman deserved to be rewarded for constancy and devotion, Avis was the one.

They were advancing now. How confidently the Chinese dragon man led the way. No Egyptian courier could, by assumption, clothe himself in the solemn grandeur that was Kai Wang's by reason of heritage.

Even Lord Rackett's eyes kindled whenever they fell upon the idol-maker. He seemed to have assumed a kingly demeanor since passing under the arched doorway of the imperial palace. Vague suspicions went groping through Plympton's brain, very much as a tangled skein which he had neither the time nor the inclination to straighten out.

He had a dim idea that perhaps Kai Wang really came of a royal family. This would account for his close connection with the great viceroy, the Lung of China, as Li Hung Chang has been called.

It might also, in a measure, explain how he came to take such a decided interest in the palace of the emperors.

Out of these chaotic fancies Lord Rackett might have woven quite a little dramatic and romantic story had he been given time, since all the required elements seemed on hand.

He was not the man given to such speculation, however, being rather prosaic and looking after the ordinary things in life, quite content to leave such imagination to poets and novelists bent on winning the laurel wreath of fame or the useful shekels of commerce.

Plainly, then, Lord Rackett was quite pleased to know they were making substantial progress, and that no improvement could be asked in the way their guide led the expedition intruded.

Another thought, however, intruded itself, and this was more likely to be the truth—perhaps Kai Wang assumed this royal carriage so that he might impress any guard upon whom they chanced.

Since deposed emperors and new fledgling sovereigns were floating around so plentifully, perhaps the bewildered soldiers would be ready to fall in with any scheme to hoodwink them, especially if the candidate for honors appeared to possess all the necessary requirements.

Well, whatever scheme Kai Wang was floating, he was well adapted to carry it out, and, for one, Lord Rackett was not about to play

The rich vestments of ministers and mandarins could be seen as they mingled together, surging to and fro, impelled by the electric excitement that permeated the air.

A coup in Chinese politics does not mean the same as it might in some Western nation. When Napoleon the Third entered Paris and dramatically seized the reins of government, seating himself upon the throne, it was necessary that his course should be strewn with the bodies of those who blocked his ambition or were unfortunate enough to get in the way of his firing legions.

Not so in China; still behind the age. There, the wretched emperor, hedged about by the responsibilities of his royal office and with the enormous burden of his ancestors' glories upon his devoted shoulders, is a mere puppet, ready to dance or retire when some strong hand pulls the string.

Now it is the Dowager Empress, anon it was Li Hung Chang who did the string act.

Every dog has his day, even in China. Any indiscretion on Kai Wang's part at this critical juncture would certainly have been fatal to their hopes.

Once among the mandarins and their troops of retainers, not to speak of the imperial guard clustered in many quarters, discovery must mean immediate death.

When one walks over a powder magazine and realizes that an iron nail in the heel of a shoe may flash a spark that will hurt all around into eternity, the sensation can hardly be called a pleasant one.

Yet that fully described the feeling that assailed our friends when they found themselves knocking elbows with the crowd of exalted personages in the great central palaver chamber of the imperial palace.

Many eyes were turned on Kai Wang. Mandarins of high degree stopped talking to look keenly at this new arrival, who seemed to move upon his way with superb indifference, as though to the purple born.

They knew not what to make of it. The air was so surcharged with dazzling rumors of astounding events, that these pawns upon the chessboard, even the nights and rooks, were hardly sure of the ground they stood upon.

The master mind of a keen-witted woman swayed them all with.

Few were in her counsels, few knew what the next move might be, yet one and all believed the old state of affairs was at an end, and a new regime about to be launched.

Hence, what, at another time, might have seemed a trivial affair of small importance, now assumed a magnitude in their eyes.

Even the advent of this stranger-mandarin was enough to arouse a sudden suspicious interest, since who could say that he might not be a new prime favorite with their royal mistress, and destined to occupy some high niche of power in the coming dynasty, perhaps even the throne itself?

It suited Kai Wang to have this impression gain ground; such a fancy was apt to prove the strongest bulwark they could erect against the discovery of their true value.

Once or twice he was addressed by certain officials of the palace in the ordinary routine of their business.

Then appeared the value of snatches

thus leading such a heterogeneous procession of nondescript followers through the collected hosts.

Perhaps it was this very element that went far toward winning the round. There is nothing so successful as success, and this is best influenced by confidence and boldness.

Many an operator on 'Change has guided his craft through the worst of tempestuous financial billows, just as the trained hand and eye of the old Indian guide takes his freight of passengers through the boiling Sault Ste. Marie Rapids, by heading boldly for what appears to be the worst eddies.

And, strange to say, Kai Wang won, with a length to spare. He pressed through the central palaver hall and entered a marble passage beyond, leaving a flutter behind.

And Larry, who had been holding his breath, fearing discovery at any instant, solemnly muttered:

"That crisis is past, thank God!"  
(To be continued).

## RAIN THAT FOLLOWS BATTLES.

### Some People Put It Down to Perspiration of the Soldiers.

A most extraordinary theory has recently been propounded to explain the reason why rain usually falls after a severe battle has been fought.

The ancients used to attribute the phenomenon to the generosity of some deity who was kind enough to make the attempt to wash away the traces of man's degradation as soon as possible; and later on, when cannon came to be used as a means of destroying life, the detonations of these machines were said to cause the wonderful downpour of rain.

But more prosaic, up-to-date people of to-day put it down to perspiration. And this is how they go to prove it.

One soldier will, in the course of twelve hours' fighting, give off six gallons of water. He drinks much. Thirst for gore, glory, and water go together on such occasions, and the total amount of moisture given off by one man is said to be sufficient to cover twelve square feet three-quarters of an inch deep.

Now, of course, all this perspiration evaporates and goes up into the atmosphere. The atmosphere, becoming unduly charged with moisture, offers itself on the slightest provocation to the formation of clouds, and in nine cases out of ten rain falls immediately condensation sets in.

This idea certainly pushes the deity and gunpowder theories altogether out of the field.

## MOTHER'S ANXIETY.

The summer months are an anxious time for mothers because they are the most dangerous months of the year for young children. Stomach and bowel troubles come quickly during the hot weather and almost before the mother realizes that there is danger the little one may be beyond aid. Baby's Own Tablets will prevent summer complaints if given occasionally, because they keep the stomach and bowels free from of fending matter. And the Tablets will cure these troubles if they come suddenly. You may save your child's life by keeping a box of Baby's Own Tablets on hand to give promptly. Mrs. Frank Moore, Northfield, N. S., says: "I do not know any medicine that can equal Baby's Own Tablets for curing stomach and bowel troubles. I always keep them on hand in case of emergency." Sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

There is nothing equal to Mother Graves' Worm Exterminator for destroying worms. No article of its kind has given such satisfaction.

Dibbs (facetiously): "This is a picture of my wife's first husband." Dobbs: "Great snakes! What a brainless-looking fellow!"

## OLD SORES

of many years' standing have been readily cured by  
It gets promptly, painlessly and thoroughly. It is a very reliable cure for Icy Poisoning, Blisters, Ulcers, and all sores difficult to heal. If your dealer has not got it, it will be sent express prepaid for 35c small size, and 50c large size. Name your nearest express office and R.O.

Mission Ointment & Chemical Co.,  
Toronto, Canada.

## Mission Ointment

## CANADIAN PACIFIC IRRIGATED FARMS IN SUNNY ALBERTA

(Calgary District)

Ready for the plough.  
Convenient to Railway and Post Office, Market and Schools.  
Climate the finest in Canada. Cattle graze all winter, and fatten on prairie hay.

Soil the richest in the Northwest. Will grow, without irrigation, Winter Wheat, Oats, Barley, Sugar Beets, Alfalfa, and almost anything that grows in other parts of Canada.

With irrigation a crop never fails. If the best Ontario farms could be irrigated, they would double their present average yield, and could be cropped ten years longer without running out.

They are cheaper now than they will ever be.

The first crop should pay for the land and increase its value four-fold. Special Reduced Railway Rates. Write for illustrated folder.

# A DEFINITION.

"Do you think that if woman is 'the weaker vessel' you might call an old maid a derelict?"

"Why? Because she's deserted?"

"Well, no—because she isn't married!"

# AN UNFAVORABLE REPLY.

"Is he to be trusted?"

"What with?"

"Anything of value?"

"Nailed down?"

"No."

"Then he isn't."

# PLEASANT MOMENTS.

It has been said with a great deal of truth that you can never become really acquainted with a man until you have supped with him, and in order to ensure a pleasant time good tea must be used. During the past sixteen years "SALADA" has become a familiar word to every newspaper reader, and the fact that the demand is steadily increasing requires no comment; it tells its own story. "SALADA" is king. The delicious flavor of "SALADA" Tea is due largely to the care used in the cultivation and preparation, and to the fact that it is packed in sealed lead packages which prevent its coming in contact with articles that would affect its flavor.

Mr. Mulligan: "An' what did his boss say to you this morning?" Mrs. Mulligan: "An' you and your husband 's'posed to offer without lightin'?" Mrs. Mulligan: "An' what did yer say?" Mr. Mulligan: "No, yer 'omner, not happen."

Time Has Tested It.—Time tests all things, and that which is worthy lives; that which is unworthy to man's welfare perishes. Time has proved Dr. Thomas' Electric Oil. From a few thousand bottles in the early days of its manufacture the demand has risen so that now the production is running into the hundreds of thousands of bottles. What is so eagerly sought for must be good.

# HOPE YET.

"I declare," exclaimed a talkative youth in a smoking room one day, "I believe I have forgotten all I ever knew!"

"Sorry to hear it," growled a ferocious old individual. "However, you can put in an hour some day learning it all over again."

They are a Powerful Nerveine.—Dyspepsia causes derangement of the nervous system, and nervous debility once engendered is difficult to deal with. There are many testimonials as to the efficacy of Parmedee's Vegetable Pills in treating this disorder, showing that they never fail to produce good results, by giving proper tone to the digestive organs, they restore equilibrium to the nerve centres.

in with any scheme to hand-knock them, especially if the candidate for honors appeared to possess all the necessary requirements.

Well, whatever scheme Kai Wang was floating, he was well adapted to carry it out, and, for one, Lord Rackett trumped in his rear, content to play second fiddle in Chinese diplomacy.

# CHAPTER XXXII.

Had there been a secret way of reaching the dungeons of the palace from the rear, their task would have been rendered far less difficult, and the dangerous element in it would have also shrunk considerably.

Unfortunately, this could not be done, the building being so arranged that the passages from four sides, facing the cardinal points of the compass, came together in the centre.

That was where danger lay.

Under ordinary conditions the palace might have been fairly quiet at this hour, and a few moving figures more or less would not have attracted much attention. Since mandarins and princes, with their suits, had the privilege of passing to and fro; and, besides, some of the counselors were apt to come early for the usual meeting at dawn, in conformity with the usages of Chinese law.

Yes, a dozen things might have happened, each one of which would have been of considerable profit to them; but it was impossible to have matters always regulated to bring about the best results, and the wise man is he who suits his sails to the prevailing breeze.

That Kai Wang meant to do.

The critical moment drew near.

They were approaching the central zone, where more or less confusion might be expected.

Kai Wang knew just when a change was required in their plans, and none of them were at all surprised to see him deliberately blow out the light that had thus far been a faithful guide to keep their feet from stumbling.

It was not needed just now.

He handed the antediluvian lantern to Larry, who accepted it without a murmur of reproach, being quite willing to serve in the capacity of linkboy or in any other department that would advance the cause for which they were enlisted.

Besides, Larry, being quick witted, was able to reach conclusions at a bound.

It Kai Wang was to play the part of a mandarin, to whom they served as his following, or suite, it would hardly be the proper thing for him to be seen performing such a menial office; slaves and henchmen are too cheap in the dominion to allow a ruler, however petty, to soil his hands with such labor.

A murmur of voices had also increased in volume, proving that the imperial palace was somewhat in the line of a disturbed beehive just at present, armed retainers occupying the halls, possibly with a view to having an influence over the next meeting of the cabinet, when the succession of a new prince must be placed upon the carpet.

Larry felt Avis tremble a little as she pressed against him—at least he fancied such was the case, and hastened to reassure her.

"Courage, dear cousin. Trust all to him, and we will win," he said in her ear.

"I fear nothing under Heaven," came the steady reply that thrilled him, so bravely was it spoken.

At least, there was no need of any further encouragement in that quarter.

The scene was now opened before them.

It was well worthy of an extended observation, and had the conditions been more favorable, Lord Rackett, for one, would have been glad to have satisfied his curiosity at full length.

As it was, he had to be content with a sweeping view of the panorama, into the midst of which his little party was directly bound.

pressure gain ground; such a rancy was apt to prove the strongest bulwark they could erect against the discovery of their true value.

Once or twice he was addressed by certain officials of the palace in the ordinary routine of their business.

Then appeared the value of speech. The old maxim could not apply in such a case, for it was the string of valiant words which Kai Wang felt fall that constituted a golden shaver.

On each occasion he seemed to meet with abundant success, since the deep salams of the obsequious officials, whose heads were evidently not any too securely fastened upon their bodies, betokened satisfaction and humble recognition of authority.

Little Larry was dumfounded by the brilliant success of his leader.

It may be remembered that Larry had himself a certain amount of experience as a mandarin wearing the yellow jacket; but, great as had been the glory attached to his ride through the streets of old Canton in a jinkelshaw, it could not hold a candle to the dash bold Kai Wang made in the halls of legislative and imperial China.

His admiration for the genius of the wonderful friend of Dr. Jack grew apace. It leaped upward in bounds, and, with his usual fertile imagination, Larry could see Kai Wang, in the near future—when the old empress had lost her grip to sagacious Li Hung Chang—seated upon the throne, ruler of the realm.

When second sober thought got in its work, however, he remembered that there was many a slip 'twixt the cup and the lip, and just at present his friend's tenure of life hung upon a pretty small thread.

In case a particularly bold deed is under advisement there is nothing so good as knowing the ropes thoroughly, and Larry could see that their wide-awake courier had accomplished this to the Queen's taste.

He had not paid numerous secret visits to the prisoner Emperor in the palace without great advantage to himself, believing that the time was bound to come, sooner or later, when this information might prove of almost priceless value.

That hour was at hand.

Lord Rackett played his part as well as the conditions allowed, although he was somewhat anxious, lest even the wonderful paint which had been used to disguise his florid complexion failed to entirely conceal the same.

But those who looked at all, gazed upon the striking form of the leader. It mattered not what manner of ruffian made up his following, for in Peking are to be seen some of the most remarkable specimens of Tartars and Mongolians on the face of the earth—people who seem a cross between the lower class of Chinese and the Russian serfs of the far-off Siberian steppes. Any old thing goes in this cosmopolitan capital of the North, where the nations of the earth seem to gather for the great football game that is to presently take place, poor China being the pigskin in question over which the desperate tussle must occur.

Yet when Lord Rackett came to think over the matter later on, he was amazed at the very audacity of Kai Wang in

Graves' Worm Exterminator for destroying worms. No article of its kind has given such satisfaction.

Dibbs (facetiously): "This is a picture of my wife's first husband." Dobbs: "Great snakes! What a brainless-looking idiot! But I didn't know your wife was married before she met you?" Dibbs: "She wasn't. This is a picture of myself at the age of twenty."

Physical Pain and mental anguish afflict the victims of skin diseases. Get rid of both by rubbing Wewer's Carate on the heated, itching, disfigured face. The relief given is among the wonders of medicine.

The following doubtful compliment is a fragment from a love-letter:—"How I wish, my darling Adelaide, my engagements would permit me to leave town and come and see you! It would be like visiting some old ruin, hallowed by time and fraught with a thousand recollections."

A Cure for Rheumatism.—The intrusion of uric acid into the blood vessels is a fruitful cause of rheumatic pains. This irregularity, is owing to a deranged and unhealthy condition of the liver. Anyone subject to this painful affection will find a remedy in Parmedee's Vegetable Pills. Their action upon the kidneys is pronounced and most beneficial and by restoring healthy action, they correct impurities in the blood.

"Papa," said the darling daughter of the household, "how did you propose marriage to mamma?" "Don't ask me," answered the old man. "I can't remember a thing about it. Go and ask your mother. She managed the whole affair."

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way. Buy Sunlight Soap and follow directions.

Office Boy—"There's a gentleman here with a bill." The Old Man—"Tell him to call again." "With a bill you got again him, that he wants to pay." "Ah! Show the gentleman in."

Holloway's Corn Cure is the medicine to remove all kinds of corns and warts, and only costs the small sum of twenty-five cents.

Smith: "Do you think that seeing is believing?" Mrs. Smith: "No, I see some people every day I could never believe."

If you are out of sorts get a bottle of 'Ferrovin' the best tonic, and you will be surprised how quickly that tired feeling will wear off. \$1.00 bottles. All dealers in medicine.

"Dear friends," began a speaker at a meeting the other night. "I call you 'dear friends'; I won't call you ladies and gentlemen because, you see, I know you all so well."

Cucumbers and melons are "forbidden fruit" to many persons so constituted that the least indulgence is followed by attacks of cholera, dysentery, griping, etc. These persons are not aware that they can indulge to their heart's content if they have on hand a bottle of Dr. J. D. Kellogg's Dysentery Cordial, a medicine that will give immediate relief, and is a sure cure for all summer complaints.

# ROOM FOR IMPROVEMENT.

Old Gent—"Pon my word, madam, I should hardly have known you, you have altered so much."

Lady (archly)—"For the better or for the worse?"

Old Gent—"Ah, madam, you could only change for the better."

# A SMALL BOY'S TEARS.

"What are you crying for, my poor little boy?"

"Boohoo! Pa fell downstairs."

"Don't take on so, my pet. He'll get better soon."

"Sister saw him fall all the way. I never saw nuffin! Boohoo!"

## WHY J. BULL CAN GROW

HE STILL CONTINUES ON TOP 'SPITE OF CROAKERS.

Americans and Germans Have Failed to Injure Great Britain's Trade.

Two or three years ago we had among us a number of prophets who painted the gloomiest pictures of England's immediate future. Germany was to take a great slice of our foreign and colonial trade, America the remainder. Even here at home our manufacturers would be driven to the wall by the pushing foreign competitor, and as for the British farmer, what with eggs from Russia, beef from Argentina, mutton from Australia, butter from Scandinavia, and so on, he must inevitably disappear from the land, says London Answers.

Very many thoughtful people grew despondent, and the impression prevailed widely that we had really passed our zenith as a great nation and were on the decline.

But this was not all. Russia would be sure to seize India, a combination of foreign Powers might overwhelm us, our Army was worth little as a fighting machine, and even our Navy was viewed with doubt.

This was the stage of things a few years ago. What a marvellous change has come over our outlook upon the future! There is scarcely a man in the country who now doubts that Britain is still in her prime in industry, commerce and warlike power.

### AMERICANS OUTWITTED.

We were never before held in such respect by foreign peoples. And it is no empty boast to say that England, at the present moment, is the first nation of the world and exercises the greatest influence in world-politics.

This great change has been effected very quietly, and in a way which ought to fill every Englishman with confidence in the destiny of his country.

It is six or eight years since the capitalists of the United States determined on a commercial invasion of Great Britain. We all remember what they thought of us—that we were quite a stupid people, without energy, fifty years behind the times. They were going to exploit England as they would China or the Philippines. What an unpleasant surprise those American capitalists must have received.

First they flooded us with bicycles, and our "dull" bicycle manufacturers bucked up and made better bicycles. The Americans went home with an altered opinion of John Bull. Then it was boots. The country was going to be stocked with American machine-made boots at a price that would drive our manufacturers into bankruptcy. We don't hear anything of the boots now. Next our entire tobacco trade was to be captured by an American trust. It was a vast enterprise to embark upon, and we must have appeared very simple folk to those who undertook it. This was even a greater failure than the boots, and the American tobaccoists must have burned their fingers badly.

### BRITAIN HOLDS HER OWN.

There were many smaller American designs on our domestic commerce, while India and the Colonies were to be supplied with purely "American" railway-engines, rails, bridges, and all kinds of machinery. That bubble has also been burst.

In every competition with our manufacturers and business men the Americans were worsted. The struggle was always a short one. We proved our overwhelming superiority.

This is a fact worth dwelling upon. We have before us, even in our generation, a desperate fight with foreign nations in commerce and industry. And it is well to understand our real

position. When we come to put forth our whole reserve of energy, and make full use of education and science, both Germany and the United States will find themselves very far in the rear.

As in commerce, so in diplomacy, India is no longer in danger. Instead of being isolated, we find foreign nations competing for our friendship. The rumor that, in a certain eventuality, we could land one hundred thousand men on the continent has inspired great respect for our Army. And it is universally acknowledged that the new disposition of our Navy has made us mistress of the seas against all the world. In a few short months the nation was raised to this high pinnacle, proving that in warlike efficiency, as well as in commerce and industry, Englishmen have only to draw upon their reserve of energy in order to take the lead of all nations.

John Bull on his mettle is undoubtedly "one of the best."

## WORLD'S FAMILY WASH

THE PROFESSION OF THE LAUN DRESS IN MANY LANDS.

Some Clean Their Clothes With a Clam Shell and Some With Oranges.

There are happy lands, far, far away, where Mondays come without the smell of soap and Tuesdays pass without the thud of sadirons in the padded boards. The ethnological authorities have not yet monographed the topic, a strange omission when one looks over the list of the things which they have found worthy of treatises. Sociology might well investigate the conditioning influence of fixed washdays upon the development of civilization.

The most conspicuous instance of unwashed clothes is in Greenland, up among the icy mountains and where-else Esquimaux most do congregate. Clad in furs and in waterproof garments made from the insides of the whale, the walrus and the seal, there is no recognized need for soap and tube, since neither linen nor starch yet exists for such cold storage humanity. Sometimes a finicky streak develops in some one of the huskies; he may want to imitate the Southern explorers in trying to be clean. Such a one takes a clam shell and scrapes off the inside of his garments, but the elders of his tribe, set in the ways of the fathers, hang around to see him catch his death of cold as a just payment for introducing innovations. When things get too rank for even boreal taste the duds can always be set adrift on an iceberg and the responsibility floated away to the Gulf Stream.

### A RECKLESS WASTE,

one that the citizens of the North Pole rarely commit.

Another tribe whose clothes are never washed are the dirty people of the roof of the world in Asia, in Tibet, where the mahatmas astral themselves into celestial district messengers for the theosophists who want to do stunts. It's wool they wear up in those high lands—wool of the yak and camel's hair. Even the yellow lama himself never changes the clothes which robe his essence of divinity. The longer they are worn, the more permeated with grease, the more charged with common dirt and fragments of explorers, the better the Tibetans like their clothes.

The nomad Kirguiz of the Siberian deserts to the north of the Pamirs have the instinct to be clean, even though water is with them far too precious to put on their clothing. Clad likewise in wool they have developed to a high degree the art of the fuller. Wherever the Tartars have made a camp one of the first things they have marked out is a fulling yard where every rag is cleaned.

NOTHING More Safe and Sure

Than an Investment in

Toronto Real Estate

overwhelming superiority.  
This is a fact worth dwelling upon. We have before us, even in our generation, a desperate fight with foreign nations in commerce and industry. And it is well to understand our real strength.

Our real strength is immense. That is proved by the fact that each fraction of our commercial and industrial population was able to take care of itself. Other countries, if they were menaced as we were, would make their defence a national affair. The Governments would intervene and put on import duties high enough to repel the attack. Englishmen never thought such measures necessary. Our bootmakers merely shook themselves up and defeated the American bootmakers, our tobacco manufacturers relied entirely upon themselves, as did our bicycle makers and other sections of the community. There could be no surer proof of our national efficiency. Where every man is able to take care of himself, the nation made up of such men is invincible.

Man for man we have proved ourselves superior to the Americans, and in the cases cited this was done without calling out the whole reserve of energy. The Americans, on the other hand, put forth all their energy. They do it always, we very seldom. In truth, Englishmen are inclined to laziness as long as things run smoothly. To bring out the best that is in them a sufficient obstacle is needed to be overcome.

Are we on the decline? Foreign journals are telling us we are. They say we must yield now to younger and more energetic nations. In view of what has happened, we can afford to smile at their predictions. We are only waiting for the obstacle to be overcome.

#### GERMANY'S HOPELESS TASK.

It is not America only which has tried conclusions with us. Germany has organized her commerce with a view, and the confident hope, of gradually driving us out of the world's markets. She relies on the greater use of science, the better technical education of her workmen, and her more methodical system of industry and commerce. She has commercial travellers all over the globe, gives her manufacturers Government assistance, and for a quarter of a century has been straining every nerve to outdo us in commerce. No doubt Germany has made great strides; but, instead of decreasing, our foreign trade is expanding by leaps and bounds. And this without any extra effort on our part!

Now Germany cannot do very much more than she is, doing to further her commerce. We are only beginning to wake up. Presently we will make use of technical education, impress science in the service of our manufacturers, send travellers with a better knowledge of foreign tongues, make out our price lists in the languages, weights, and measures of our customer-countries. Where will Germany be then?

#### JOHN BULL SCORING EVERYWHERE

Americans are putting forth all their energy and have no reserve. We have more energy in reserve than in use. Germans avail themselves of every help to be obtained from education, science, and system. They can make little further advance. We still rely to a great extent on the rule-of-thumb methods, and are, nevertheless, the equals at least of the

water with them far too precious to put on their clothing. Clad likewise in wool they have developed to a high degree the art of the fuller. Wherever the Tartars have made a camp one of the first things they have marked out is a fulling yard where every rag is cleaned. It is not laundry work—it is chemistry of a rude and simple sort, but it does turn out clean clothes. That is something to the credit of a horde of shabby wandering marauders.

Fulling is a rare art under present domestic conditions in this country. Everything goes into the wash and much comes out sadly reduced in all necessary dimensions. In the older communities of central and eastern Europe the fuller fills a recognized need

#### IN EVERY TINY HAMLET.

In Germany, in Austria and in Russia every little village has its fulling yard, just as is the case with the nomads of the Asian steppes. To the fuller are sent all woollens and flannel goods. Over washing for such fabrics fulling has the advantage that an undershirt when cleansed is the same size as before it underwent the operation, and it is not necessary to pass it on to a junior and smaller member of the family every time it is done up.

In these old-fashioned communities of the old world the laundry is no weekly diversion. Once a year, or at most twice, it is performed. Under such conditions to get up the family wash becomes an institution, a function to be celebrated upon completion by a feast with wine and the noise of pipe and tabor and dulcimer and all sweet sounds. This means much linen in store, enough for a year at least. For this good mothers begin when their girls are scarcely able to sit a chair to set them at running seams in sheets and napery so that years hence they may start their own homes with a plentiful supply of household gear.

No young man prudent as to the future would marry a girl who could not bring him such a dowry as would fill the linen press in the house he has built for her. Thus it is that the annual feast of the wash is the great season of weddings. A life of simplicity so Arcadian that department stores have not entered the field. In White Russia the laundry feast is the crowning celebration of the year, a feast that follows close on Easter, a round of glad days when all the single men get married and all the married men get blissfully drunk.

Long before men had learned to boil fat and ashes the ancient Egyptian had his clothes washed.

#### ALONG THE STORMED NILE.

Clothes are still washed and washed clean, in many lands to which the cake of soap has not been carried. All over the country, by the banks of streams and along the roadside, grows the Bouncing Bet, an excellent soap from spring to autumn. The leaves, stems and roots rubbed together in water will make thick suds that make washing light; the dirt fairly drops from fabrics and grease is dissolved without leaving a stain. There is but one precaution to observe, namely, to peel the rind from the root, for otherwise the linen will be darkened and need bleaching. The same plant is equally common in Europe.

The jaborera of Spain is also a wayside plant which may be used in the same way, with the further advantage that it is not necessary to peel the root. This is so fine a cleansing material that all over the Iberian peninsula it remains in family use, for it is superior to any soap in laundering dainty fabrics of mantilla and reboso. An allied plant grows abundantly along the Nile, where it is still more commonly employed than soap. It is with this gentle detergent that the linen of the Pharaohs in their starched majesty was done up long before culture had begun to develop in a dark world of barbarism.

If it were not for similar saponaceous plants the flowing robes of India would present a shabby spectacle, for millions of Hindus are prevented by religion from

#### THE USE OF ANIMAL FATS.

In regions of the torrid zone where nature has omitted these soapworts and soaproots nature is considerate enough to supply another substitute in citrus fruit. This is commonly known as the soap orange. It is so close to the grapefruit that the two are interchangeable. The grapefruit will wash clothes and the soap orange will serve for breakfast. Cut across the middle it is rubbed on the garment until all the juice is squeezed out. Then the linen is to be washed in water and comes out as white and clean as though some favorite brand of laundry soap had been.

For starch there has been no need to find a substitute, since it is always to be found where vegetables grow. In South America and in Africa laundry starch is derivable from the sago or other of the common palms. In the East Indies the stiffening and the gloss upon fine linen are achieved through the use of arrowroot. It would be perfectly satisfactory if it were not that it seems very toothsome and attractive to insects, and no gentleman can feel that he is making his best impression when he discovers a finger long cockroach dining off his shirt bosom.

The tub is merely a refinement of enervating luxury. Clothes were washed before coopers learned their trade, and tubless laundering goes on to-day the world around. In Mexico one may see in every stream the lavanderas plying their art. The river is the best tub of all, for the water is always running. The clothes are soaped and spread upon a flat rock; then beaten with

#### A SHORT WOODEN PADDLE.

It is effective, and the laundress need have no fear of slopping the water and getting her feet wet, for she goes into the river with her wash. The traveller inclines to treat the Mexican lavandera with respect when he sees how effectively she can wield a club upon the family linen.

The account would not be complete without mention of the lavender, the laundry plant, as its name shows. Clothes may be cleaned without it, its part comes later; comes last of all. It

is when the spotless linen comes off the bleaching lawn, with the aroma of sweet clover on it, with the freshness of the whitening sun, that the lavender is laid within its folds as it is put away for needs yet to arise. It may be a petty art of housewifery, but it is not without its charm when the linen press is opened to sniff the whim of good old country lavender.

#### THE PROFESSOR.

"That spendthrift nephew of mine," said the doctor, "is so good for nothing that sometimes I am tempted to operate on his skull with an auger to see if I can find out what is the matter with him."  
"Don't do that," advised the professor. "Use a silver instrument on him. Cut him off with a shilling."

# RUSSIA'S SECRET POLICE

## Large Number of Foreign Detectives Will Be Engaged.

### BAD STATE OF AFFAIRS.

A despatch from St. Petersburg says: Official statistics of the terrorism of last week show that 101 officials, gendarmes, police, etc., were killed, 92 were wounded, 291 private persons were killed or wounded, 34 spirit shops were plundered, private and individual institutions were robbed of \$180,815, and State institutions of \$84,981. There were over one hundred and fifty armed attempts to rob banks, houses, etc.

A despatch from Odessa says: Wholesale arrests of political suspects continue. Violent revolutionary leaflets have been placed in circulation, and the public is apprehensive of grave events. A thousand men were added to the police force on Wednesday.

### GRADUAL REFORMS.

A despatch from St. Petersburg to the London Tribune says the Cabinet has decided to pursue the same course of gradual reforms as heretofore. The Ministry of the Interior is working feverishly for the reorganization of the secret police. The Minister intends to call to its aid at large salaries a large number of experienced foreign detectives.

A circular has been sent to all the provincial Governors directing them to inform the peasants that petitions for the reassembling of the former Duma cannot be granted, as the idea is opposed to the fundamental laws of the empire.

### CZAR'S PERSONAL APPEAL.

The St. Petersburg correspondent of The London Express telegraphs: "I have just seen a copy of a remarkable personal appeal from the Czar which was issued on Wednesday by the Ministry of the Interior. It is addressed to all officials of the empire, including civil and military Governors and chiefs of police, and enjoins on them the necessity of standing by the Government at this crucial moment. The appeal in brief makes no attempt to minimize the critical condition of affairs. It asks all loyal officials to remain at their posts even at the risk of their lives, to show no sympathy with those who by their wanton disobedience of the laws disregard the measures we have taken for their welfare, have forfeited all claims to our clemency and are unworthy to be termed citizens of our empire."

### KING EDWARD'S SYMPATHY.

King Edward has sent the following telegram to the widow of Gen. Min, who was assassinated by a young woman in the park of Peterhof Palace: "I am dismayed at the terrible occurrence.

I pray you, madam, to accept my sincere condolences."

Over 1,800,000 dessiatins, forming the crown lands, which consist of 8,000,000 dessiatins, are to be sold under imperial ukase of Aug. 25 to peasants through the Peasants' Agrarian Bank.

It is stated that Gen. Orloff, the commander of the repressive expedition to the Baltic provinces, is to succeed Gen. Skalon as Governor-General of Warsaw.

Bomb outrages and discoveries of bombs continue to be reported throughout the country.

Despatches from the Baltic provinces of Georgia show that the terrorists have set up their own government in opposition to the legal authorities.

The leaders of a local Socialist revolutionary group have been arrested at Warsaw. The society of which they are members has considerable funds and supported its own carpentry, bakery and locksmith workshops.

Gov. Skallon, of Warsaw, who recently was injured by a bomb thrown by a woman, is about to be replaced by Gen. Oreleff, who suppressed the revolt in the Baltic provinces.

The Governments of Germany, Austria, France, Great Britain, the United States, Italy, Belgium, and Japan have conveyed to Premier Stolypin their congratulations upon his escape from the assassin's bomb and an expression of their indignation at the outrage.

Gen. Trepoff is suffering from an illness that precludes him from taking any part in political affairs for the present.

The Town of Mordovo has been destroyed by fire and 200 of the inhabitants are homeless.

### MUTINEERS WERE SHOT.

A despatch to a London news agency from Helsingfors, Finland, announced that nineteen soldiers found guilty of participation in the recent mutiny at Sveaborg fortress, were shot there on Friday; that three civilians convicted of incitement to mutiny were hanged, and that others were sentenced to prison for terms varying from five to fifteen years.

### BOMB THROWN AT WEDDING.

A despatch from Ustka says: A bomb was thrown at a wedding procession here on Friday, killing or wounding sixteen persons, the perpetrator of the outrage being among those killed.

### ACTS OF TERRORISM PREDICTED.

A despatch from St. Petersburg says: The woman who assassinated General Min has warned her jailors that St. Petersburg is on the eve of a series of acts of terrorism.

# THE WORLD'S MARKETS

### Prices of Cattle, Grain, Cheese and Other Dairy Produce at Home and Abroad.

Toronto, Sept. 4.—Flour—New Ontario wheat, 90 per cent. patents are quoted

grades, 22½ to 23c. Cheese—Ontario, 12½ to 13c; Quebec, 12½ to 12c.

### UNITED STATES MARKETS.

Milwaukee, Sept. 4.—Wheat—No. 1 Northern, 77 to 80c; No. 2 Northern, 75 to 77c; Dec., 74 to 74½c bid. Rye—No. 1, 59½c. Barley—No. 2, 55 to 56c; sample, 38 to 54c. Corn—No. 3, cash, 49½ to 50c; Sept., 48½c bid.

Minneapolis, Sept. 4.—Wheat—Sept., 71½c; Dec., 73½c; May, 77½c; No. 1 hard, 77c; No. 1 Northern, 76c; No. 2 Northern, 74c; No. 3 Northern, 72 to 73c. Flour—First patents, \$4 to \$4.10; second patents, \$3.85 to \$3.95; first

### \$90,000,000 FROM CROPS ALONE.

#### The Amount Western Farmers Expect to Receive.

A despatch from Winnipeg says: It is estimated that the farmers of the Canadian North-West will receive \$90,000,000 this year from their crops alone, wheat, oats, and barley. It is figured this way: Wheat, 91,813,900 bushels, at 68 cents, \$62,433,452; oats, 80,854,680 bushels, at 28 cents, \$22,639,310; barley, 17,735,790 bushels, at 30 cents, \$5,320,370. Total, \$90,393,132. When to this amount is added the return from live stock, dairy produce, vegetables, etc., it is safe to say that the total will pass \$100,000,000. This is an enormous sum of money to do business with among a comparatively small population.

The crop estimates used were those compiled by John Aird, of the Canadian Bank of Commerce. He figures the three provinces will produce 91,813,900 bushels of wheat this season.

Figures issued by Chief Grain Inspector David Horn on Friday show that during the crop year ending Aug. 31, 1906, a total of 65,850,000 bushels of wheat was inspected, compared with 39,000,000 the previous year, which is the highest total in the history of Western Canada, the previous record being in the crop year ending Aug. 31, 1902, when 53,700,000 bushels were inspected. Of last year's inspections, 80 per cent. was of contract grade. Other grains inspected were: Oats, 6,921,000, and barley, 1,400,000 bushels.

### SHORTAGE OF TEACHERS.

#### Government Adopts Amendment to Remedy the Situation.

A Toronto despatch says: In view of the scarcity of public school teachers, and the probability that it will become still greater during the first session of the new Normal School system, which will go into operation in September, 1907, the Education Department has authorized the following modifications of the existing regulations in regard to Model schools and the Public school teachers' certificates:—

A county Board of Examiners may admit to the Model school (1) candidates holding junior teachers' certificates who will be 18 years of age on or before the re-opening of the rural Public schools for the second half of 1907, and (2) candidates who will be 18 years of age on or before Sept. 1, 1906, and who have failed at the junior teachers' examination, but whose marks warrant the county board in presuming that, after further study, they will be able to pass the junior teachers' examination of 1907.

The professional certificates shall not be issued in either of the above cases until the candidates comply with the present legal requirements as to age and non-professional standing.

### SIX LOSE LIVES IN WRECK.

#### A Vessel Goes to Pieces North of Selkirk, Manitoba.

A despatch from Winnipeg says: Six people perished when the steamer Princess, owned by Capt. William Robinson, of Selkirk, and plying on Lake Winnipeg, went to pieces early on Sunday morning near Swampy Island, 150 miles north of Selkirk. The drowned are: Flora McDonald, stewardess; Joba Johnson, stewardess; Loftus Goodman, passenger, all of Selkirk, Man.; Charlie Greyeyes, St. Peters, Man.; deckhand; Joe Johannson, passenger, Poplar Point.

The Princess, which was south bound from Poplar Point to Selkirk with a cargo of fish, encountered one of the worst storms in the history of the lake, and about three o'clock Sunday morning began to leak. The water gained so

# WINTER WHEAT TESTING

## RESULTS OF EXPERIMENTS WITH AUTUMN SOWN CROPS.

Conducted at the Ontario Agricultural College and Throughout the Province.

Owing to the deficient snowfall and the alternate freezing and thawing of the ground during the past winter, most of the autumn sown crops in the province suffered considerably. As a consequence, some of the fall wheat was ploughed under in the spring, and many of the fields which were left yielded rather uneven crops. Quite a number of the co-operative experimenters reported a total failure with winter vetches and winter wheat, and in several cases even the rye was somewhat injured. At the college, both wheat and rye came through the winter well, but the subsequent growth of the wheat was not as good as might have been expected, and on the whole, the yields were somewhat lower than those of last year.

### 1.—EXPERIMENTS AT THE COLLEGE.

About two hundred and fifty varieties of winter wheat have been tested at the college within the last seventeen years. In all cases the varieties are given a thorough test for five years, at the end of which time the inferior kinds are discarded and only the more promising ones retained for further experiments. During the past season sixty-one varieties were grown; twenty-nine of these have been under test for the past five years, and fifteen of the twenty-nine for the past ten years.

The following table gives the average weight per measured bushel and the average yield of straw and grain of each variety for ten years.

| VARIETY.              | Color of Grain |
|-----------------------|----------------|
| Dawson's Golden Chaff | White          |
| Imperial Amber        | Red            |
| Early Genesee Giant   | White          |
| Russian Amber         | Red            |
| Egyptian Amber        | Red            |
| Early Red Clawson     | Red            |
| Tasmania Red          | Red            |
| Rudy                  | Red            |
| Tuscan Island         | Red            |
| Geneva                | Red            |
| Bulgarian             | White          |
| Turkey Red            | Red            |
| Kentucky Giant        | Red            |
| McPherson             | Red            |
| Treadwell             | White          |

Among the sixty-one varieties grown this season, the Abundance stood first in yield with 50.4 bushels per acre, and the Prize Taker second with 50.2 bushels. These are both white wheats, very closely resembling the Dawson's Golden Chaff in all respects. The Abundance also gave the highest yield among all the varieties grown in 1905 and is a promising variety, although not of the very best milling quality. It is interesting to note that this year two of the comparatively hard red wheats—Russian Amber and Imperial Amber—have come up to second and third places in yield of grain with 49.8 and 49.4 bushels per acre respectively. All four varieties mentioned above were over the standard in weight, the Imperial Amber being the heaviest and weighing almost 63 lbs. per bushel. The five varieties giving the heaviest weight per measured bushel in 1906 were Northwestern, Geneva, McPherson, Economy, and Auburn; these, however, were all rather low in yield with the exception of Auburn which was fifth in weight per measured bushel and sixth in yield of grain per acre among the sixty-one

Toronto, Sept. 4.—Flour—New Ontario wheat, 90 per cent. patents are quoted at \$2.75 to \$2.80 in buyers' sacks outside for export. Manitoba first patents, \$4.40 to \$4.60; second patents, \$4 to \$4.10, and strong bakers', \$3.90 to \$4. Toronto.

Bran—The market is firmer at \$14.50 to \$15 in bulk outside. Shorts are quoted at \$18 to \$18.50 outside.

Wheat—New No. 2 Ontario wheat quoted at 69c for white, and 70c for red outside. No. 1 Northern Manitoba quoted at 82c, lake ports, and No. 2 Northern at 79½c, lake ports.

Corn—No. 2 American corn is quoted at 59 to 59½c, to arrive, Toronto.

Oats—Old No. 2 white nominal at 36 to 37c on track here, and at 33 to 34c outside. New No. 2 white quoted outside at 30 to 30½c, September delivery.

Rye—No. 2 quoted at 58 to 59c outside.

Barley—No. 2 quoted outside at 47 to 48c, and No. 3 extra at 45c.

#### COUNTRY PRODUCE.

Beans—Hand-picked selling at \$1.75 to \$1.80 and primes at \$1.60 to \$1.70.

Honey—Strained honey quoted at 9½ to 10c per lb. and combs at \$2 per dozen. Hops—13 to 16c per lb.

Hay—Car lots of No. 1 old timothy are quoted at \$10.50 on track, Toronto, and No. 1 new at 89.

Straw—\$5.50 to \$6 per ton.

Potatoes—New potatoes are quoted at 60 to 70c per bushel in quantities.

Poultry—Turkeys, fresh killed, 12 to 14c; chickens, 10 to 12c per lb. alive; hens, 8 to 9c per lb. alive; ducks, alive, 10 to 11c per lb.

#### THE DAIRY MARKETS.

Butter—Pound rolls are quoted at 19 to 20c; tubs 17 to 18c. Creamery prints sell at 24 to 25c, and solids at 22 to 23c.

Eggs—Good candied stock, 16 to 18c per dozen.

Cheese—Quoted at 14½ to 15½c, the latter for twins.

#### HOG PRODUCTS.

Dressed hogs in car lots are nominal. Bacon, long clear, 12½c per lb in case lots; mess pork, \$21.50 to \$22; short cut, \$24 to \$24.50.

Hams—Light to medium, 16c; do. heavy, 15c; rolls, 12½c; shoulders, 11½ to 12c; backs, 17½ to 18c; breakfast bacon, 15 to 16c.

Lard—The market is quiet, and prices are unchanged. We quote: Tierces, 11½c; tubs, 11½c; pails, 12c.

#### BUSINESS AT MONTREAL.

Montreal, Sept. 4. — Grain—The local grain situation shows little change. There is a fair demand for oats for local consumption, and prices continue firm, with sales of car lots of No. 2 white at 38c; No. 3 at 37c; and No. 4 at 36c per bushel ex store. Flour—The Flour Market continues quiet and unchanged. Manitoba Spring wheat, \$4.40 to \$4.50; strong bakers', \$3.90 to \$4; winter wheat patents, \$4.25 to \$4.30; straight rollers, \$3.85 to \$4; do. in bags, \$1.85 to \$1.90; extras, \$1.60 to \$1.70. Feed—Manitoba bran, in bags, \$19; shorts, \$22 per ton; Ontario bran, in bags, \$18 to \$18.50; shorts, \$21 to \$21.50; milled mouillie, \$21 to \$25 per ton, and straight grain, \$28 to \$29. Provisions—Barrels short cut mess, \$23 to \$24; half barrels, \$11.75 to \$12.50; clear fat backs, \$23.50; long cut heavy mess, \$21.50; half barrels do. \$11.25; dry salt long clear bacon, 12½ to 12½c; barrels plate beef, \$12 to \$13.50; half barrels do. \$6.75 to \$7.25; half barrels heavy mess beef, \$11.50; half barrels compound lard, 8 to 9c; pure lard, 12 to 12½c; kettle rendered, 13 to 14c; hams, 14½ to 16c; breakfast bacon, 15½ to 16½c; Windsor bacon, 16½c; fresh killed abattoir bacon, 16½c; fresh killed abattoir dressed hogs, \$10.50 to \$10.75; alive, \$7.25 to \$7.60 per 100 lbs. Eggs—Selects, 20 to 20½c; No. 1 candied, 17½ to 18c. Butter—Choicest creamery, salted and unsalted, 23 to 23½c; medium

71½c; Dec., 73c; May, 74c; No. 2 hard, 77c; No. 1 Northern, 76c; No. 2 Northern, 74c; No. 3 Northern, 72 to 73c. Flour—First patents, \$4 to \$4.10; second patents, \$3.85 to \$3.95; first clears, \$3.25 to \$3.45; second clears, \$2.50 to \$2.60. Bran—\$13.50.

Buffalo, Sept. 4. — Flour — Firm. Wheat—Spring unsettled; No. 1 Northern, 83c; Winter, nothing doing. Corn—Firm; No. 2 yellow, 56½c; No. 2 corn, 55½c. Oats—Rather strong; No. 2 white, 34½ to 34½c. Canal freights—Steady.

#### LIVE STOCK MARKET.

Toronto, Sept. 4.—Buyers stated that trade was quiet at the Western Market to-day.

Exporters' cattle continued to be offered in limited numbers, and the inquiry was slack. Quotations were almost nominal at \$4.25 to \$4.75 per cwt. The best figure reported for a load was \$4.65. Butchers', choice, \$4.40 to \$4.50; medium, \$4 to \$4.20; medium cows, \$3.50 to \$3.65; bulls, \$3 to \$3.25; canners, \$1.75 to \$2 per cwt.

Stockers, choice, \$3 to \$3.50; common, \$2.50 to \$2.75; bulls, \$2 to \$2.25; feeders, \$1 to \$1.15; short-keepers, \$4.20 to \$4.60 per cwt.

The arrivals of milch cows amounted to about 70, and trade was more active. The prices ranged from \$25 to \$70 each.

Export ewes, \$4.50 to \$4.75; export bucks, \$3.50 to \$3.75; lambs, \$6.50 to \$6.65 per cwt. Calves were steady at \$3 to \$6.50 per cwt.

Hogs were quoted at \$6.65 for selects, and \$6.40 for lights and fats.

#### HAIL AND WIND STORM.

Buildings at Fort William Were Blown Down.

A Fort William despatch says: A terrific hail and wind storm passed over this district on Wednesday night, and, although only of short duration, did great damage. The hailstones were the largest ever seen here, and windows in all parts of the town were broken. The wind also was of great velocity, and many buildings under construction were blown down. The new high school, one of the buildings under construction, was blown down. The Y.M.C.A. athletic grounds on which the fair opens on Monday seemed to be right in the centre of the storm. Refreshment booths were taken up completely and taken a hundred yards away. A big part of the fence was also blown down. Several small pleasure boats were badly smashed. No injuries to persons are reported, although several had narrow escapes by falling.

#### GRAPHITE DEPOSITS.

Mines Branch is Busy Making an Extensive Survey.

An Ottawa despatch says: The Mines Branch, under the supervision of Dr. Eugene Hainel, is engaged in a survey of the graphite deposits of Ontario and Quebec, which will shortly be published in book-form giving full particulars as to their known extent, and the localities in which the mineral has been found.

A commission of experts that last season made a complete investigation of the zinc deposits of British Columbia, their extent and economic value will shortly issue its report, which will be available for distribution among all who are interested in this question.

#### BIG ORDER FOR FLOUR.

Calgary Milling Company Ships Twenty Thousand Sacks to Orient.

A Calgary despatch says: The Calgary Milling Company have completed the largest shipment of flour ever sent from here to the Orient. It consists of 10,000 sacks for China and 1,000 sacks for Japan. Heretofore shipments were in the line of sample orders.

from Poplar Point to Selkirk with a cargo of fish, encountered one of the worst storms in the history of the lake, and about three o'clock Sunday morning began to leak. The water gained so fast on the pumps that the fires were put out, and when the boat lurched, the smoke stack came crashing down through the hold, splitting her open. Sixteen people escaped from the wreck in boats. The survivors were picked up on Monday by the steamer City of Selkirk on Swampy Island reef and brought on to Selkirk, arriving at that place to-night.

#### CAUGHT BY BALLOON ANCHOR.

Woman Whirled 500 Feet Above Heads of Spectators.

A despatch from Kingston, N. Y., says: Caught by the anchor of a balloon and whirled 500 feet in the air over the heads of 5,000 spectators, Mrs. Roper, of Brooklyn, was seriously, but not fatally, injured on Wednesday at the Ulster County Fair at Ellenville. Maggie Daley, of Middletown, who has been making daily ascensions at the fair grounds in a balloon, had just entered the car, and was about to give the order to cast off when the balloon broke loose and sailed upwards with the anchor trailing. Before the bystanders could scatter the anchor fluke caught in Mrs. Roper's dress and she was whipped up into the air screaming. The weight of the anchor rope caused the balloon to tip over, and Miss Daley, looking out of the car to ascertain the cause of the trouble, caught sight of her involuntary fellow voyager swinging far below at the end of the rope, and at once pulled the safety cord. The balloon, which by that time had reached an altitude of 500 feet, quickly descended, and reached the ground a quarter of a mile from the point of ascension. Mrs. Roper struck the ground heavily, and when picked up was found to be unconscious, and to have sustained fractures of the shoulder, ankle and several fingers.

#### ATTACKED THE TURKEY.

Desperate Attempt to Escape From Port Arthur Jail.

A despatch from Port Arthur says: Mike Erovani, who is awaiting trial on the charge of murdering another Italian on Good Friday last, together with Dan Woods, serving six months for obtaining money under false pretences, made a desperate attempt to escape from jail on Tuesday. They knocked Turnkey Jones down when he entered the day room, and were just securing the keys when Geo. Slater, another prisoner awaiting trial for murder, interfered and gave the alarm. Erovani and Woods sawed the bars of their cells and nearly secured their liberty less than a month ago. Jones was badly beaten by the ruffians before he was rescued.

#### BOERS EMIGRATING.

Warning Issued at Solicitation of General Botha.

A Johannesburg despatch says: A warning issued by the Transvaal Government to intending Boer emigrants to the Argentine Republic was published after urgent representations made by Gen. Botha to Lord Selborne in behalf of Het Volk. For the last two years the Boer leaders have been vainly endeavoring to stem the tide of emigration to Argentina, especially on account of well-to-do farmers joining the movement. According to private letters from Boer settlers, the Boer settlement are doing well, and are deserving every encouragement from the Argentine Government. Churches and schools have been established, and the settlers are exempt from military service. Most of the settlers are irreconcilables and Cape rebels.

burn; these, however, were in rather low in yield with the exception of Auburn which was fifth in weight per measured bushel and sixth in yield of grain per acre among the sixty-one varieties grown. Generally speaking, the white wheats yield more grain per acre, possess stronger straw, weigh a little less per measured bushel, and are slightly softer in the grain than the red varieties.

At the present time efforts are being made to obtain improved strains of some of the best varieties by systematic plant selection, and while the ordinary seed of Dawson's Golden Chaff gave a comparatively lower yield than usual this year, three new strains of this variety, obtained by the above mentioned method, each gave a much higher yield than any of the varieties in the regular test.

Much work is also being done along the line of cross breeding and it is expected that some profitable results will accrue from this work in the near future. During the past year many hundreds of hybrid plants were grown, and judging from present indications, some of these are destined to become the progenitors of very valuable new varieties. For this work only the very best of the standard sorts are used as parent stocks. Among these might be mentioned the Dawson's Golden Chaff, Bulgarian, Turkey Red, Imperial Amber, and Tasmania Red.

The results of twelve separate tests made at the College show an average increase in yield of grain per acre of 6.8 bushels from large as compared with small seed, of 7.8 bushels from plump as compared with shrunken seed, and of 35.6 bushels from sound as compared with broken seed. Seed which was allowed to become very ripe before it was cut produced a greater yield of both grain and straw and a heavier weight of grain per measured bushel than that produced from wheat which was cut at any one of four earlier stages of maturity. In 1897 and again in 1892, a large amount of the winter wheat in Ontario became sprouted before it was harvested, owing to the wet weather. Carefully conducted tests showed that an average of only 76 per cent. of the slightly sprouted and 18 per cent. of the badly sprouted seed would grow and produce plants. Surely he is the wise farmer who will sow none but large, plump, sound, ripe seed of good vitality.

In each of seven years, experiments have been conducted in treating Winter Wheat in different ways to prevent the development of stinking smut, and the results have been very satisfactory. In the average of the past three years, untreated seed produced 4.4 per cent. of smutted heads, while seed which was immersed for twenty minutes in a solution made by adding one pint of formalin to forty-two gallons of water produced a crop which was practically free from smut. Not only did the formalin treatment effectually prevent the development of the smut in the crop, but a considerably larger yield of grain was obtained when the treatment was applied. The average yield of grain for the three years from untreated seed was 38.7 bushels, while the crop grown from seed to which the formalin treatment had been applied yielded 45.6 bushels per acre in favor of the treated seed. Several other methods of treating seed for the prevention of smut were tested but the formalin method herein described was the cheapest and most practical of all, as well as being effectual.

Many tests conducted at Guelph indicate the importance of sowing about ninety pounds of winter wheat per acre on an average soil. This amount might be increased for poor land and decreased for rich soil. If the land is in a good state of cultivation it matters but little whether the seed is sown broadcast or with a tube drill, but if the land is dry or lumpy, that which is sown with the drill is likely to give the best results. The highest yields per acre have been obtained from sowing between the

26th of August and the 9th of September.

Common Winter Rye and Mammoth Winter Rye have been grown for seven years in succession; the Common giving an average yield of 57.9 bushels and the Mammoth 59.3 bushels of grain per acre. Among five varieties grown for the past three years, the Mammoth White stood first with an average yield of 66.6 and the Washington second with 61.7 bushels per acre. Winter Barley has been grown at the College for several years and when it is not winter killed gives very good yields. This season it made a poor showing in the spring but recovered from the effects of the unfavorable winter and yielded 58.5 bushels per acre. Hairy or Winter Vetches produced an average yield of 10.2 tons of green crop per acre in the experiments for four years and 6.7 bushels of seed per acre in the tests for six years. Home grown seed has given considerably better results than imported seed.

### 3.—RESULTS OF EXPERIMENTS THROUGHOUT ONTARIO.

No less than two hundred and forty-one farmers in Ontario conducted co-operative experiments with Autumn-sown crops during the past year. Good reports of carefully conducted tests have been received from many of these, and all deserve credit for the useful work they have done for themselves and their fellow farmers. Following are some of the summary results of these tests.

In the Autumn of 1905, five varieties of Winter Wheat were distributed to those who made application. The following table gives the average yield of straw and grain:

| Variety.                    | Straw<br>per Acre<br>(tons) | Grain<br>per Acre<br>(bus.) |
|-----------------------------|-----------------------------|-----------------------------|
| Banarka .....               | 2.2                         | 30.0                        |
| Early Genesee Giant .....   | 1.9                         | 25.5                        |
| Crimean Red .....           | 1.9                         | 25.4                        |
| Imperial Amber .....        | 1.9                         | 23.4                        |
| Dawson's Golden Chaff ..... | 1.7                         | 21.6                        |

Notwithstanding the fact that the

| Weight<br>per Bush.<br>(lbs.) | Straw<br>per Acre<br>(tons) | Grain<br>per Acre<br>(bus.) |
|-------------------------------|-----------------------------|-----------------------------|
| 59.7 .....                    | 3.3                         | 54.0                        |
| 60.5 .....                    | 3.8                         | 52.3                        |
| 59.7 .....                    | 3.5                         | 50.7                        |
| 60.7 .....                    | 3.6                         | 50.4                        |
| 61.2 .....                    | 3.7                         | 49.6                        |
| 58.9 .....                    | 3.2                         | 49.5                        |
| 61.5 .....                    | 3.3                         | 47.7                        |
| 60.8 .....                    | 3.0                         | 47.1                        |
| 61.0 .....                    | 3.3                         | 47.0                        |
| 62.2 .....                    | 3.3                         | 45.9                        |
| 60.5 .....                    | 2.9                         | 45.1                        |
| 61.1 .....                    | 2.9                         | 44.8                        |
| 61.0 .....                    | 3.0                         | 44.6                        |
| 62.0 .....                    | 2.9                         | 44.2                        |
| 60.4 .....                    | 2.9                         | 44.2                        |

Dawson's Golden Chaff and Imperial Amber gave smaller yields of grain than the other three varieties, they have first and second places in popularity with the experimenters; the Dawson's being the most popular, probably because of its clean strong straw. The Banarka which stood first in yield of grain was third in popularity. This is a hard red wheat of good milling quality but produces rather weak straw, and therefore lodges considerably, especially in bad weather.

Of the three varieties of Winter Rye distributed last Autumn, the Mammoth stood first in average yield of grain with 41.4 bushels per acre, the Thousand-fold second with 32.9 bushels, and the Common third with 31.8 bushels. These three varieties are very much alike in most respects, though differing somewhat in yield.

For the production of fodder Hairy Vetches and Winter Rye were grown this year for the fourth time. Several reports of this experiment were received, but as the Vetches were completely winter killed in most places, no good comparison of the yields can be made. In several tests Winter Rye gave

### FIVE BOYS BLOWN UP.

Four of Them Killed and the Other Seriously Injured.

A despatch from Halifax, N. S., says: Four boys were killed and blown skyward by a terrific explosion in an abandoned coal working in Stellarton on Monday afternoon. The dead are two sons of Neil Gunn, a son of Joseph Frew and a son of Neil Patterson, all between twelve and sixteen years old. They, with another boy named Kornett, were playing ball near what is known as the English slope, at the lower end of the town of Stellarton. Entrance to the slope was partly uncovered, and their ball rolled in. All five entered the slope in search of it. After they had proceeded several feet one of the boys lighted a match, which ignited the gas in the mine, which has not been worked for several years. A terrific explosion resulted, and the boys were hurled in all directions. Frew was hurled nearly four hundred feet. One of the Gunn boys was thrown over the top of a grove of trees, some distance away, and both bodies were terribly mangled, death being instantaneous. Patterson and the other Gunn lad were alive when found, but were so badly injured that they died in less than an hour. Young Kornett, who began to retreat up the slope when his companions suggested lighting the match, escaped with his life, but sustained a broken arm and severe bruises. The force of the explosion was felt throughout the town, and at first it was feared that an explosion in one of the working mines had occurred.

### FOUND DEAD IN A FIELD.

Mr. John Bird, Farmer, of North Cayuga Township.

A despatch from Cayuga says: John Bird, a farmer, living about eight miles from here, in the township of North Cayuga, was found dead in a field on Sunday evening by a passerby on the road. He rode to the field on horseback to bring the cows home for milking, and had only been gone about fifteen minutes when found. Valvular heart trouble was the cause of death.

### MOTOR STRUCK BY TRAIN.

Mrs. Burgess Was Killed at Carleton Place.

A despatch from Ottawa says: Mrs. Burgess, 63 Waverley Street, this city, wife of W. H. Burgess, assistant time inspector of the C.P.R., was killed at Carleton Place on Monday afternoon. She was in an automobile with Mr. and Mrs. Samuel Torrance, when the conveyance was struck by the Imperial Limited, going west. Mrs. Burgess lost her life, and Mr. and Mrs. Torrance received severe injuries.

### KILLED BY AUTOMOBILE.

Tragedy Occurred on College Street West, Toronto.

A despatch from Toronto says: An unknown woman was knocked down and killed by an automobile belonging to Mr. Ambrose J. Small, the theatrical manager, near the corner of College Street and Palmerston Avenue at 10 minutes to 8 on Monday night. Her body lies unidentified at Ellis' morgue, on College Street. The chauffeur in charge of the machine was George Seagar, of George Street, and after he had explained the circumstances to Crown Attorney Corley and Inspector Dixon they did not consider it necessary to arrest him.

## HEALTH

### DIRTY AIR.

The importance of ventilation and of a constant supply of fresh air in living-rooms and wherever man abides, whether sleeping or waking, has often been insisted upon in these articles. Without air life is impossible, and unless that air be moderately pure, health cannot be maintained, although it is astonishing, and a proof of the wonderful adaptation of living beings to their environment, to note how great an amount of contamination of the air can be borne with seeming impunity.

There are two forms of impurity in the air—gaseous and solid. The gases, those resulting from exhalations from the lungs, and in city houses from the little unnoticed leaks from the gas-pipes and from defective plumbing, are the most injurious. For the removal of these, free ventilation through open windows and open fire-places is most efficacious; but it is of little service in the removal of the other kind of impurity, that is to say, the solid particles of matter—dust—which are always floating in the air of houses as well as in that of the streets.

A beam of sunlight entering through a half-closed shutter makes visible this dust, and as one looks with startled eyes on the beam which lights up the floating particles, the wonder grows that the lungs are not made solid by this stream of dust flowing in with every breath. Fortunately the nose and the moist lining of the air tubes are designed to filter the air by arresting these particles before they can enter the delicate air-chambers of the lungs. They do their work well, but not perfectly, and the greater the amount of dust the more they fail in their function.

Workmen engaged in dusty trades—carpet-beaters, coal-miners, potters, grinders, felt-workers—often acquire disease of the lungs from the inhalation of dust.

Dust particles are injurious not only mechanically, but also and chiefly because they act as carriers of disease-germs.

Since it is impossible to remove dust entirely by ventilation, it is necessary to do what is practicable to prevent its dissemination through the air. Settled dust is ugly, but inoffensive. But when the well-meaning but ignorant housewife flaps it into the air with a feather duster, she only rouses the sleeping lion. Brooms and feather-dusters are relics of barbarism, and should be banished. The damp cloth for furniture and the mop and carpet-sweeper for floors, or best of all the vacuum process, are the modern civilized agents of cleanliness. These gather up the dust, and do not simply scatter it in the air, where it is invisible but pernicious.—Youth's Companion.

### BIG TUNNEL CONTRACT.

Ten Million Dollars to be Spent on the Project.

A despatch from Detroit says: Preparations are being made by the New York engineering and construction firm that is to build the Michigan Central tunnel under the Detroit River, to begin operations within 30 days on the \$10,000,000 contract. W. Butler of the firm has been in Detroit several days in consultation with different material men.

A Santiago, Chile, despatch says: The ambulance stations and hospitals a

Vetches and Winter Rye were planted this year for the fourth time. Several reports of this experiment were received, but as the Vetches were completely winter killed in most places, no good comparison of the yields can be made. In several tests Winter Rye gave very good results. The experimenters report that these crops were fed to several classes of animals. In general, the Vetches were relished by all kinds of stock but the Rye was not so freely eaten, except by horses.

### 3.—NOTICE TO EXPERIMENTERS.

Each of the experimenters with spring and summer crops will kindly report the results of their experiments as soon as they can after the crops are harvested.

## CANADA'S TRADE WITH BRITAIN.

### Big Increase in Butter, But Cheese Is Stationary.

A despatch from Ottawa says: Returns just published of Canada's foreign trade for the year ending June 30, 1906, show that exports of Canadian cheese to the British market totalled 214,877.077 lbs., of a value of \$24,300,908. This is almost the same quantity as found its way to the United Kingdom in 1905, but the better prices prevailing in 1906 showed an increase in the value of this trade amounting to \$4,126,697.

The total of 32,904,900 lbs. of Canadian butter, valued at \$6,802,003, found its way to Britain last year, which represents an increase of 2,914,321 lbs., and an increase in value of \$1,233,004. Canadian bacon to the amount of 98,173,242 lbs., valued at \$11,563,619, found its way to the British market, as compared with 116,705,157 lbs., worth \$12,180,817, in the year 1905. Canadian wheat exports to the Motherland in 1906 were 36,027,692 bushels, as compared with 11,280,407 bushels in the previous 12 months.

A total of 13,503,781 lbs. of canned meats, valued at \$1,340,880, were marketed in Britain, compared with 38,190,651 lbs., valued at \$3,525,270 in 1905. One hundred and sixty-six thousand two hundred and seventy-eight cattle, valued at \$11,079,005, were exported to the Motherland last year, which about equaled the trade of 1905.

Sales of Canadian eggs in England in 1906 totalled 2,688,977 dozen, valued at \$448,463, as compared with 3,352,485 dozen in 1905, of a value of \$660,610.

## WINTER CROPS, 1906.

### Co-operative Experiments in Ontario Agriculture.

Material for any one of the five experiments here mentioned will be sent free to any Ontario farmer applying for it, if he will conduct an experiment with great care and report the results after harvest next year. The seed will be sent out in the order in which applications are received as long as the supply lasts.

1.—Testing Hairy Vetches and Winter Rye as fodder crops, 2 plots.

2.—Testing three varieties of Winter Wheat, 3 plots.

3.—Testing five Fertilizers with Winter Wheat, 6 plots.

4.—Testing Autumn and Spring Applications of Nitrate of Soda and Common Salt with Winter Wheat, 5 plots.

5.—Testing two varieties of Winter Rye for grain production, 2 plots.

The exact size of each plot is to be one rod wide by two rods long. The material for either of the first two experiments or for No 5 experiment will be forwarded by mail, and for each of the other two by express. Each person wishing to conduct one of these experiments should apply as soon as possible, mentioning which test he desires, and the material, with instructions for testing and the blank form on which to report, will be furnished free of cost until the supply of experimental material is exhausted. — J. Buchanan, Agricultural College, Guelph, Ont.

The Mexican Government will subsidize a steamship service between Mexico and Canada on the Pacific.

The first international Esperanto (universal language) congress opened at Geneva, with 500 representatives of fifteen nations present.

## ONTARIO HAS BIG CROPS.

### Grains Will Yield Higher Average Than Ever.

A Toronto despatch says: Ontario's farmers will have good reason to remember the crop of 1906. According to the August crop bulletin, issued by the Department of Agriculture, the average yield per acre of all grain crops shows a good increase over all previous years. The shortage in hay is one of the few exceptions to the general rule, but it is claimed that this will be more than offset by the improvement in quality. The farmers report that their barns are filled and that prices are high in every case.

The following table shows the yield of the different crops for 1905 and 1906 according to the August crop bulletin:—

|              | 1905.       | 1906.       |
|--------------|-------------|-------------|
| Fall Wheat   | 18,467,043  | 19,023,633  |
| Spring wheat | 3,591,941   | 3,348,190   |
| Barley       | 24,163,883  | 25,478,250  |
| Oats         | 102,809,734 | 111,356,914 |
| Rye          | 1,753,135   | 1,370,868   |
| Peas         | 7,510,775   | 8,671,567   |
| Beans        | 968,883     | 1,034,119   |
| Hay          | 5,847,494   | 4,802,330   |

The following table shows the acreage in root crops this year and last:—

|          | 1906.   | 1905.   |
|----------|---------|---------|
| Potatoes | 136,064 | 132,530 |
| Mangels  | 69,353  | 69,035  |
| Carrots  | 4,980   | 5,500   |
| Turnips  | 132,512 | 135,348 |

## SUFFERED LITTLE DAMAGE.

### Most of the Western Harvest Has Been Gathered.

A Winnipeg despatch says: The latest crop report issued by the C.P.R. indicates that from 50 to 75 per cent. of the crop has been cut in most localities, while in others it has been entirely finished, and threshing is progressing favorably. Little or no damage has been done to the crops through hail or other causes, thus proving a record-breaking year in this respect. The yield in north-western Manitoba seems to be particularly good, averaging from 20 to 22 bushels an acre, while in the southern part of the province the grain is turning out slightly better than in previous years. Rain is reported in some parts of the province, but not sufficient to damage the crop to any extent. Most of the wheat already threshed graded No. 1 Northern, and experts say that fully 75 per cent. of the remaining crop will grade the same.

## LEPERS AT THE COAST.

### Dominion Government Has Decided to Build a Hospital.

A despatch from Ottawa says: Dr. Watt, chief quarantine officer for British Columbia, will accompany Dr. Montizambert, director-general of public health, on a trip of inspection to Grosse Isle quarantine station, and to the leper hospital at Tracadie, N.B. Dr. Watt has not previously visited Tracadie and his object in going there is to see how the institution is run in view of the decision of the Government to establish such a hospital in British Columbia. At present there are seventeen patients in the Tracadie hospital.

At Darcy Island, B.C., seven Chinese lepers have been detained for some years. The provincial authorities have been looking after them in an intermittent way. The Dominion Government has now decided to take charge of the lepers and a proper hospital will be erected.

## CANADA'S CUSTOMS REVENUE.

### Returns for Month Show Increase of \$8402,936 Over Last Year.

A despatch from Ottawa says: The Customs revenue of the Dominion for the month ending on Friday totalled \$4,615,951, an increase of \$402,936 over last year. For the two months that have now elapsed of the current fiscal year, the collections were \$8,178,330, an increase of \$764,678.

## SMELTER IN OTTAWA VALLEY.

### Establishment of Large Plant at Ottawa Depends on Water Powers.

A despatch from Ottawa says: An inquiry is now being made into the available water powers and deposits of iron in the Ottawa Valley, and if the report be as favorable as is anticipated it will probably lead to the establishment of a large electric smelting plant. The capitalists interested in this proposal are mostly Canadians. It is said that at the Chats Falls power can be generated as cheaply as 2½ or 3 cents per electric horse-power a year. One advantage, of course, with the electric power is the possibility of transmitting it a considerable distance at a small cost, so that in many cases the smelting could be done right at the mines' mouth.

## A HEROIC LIFE-SAVER.

### C. P. R. Fireman W. Fitzgerald Rescues Another Man From Drowning.

A Sault Ste. Marie, Ont., despatch says: W. Fitzgerald, the C. P. R. fireman, has performed his second life-saving act of the season by rescuing Fireman Thomas Van of the Soo, on Wednesday. Van was swimming across the river at Algoma Mills and became exhausted, Fitzgerald swam to his assistance and was clasped around the neck by the drowning man, but he succeeded in bringing him ashore. A couple of weeks ago Fitzgerald jumped 25 feet from a bridge and saved a man named Jones, who had taken cramps. A collection is being taken up to present him with a gold watch.

## GIVE UP IMMENSE TRACK.

### Indians in North of New Provinces to Resign 85,000 Square Miles.

A despatch from Ottawa says: The order-in-Council authorizing a treaty to be made with the Indians in the northern part of Saskatchewan and Alberta provides for extinguishing the Indian title to 85,800 square miles, an area almost equal to that of England, Scotland and Wales. The Indians are to be given reserves of an area equal to one square mile for each family of five. They are also to receive the following immediate payments:—To each chief, \$32; to each head man, \$22, and to every other Indian of whatever age, \$12; yearly payments to be made as follows:—\$25 to each chief, \$15 to each head man, and \$5 to every Indian squaw, and papoose. Half-breeds are to be settled with by a grant of scrip for 240 acres each, or \$240 in cash. Mr. J. A. J. McKenna is the commissioner who will make the treaty.

## ADULTERATED HONEY.

### Ten Out of Fifty-four Samples Found to be Impure.

An Ottawa despatch says: The analysts of the Inland Revenue Department have carefully examined 54 samples of honey collected during March and April last in different parts of Canada. Of this number ten were found to be adulterated. The Maritime Province samples were genuine. Three cases of adulteration were found from the Provinces of Quebec and Manitoba, two in Ontario, one in Alberta, and one in British Columbia. It is pointed out that it is illegal to feed either sugar or glucose to bees for the intent that it shall be used by the bee in making honey.

## VALPARAISO'S INJURED.

### Hospitals and Ambulance Stations Caring for 3,600 People.

A Santiago, Chile, despatch says: The ambulance stations and hospitals a Valparaiso are now caring for 3,600 persons who sustained injuries during the earthquakes or the fires which followed.

## BRITISH PREMIER'S WIFE DEAD.

### Lady Campbell-Bannerman Has Been An Invalid for Many Years.

A despatch from Marlenbad, Bohemia says: Lady Campbell-Bannerman, wife of the British Premier, Sir Henry Campbell-Bannerman, died on Thursday. She had been an invalid for years.

## DEATH IN CANNED BERRIES.

### Two Nova Scotia Children Died of Poisoning.

A despatch from Lawrencetown, N. S. says: Two children, aged 4 and 6 years daughters of John Garber, who reside near this town, died suddenly Thursday, one in the morning and the other in the evening, from poisoning, the result of eating canned blueberries and the two other children of the family narrowly escaped the same fate, from the same cause, by the timely arrival of medical aid. The first child to succumb fainted at school, was carried home by a comrade and died next morning.

## TWO KILLED; THREE HURT.

### Premature Explosion at a Construction Camp.

A Fort William despatch says: Another fatal accident occurred in the Grand Trunk Pacific construction camp at Kaminitiquia, on Tuesday, in which S. Peterson, foreman for Foley Bros and an Italian laborer were instantly killed by the premature exploding of blasting shot. Three other laborers were injured. Peterson's body was horribly mutilated.

## EXPERIMENTAL FARM SITES.

### Two to be Established in Alberta a Lacombe and Lethbridge.

A despatch from Ottawa says: on the recommendation of the Minister of Agriculture, sites have been selected at two points in the Province of Alberta Lacombe and Lethbridge, for experimental farms. The Lethbridge farm will be located in the dry belt, so that the effects of irrigation will be noticeable.

## WAS CUTTING CELL BARS.

### Charlebois Makes Another Attempt to Escape from Kingston.

A Kingston despatch says: The murderer, Charlebois, who escaped from the penitentiary several months ago and was captured near Mallorytown recently made another attempt to escape from confinement. Several saws were found in his possession. The convict was at work cutting the bars of his cell when discovered.

## PREFERENCE TO BRITAIN.

### Bill Increasing Duties to Foreigners in Australian Parliament.

A Melbourne despatch says: Premier Deakin on Thursday laid on the table a motion increasing the duties to foreign countries 10 per cent., and giving a preference to that amount of British products imported in British ships.

Contracts for I.C.R. shops and storehouses at Moncton, to cost \$100,000 have been awarded to E. A. Walberge C.E., Montreal.

## For Thin, Poor Blood

You can trust a medicine tested 60 years! Sixty years of experience, think of that! Experience with Ayer's Sarsaparilla; the original Sarsaparilla; the Sarsaparilla the doctors endorse for thin blood, weak nerves, general debility.

But even this grand old medicine cannot do its best work if the liver is inactive and the bowels constipated. For the best possible results, you should take laxative doses of Ayer's Pills while taking the Sarsaparilla.

Made by J. C. Ayer & Co., Lowell, Mass.  
Also manufacturers of  
**Ayer's**  
HAIR VIGOR,  
ACUTE CURE,

**MUNN & Co.** 625 E. St., New York

He is the kind of man who when the  
 dearest girl in the world finds out that  
 there are "others" and asks him who  
 they are and what he means by call-  
 ing on them will assume an air of ex-  
 cessive dignity.

The man who holds the pencil out  
 at arm's length and whittles away at  
 it, hit or miss, is impulsive, jolly, good  
 natured and generous.

He who leaves a blunt point is dull  
 and plodding and will never amount  
 to much. He is really good hearted,  
 but finds his chief pleasure in the  
 commonplace things of life.

He who sharpens his pencil an inch  
 or more from the point is high strung  
 and imaginative and subject to ex-  
 uberant flights of fancy. He will al-  
 ways be seeking to mount upward and  
 accomplish things in the higher re-  
 gions of business and art, and his  
 wife's greatest trouble will be to hold  
 him down to earth and prevent his  
 flying off altogether on a tangent.

The man who sharpens his pencil all  
 around smoothly and evenly, as though  
 it were planed off in an automatic  
 sharpener, is systematic and slow to  
 anger, but he is so undeviating from a  
 fixed principle that he would drive a  
 woman with a sensitive temperament  
 to distraction in less than six months.

On the contrary, he who jumps in  
 and leaves the sharpened wood as jagged  
 as saw teeth around the top has  
 a nasty temper and will stomp the  
 baby on the slightest provocation.  
 There are certain women who can  
 manage that kind of man beautifully,  
 however, and if he gets a wife with a  
 calm, persuasive eye he will come  
 down from his high horse in a few  
 minutes and be as meek as a lamb.

The man who doesn't stop to polish  
 the point of lead once the wood is cut  
 away has a streak of coarseness in his  
 nature.

He who shaves off the lead till the  
 point is like a needle is refined, deli-  
 cate and sensitive. He will not be  
 likely to accomplish so much as his  
 more common brother, but he will never  
 shock you and is without doubt a  
 good man to tie to. —New York Press.

# The Better Way

The tissues of the throat are  
 inflamed and irritated; you  
 cough, and there is more irrita-  
 tion—more coughing. You take  
 a cough mixture and it eases the  
 irritation—for a while. You take

# SCOTT'S EMULSION

and it cures the cold. That's  
 what is necessary. It soothes the  
 throat because it reduces the  
 irritation; cures the cold because  
 it drives out the inflammation;  
 builds up the weakened tissues  
 because it nourishes them back  
 to their natural strength. That's  
 how Scott's Emulsion deals with  
 a sore throat, a cough, a cold,  
 or bronchitis.

 A SAMPLE FREE.

**SCOTT & BOWNE, Chemists,**  
 Toronto, Ont.

the bitter truth in a woman's life is to  
 be childless. Who can tell how hard the  
 struggle may have been or how she learnt to  
 resign herself to her lonely lot? The ab-  
 sence of this link to bind marital life  
 together, the absence of this one pledge  
 to mutual affection is a common dis-  
 position. Many unfortunate couples  
 become estranged thereby. Even if they  
 do not drift apart, one may read the whole  
 extent of their disappointment in the eyes  
 of such a childless couple when they rest  
 on the children of others. To them the  
 largest family does not seem too numerous.

In many cases of barrenness or child-  
 lessness the obstacle to child-bearing is  
 easily removed by the cure of weakness on  
 the part of the woman. Dr. Pierce's Fa-  
 vorite Prescription has been the means of  
 restoring health and fruitfulness to many  
 a barren woman, to the great joy of the  
 household. In other, but rare cases, the  
 obstruction to the bearing of children has  
 been found to be of a surgical character,  
 but easily removable by painless operative  
 treatment at the Invalids' Hotel and Sur-  
 gical Institute, Buffalo, N. Y., over which  
 Dr. Pierce of the "Favorite Prescription"  
 fame presides. In all cases, where chil-  
 dren are desired and are absent, an effort  
 should be made to find out the real cause,  
 since it is generally so easily removed by  
 proper treatment.

In all the various weaknesses, displace-  
 ments, prolapsus, inflammation and de-  
 debilitating, catarrhal drains and in all  
 cases of nervousness and debility, Dr.  
 Pierce's Favorite Prescription is the most  
 efficient remedy that can possibly be used.  
 It has to its credit hundreds of thousands  
 of cures—more in fact than any other  
 remedy put up for sale through druggists,  
 especially for woman's use. The ingredi-  
 ents of which the "Favorite Prescription"  
 is composed have received the most  
 positive endorsement from the leading  
 medical writers on *Materia Medica* of all  
 the several schools of practice. All the  
 ingredients are printed in plain English  
 on the wrapper enclosing the bottle, so  
 that any woman making use of this  
 famous medicine may know exactly what  
 she is taking. Dr. Pierce takes his pa-  
 tients into his full confidence, which he  
 can afford to do as the formula after  
 which the "Favorite Prescription" is  
 made will bear the most careful exami-  
 nation.

Dr. Pierce's Pleasant Pellets are the  
 best and safest laxative for women.

# HONORS AND WORTH.

Absurdity of Titles That Descend  
 From Father to Son.

When you find a man a most excel-  
 lent runner, poet, surgeon or mariner,  
 you give him due respect for his skill.  
 If he is very eminent, his occupation  
 esteemed and you chance to be some  
 ruling power, he may receive a title.  
 You do not confer this title because  
 of his grandmother, and you do not  
 make the old lady a duchess or indeed  
 pay her any particular attention. This  
 omission does not reflect discredit on  
 the grandmother. It is obvious to her  
 mind that to make her a peeress be-  
 cause not she, but some one else, has  
 done something "good" would be as  
 absurd as giving her twelve months' hard  
 labor if he had done something  
 otherwise.

Still less rational would it be to make  
 the man's son a peer. The old lady  
 has given the world this grandson.  
 Perhaps she is in a measure the cause  
 of his greatness, just as she might be  
 to a certain extent responsible were  
 he a criminal. But the son of the man  
 did not make his father. He is not to  
 be more greatly praised for what his  
 father has done than for what William  
 the Conqueror did.

The world seldom or never gives a  
 man a title because his father earned  
 one, but it does an equally silly thing  
 when it allows a son to inherit such an  
 "honor," says Home Notes.

Until a man can transmit merit it is  
 absurd to allow him to transmit a tes-  
 timonial as to merit. And, if there be  
 no pretense of claim to exceptional  
 worth, what solid reason can be ad-  
 vanced for a man receiving a designa-  
 tion that commands deference?

Hammocks a fine assortment.  
**MADOLE & WILSON.**

# Color Troubles of the Color Blind Poet, Whittier.

It is well known that the poet Whit-  
 tier was color blind and unable to dis-  
 tinguish red from green. He once  
 bought for himself a necktie which he  
 supposed to be of a modest and suit-  
 able olive tint and wore it once. He  
 never wore it again, for his friends  
 soon made him aware that it offended  
 against the traditional quietness of  
 costume enjoined alike by the habits  
 of the Friends and by his own taste.  
 The tie was of flaming scarlet.

On another occasion, when he found  
 a little girl in distress on account of  
 a new gown, made over from her elder  
 sister's, which was not becoming to  
 her coloring and complexion, he tried  
 to console her.

"I wouldn't mind what a rude boy  
 says about it, Mary," he said kindly.  
 "There looks very well indeed in it,  
 like an oread, Mary, dressed all in  
 green."

Unfortunately, Mary was not dressed  
 in green. She was red haired, and her  
 dress was red. That was the trouble.

Once, on a day in mid March, when  
 out walking with a Friend and deeply  
 engaged in conversation, Mr. Whittier  
 approached too near for safety to a  
 place where blasting was going on.  
 The danger signal was shown, but  
 neither Friend noticed it until a work-  
 man, violently waving his arms and  
 shouting, leaped before them and  
 warned them back.

"I didn't see the flag at all," said  
 Mr. Whittier's companion.

"I saw it," rejoined the poet, with  
 a twinkle in his eye, "but I thought it  
 was in honor of St. Patrick. They  
 know my defect. I can't tell them  
 from explosions except by the harp!"  
 —Youth's Companion.

# ROMAN ROSES.

They Are Beautiful and Abundant  
 Because They Eat Meat.

"I have yet to see a rose equal to  
 those grown in Rome," said the ama-  
 teur horticulturist. "They bloom in  
 the greatest abundance all through the  
 winter, and they are as large and rich  
 and velvety as American Beauties, liv-  
 ing out of doors, climbing like ivy or  
 honeysuckle over the crumbling marble  
 walls of ruined temples, gleaming in  
 crimson and green masses upon an-  
 cient columns, giving to the grimness  
 and saddest of mediæval palaces an  
 air of gayety and youth."

"One day on the Via Sistina, as I  
 passed the garden that had once been  
 the garden of Lucullus, I saw an old  
 man tending the superb roses that grew  
 there. He was pouring on their roots  
 a dark, rich looking fluid.

"Why are the Roman roses so beau-  
 tiful and abundant? I said to the old  
 man.

"Because they eat meat," he an-  
 swered.

"Eat meat? Nonsense," said I.

"Well, they drink meat—meat ex-  
 tract, which is the same thing," said the  
 old man. "We Roman gardeners have  
 for centuries watered our roses three  
 a week with a strong decoction of fresh  
 beef—a rich grade of beef tea. They  
 are meat eaters. That is why the roses  
 of Rome are as hardy and prolific as  
 weeds and at the same time as richly,  
 delicately beautiful and as sweetly per-  
 fumed as flowers grown under glass."

If thou knowest how to use money it  
 will become thy handmaid. If not, it  
 will become thy master.—Diodorus.

# BIRTH OF THE MOON

LUNA WAS FLUNG OUT OF THE EARTH INTO SPACE.

**She Once Filled, Perhaps, the Great Basin Now Occupied by the Pacific Ocean—Latest Ideas of Science as to Conditions on Our Satellite.**

Millions of years ago the earth was not the land bound, sea swept globe so familiar to us, but a liquid mass on which floated crust some thirty-five miles thick. At that period, says the Strand Magazine, it turned on its axis at a constantly increasing speed that finally shortened the day to three hours. When that terrific velocity was obtained 5,000 cubic million miles of matter were hurled off by the enormous centrifugal force, and our moon was born. The cleaving of so large a body must have left some scar on the earth's surface. It has accordingly been suggested that the great basin now occupied by the Pacific ocean was once filled by what is now the moon.

Our moon has the distinction of being the largest of all planetary satellites—so large, indeed, that to the inhabitants of Mars it must appear with the earth as a wonderfully beautiful twin planet.

Because the moon rotates on its axis in exactly the same time that it revolves around the earth we are destined to see little more than one hemisphere. So slow is this rotation that the lunar day is equal to fifteen of our days. For half a month the moon is exposed to the fierce heat of the sun; for half a month it spins through space in the densest gloom.

Smaller in mass than the earth is, the moon's attraction for bodies must be correspondingly less. A good terrestrial athlete could cover about 120 feet on the moon in a running broad jump, and leaping over a barn would be a very commonplace feat. A man in the moon could carry six times as much and run six times as fast as he could on the earth.

Although separated from us by a distance that at times reaches 253,000 miles and is never less than 222,000 miles, we know more of the physical formation of the single pallid face that the moon ever turns toward us than we know of certain parts of Asia and the heart of Africa. Powerful telescopes have brought our satellite within a distance of forty miles of the earth. Physicists have mathematically weighed it and fixed its mass at one-eighth of the earth, or 73,000,000,000,000 tons.

The moon presents aspects without any terrestrial parallel. Rent by fires long since dead, its honeycombed crust seems like a great globe of chilled slag. Craters are not uncommon on the earth, but in number, size and structure they bear for the most part little resemblance to those of the moon.

A lunar crater is not the mouth of a volcano having a diameter of a few hundred feet, but a great circular plain twenty, fifty, even a hundred miles in diameter, surrounded by a precipice rising to a height of 5,000 or 10,000 feet, with a central hill or two about half as high.

Water cannot possibly exist as a liquid, for the temperature of the moon's surface during the long lunar night is probably not far from 400 degrees below the zero mark of a Fahrenheit thermometer, and the atmospheric pressure is so low that a gas under pressure would solidify as it escaped. Ice and snow are the forms, then, which lunar water must assume.

atmosphere that causes them to twinkle to our eyes.

In the line of sight it is impossible to estimate distances, for there is no such phenomenon as aerial perspective. Objects are seen only when the rays of the sun strike them.

At times there may be observed spots which darken after sunrise and gradually disappear toward sunset. They cannot be caused by shadows, for shadows would be least visible when the sun is directly overhead.

They appear most quickly at the equator and invade the higher altitudes after a lapse of a few days. In the polar regions they have never been seen. What are they? Organic life resembling vegetation, answers Professor Pickering of Harvard university, vegetation that flourishes luxuriantly while the sun shines and withers at night.

A single day, it may be urged, is not sufficiently long for the development and decay of vegetation, but sixteen hours on the moon is little more than half an hour on the earth; a day lasts half a month and may be regarded as a miniature season.

The expressions "Hallelujah" and "Amen" are said to have been introduced into Christian worship by St Jerome about A. D. 390.

## CHIRSCHMUS.

A Swiss Dainty That is Made of Preserved Cherries.

Last summer I ate genuine Swiss chirschmus twenty years old. It tasted like a concentration of all the richness and sweetness of the most perfect cherries. In appearance it was a purplish black mass. Age had not impaired it in the least.

Upon inquiry I learned how this cherry concoction, with its wonderful preserving quality, is made. The cherries used must be perfect—very large, ripe, juicy black ones and, above all, very sweet.

The juice of them pressed out and strained through a bag is put in a large preserving kettle, at the bottom of which is placed a piece of smoked pork fastened to a block of wood. The wood serves as a weight to keep the fat down and prevent the juice from burning as it thickens.

The cherry juice is boiled for about twenty-four hours without sugar, but stirred from time to time until it becomes a mass of sweetness so firm and thick that it would not fall if the kettle were inverted.

That is all, a simple process, but the result is delicious. This chirschmus is in general use in Switzerland with the "süsse milke" (sweet butter) and bread. —London Ladies' World.

## Feeding Silkworms.

The quality and quantity of silk produced by your silkworms will all depend on how you feed them. Too much food should not be given at once, but they should never be left entirely without at any time during the day or night. You must, therefore, watch carefully to get an idea of their appetite and provide accordingly, says Home Chat. Fresh mulberry leaves are the proper food for silkworms, but if at any time these are not procurable young lettuce leaves are the best substitute, but they are only a stop gap. Silkworms cannot live for a long period without their natural food.

## DRS. KENNEDY & KERGAN

Specialists in the Treatment of Nervous, Blood, Private and Sexual Diseases of Men and Women. 25 Years in Detroit.

**No Names used without Written Consent. Cures Guaranteed.**

Thousands of young and middle-aged men are annually swept to a premature grave through early abuse or later excesses. Chas. Anderson was one of the victims, but was rescued in time. He says: "I learned an evil habit. A change soon came over me. I could feel it; my friends noticed it. I became nervous, despondent, gloomy, had no ambition, easily tired, evil forebodings, poor circulation, pimples on face, back weak, dreams and drains at night, tired and weak mornings, burning sensation. To make matters worse, I became reckless and contracted a blood disease. I tried many doctors and medical firms—all failed till Drs. Kennedy & Kergan took my case. In one week I felt better, and in a few weeks was entirely cured. They are the only reliable and honest Specialists in the country."

**READER—We guarantee to cure you or no pay. You run no risk. We have a reputation and business at stake. Beware of frauds and impostors. We will pay \$1,000 for any case we take that our NEW METHOD TREATMENT will not cure.**

We treat and cure Nervous Debility, Varicose Veins, Stricture, Weak Parts, Kidney and Bladder Diseases. Consultation free. Books free. Call or write for Question List for Home Treatment.

# Heart, Throat, Liver and Skin

**DR. AGNEW'S FOUR FAMOUS SPECIFICS CURE COMPLETELY THE WORST DISEASES OF THESE PARTS—DREADFUL HEART DISEASE RELIEVED IN THIRTY MINUTES.**

Heart disease will affect people differently, but in all cases it must be viewed with great alarm. Dr. Agnew's Cure for the Heart is the one remedy that can be safely depended upon in times of trouble. It will give relief in thirty minutes.

Mr. Thomas Petty, of Aylmer, Que., was troubled with severe heart complaint for five years, the pain, at times, being so severe that he could not attend to business. Every other remedy failed until he tried Dr. Agnew's Cure for the Heart, which gave immediate relief, and his words are these: "I have now taken four bottles of the remedy and am entirely free from every symptom of heart disease."

A cold in the head need not be trifled with, for it is catarrh in an incipient condition, and catarrh is not to be trifled with. Dr. Agnew's Catarrhal Powder, as scores of clergymen, members of parliament, and prominent citizens in the Dominion have borne testimony, drives away a cold in the head like magic, and where this has assumed the shape of aggravated catarrh producing deafness and throat trouble, it effects a permanent cure.

It is not always safe to take pills for liver trouble. They not unfrequently create other troubles that are serious. Dr. Agnew's Liver Pills, whilst thoroughly certain of removing all liver trouble, give no difficulty either at the time or afterwards. They are pleasant to take and cost only 10 cents.

The faculty that Dr. Agnew has displayed in getting at the seat of trouble is manifest in his Ointment, as in the other three remedies. This contains the elements that give speedy and permanent relief in all skin diseases and is peculiarly effective in curing piles. 35 cents.

crinus, then, which lunar water must assume.

Because of the present paucity of water the moon's atmosphere is so exceedingly rare that startling effects are produced. Perhaps the most startling is that of the sunrise. Dawn and the soft golden glow that ushers in terrestrial day there cannot be. The sun leaps from the horizon a blinding globe, and the loftier peaks immediately flash into light.

There is no azure sky to relieve the monotonous effects of inky black shadows and dazzling white expanses. The sun gleams in fierce splendor, with no clouds to diffuse its blinding light. All day long it is accompanied by the weird zodiacal light that we behold at rare intervals.

Even in midday the heavens are pitch black, so that, despite the sunlight, the stars and planets gleam with a brightness that they never exhibit to us even on the clearest of moonless nights at sea. They shine steadily, too, for it is the earth's at-

of Captain Jack is purely local—to him self. The old man came out of his cottage door one morning and discovered some men-do-well neighbors digging clams in the flat in front of his shore.

"Dear me, boys," he quavered in a weak, old voice, "don't dig my clams! There's Abel Wyman over there across the cover; he has ham for breakfast every morning in the year. Go over there and dig his clams, boys."

**His Awful Mistake.**

"Young man," said her father, "do you smoke cigarettes?"

"I should say not," declared the youth hastily. "I would consider it disgraceful to be seen with one of the vile things in my mouth. I think all cigarette smokers should be jailed. Why do you ask, sir?"

"Thought perhaps you could let me have one," said the old man pointedly. "I smoke 'em myself."—London Telegraph.

# WONDERS OF THE SKIN.

Curious and Interesting Facts About What it is and What it Does.

Did you ever consider the fascinating romance of the human skin? Next to the heart the skin is perhaps the most wonderful part of the human frame. If you were to take a small piece of skin and magnify it many thousand times you would see what is depicted in the accompanying sketch. The little holes marked "A" are the mouths of tubes or pores, and it is through these minute openings that the body ejects a great deal of its impure matter in the form of perspiration. There are about three thousand of these minute pores to every square inch of the skin surface, and the vital influence of the skin upon health may be imagined when it is pointed out that from these tiny tubes about two pounds of solid matter is exuded each day. These pores, moreover, lead to glands, as shown in the diagram, which are in contact with minute blood vessels. It is readily seen, therefore, how dangerous it is to rub into the skin ointments containing mineral coloring matters and poisons, and how equally detrimental ointments containing rancid mineral fats and oils must also be. Nobody would think of eating such ointments as these, yet to rub such ointments on to the skin is just as harmful, since they reach the blood just as surely if taken either way. Zam-Buk is a pure balm specially compounded to meet Nature's needs. It is composed entirely of natural vegetable essences, and contains no mineral matter or any poisonous coloring matter whatever. Not only is Zam-Buk superior because of its purity, but because of its special refinement. Many ointments in common use are too coarse to penetrate the minute orifices referred to. Zam-Buk, on the contrary, is so specially refined as to be absorbed completely by the skin. Its healing qualities are thus utilized to the full. Zam-Buk has been tested by medical men, hospital nurses, and by the general public, and has been found unequalled for all diseased and injured conditions of the skin. In cases of cuts, burns, bruises, etc., its action is really wonderful. Whoever watches the healing of a wound, chronic sore or diseased surface of the skin by Zam-Buk is face to face with one of Nature's greatest wonders. The antiseptic substances

contained in Zam-Buk first attack and kill all microbes or germs that are the cause of inflammation or disease. The healing ingredients contained in this unique balm then proceed to build up new tissue to replace that which has been damaged or diseased. New cells appear underneath the old skin like a builder replacing an old foundation with a new and more lasting one until the whole of the wounded area is gradually overlapped. The old injured skin then falls off, and in a short time it is hard to say where the injury has been.

Mr. Wentworth Lascelles Scott, one of the leading analysts of modern times, has specially investigated Zam-Buk. From special bacteriological tests he discovered that the power which Zam-Buk has of destroying harmful germs is even greater than that of poisonous carbolic acid. Notwithstanding this excessive power to destroy harmful germs, Zam-Buk is so mild in its operation that it may be used, and is daily being used, on the delicate skin of young babies. In Zam-Buk power and healing-power to destroy harmful germs which cause inflammation festering, etc., and soothing healing properties are found in their fullest extent. Every sufferer from any of the following diseases or injuries will find in Zam-Buk an excellent cure. It is without doubt the finest household balm of modern times.

It cures cuts, burns, bruises, scalds, insect stings, pain and inflammation, diseased ankles, bad feet, ulcers, bad legs, swellings, piles, chafing, heat rashes, pimples, boils, eczema, sore breasts, sore backs, baby's sores, scalp sores, festering sores, poisoned wounds, sprains, sciatica, neuralgia and nerve pains generally.

All druggists sell Zam-Buk at Fifty Cents per box, or it may be obtained post free upon receipt of price by the Zam-Buk Company, Colborne Street, Toronto. Six boxes will be mailed post free upon receipt of two dollars and fifty cents at the company's headquarters. A free sample box will be sent you if you cut out this article, write across it the name and date of this paper, and mail it with a one cent stamp (to pay return postage) to the Zam-Buk Company, Toronto. This offer should not be missed.

## Especially For Women

**FRUIT-A-TIVES** are the finest medicine in the world for women.

As a mild and gentle laxative—as a positive and speedy cure for Constipation and Biliousness—as the only cure for weak and irritated kidneys and especially for “that pain in the back”—as a positive cure for headaches—and as a general tonic to build up and invigorate the whole system—**FRUIT-A-TIVES** stand supreme.

In cases of irritated Ovaries, Ovarian Pains, Vaginal Catarrh, Excessive and Scanty Menstruation, Ulcerations, Bearing Down Pains—and all those troubles peculiar to women—

## Fruit-a-tives

OR “FRUIT LIVER TABLETS”

have the most remarkable effect.

Ninety-nine cases out of a hundred of Female Troubles are due to neglect. Bowels become constipated—kidneys irregular—skin neglected—and the poisons of the body, which should be carried off by these important organs, are taken up by the blood carried to the female organs and poison them, thus starting up a train of female troubles.

**FRUIT-A-TIVES** are made from fruits and by their remarkable action on bowels, kidneys and skin, rid the system of poisons, purify the blood, and restore the delicate organs of generation to new vigor and health.

No woman, who suffers, should ever be without them. 50c. a box—6 for \$2.50, at your druggist's or sent postpaid by **FRUIT-A-TIVES LIMITED — OTTAWA.**

### Temper.

If a man has a quarrelsome temper, let him alone. The world will soon find him employment. He will soon meet with some one stronger than himself who will repay him better than you can. A man may fight duels all his life if he is disposed to quarrel.—Cecil.

### Posted.

“Can you repeat the Declaration of Independence?” she asked.

“I used to be able to,” he replied, “but about all I remember of it now is, ‘To be or not to be—that is the question.’”—Judge.

### From the Woods.

A popular sprano is said to have a voice of fine timbre, a willowy figure, cherry lips, chestnut hair and hazel eyes. She must have been raised in the lumber region.

### Putting Out a Fire.

When trying to put out a fire remember that one gallon of water at the bottom of the blaze will do more to put it out than ten gallons at the top. “Play low” is the motto to follow while fighting fire. A few gallons at the bottom of the flames will rise in clouds of steam when the fire is rising and quench it. A big blaze on the leeward side looks fearful, but play low with the water on the bottom of the fire on the windward side and you have the speediest way to quench the flames and will not require a river.

### Rough on the Count.

Lord Freelunch—Ah, count, did you make a favorable impression on the father of the heiress? Count Broken—Favorable! Why, when I told him I was looking for his daughter's hand he said he thought I was looking for a handout.

## DIZZINESS.

**Various Causes That Bring About an Attack of Vertigo.**

Dizziness, or vertigo—scientific writers sometimes try to distinguish in sense between these two words, but practically, in popular usage, they mean the same thing—is a disturbance of relation to the outside world, a loss of the sense of equilibrium. The sensation persists even when the eyes are closed. There is more or less inability to walk straight or even to stand still, and often there is nausea, followed by vomiting.

Vertigo is due to a disturbance, either actual or reflex, of the nervous “center of equilibrium” in the back part of the brain or in the semicircular canals in the ear, in which the terminations of the nerves coming from the center of equilibrium are distributed. For the most part, vertigo is a reflex trouble due to some impression which gets shunted off its own route, as it were, through nerve fibers connecting with the equilibrium center and acts upon the semicircular canals of the ear. Thus it is that dizziness is a comparatively trivial affection, as a rule—disagreeable enough, but brief and of no great significance except as a symptom of trouble elsewhere in the body.

Persistently recurring, transient dizziness is often due to eye strain—that is to say, to errors in the formation of the eye not corrected by proper glasses. Wearers of spectacles can frequently tell when a change in the eyes has occurred, necessitating a corresponding change in the glasses, by the coming back of these attacks of giddiness, especially when the gaze is suddenly moved from a near object to a remote one or the reverse.

Vertigo is a common symptom of disorders of digestion seated either in the stomach or the intestine. The treatment for this form is, of course, to treat the indigestion or constipation.

Another more serious variety of dizziness depends upon disease of the heart or of the blood vessels, especially those of the brain.

Any disease of the ear is apt to be associated with more or less vertigo. The same is true of tumor or other disease of the brain, especially of the cerebellum, that part of the brain in which the center of equilibrium is situated.

The dizziness of seasickness, as well as that of swinging or of rapidly turning about, is thought to be caused by an irritation of the nerves in the semicircular canals by the striking against them of the fluid in these canals.—Youth's Companion.

### Exciting.

Percy—I am tired of this life of ease. I want a life of toil, danger, excitement and adventure!

“Oh, this is so sudden! But you may ask papa.”—Life.

### Not Exhausted.

She—Henry, I'm going to give you a piece of my mind. He—I thought I'd had it all.—New York Press.

These who always creep are the only ones that never fail.

## BY-LAW NUMBER

**OF THE MUNICIPAL CORPORATION OF THE TOWNSHIP OF RICHMOND.**

A By-Law to provide for the completing and repairing of certain drainage work provided for by By-Law No. 291 of the said Municipal Corporation in pursuance of the report of the Engineer, as embodied in the said By-Law.

Provisionally adopted the Sixth day of August, A. D. 1906.

WHEREAS pursuant to By-Law No. 291 the Municipal Corporation of the Township of Richmond constructed that certain drain known as Otter Creek Drain for the benefit of the land therein described.

AND WHEREAS by mandamus issued out of the High Court of Justice the said Municipal Corporation have been directed to repair and maintain the said drain.

AND WHEREAS, thereupon under the terms of the said By-Law Number 291, the said Council has procured an examination to be made by Frederick Fraser Miller, Civil Engineer, being a person competent for such purpose, of the said area proposed to be drained and the means suggested for the drainage thereof, and of other lands and roads liable to assessment under the Municipal Drainage Act, and has also procured specifications and estimates of the drainage work to be made by the said Frederick Fraser Miller and an assessment to be made by him of the lands and roads to be benefited by such drainage work and of other lands and roads liable for contribution thereto, stating as truly as he can the proportion of benefit, outlet liability and injurious liability, which, in his opinion will be derived or incurred in consequence of such drainage work by every road and lot or portion of lot, the said assessment so made being the assessment hereinafter by this By-Law enacted to be assessed and levied upon the roads and lots, or parts of lots hereinafter in that behalf specially set forth and described; and the report of the said Frederick Fraser Miller in respect thereof, and of the said drainage work being as follows:—

To the Reeve and Council of the Township of Richmond.

Gentlemen:—Re. Otter Creek Drainage Works. I have the honor to report to you that I have examined the Creek and arched and that the following work will have to be done to make the work conform to the original report, known as By-Law No. 291 of the Township of Richmond.

1. The Creek will have to be thoroughly cleaned out to remove the obstructions to the free flow of the water. These obstructions consist of sand bars, stones, poles, etc. also remains of McLaughlin bridge abutments and a couple of bridges which are not high enough and have not spun enough and will therefore have to be changed so as to give a clear twenty feet of water.

2. Considerable work will have to be done along the road allowance between the 7th and 8th Concessions consisting of about 74 rods of new ditch, a couple of culverts and about 10 rods of old ditch will have to be cleaned out.

3. The ditches along the south and east sides of the swamp from the above named Concession road north easterly and on the north side of the swamp from the spring north easterly will all have to be deepened and widened to become operative.

4. I estimate that the cost of the above work will be \$630.00 or at the rate of \$1.75 per acre of land benefited as per original By-Law No. 291 in respect to said drainage work and the whole assessment is for benefit liability.

5. I have, in the Schedule hereunder written, assessed the benefit liability of the said drainage works against the several parcels of land liable therefor.

DATED at Napanee this 21st day of July A. D. 1906.

F. F. MILLER,  
Engineer.

The following Schedule gives description of land, number of acres benefited and total cost assessed upon each.

| CONCESSIONS | SECTION | LOT | ACRES | TOTAL ASSESSED |
|-------------|---------|-----|-------|----------------|
| 7th         | 1st     | 1   | 1.00  | \$1.75         |

said Municipality of their intention to make application for such purpose to the High Court of Justice during the six weeks next ensuing the final passing of the said By-Law.

AND NOTICE is hereby further given that a Court of Revision required by the Municipal Drainage Act Section 21 Chapter 226, Revised Statutes of Ontario 1897, will be held for the purpose of the said Act by the Council of the said Corporation of the Township of Richmond on the 24th day of September, A. D. 1906, at the hour of ten o'clock in the forenoon at the Town Hall in the Village of Selby for the trial of complaints, which may have been made by owners or persons interested in any property assessed in and by said By-Law in respect of the said Assessments under the said Municipal Drainage Act.

DATED at Selby the Sixth day of August A. D. 1906.

(Sgd.) ABRAM WINTERS,

Clerk.

First publication August 31st, 1906.

## SHERIFF'S SALE OF LANDS.

Under and by virtue of a writ of execution issued out of the Fourth Division Court of the County of Lennox and Addington, and to me directed and delivered at the suit of William Jenkins, plaintiff, and Peter Vandewater, defendant, I have seized and taken in execution and will offer for sale at my office in the Court House, in the Town of Napanee, on MONDAY, THE 10th DAY OF SEPTEMBER, 1906, at the hour of eleven o'clock in the forenoon, all the right, title, interest and equity of redemption of the said defendant, Peter Vandewater, in, to and out of all and singular that certain parcel or tract of land and premises situate, lying and being in the Village of Centerville, in the Township of Camden, in the County of Lennox and Addington, and Province of Ontario, being composed of Village Lot Number Eleven in “Block B,” according to a plan of the said Village of Centerville made by A. R. Davis, P. L. S., and filed in the Registry Office for the said county.

And also that certain other parcel or tract of land and premises situate, lying and being in the Village of Tamworth, in the Township of Sheffield, in the said County of Lennox and Addington, being composed of the south half Village Lot Number One in “Block W,” according to a plan of the said Village of Tamworth, made by A. R. Davis, P. L. S., and filed in the Registry Office for the said County on the 10th day of April, 1893.

GEO. D. HAWLEY,

Sheriff County Lennox and Addington  
Sheriff's Office, Napanee, 7th June '06 35c

## WORSHIP OF SPRINGS.

How It Prevailed Among Early Peoples in the Southwest.

Springs are rarely found in the southwestern part of the United States, and for this reason they have been from ancient times prized as a most valued possession. The people who dwell in this region, says Walter Hough in “Records of the Past,” saw in these sources of life giving water the founts of continuance and well being, and near them they located their pueblos. Save air, no elements of nature are nearer to human life than those combined into the primitive fluid which must always be within reach of men who put themselves into the grasp of the desert. The primary knowledge of the tribes who were the pioneers and of every human being who has since made his home in the great American desert was complete as to the location, distribution and idiosyncrasies of the water supply.

Spring water is naturally more prized by the inhabitants of those desert solitudes than that from living streams, because it is always drinkable and always at hand, while the watercourses, which for the greater part of the year are sinuous reaches of dry sand, furnish at flood a quickly disappearing supply of thinned mud which will not be touched by man or beast except in the dis-

-Favorable! Why, when I told him I was looking for his daughter's hand he said he thought I was looking for a handout.

**Perfectly Secure.**  
An old farmer once excused himself for sleeping under the rector's sermons by observing, "Lor, sir, when you are in the pulpit we know it is all right!"—London Standard.

# CLEANLINESS IN ITS RELATION TO THE PRODUCTION OF CHEESE AND BUTTER

We have a great deal from time to time as to the necessity for well-equipped factories and creameries if we are to insure cheese and butter of a high quality. The subjects of transportation and the grading of cheese is also receiving more or less attention from dairymen, especially salesmen and dealers. There is one point however which is very apt to be overlooked by many in their efforts to improve the quality of our cheese and butter. Would not much of the trouble now experienced practically disappear if all our producers took proper care of the raw material? It is safe to state that if milk were produced under cleanly conditions and proper care taken of it until it reached the place of manufacture, nine out of ten of the cases in which the product is now inferior would disappear.

The Provincial Department of Agriculture has in conjunction with the Dairymen's Associations carried on an aggressive campaign of dairy instruction and the results have been gratifying. The instructors have not, however, been able to give much personal attention to the producer with a view to inducing him to take proper care of his milk. Many personal visits have been made by the instructors, but at the best only a small percentage of the producers can be reached in this way. Leaflets have been gotten out setting forth the objects of instruction and giving instructions as to production and care of milk. Those have been distributed to a limited extent; but the importance of the matter demands that the attention of the producer be called to the approved methods time and again, until he practices the methods recommended. There is no one point in connection with the production of cheese and butter which is more worthy of attention. In fact if all milk were produced under proper conditions, and cooled to 50 or 60 degrees, or even 65 degrees, and kept at that point until it reached the place of manufacture, much of the trouble which now results from tainted milk and that in which the acid-forming bacteria have become active, would be avoided.

A commercial firm secured an order for £1,000 in the west of England and, as it was not duly acknowledged, wrote a letter to the firm calling special attention to it and saying, "I thought you would consider such an order quite a feather in my cap."

In reply he received this note from his principal: "We have filed your order and inclose for your cap the one feather you require."

After a fortnight came another letter from the firm: "The people who gave you the £1,000 order have failed, and we lose the goods. We have this day sent to you a bagful of feathers for you to fly home with, as we do not want you out on the road for us any more."—Strand Magazine.

## Food Value of Cheese.

It is said that one pound of cheese is equal in food value to more than two pounds of meat. It is very rich in proteids and fat. Considering this, it is low in price when compared with meat and ought to do good service to the poor man in replacing occasionally the regular diet of meat. In America cheese is looked upon more as a side dish and luxury than in some parts of Europe. The Swiss peasant depends on it as a staple second only to bread, while the use of it in England and Germany is extensive.

# THOUSANDS OF FAIR WOMEN HERALD PRAISES OF PE-RU-NA.

**Catarrh and Catarrhal Diseases Make Invalids of More Women Than All Other Ailments Combined.**

## Considers Pe-ru-na the Best Medicine in the World.

Mrs. W. J. Bryanton, 210 Sherman street, Dennison, Ohio, writes:

"I followed the directions you kindly gave me and now I find myself entirely cured. I think your Peru-na is the best medicine in the world."

## Heartfelt Thanks For Relief Found in Pe-ru-na.

Miss Jessie S. Dword, 37 South street, Passaic, N. J., writes:

"I took Peru-na as you directed. I had a dry cough and after using two bottles of Peru-na, I found relief. You have my heartfelt thanks."

A cough is caused by a catarrhal condition of the throat and bronchial tubes. Remove the catarrh and the cough disappears. Peru-na is the remedy for all catarrhal conditions.

## Permanent Benefit Followed Use of Pe-ru-na.

Miss May Cray, 147 11th street, Brooklyn, N. Y., writes:

"For more than five years I suffered from rheumatic pains in my joints, and in damp or stormy weather I was obliged to stay in doors."

"Medicine seemed to be of no use until I started using Peru-na."

"I took twelve bottles in all, although it is six months ago since I stopped."

"I have had no return of my old complaint, in spite of the fact that I have been out in all sorts of weather during the severe winter."

No better remedy was ever devised by the medical profession for the mitigation of all climatic ailments than Peru-na.

## Pe-ru-na Used For Throat Trouble. Keeps the Remedy at Hand.

Mrs. J. A. Baker, 380 Locust avenue, Amsterdam, N. Y., writes:

"I feel it my duty to write and tell you what Peru-na has done for me, so that all those who are troubled as I was may find the same speedy cure."

"Four years ago I lost my voice, so that I was unable to speak above a whisper for seven weeks. Our family doctor could do nothing for me."

"After seven weeks suffering, I read some circulars in regard to Peru-na."

"I bought a bottle at once and took it in teaspoonful doses every hour, and in two days I could talk. I will never be without it."

For free medical advice, write to Dr. S. B. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

## CHEESE BOARD.

Board met in Council Chamber in the town hall on Friday last.

## Politics and Love.

"It's funny," remarked Sandy Bowen, "how politics and love are so much alike. For instance, if you meet a bonnie girl and she gives you half a chance to kiss her you go in for free trade. However, after you get married and your wife's mother wants to embrace her newly acquired son-in-law you go in for protection. If your wife seeks an osculatory exchange you in time become a passive resister, and?"

"She turns out a home ruler if she has any sense," remarked Mrs. Bowen, who happened to overhear the conver-

## Where He Was.

"To what do you attribute your good health and remarkably robust condition?"

"To regular habits and early retiring."

"Then you have been so situated that you could carry out these excellent rules for the preservation of the health?"

"Oh, yes. I was in the Illinois penitentiary for twenty-three years!"

## Refrigerators and Hammocks.

There is a lot of warm weather yet before us and it will pay you to improve this winter.

is looked upon more as a side dish and luxury than in some parts of Europe. The Swiss peasant depends on it as a staple second only to bread, while the use of it in England and Germany is extensive.

#### Delay Fatal.

Visitor (to widow).—I am so sorry to hear of the sudden death of your husband. Did they hold a postmortem examination?

"Yes, and, like those doctors, they did not hold it until he was dead, or they might have saved his life."

#### What It Cost Him.

Mrs. Watts. There! We have cleared off the last of that church debt, and it never cost you men a cent. See what women can do. Mr. Watts—I don't know about the other fellows, but I know you have made me spend more than \$100 for extra meals downtown while you were out monkeying around.

#### The First Sight.

Ethel—I understand it was a case of love at first sight between Jack and Miss Oldgirl. Maud—Yes, dear. But the first sight was at her bank book.

Wonder is the first cause of philosophy.—Aristotle.

## ITS MERIT IS PROVED

### RECORD OF A GREAT MEDICINE

A Prominent Montreal Woman Tells How Lydia E. Pinkham's Vegetable Compound Completely Cured Her.

The great good Lydia E. Pinkham's Vegetable Compound is doing among the women of America is attracting the attention of many leading scientists, and thinking people generally.

The following letter is only one of many thousands which are on file in the Pinkham office, and go to prove beyond question that Lydia E. Pinkham's Vegetable Compound must be a remedy of great merit, otherwise it could not produce such marvelous results among sick and ailing women:

Dear Mrs. Pinkham:—  
"Soon after my marriage my health began to decline. My appetite failed me; I was unable to sleep, and I became very nervous and had shooting pains through the abdomen and pelvic organs, with bearing-down pains and constant headaches, causing me much misery. The monthly periods became more and more painful, and I became a burden and expense to my family instead of a help and pleasure. Lydia E. Pinkham's Vegetable Compound cured me within three months. Soon after I began using it I felt a change for the better, and at the time of my next period I noticed a great difference, and the pain gradually diminished until I was well. I am stronger and look better than I did before I was married, and there is great rejoicing in the house over the wonders your medicine worked." Mrs. M. A. C. Letellier, 732 Cadieux St., Montreal, Quebec.

If you have suppressed or painful periods, weakness of the stomach, indigestion, bloating, pelvic catarrh, nervous prostration, dizziness, faintness, "don't-care" and "want-to-be-left-alone" feeling, excitability, backache or the blues, these are sure indications of female weakness, or some derangement of the organs. In such cases there is one tried and true remedy—Lydia E. Pinkham's Vegetable Compound.

All sold at 12 1/2-16 after board closed.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. It is now known that Catarrh is not a local disease, but a constitutional one, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.  
Address: F. J. CHENEY & CO., Toledo, Ohio.  
Sold by Druggists, 75c.  
Take Hall's Family Pills for constipation.

### A NOBLE ENEMY.

The Fate of Mokran, a Moslem Chief of Africa.

France was never in greater danger of losing her colonies in Africa than during the war with Germany in 1870. The troops were recalled from Africa to take part in the conflict that was going on against France, and Algeria was left almost defenseless.

The hour for which the conquered races had long waited had come, and if a holy war had been proclaimed it is probable that the French would have been driven from northern Africa.

But the tribes did not rise while the French had their hands full on the other side of the Mediterranean, and the fact was due to their fidelity to a solemn pledge.

When the war broke out a chief of great influence among the tribes, Mokran, gave his word to the governor general of Algeria that there should be no insurrection while the war lasted. That word was faithfully kept. Disaster after disaster followed the French arms. The defeats of the war culminated in the surrender of Paris. But not a man of the tribes of Kabylia stirred. The Moslem's faith was plighted; the Moslem's faith was kept.

When, however, the last battle had been fought and the treaty of peace signed, Mokran, then released from his word, gave the governor general notice that in forty-eight hours he would declare war. The French armies, released from duty at home, hurried across the Mediterranean. The end was inevitable. Mokran, seeing that all was lost, put himself at the head of his warriors and fell fighting in the front rank. The French erected a monument to mark the spot where their noble enemy perished.

### A River of Death.

Before the English occupation of India it was estimated that the Ganges carried to the sea every year 1,000,000 dead bodies. It was then considered by the Hindoos that the happiest death was one found in its waves, and all pious Hindoos who could do so were carried to its banks and placed in its waters to die. The decaying carcasses along its banks were probably responsible in no small degree for the pestilences which formerly desolated the peninsula.

law you go in for protection. If your wife seeks an osculatory exchange you in time become a passive resistor, and"—

# ANTIDOTE FOR MODERN EVILS

## The Best Things Are the Least Expensive.

In a recent address, Rev. Dr. Newell Dwight Hillis, of the Brooklyn Tabernacle, said:—It is often said that our generation is more avaricious, pleasure-loving and immoderate than any of its predecessors. But he who reads the history of the eighteenth century will be cured of depression over the excesses of the nineteenth and twentieth. In medicine it is a proverb that like cures like, and that a little drop that causes a disease will also prevent it. And certainly one page out of the history of Walpole makes the history of the "fast set" of to-day seem tame.

What! Our generation a race of speculators? In the days when the stock waters in London were promoting the Mississippi Bubble the tradesmen and citizens of London lined up on Saturday night so as to be the first in place on Monday morning ready for the Stock Exchange to open. Faithful wives carried these men warm drinks of tea and whiskey during the two nights. Some men fainted in their places, others were trampled to death, and all that the citizen might be the first to exchange his gold guinea for a piece of paper that represented nothing.

### HIGHEST WELFARE INEXPENSIVE.

But the best antidote to the evils of our time is the love of simplicity and the essentials of the life that is more than meat or raiment. This wise King who prayed "Give me neither poverty nor riches" understood the importance of the golden mean. He knew that too much rain of wealth and too much drought of poverty were alike injurious to the fruits of the soul. He knew that God had ordained that the sweetest pleasures should be within easy reach of the shortest hand.

On architecture we have all learned to eschew ornament. The Corinthian capital has just enough leaves, the Ionic column has very simple lines. In literature we know that nothing destroys the oration of the book like verbosity. Every June bride knows enough to wear one color—white—and one spray of blossoms on the bosom. The physicians tell us that walking is far more healthful than riding, and we need no physician to tell us that it is less expensive.

When the poor boy is making his fortune he does not realize that his strength, his energy and his happiness are largely due to his plain living. Grown rich, he eats eight or ten courses, with two or three kinds of wine. That is, he eats the courses for a short time—then the courses carry him into the graveyard. The achievements of Wordsworth, the old German Emperor or Leo XIII., of Gladstone and Tennyson, are the achievements of extreme abstinence in old age. A little fruit, a little cereal and wheaten bread, a glass of milk—

these are within reach of all, even the poorest laborer; anything more is at the peril of the eater. The express companies mark certain packages "at the owner's risk." In life's feast Nature stamps the last eight courses of the rich man's dinner with these words, "At the owner's risk. All responsibility disclaimed."

### HAPPINESS AND CULTURE.

That the highest happiness is inexpensive is seen also in the fact that man's chief pleasure comes from mental culture. Upon reflection, we all discover that our happiest moments, day by day, are those when we are conscious that we have grown in manhood or womanhood through the companionship of great books and conversation with wise friends. Nothing exhilarates like a golden hour of personal growth. What a glow pervades the mind when one approaches the last pages of an inspiring story, poem or oration! The pleasure is not fiery, nor consuming. It is a gentle pleasure, like that experienced when we listen to high music, or look at a rich sunset, or behold a mountain side golden with autumnal splendor. It need not be college culture, for the time is gone forever when culture is limited to colleges.

The aerial highway is for all, poor and weak, bond and free, high and low, alike. All that is asked is the hunger for the feast of beauty that Nature and God hath prepared. For the fountain that bubbles on the mountain side is free to lark and eagle alike, and to the wild deer. And the fountain of happiness is a spring that will bubble in every human heart. What a word is that "the well of water that I will open up is a well of eternal life and happiness."

### HAPPINESS OF LOVE AND SERVICE.

A higher form of happiness is the least expensive—the happiness of love and service. The keenest delight that ever ravished the soul of man is the delight of serving the poor and weak. That wealthy Englishman who took his art treasures to Sheffield was a wise man. He had marbles that had come from Greece, pictures from the galleries of Italy, examples of the French and Dutch schools. He did not take them to a gallery that would spread his name and fame. He founded a school of art for the working people who made knives and forks and spoons. He taught them how to spread beauty over the walls of the dining-room and parlor, and gave them models for beautiful rugs. His gallery is empty, but his heart holds something that it has never held before—happiness—that the world could not give and could never take away. This is the joy of knowledge that the wise man can teach.

gentle and more easily controlled than would otherwise have been the case.

8. Spread them in the way—A demonstration of popular enthusiasm and devotion equal to that of the triumphal entry of a Roman conqueror into the imperial city. Only the official recognition of the ecclesiastical authorities at Jerusalem, which were at the same time the municipal authorities, was lacking. As king Jesus enters the capital city, and as king he must be rejected by the highest authorities of the Jewish nation.

9. Hosanna—Heb. Hoshianah, meaning literally save now, or save. I pray. The syllable na is a particle of entreaty

# LIFE TOLD IN FIGURES

## THE METROPOLIS OF THE WORLD FOR ONE YEAR.

### Gigantic Post Bag is a Remarkable Feature Passengers on Railway Lines.

It requires a closely printed volume of more than 500 pages to tell the fascinating life of London in figures. This volume was compiled by Mr. Edwin Harper, statistical officer of the London County Council.

It tells everything that can be told in statistics of the administrative County of London, and the public service carried on therein during the past year.

The County of London embraces an area of 75,442 acres; it has a population of more than 4½ millions; its parliamentary electors number 621,180, and its borough electors 715,751. Greater London has a population of 7,113,560.

The vital statistics for the county gives the following yearly return of marriages, births, and deaths:—

Marriages, 39,586; rate per 1,000, 17. Births, 129,335, rate per 1,000, 27.9 Deaths, 74,990; rate per 1,000, 16.9. Infant mortality is responsible for a considerable part of the earth's rate, the deaths under one year of age in the course of a single year being 18,600.

### MILLIONS OF PASSENGERS.

In regard to the passenger traffic in Greater London the figures are stupendous. The following table shows the statistics for 1904:—

| Mode of Conveyance. | Passengers Carried. |
|---------------------|---------------------|
| Railway .....       | 298,638,750         |
| Tramway .....       | 433,731,880         |
| Omniabus .....      | 288,965,214         |

Total .....

But even these figures are incomplete, as the omnibus returns include those of only two principal companies, while the railway figures are also incomplete. The number of journeys per head of the population is probably more than 200.

London's post bag is thus described in figures:—

|                                  |             |
|----------------------------------|-------------|
| Letters .....                    | 727,200,000 |
| Postcards .....                  | 66,600,000  |
| Book packets and circulars ..... | 63,800,000  |
| Newspapers .....                 | 33,700,000  |
| Parcels .....                    | 17,391,000  |
| Letters registered .....         | 6,472,000   |
| Parcels registered .....         | 291,215     |
| Express delivery services .....  | 916,744     |
| Telegrams handed in .....        | 28,364,000  |

The figures in the first five lines apply to deliveries only.

### PEOPLE EMPLOYED.

The total number of persons employed in the London postal service is 46,216, of whom 38,659 are males and 7,557 females.

The number and tonnage of vessels entered at, and cleared from, the port of London during 1904 were as follows:—

| Number.       | Tonnage. |
|---------------|----------|
| Entered ..... | 27,098   |
| Cleared ..... | 27,471   |

The trade of the Port of London is valued at:—

|               |             |
|---------------|-------------|
| Exports ..... | £57,780,490 |
| Imports ..... | 17,802,613  |

The exports showed a decrease of £1,827,309 on the previous year, and the imports an increase of £5,258.

### FACTS IN BRIEF.

Telephone public call offices number 3,135.

11,341 motor-cars were registered in 1904-5.

The yearly population of London prisons is 59,464.

The length of sub-ways under streets for the reception of pipes is 11,945 yards.

Road improvements during the year cost the London County Council £5,405,972.

More than 52,000 articles were left in public carriages by forgetful passengers.

# QUEEN'S MAIDS-OF-HONOR

## THEY ARE THE QUEENS MOST CONSTANT COMPANIONS.

### Duties Are Not Arduous, Her Majesty Being a Most Considerate Mistress.

The most coveted position amongst gentlewomen in the kingdom is that of Maid-of-Honor to Queen Alexandra. At the moment, four ladies hold this honorable position. Wherever the Queen goes—to State function, ball, theatre, party, at home or abroad—at least one Maid will be in constant attendance upon her. Yet, though so much sought after, the post is no sinecure. It requires a particularly talented lady to fulfil all the Queen's requirements, says Pearson's Weekly.

That they must be daughters of aristocrats is, of course, essential—usually they are daughters or grand-daughters of peers—but, failing their right to a title, or precedence by birth, they are allowed the prefix of Honorable immediately upon appointment to office.

A Maid-of-Honor's day commences immediately after the Queen has breakfasted. Though her Majesty's private secretary will see to the bulk of the correspondence the morning's post has brought, there will still remain many letters of a more or less confidential and private nature, which the Queen will answer personally, through one of her Ladies-in-Waiting. That alone requires a Maid-of-Honor to be an accomplished linguist, for almost daily Queen Alexandra receives communications from her numerous relatives in different parts of Europe.

Immediately this is over, and if the weather be fine, the Queen, who spends a good deal of her time in the open air, especially when staying at Sandringham and Windsor, will order her carriage for

### A LENGTHY DRIVE.

A Maid-of-Honor always accompanies her Majesty; while on those rare occasions when the Queen goes out on horseback, one of her ladies, similarly mounted, rides with her.

To the management of horses will be added the care of the sick and the poor. For it is on such occasions that the Queen pulls up before some of the cottages of her villagers, and sends her Maid-of-Honor to inquire as to the health and prosperity of the inmates.

Back to luncheon, there is usually some function at which the Queen, and, of course, one or more of her Maids-of-Honor, must attend. If a King or Queen, or anyone of princely rank, is visiting King Edward, the Maids-of-Honor must be present with the Queen, to greet them on arrival. During the season, when Drawing Rooms are held, the Maids take part in the Royal procession to the Throne Room, and are in attendance upon her Majesty throughout the ceremony. At State concerts they sit immediately behind the Queen and her daughters. At State balls they are always close at hand to adjust the Queen's cloak or wrap, or to take her fan or flowers from her.

There is no ceremony, indeed, not even of a semi-official nature, such, for instance, as the presentation of medals by the King to soldiers returned from service abroad, or the

### DISTRIBUTION OF BADGES

to hospital nurses, at which the Queen is present without her Maids-of-Honor. In all Royal processions, moreover, these ladies occupy the carriage immediately preceding that in which the Queen herself is sitting.

Unless requested to join the Royal Family at luncheon or dinner, Maids-of-Honor, after having placed a special bouquet upon the dining-table at the Queen's right hand, retire to the dining-room kept specially for the other ladies and gentlemen of the Household. But

# THE S. S. LESSON

## INTERNATIONAL LESSON, SEPT. 9.

Lesson XI. Jesus Enters Jerusalem in Triumph. Golden Text: Matt. 21. 9.

THE LESSON WORD STUDIES.  
Note.—The Text of the Revised Ver.

## THE LESSON WORD STUDIES.

Note.—The Text of the Revised Version is used as a basis for these Word Studies.

Jesus at Bethany.—The narrative of Matthew at this point in the story of the closing events of the life of Jesus does not follow the exact chronological order. For this we must turn to the narrative of John. John alone records in the correct place the anointing of Jesus by Mary at Bethany. We are to think of Jesus as arriving at Bethany from Jericho on the evening preceding the Sabbath, six days before the pass-over. Here he spent the Sabbath in the circle of his friends continuing his journey to Jerusalem and making his triumphal entry into the capital city on the day following the Sabbath. Luke in his narrative inserts the parable of the Pounds immediately after his account of the healing of the blind man at Jericho; and it is Luke again who alone mentions the incident of Christ's weeping over Jerusalem.

Verse 1. They.—That is, Jesus and his disciples together with a larger company with whom they journeyed.

Nigh unto Jerusalem.—From Bethany where the Sabbath had been spent.

Unto Bethphage.—Mark here reads "unto Bethphage and Bethany at the Mount of Olives," omitting mention of the stay at Bethany. Luke reads "nigh to Bethphage and Bethany at the mount called the Mount of Olives." Bethany was about two miles south-east of Jerusalem. The location of Bethphage is not known, but it is supposed to have been west of Bethany and between that place and Jerusalem.

2. The village.—That is, Bethphage.

An ass tied, and a colt with her.—Mark and Luke mention only the colt on which Jesus afterward rode into Jerusalem. The ass is a very common beast of burden among the rich and poor in the Orient even to-day. It is also used for riding very extensively.

3. The Lord hath need of them.—The fact that this simple explanation would be sufficient to satisfy the owner of the animal seems to indicate that he was a friend, if not a secret disciple of Jesus. Of such, doubtless, there were many in Jerusalem and vicinity at this time. Such also was Nicodemus.

4. That it might be fulfilled which was spoken through the prophet.—Matthew who is writing for a Jewish circle of readers, is very careful to point out in each case the fulfillment of Messianic prophecy in any act or word of Jesus where such fulfillment is involved. He seems bent on proving to the Jews, who looked for the coming of a Messiah and were familiar with the prophecies relating to his coming, that Jesus of Nazareth was indeed that Messiah, the promised Saviour and King of the Jews.

5. The prophecy quoted in this verse is taken from Zech. 9. 9, which reads "Rejoice greatly, O daughter of Zion; thy king cometh unto thee; he is just, and having salvation; lowly, and riding upon an ass, even upon a colt the foal of an ass."

7. Their garments.—The loose, flowing outer garments worn by men and women.

The sat thereon.—On the colt. The wording of Mark is very explicit: "And they bring the colt unto Jesus, and cast on him their garments; and he sat upon him." The wording of Matthew's narrative at this point is slightly ambiguous. We must remember that the colt on which Jesus rode was one on which before no man had ever ridden. In other words, it had not yet been broken and, though possibly full grown, was still permitted to be with its mother. Hence it was natural, if not absolutely essential, that the mother of the colt be brought also, since in company with its mother doubtless the animal was more

As king Jesus enters the capital city, and as king he must be rejected by the highest authorities of the Jewish nation. 9. Hosanna—Heb. Hoshana-na, meaning literally save now, or save, I pray. The syllable na is a particle of entirely added to imperatives. The Hebrew word is used in its original meaning in Psalm 118. 25, which reads, "Save now, we beseech thee, O Jehovah: O Jehovah, we beseech thee, send now prosperity." This verse from Psalm 118 was one sung by those who participated in the solemn procession around the altar at the feast of tabernacles and on other festive occasions. It is in recognition of Jesus as the Messiah that the multitude here address to him the strains of their most joyous festival.

He that cometh.—In Hebrew a single word, habba, and a recognized Messianic title. After permitting himself to be thus greeted and escorted in triumph into the city as the long-expected Messiah, it was, humanly speaking, not possible for Jesus to escape persecution and punishment at the hands of the ecclesiastical authorities who rejected his claims. So long as they refused to accept him as the Messiah there was between him and them a chasm which could not be bridged; and the sad tragedy which soon followed, viewed from the human standpoint, was but the natural outcome and result of the triumphal entry.

10. All the city was stirred.—Careful reading of the different gospel narratives will bring out clearly the fact that the expectation of the common people at this time was at its height, and that the enthusiastic reception which Jesus received at Jerusalem was but a culminating outburst of popular feeling. The request of Salome in behalf of her two sons, James and John; the dispute among the ten as to who was to be the greatest in the kingdom; the insistent cry of the blind man at Jericho; the excited question of the crowds in the city, and the triumphal entry itself were but different signs of this same feeling of expectancy and of popular devotion to the prophet from Nazareth.

11. This is the prophet, Jesus from Nazareth of Galilee.—As the prophet and teacher from Nazareth of Galilee Jesus had become best known and loved by the common people.

12. Them that sold and bought in the temple.—The outer courts of the temple were converted into a marketplace where sacrificial animals could be purchased by worshippers coming from a distance.

Money-changers.—Offerings of money were required to be paid in temple coins, while in ordinary business Roman coinage was used. The money-changers of the temple were men who, for a small fee, supplied the required temple coins in exchange for other money.

13. Den of robbers.—A designation implying that the merchants and money-changers exacted more than was right from those who did business with them in the temple courts.

15. Moved with indignation.—At his calm acceptance of Messianic honors.

17. Lodged there.—Probably at the home of Lazarus.

## GREATEST FLOATING DOCK.

By the end of 1907 the port of Hamburg will possess the greatest floating dock in the world. It is now under construction in the shipyard of Messrs. Blohm and Voss, at Hamburg, and is to have an accommodation capacity of 35,000 tons. Its length will be 52 feet, so that the largest warships and ocean liners will be able to use it. The dock will be eventually towed to Brunsbüttel on the Lower Elbe, where it can be utilized by the German fleet in case of war.

## TO SHOW HIM UP.

The way to show up a man who thinks he knows it all is to get an eight-year-old boy to ask him questions.

yards.

Road improvements during the year cost the London County Council £5,405,972.

More than 52,000 articles were left in public carriages by forgetful passengers.

There are 2,158 miles of streets in the county, and they are maintained at a net cost of £2,109,240.

The names of 167 streets were abolished sixty new streets were named, and ninety-three streets renamed.

The net annual cost of the London police is £1,535,558. The total cost for England and Wales is £4,321,132.

The council spends £1,638,262 every year in maintaining its parks and open spaces, which are 4,945 acres in extent.

Inquests to the number of 7,391 were held. The expenditure on them was £30,411—an average of about £4 per inquest.

The widest street in London is Piccadilly, which at one point is 136 feet wide, of which the roadway takes up 106 feet.

The number of public carriages licensed by the Metropolitan Police is 16,379. The drivers and conductors number 31,912.

There are 6,684 public houses in the metropolitan area. The number of apprehensions for drunkenness during the year was 60,829.

The authorized area of supply of the Metropolitan Water Board is 537 square miles. The total volume supplied during the year was 80,201,619 thousand gallons.

The British Museum has more visitors than any other museum, the total for the year being 954,551. The Victoria and Albert Museum is next in popularity, the yearly number of visitors being 848,969.

## SEARCH FOR PIRATE'S HOARD.

## Ship Fitted Out to Locate Buried Treasure.

William H. Small, of Liverpool, the owner and master of the ketch Catharine which has been fitted for a voyage to the Caribbean Sea in search of treasure, and which is under detention by the Customs authorities at Douglas, Isle of Wight, because of lack of ship's papers, has made an interesting statement regarding his intentions.

The concealed hoard, he says, was buried by Latrobe, a notorious French pirate, about the year 1808 on an island, and consists of specie and jewelry of the estimated value of \$5,100,000.

The secret of the hiding place was revealed by an old sailor while on his deathbed twenty-eight years ago to a ship's doctor named Davison. This sailor, while serving on a merchant ship, was made a prisoner by Latrobe, and to escape death joined the pirate crew. While making for the pirate headquarters they were chased by an American corvette, but escaped and buried their treasure in boxes on the island.

When the pirates again put to sea they were attacked by an American ship, most of them being killed and the remainder being captured.

## BUSH FIRES IN AUSTRALIA.

The remarkable discovery has been made that many of the recent great bush fires in New South Wales and Victoria were caused by the phosphorus paste laid down to kill rabbits. The paste is laid down by the ton in all the rabbit-infested districts. As soon as the mixture dries it catches fire under the heat of the sun's rays and starts disastrous conflagrations.

Elephants without tusks are numerous in Abyssinia.

Babies and pianos cause a lot of trouble because people refuse to let them alone.

Family at luncheon or dinner, Maids-of-Honor, after having placed a special bouquet upon the dining-table at the Queen's right hand, retire to the dining-room kept specially for the other ladies and gentlemen of the Household. But they are again in attendance upon her Majesty immediately she enters the drawing-room—to play the piano, to sing, to read, to play bridge, to do needlework, painting, or any amusement or occupation which Queen Alexandra may decide upon.

Being a renowned musician herself, the Queen spends a good deal of time at the piano, and the Maids are usually chosen because of their accomplishments in this direction. All are excellent pianists and singers. They must needs be so, else they would not be able to play in the duets which her Majesty loves to take part personally, with a brilliancy of style, and absolute accuracy of detail, that would astonish many a first-rate professional performer.

While Queen Alexandra is engaged in poker work, art needlework or carving, in all of which she is

## PARTICULARLY PROFICIENT.

she often desires one of her Maids to read to her. Here, again, proficiency in foreign tongues is essential, for the Queen may require the book to be translated into English, or to be read in the language in which it has been printed. At any rate, the elocution must be of the very best order.

Until the Queen retires for the night, the Maids are not free from their responsibilities. Although very comprehensive, the duties of a Maid-of-Honor are not arduous, the Queen being a most considerate and kindly mistress. And, of course, should one of the Maids marry during her term of office, Queen Alexandra, as has been the custom of the Court for centuries, presents her with \$5,000 as dowry. Her Majesty's consent, however, must be obtained for the match. Most of the Maids marry exceedingly well, their position in the Court naturally bringing them in contact with highly eligible suitors.

## GERMANS TO PAY MORE FOR BEER.

## Many Have Resolved to Become Total Abstinents.

What the Germans call a "Bierkrieg" (beer war) has broken out in large districts in the country, and threatens to spread over the entire Fatherland.

Last session the Reichstag voted additional duties on beer. The imposition was most unpopular, and was resisted to the utmost by a large majority of the House, the members well knowing that the consumers would have to pay it rather than the brewers. Roughly, this extra duty amounted to about 3 marks per hectolitre. What was foreseen has come to pass. The brewers have raised their prices on an average about 5 marks, thus making extra a clear profit of 2 marks per 1,000 litres, and the publicans now want to charge 5 pennings per glass extra, which makes an addition of about 100 marks on 1,000 litres, or twenty times as much as they pay the breweries.

For the present the fight is largely confined to the brewers and publicans. The brewers have formed a ring into which they are striving to squeeze the entire trade. In a number of important towns like Leipzig, Halle, Erfurt, Cassel, Hanover and Frankfurt the war rages merrily.

The conflagration will undoubtedly spread to Berlin, and people by the thousand are making rash promises to abstain wholly from beer rather than pay the enhanced prices. The market value, both of breweries and public houses, has risen since the increase of excise duty passed by the Reichstag.

No doubt men are just as foolish as women, but you seldom hear of a man suing a woman for breach of promise.

# HOME.

## SOME DAINTY DISHES.

**Southern Waffles.**—To one pint of flour add a teaspoonful of salt, and one pint of buttermilk or sour milk, in which a level teaspoonful of soda has been dissolved. Beat well, and cook in a hot, greased iron. This is a very simple recipe, as you will note, but is more satisfactory than many which I tried while living in the north, containing eggs and butter, and milk and baking powder. It all depends on the heat of the iron and the consistency of the batter, which must be like that used for griddle cakes, whether or not they are crisp and tender.

**To Can Tomatoes.**—Pour boiling water over the tomatoes to loosen the skin. Remove these; drain off all the juice that will come away without pressing hard; put them into a kettle and heat slowly to a boil. Your tomatoes will look much nicer if you remove all the bad parts before putting them on the fire, and rub the pulp soft with your hands. Boil ten minutes, dip out the surplus fluid, pour the tomatoes, boiling hot, into the cans, and seal. Keep in a cool, dark place.

**Creamed Cucumber Sauce.**—Pare and mince with a keen knife two cucumbers of fair size. Drain off the liquid without pressing it, letting it drip for two minutes. Have ready a chilled bowl, rubbed with a clove of garlic. Put the mince into it, season with white pepper, salt, a teaspoonful of onion juice, and a tablespoonful of lemon juice. Mix lightly into it with a silver fork a cupful of whipped cream, into which has been beaten a pinch of soda. Serve very cold with fish.

**Baked Tomatoes a la Creole.**—Pare large ripe tomatoes, slice and lay them in order in a bake-dish, alternating with minced green sweet peppers. Dot each layer with bits of butter; season with salt and a dash of sugar to soften the acid of the tomatoes. Stew fine crumbs over all, and bake, covered, fifteen minutes; then brown.

**Hashed Cold Potatoes.**—Chop cold boiled potatoes, season with salt, pepper, and onion juice. Have two tablespoonfuls of good dripping, hissing hot, in a frying pan; put in the potatoes and pat smooth. Cook slowly, turning the frying pan occasionally, that they may brown evenly on the bottom. In about twenty minutes they should be nicely colored and crusted into a thick sheet. Reverse carefully upon a hot platter.

**White Soup.**—Take six potatoes, four onions, four ounces of crushed tapioca, one and a half pints of milk, butter, pepper, and salt. This makes two quarts. Cut up the potatoes and onions, put them into two quarts of boiling water, boil for three-quarters of an hour, rub the vegetables through a sieve. Put back the smooth paste into the same water, add butter, pepper, and salt to taste. Then boil the four ounces of tapioca for fifteen minutes in the soup. Add the milk when fully heated through; a little sweet marjoram with a dash of nutmeg should be put in. The best kind of clam soup is made from this recipe by adding twenty-five chopped clams instead of tapioca; the nutmeg may also be omitted if preferred. Always allow plenty of time for preparing fish; it is one of the most delicate edibles that come to our table. Let it be cleaned with the most scrupulous nicety, for nothing can more effectually destroy the appetite or disgrace a cook than to have it come to the table imperfectly cleansed.

**Little Frosted Cakes.**—Many housekeepers like small cakes to serve with ices. A good plan is to make an ordinary sponge-cake, bake it in a thin layer in a biscuit-tin, cut it while warm into fancy shapes, and ice these with either boiled frosting or one more eas-

round with hay, and then fill with cold water. Put the pan on the fire, and bring it slowly to boiling-point; then remove from the fire, and stand aside until cold.

## PERSONAL PARAGRAPHS.

### A Few Interesting Facts About Well-known People.

The Kaiser's newest role is an enthusiastic collector of picture postcards, and he is said to throw himself into the pursuit with all the native energy that characterizes him in more weighty matters.

Lord Templemore, an Irishman, is the "Father" of the House Lords, of which he has been a member since 1842, when he came of age. He is closely followed by the Earl of Leicester, who succeeded his father in 1842, and came of age in the following year.

The King is probably the only motorist who has ever been regularly driven by a policeman. For some time past His Majesty's motor-car has been in the hands of the police. It may be explained that the King has been employing skilled policemen-chauffeurs from Scotland Yard.

The Countess of Crew, who was Lady Margaret Primrose, the second daughter of Lord Roscerey, shares with her distinguished husband the delights of hunting and shooting. At many of the fashionable race-meetings they form members of the same house-party and attend the races together, though their opinions as to the merits of a horse and its chances of success do not by any means always agree.

The Countess of Warwick is one of the cleverest women drivers of a four-in-hand in Great Britain, and has on one or two occasions had the honor of having King Edward at her side on the box-seat of her coach. Her ladyship also hunts regularly with both the Essex and the Warwickshire hounds. The Earl of Warwick is at the present time abroad on a big game sporting expedition, but when at home he and his beautiful countess are frequently to be seen together as amiable rivals in the field of sport.

Mr. J. M. Barrie is the enviable possessor of a key to the gate of Kensington Gardens, close to his house in Lancaster Gate, and thus enter the gardens at any hour of the day or night. After his delightful story of "The Little White Bird" (the scene of which is laid in Kensington Gardens), had been published, the late Duke of Cambridge, then Ranger of Hyde Park, sent Mr. Barrie the key with a note to say that he thought it only fitting that the author of such a charming book should have that key.

The ex-Empress Eugenie is 80 years of age. She has been so long in the country, where she found a refuge when the revolutionary storm swept away the second French Empire that all English people have come to regard her with a kind of affectionate sympathy. That she is actually "of Scottish descent" is often overlooked. Her grandfather was William Kirkpatrick, to whom tradition gives for ancestor the giant Finn Mac-Cual, a king in Ireland 1,700 years ago. The Empress lives in seclusion at Farnborough Hill, Surrey, and there she has had built a pure white mausoleum, where black-robed Benedictines pray constantly for the welfare of the souls of Napoleon III. and the Prince Imperial.

Among the latest applicants for membership of the Aero Club is the young Sultan of Johore, one of the most progressive and enlightened of Oriental potentates. He carries his love of Western fashions to the point of dressing in English style, driving a smart dogcart, and playing polo. He is a dead shot, and has bagged as many as seven tigers in a day, almost stalking his quarry on foot. Visiting Australia once in quest of sport, he was "held up" as a prohibited lieu, and was not allowed to land at Port Adelaide until sundry yards of red tape had been uncoiled. His originality was strikingly in evidence a few

## NEWS BY MAIL ABOUT JOHN BULL AND HIS PEOPLE.

### Occurrences in the Land That Reigns Supreme in the Commercial World.

It is announced that the Government torpedo factory is to be removed from Woolwich.

Forty-one thousand six hundred and eighty-seven certificates of conscientious objection were received by the vaccination officers during 1905.

During the past twelve months about one hundred and fifty rifle clubs have been formed throughout the United Kingdom. The present number of clubs is 378.

An attempt is about to be made to train unemployed women in market gardening, bee-keeping, fruit culture, poultry keeping, and dairy work.

At Spalding, Mr. Ayre of Cunningham's Drove has had 330 chickens taken by rats during the past fifteen months, as many as thirty-four being taken in one night.

Speaking at the speech-day at the Normanton Girl's Secondary School, Mr. P. Tew, of Wakefield, said that woman's first duty was to be graceful and pleasing.

Relic hunters have greatly mutilated the gravestone in Conway Churchyard which is associated with Wordsworth's poem, "We are Seven," and steps are to be taken to protect the stone from further damage.

There are yearly imported into this country over 800,000 pounds' weight of feathers, and it is calculated that forty million birds die annually to supply plumage for decorating the hats of women in Europe.

Viscount Ridley's Marriage Act Amendment bill allows the marriage of a seaman to take place by license in the diocese of the port where his ship is lying, if he has been resident for fifteen days on the ship or partly on the ship and partly on shore within the diocese.

At Liverpool a man named Thomas Molyneux was fined £1 and costs for burying a dog alive.

Automatic gas-meters in Manchester collected 123 tons of pennies last year, which represents £59,773 12s. 2d.

Charged at Romford with stealing an apple valued at a penny from an orchard a laborer was fined 10s. and costs.

The Colonial Secretary has authorized the Crown Agents to invite tenders for the erection of wireless telegraph stations in the West Indies.

Mr. L. V. Harcourt states that the new War Office buildings in Whitehall will not be available for the use of the department until Christmas.

Undertaking to live for twenty-one days on four meals a day of lined meat and fish, a man living at Harrow has offered himself to Messrs. Armour for exhibition in London.

It was stated during the hearing of a damage suit at the City of London Court that the steam tug Hilda was known to Thames watermen as the "Mad Mullah," because of her excessive speed.

There is a blind news agent at Northampton who has supplied customers in several adjacent villages for the last twenty years. He scarcely ever delivers a wrong newspaper, despite his large round.

Owing to the dishonesty of a lawyer, Lord Amherst of Hackney has incurred the loss of about £100,000.

The Earl of Ellesmere is laying out a model colony on the banks of the Bridgewater canal at Worsley.

A Forest Gate boy has been presented with a spirit flask for winning a race at a Sunday school treat.

A number of Dutch farmers are shortly to visit Essex for the purpose of studying English methods of farming.

# ON THE FARM

## HARVESTING SOY BEANS.

The method of harvesting soy beans will depend on the use that is to be made of them. When grazed down by sheep or cattle, it is simply a matter of turning in the animals. But cattle waste much of the crop, hence, if grazed down by this class of stock, the animals should be removed when they have satisfied their needs. Swine and sheep may be given access to the crop at will when the season for grazing has arrived. Of course, with swine, that season is not until the crop is practically mature.

Various methods of harvesting the crop have been practiced, as for instance, cutting with the field mower, self-rake reaper, the binder, the corn harvester and the bean harvester. Which of these modes will answer best will depend largely upon the way in which the crop is grown, and the exact use that is to be made of it. The mower is best suited to harvesting a crop broadcast and to be cut for hay. The self-rake reaper can best be used in cutting the crop for hay, for soiling, for silage or for seed. The binder is best adapted to harvesting the silo crop or the seed crop, but can only be used satisfactorily in harvesting tall growing varieties. The corn harvester can best be used when the beans are grown in the line of the row with corn for silage, but may also be used in harvesting tall growing varieties grown in rows without admixture. The bean harvester is only used when harvesting the crop for seed, and is exceptionally well adapted to harvesting the small varieties.

The cutting of the crop for soiling may begin at the season of early bloom and continue until it approaches maturity. For soiling it is probably at its best when the pods are forming. For silage the crop may be harvested any time from full bloom to early maturity, but cutting toward the latter stage is preferable, since more grain is then furnished and the greater woodiness of the stems is less objectionable when fed as silage than when fed as soiling food. For hay, the crop should be cut when in full bloom or probably a little later, but assuredly before the leaves begin to fall.

Soy bean hay is not easily cured, if the plants are much exposed to the sun after being cut, many of the leaves will be lost and the stems do not readily lose their moisture. Much handling in the curing is also attended with much loss of leaves. The aim should be to cut when free from dew, to rake sufficiently wilted after the tedder when one has been used, and to put up small cocks narrow and high until cured. In these it is usually necessary to let the plants remain for several days. The crop is not nearly so easily damaged by rain as cowpeas. The average yield of cured hay is about two tons per acre.

As the stalks yield up their moisture very slowly, there should be no haste in storing or the mass may heat and spoil. This may be prevented by storing the bean hay and some kind of cereal straw in alternate layers. This will also improve the palatability of the straw. The hay when well cured has a high feeding value.

The crop may be threshed with the flail, with the bean thresher or with the grain separator. The bean thresher does the work well, but is slow. The grain separator when used calls for a readjustment of the concaves and of the teeth of the cylinder, to prevent breaking the crop. On good land, the yield is fully 20 bushels per acre. The beans must not be put in deep bins or they will heat and spoil.

## PASTURING MEADOWS.

A common practice among farmers of the present day, and more so the eastern

**A Good Plan.**—To make an ordinary sponge-cake, bake it in a thin layer in a biscuit-tin, cut it while warm into fancy shapes, and ice these with either boiled frosting or one more easily made with confectioners' sugar. These can be so decorated as to suggest that they are all quite different cakes.

**Fancy Icings.**—For boiled frosting, cook a cup of sugar with a third of a cup of water, without stirring, until it forms a thread. Beat one large egg-white stiff, add a pinch of cream of tartar, and slowly pour the syrup, a few drops at a time, into the egg; flavor, and beat until cool enough to spread; use immediately.

Confectioners' sugar makes icing more simply, and is better for summer use, to make it, mix one cup of sugar with the unbeaten white of an egg, and either one tablespoonful of water or as much fruit juice—orange, lemon, currant, etc. To make fancy cakes, some rounds may be dipped in this icing, and when cooled on buttered paper half a candied cherry may be put on some, half a blanched almond on others, and a pistachio nut on still others. Almonds may be chopped and sprinkled on the icing; or a little melted chocolate may be stirred in with the egg. Fancy colored icings may be made by using fruit paste in small quantities. With a violet icing a candied violet may be put on top of the cake; with rose color a bit of candied rose petal; with green, a pistachio nut. Of course the flowers must correspond with the decorations.

Coffee icing is very nice, and so is maple. The first is made by merely using a little very black coffee instead of water when the sugar is mixed; the other is maple syrup boiled and stirred into a beaten egg white.

#### HINTS FOR THE HOME.

A thin knitting needle is better than a fork for testing vegetables in cooking, as it leaves scarcely any mark.

Apples are excellent food for us all, especially brain workers, and so everybody who has much intellectual work to do should eat freely of this fruit.

When making jelly with fresh fruit, the juice should always be allowed to drip into china or glass vessels. If a tin one be used the color of the jelly is spoiled.

To keep cheese from becoming mouldy wrap the cheese in a cloth that has been dipped in vinegar and wrung as dry as possible; keep this in a cool place.

In giving milk to children always use either glass of china vessels, not metallic cups of any sort. The greatest cleanliness must be observed in their management, rinsing all used glasses, first in cold and then in warm water.

When ironing the best thing with which to rub the irons is a fairly large pad of folded brown paper. This will also serve to test their heat. Besides this a cloth should be kept at hand on which to wipe off any flakes of soot or dirt. A small piece of wax is excellent for producing a gloss when rubbed on the iron, and paraffin has the same effect also.

**Kerosene for Woodwork.**—When washing woodwork, if kerosene is put in the water instead of soap, fly specks and grease will come off quicker and easier. A good quality of kerosene cleans windows and mirrors best, but a poor quality, or oil with dregs in it, leaves the glass streaked. Soap must not be used with kerosene for glass.

**Use of Knitting-Needle.**—Keep a knitting-needle in your kitchen; it is most useful. It is the best thing to test cakes with, also for trying potatoes. It should also be used for beets, which lose their sweetness, if pierced to the bleeding stage with a fork. To test milk it is also of use. Dip it in a jug of milk, and take it out in an upright position. If the milk is pure some of the fluid will remain on the needle; if adulterated with water no milk will stick to it.

**New Glass.**—When you buy new tumblers, wine-glasses, decanters, etc., you should never use them until you have "toughened" them as follows: Place the tumblers, etc., in a large pan, pack them

of sport, he was "held up" as a prominent lieu, and was not allowed to land at Port Adelaide until sundry yards of red tape had been uncoiled. His originality was strikingly in evidence a few years ago, when, as the result of an accident with a horse, the whole of his incisor teeth were destroyed. The Sultan had them replaced by teeth of solid gold, into each of which a large diamond was set. As the slightest flicker of a smile entirely uncovers them the effect is a weird one to the beholder, especially when the sun catches the gems and makes them flash fire.

#### THRIFTY ITALIANS.

**Their Bank Savings Estimated at \$1,000,000,000.**

It is figured the total savings of the people in Italy now represent not less than one thousand million dollars. Since the year 1822 there have been founded in Italy 222 savings banks, of which 184 are still in existence. There are two kinds. The first, especially numerous in Tuscany and in the Roman provinces, are generally incorporated as stock companies, and wholly independent from other institutions, while the others, very common in the northern districts, are generally founded by and dependent upon Government authorities. In the southern provinces most of the savings banks were originally loan institutions on grain, depending upon their respective communes. Somewhat of a similar nature are a few savings banks established by provincial councils and some by labor unions. There are besides five banks, the origin and management of which are quite distinct. These are the Milan Savings Bank, whose officers are appointed by the City Council, the Province of Lombardy and the Government; the Palermo and Carrara Savings Banks, under Government control, and, lastly, those of Naples and Siena, depending, respectively, from the National Bank of Naples and the "Monte dei Paschi."

The aggregate sum deposited in the 182 savings banks existing at the end of 1904 came to \$355,400,000, which sum was guaranteed by a reserve fund of \$56,400,000, making a total of \$411,800,000. This shows a substantial growth from 1830, when the deposits were \$1,260,000, and from 1870, when they aggregated \$65,540,000. The Savings Bank of Milan represents about one-half of the total deposits, having at the end of 1895 deposits of about \$153,400,000, and a reserve fund of over \$20,000,000. To the above sum of \$355,400,000 must be added \$198,800,000 deposited in the postal savings banks, making an aggregate amount of \$554,200,000. These figures do not represent the total savings of the kingdom, for a great deal of money is deposited in other financial institutions and people's banks.

#### IS THERE A TRAITOR?

**Foreign Power Said to be in Possession of Britain's Secrets.**

The London correspondent of the Petit Parisien is responsible for a strange story of grave anxiety at the Admiralty. The utmost secrecy has been observed, but, according to special information obtained by the writer the officials are convinced that numerous and extremely important leakages have occurred during the past few months. All the details of a new quick-firing naval gun, from which the best results were anticipated, although the trials are not yet at an end, are now in the possession of a foreign power, and other documents of great value have disappeared in the same way. The correspondent adds that this extremely disagreeable discovery is causing all the more concern among the officials at the Admiralty as they have not yet ascertained the exact proportions of these leakages, and how far the plans for defence of the British ports may be known to the power in question.

of sport, he was "held up" as a prominent lieu, and was not allowed to land at Port Adelaide until sundry yards of red tape had been uncoiled.

A number of Dutch farmers are shortly to visit Essex for the purpose of studying English methods of farming.

After holding the position of headmaster of the Westminster City School for 33 years, Mr. Robert Goffin is retiring.

After 28 years' service in every part of the metropolis, Mr. E. Wangford, London's oldest fireman, and the senior superintendent in the Fire Brigade, has retired.

James Willis, who was coachman to the father of Gen. Sir John French, has just died at Ripple at the age of 95, leaving 76 descendants, including 31 great-grandchildren.

#### SENTENCE SERMONS.

The leisure often determines the life. It's no use holding up a pint cup for a quart of blessing.

You cannot prove your faith in God by your doubts of men.

Common courtesy is often an uncommon kind of Christianity.

To be ashamed of virtue is a step towards being proud of vice.

Many a man thinks he is orthodox when his mind is only atrophied.

Sow your seed in ruts, and you will not be bothered by a harvest.

A real kindly feeling never has to wait long for a chance to get busy.

There is nothing sacred in any day if there is not something sacred in all.

Dancing is always the worst sin in the decalogue to a wooden legged man.

The only way to commit the commandments to heart is to commit them in daily life.

It's easy to see what will become of a man's humility once he becomes proud of it.

The man who cannot find heaven on the street is not likely to find it in the church.

The boy who is given a start at the top of the hill usually makes a record coming down.

It's not the making of money but the failure to make manhood that must be condemned.

The best way to keep the robe of righteousness from raggedness is to wear it every day.

The magnate may conduct courses of study on the moral time card and still miss the train.

When a man finds that religion might restrict his revenue he begins to talk about its incompatibility with his reason.

It's always the man who kicks up his heels with the greatest abandon who demands that newspapers shall exercise the greatest restraint in describing the occasion.

#### PASTURING MEADOWS.

A common practice among farmers of the present day, and more so the eastern farmer, is to pasture the meadows as soon as the hay crop is cut off, writes Mr. P. Wiley. It is an old practice and a bad one. It has been practised for generations, but not to such an extent as at present. To turn stock immediately upon the meadow is a sure ruination of next year's crop of hay and relieves the farmer but little in the long run. In July and August pasture gets short, especially in a dry year and to see the green grass growing is indeed a great temptation. On very rich soil I do not say that it is not proper to pasture, providing that the young shoots are given a chance first to gain size and luxuriant growth.

Every farmer should sow plenty of fodder corn in early spring and summer so it can be fed during the shortage of pasture. In a great many sections, no doubt, farmers have learned from experience the folly of early pasturing of meadows. I believe it perfectly right to allow stock to graze on mowed meadows not earlier than September 1, providing it is not carried to extremes. I have observed in a great many instances when winter set in that the ground would be gnawed as smooth as a house floor. This leaves the young plant roots unprotected and the damage done is extensive.

I have a number of neighbors, successful in a way, whose first act after removing the hay is to turn in every head of live stock they have. Experience has shown this is very unprofitable. My method is to allow the stock to pasture the grass for moderately short intervals at a time. In this way there is sufficient top left to insure winter protection to the roots, some soil rebuilding and a big hay crop the succeeding year.

#### CLOUD-SHOOTING.

"Cloud-shooting" is becoming a regular form of artillery practice in many Continental countries. The object of this atmospheric gunnery is to dispel threatened hailstorms. The most recent form of gun is a funnel-shaped barrel of iron with a broad muzzle, so that the discharge shall be distributed over a large space as possible. The effect of the discharge is to create a small, but powerful whirlwind, which, it is found, disperses clouds that would otherwise descend in hail. So strong is the gust of wind sent upwards that it sometimes kills or disables birds flying at great heights overhead.

#### THRIFTY.

"Mamma, can I go to bed an hour earlier than usual to-night?"  
"An hour earlier! What for?"  
"I want to say my prayers for three weeks ahead."

# INDUSTRY OF THE INSECT

CREATURES MAY HAVE BUSINESS OR SIMPLY BE EXERCISING.

Even the Smallest Have Parasites and Diseases—Parental Forethought for Young.

I doubt if anyone half realizes how life teems in the world unless he has thrown himself down in the grass or under an oak or willow on the moss, and has lain there for an hour or more watching what goes on about him, writes S. Baring-Gould in the London Leader. If he be observant he will find himself, like Gulliver in Lilliput, with multitudes of active beings swarming about him engaged on their several pursuits—seeking food, in quest of mates, or merely promenading to exercise their limbs.

There is an old story of a king and his servant; the day was hot, his majesty was tired, and he expressed the desire to sleep. Accordingly he lay down in the herbage and was soon snoring. But the servant sat by his master, watching, and to his surprise saw a little creature like a tiny newt issue from between the lips of the king and begin to run about. A little trickle of water was near, and the newt crossed this on a bent leaf of grass and disappeared among the flowers and foliage beyond. After an hour the servant saw the small creature reappear beside the water, when he removed the grass suspension bridge by which he had crossed. The newt ran up and down the bank in great perplexity till it discovered a great laid across the stream. It crossed that, ran to the sleeping king, darted into his mouth, and

## HIS MAJESTY AWOKE.

"Have you slept well, sire?" asked the servant.

"Yes; I have had a pleasant dream. I thought I was walking in a fair land, where the buttercups were of the size of the sun and the bluebells as big as the largest cathedral bell. And I saw before me a mighty river, crossed by the most beautiful bridge conceivable, as of green grass, but perfectly solid and not likely to break. Having traversed the river on this bridge I entered a wonderful world, peopled by the most marvelous beings, full of cleverness and mother wit, and— But I cannot tell you all. Suffice it to say I found great difficulty in getting back, for the green bridge had been carried away by the torrent, and I had to find another."

Then the servant knew that what he had seen was not a lizard or a newt but the soul of the king on its wanderings whilst he slept.

Now, I venture to say that anyone who on a hot July day will lie as suggested in the grass, among the heather on a moor, beneath a tree in the wood, will find his soul transported into a world of which he had not dreamed, and will see sights of which he had no previous conception. He will be visited by a vast number of insects, quite harmless, moved by curiosity, desirous of seeing if anything in their way can be got out of him, but he will also see a greater number going about their own business, unconcerned by his presence, intent only on their own affairs, it may be seeking food, it may be merely

## PASSING THE TIME.

And all the insect world seems to be so happy, to be without a care, and yet it has its tragedies and sorrows. Just then went by the ichneumon fly, very small, but capable of compassing the destruction of many a caterpillar, though not one-thousandth part of the size of a single victim. This fly perches on the back of the grub, pierces its skin with a sharp hollow needle wherewith

yielding a richer crimson. This year the roses have been attacked with the aphids, the green fly, very seriously. Spare every ladybird you see. It is the natural enemy of the aphids, as the aphids is the enemy of the rose.

## OVER A CLIFF.

Captain Glasfurd's Experience With a Bear.

To go out after game in the hill-country of India means that the hunter will find game, says Captain Glasfurd, the author of "Rifle and Romance in the Indian Jungle." One morning, followed by his shikarees, or native hunters, Captain Glasfurd was out looking over a rough hillside for bear. He had passed round the curve of a high ledge, when he found himself in front of a large, low-roofed cave. On the sandy floor of the entrance to the cave were the fresh incoming tracks of a bear.

Our position was a sufficiently hazardous one. The ledge was extremely narrow, overhung by rock, and on the verge of a perpendicular face of sandstone. We began quietly retracing our way. But scarcely had we taken one step when a horrible disturbance occurred in the depths of the cavern. This hastened our movements; but our haste was as nothing compared to the rapidity of the eruption that was going on behind us as the bear came yelling and scrambling out of the cavern. For me there was nothing but a swift whip round to face this horrid denouement, my rifle not even permitted to reach my shoulder. To right, a blank wall of smooth cliff-side; to left, a swift descent to the unknown over the edge of the cliff, and in front a raging, roaring mass of black hair shooting toward me with the speed of a runaway motor-car.

Bang! goes my rifle, and the next moment I am enjoying a strange, slowly-moving nightmare, one of the most vivid of its memories being the smoothly brushed appearance of the bear's forehead as her jaws closed on my right thigh.

We bump and whirl swiftly downward. A semi-unconsciousness held me, and then came a shock. I saw the body of the bear hurled far from me into space, and I realized that I was clutching at something.

It was a little tree that I gripped in the strength of despair. I was hanging to it, head downward, on the face of the cliff itself.

My Jai orderly's voice sounded in my ear. The plucky fellow crawled down that awful slope and managed to seize my hands. I was somehow drawn upward to the ledge. Then my gaze fell upon that solitary sapling, rooted in some mere chink in the rock. There was no other tree within many yards.

Two months on my back afforded scope for thought as to my extraordinary piece of luck.

## FREDERICK TEMPLE'S CHILDHOOD.

His Mother Was His Teacher Before He Went to School.

Frederick Temple, Archbishop of Canterbury, was born in the Ionian Islands. Although he was taken to England at nine years of age, his recollection of his early years was vivid, and the influences on him of his home education and surroundings were permanent. In his "Memoirs" his sister tells of his early education.

My mother was considered a beautiful woman, with gentle manners, knowing no language but her own, not clever in the sense of brilliant at all; but thoughtful, with excellent judgment, great sense of personal dignity, governing her family without any effort, without severity. Her word was an unquestioned law.

She was the only teacher that my brothers and I had previous to the time when they went to school. She taught us to read and write; she taught arithmetic, with very little knowledge of

# \$1,000,000 FOR EYESIGHT

THE PATHETIC STORY OF A BLIND MILLIONAIRE'S LIFE.

Mr. Charles Broadway Rouss Has Had a Strangely Adventurous Career.

There is no story in the history of million-making at once so romantic and pathetic as that of Mr. Charles Broadway Rouss, who, after struggles which would have broken the heart of nearly every other man, fought his way to riches, only to find himself in his old age stricken with total blindness and all the world turned to darkness for him.

"Paralysis of the optic nerve," learned specialists called it, and not one of them could hold out any hope that the self-made Croesus would ever see again. Here was a particularly cruel illustration of the irony of life; for not all his millions, the long and painful accumulation of years, could buy back the eyesight which he valued so little before he started on his long climb to fortune.

But Mr. Rouss was not the man to abandon hope without a fight. In a thousand papers circulating in every part of the globe he offered the stupendous reward of \$1,000,000 to anyone who would restore his sight. From every point of the compass there poured in upon him

## THOUSANDS OF APPLICATIONS.

from quacks, fanatics, and faith-healers—the whole tribe of medical impostors—who promised to cure him if he would but give their nostrums and methods a fair trial. These applications were carefully weeded out, and Mr. Rouss decided to give a few of the more promising of them a trial. For this purpose he engaged the services of another blind man, similarly afflicted, and for \$750 a week his proxy underwent one treatment after another—but all to no purpose. Then and only then, Mr. Rouss resigned himself to spend his remaining days in darkness, finding what solace he could from the wealth he had amassed.

Mr. Charles Broadway Rouss, whose millions proved thus powerless to restore to him the gift of sight, the heritage of the poorest, has had a strangely adventurous career. Born just seventy years ago in Maryland, the son of a comparatively well-to-do man, he decided at a very early age to make his own way in the world. At fourteen he left school and found employment in the store of Mr. Jacob Senseny, of Winchester, where for a dollar a week and his board he toiled early and late, until, as his wages grew,

## HE WAS ABLE TO SAVE \$500.

On this modest capital, which seemed riches to the ambitious youth, he opened a small store of his own, and one day startled the inhabitants of Winchester by the bold announcement, "We shall keep everything calculated to make a man fashionable, a lady irresistible, and a family comfortable." Far and wide over the Lower Shenandoah Valley this striking notice was circulated, and the young man before long found himself doing a roaring trade and making money rapidly. Then, just as the foundation of his fortune seemed to be securely laid, came the Civil War and a general paralysis of trade. Winchester fell into the hands of the Federal Army; and the young shopkeeper was compelled to sell his stock at an enormous sacrifice and take up arms for the Confederate cause.

When the fighting was over he returned penniless, to his father's farm, where, for a time, he worked as a laborer, until he felt impelled to make a fresh start in life. Accompanied by his wife and child and with \$30 for all his capital he set out for New York, where after finding himself

## ON THE VERGE OF STARVATION,

## PERSONAL NOTES.

Gossip About Some Prominent People on the World's Stage.

Lady Charles Beresford collects ball-programmes as a hobby specially favoring those painted by hand or designed by lady-artists.

The Czarina of Russia is fond of swimming, and when staying at the St. Petersburg Winter Palace indulges in the recreation in a splendid bath of white marble.

The Shah of Persia is supposed never to be off Persian soil. As a matter of fact he never is, though he does travel. To his boots there is a false sole; between the false and the real a portion of the holy earth of Persia is packed. He thus strictly obeys the law.

A good story is told of little Princess Mary of Wales. It was said that one of her aunts, wishing to test her knowledge when she was beginning to talk fluently, pointed to her feet, and asked what she called them. "Ven I has shoes on vey is feet," was the answer. "Ven vey is bare vey is Trilbies."

One of the proudest treasures of King Alfonso's nurse is a gold ring in which is set the first tooth shed by her Royal charge. It bears the inscription, "My tooth to my nurse, Alfonso XIII." In making this presentation His Majesty followed a custom which has prevailed in the Spanish Royal family for centuries.

The prettiest hand in the world belongs to Mdlle. Marie de Castellane, member of the famous French family of that name, and one of the reigning beauties of Paris. The countless, who gets her title through the dethroned Royal family, long ago dropped the family crest and went upon the stage, where she is known by another name.

Edward Grieg, the great Norwegian composer, when only six years old learnt the piano and the theory of music from his mother. At nine he composed some variations on a German melody, but he was told to stick to his lessons. As a boy he thought of being a painter, but at fifteen it was decided that he should go to Leipzig to study music thoroughly, as he showed such a decided gift.

Sir John Madden, Chief Justice and Lieutenant-Governor of Victoria, who is now enjoying the first holiday of his life in London, is a native of Cork who has spent fifty years in Melbourne. He was the first student of the Melbourne University, of which he is now Chancellor, to gain the degree of LL.D. As Dr. Madden he soon became a leader at the Melbourne Bar, a brilliant advocate, M.P., and Minister of Justice. He was also an accomplished athlete and amateur boxer.

Marshal von Wrangel is one of the most autocratic officers of the German army. On one occasion he noticed that a young cavalry lieutenant was wearing a pair of spurs that were not of the regulation pattern. The Field-Marshal promptly gave him twenty-four hours' arrest. The lieutenant, who belonged to the self-sufficient school of officers, took it upon him to point out that the Field-Marshal was wearing just such a pair of spurs. "Good, my son," was the reply; "you can just do twenty-four hours extra for my shortcomings."

The Earl of Egmout had a fairly adventurous career before he succeeded to the family honors in 1897, for he served for twenty years before the mast on vessels trading to the East, and has been, among other things, a member of the London Fire Brigade. He has no children by his marriage to a lady of South Carolina family, and his heir is his brother, who has, like himself, been a sailor, and has also served in the Natal Mounted Police. Cowdray Park, the once magnificent family seat in Sussex, was purchased by the sixth earl some sixty years ago.

General Weyler is the most popular soldier in the Spanish army, where his real ability and passion for efficiency are appreciated by officers and private alike. When a lieutenant-colonel in a crack regiment General Weyler wooed and won a humble peasant girl of rare beauty, who, like himself, was a native

small, but capable of compassing the destruction of many a caterpillar, though not one-thousandth part of the size of a single victim. This fly perches on the back of the grub, pierces its skin with a sharp hollow needle wherewith it is furnished, and the force of the stab projects an egg under the skin into the flesh.

As each wound is made the caterpillar shows a certain amount of uneasiness, but does not intermit its eating. The eggs of the ichneumon are speedily hatched within the body of the grub, and they devour the fatty portions of the caterpillar, shrewdly leaving the vital organs untouched. When the time arrives for the caterpillar to change into chrysalis the ichneumon grubs eat their way out of their foster mother and at once spin for themselves a number of yellow cocoons, among which the dying caterpillar is often hopelessly entangled and where it expires.

I once gave a great scare to an old lady. I saw an ichneumon fly perch on her hand, and she exclaimed that she had been pricked by it. So I gravely described to her how that insect provides for the young of its kind. The old lady, who was very fat, turned green, and, looking at me with a ghastly face, asked, in a voice that quivered with emotion: "How long do you think it will be before they reach my vital organs?"

#### IT WAS A RATHER CRUEL JOKE.

but I never for a moment supposed that she would take the matter seriously.

Wonderful it is that the insects should have their maladies like mortal men, and that these maladies should be due to those confounded microbes of which we have heard so much and of which we are in terror of our lives.

Almost every caterpillar has a silk-forming organ—a double organ it is: there is a vessel containing a gummy substance from which the silk is spun, and as there are two of these silk-making organs, the result is a double thread. If these threads lie parallel to each other the silk is good. But there is a silk and silk, and the silk of most caterpillars is not valuable.

The production of the silk of the silkworm is the great industry of the Southern Cevennes, where every farmer grows acres of mulberry trees, and all members of his family for the few weeks of the hatching out of the silkworms to their spinning cocoons are busily engaged.

A few years ago the silkworms were attacked by a disease called fibrine that threatened the extinction of the industry, and a panic fell on the inhabitants of the Cevennes. M. Pasteur was sent for. He came down and examined the moth, and discovered that the malady was due to a detestable little living organism—a microbe. In short: that there was no other way of getting rid of the sickness than by

#### STAMPING IT OUT.

Now, every moth when it lays its eggs is enveloped in a little bag, labelled, and sent to a laboratory there to be pounded up and examined through a microscope. If the germs of fibrine be detected, moth and eggs are consigned to the fire. At Alais is a bronze statue to Pasteur, who is represented waving a twig of mulberry, with caterpillars on it, and adoring Cevennes peasants kneeling at his feet. He saved the industry. Look at the little hardwood plants, as well as the shrubs and trees, and see how the leaves are shuddered with galls. Provisions these, made by insects for their young to live and thrive, whilst they themselves gad elsewhere. In the Cevennes just mentioned was once a great industry now extinct. The almost barren limestone tracts and mountains grow the dwarf kermes oak, evergreen with spiky leaves, like holly. On the underpart of the leaf lives the Kermes insect, much as a tick does on a dog or sheep. It blows itself out with the juices of the plant, but transforms this juice into a brilliant crimson, which was used by dyers until the cochineal insect was discovered to take its place as

questioned law.

She was the only teacher that my brothers and I had previous to the time when they went to school. She taught us to read and write; she taught arithmetic, with very little knowledge of arithmetic herself, by steady repetition. She had a key to the sums in the arithmetic which gave the answers. If a sum was brought to her and the answer was wrong, she drew her pencil through it and made no further remark. It had to be done again till it was done right. The sum to-day was repeated to-morrow, and so on, until perfect accuracy was obtained.

When it was time for my brothers to begin Latin, the same system was adopted. She could not pronounce it, but Frederick had to learn a few lines each day, always repeating the old until seven or ten pages had been learned. Then the first four or five pages would be left and a further advance made.

This went on day by day and year by year until he was twelve years old; and he went to school knowing his grammar perfectly, as no other boy knew it.

Eulrid was the same. She did not understand a word. He began to understand as he advanced, and could substitute one expression for another, or change the order of letters. She interposed and corrected him. He would reply, impatiently, "It is all the same." "Say it," she ordered, "precisely as it is here!" touching the book.

The boys were under an absolute rule of courtesy. They were taught that courtesy was ever to be maintained in the family. We were not at all rich, and lived very plainly. Butter was expensive, and we lived on dry bread, except that now and then we were allowed some jam, or, a rarer treat still, some "dripping." The boys were taught to eat whatever was given them.

#### NOT SO LONG AGO.

Telephones, Autos, Trolley Cars, and Electric Lights Were Unknown.

Forty-five years marks, we may say, the man of middle age, yet the retrospect of the last 45 years will point to many of the most remarkable, and as now considered, indispensable, inventions and devices of civilized life. These, the middle-aged man, as a boy, did not even dream of. Going back to the time when the man, now 45, was five, we will find that he and all the rest of mankind lived very satisfactorily without telephones. Scarcely a house of any considerable size would now be deemed habitable without one. When communication with a distant point was needed quickly the telegraph was brought into requisition. If great haste was not requisite, a letter sufficed.

The expedition with which business is now transacted was obviously impossible without the telephone, although other inventions, then equally unknown, contribute much to the hurry of to-day. The electric light, like most other electrical inventions, was as distant as the telephone; though gas and oil, principally the former, made what was considered satisfactory illumination. Great construction works could not, however, be carried by night with gas, while now, by are light, they may. In that day the miner toiled underground by the dim flickering illumination of a candle. At present, large mines are strung with incandescent electric lights and kept practically as light as are surface establishments by night.

Forty years ago, a speed of thirty miles by rail was deemed wonderful, and continuous trips of more than 200 miles were rare. Changes of cars were frequent on long-distance journeys, and as the segments of road were in those days controlled by different companies, there was much transferring of passengers and baggage, and buying of new tickets. Dining cars were unknown, and wayside lunch counters, with their familiar gongs, and summary "All aboard" terminations to unsatisfactory and abbreviated repasts, were the rule.

until he felt impelled to make a fresh start in life. Accompanied by his wife and child and with \$30 for all his capital he set out for New York, where after finding himself

#### ON THE VERGE OF STARVATION.

he found some small and ill-paid employment. He contrived, however, to save a little money, and in time was able to make a second modest start in business, this time in New York. Here again Fortune smiled on him; every year saw his business expanding, and within a few years he was once more a flourishing man. Then, as ill-luck would have it, came the panic of 1873, one disaster followed another, and, unable to collect the thousands of dollars owing to him, he had to shut up his store.

Still undefeated, he was able to rescue sufficient from the wreck to make a third start in a small room in Church Street, New York, for which he paid a dollar a day. This was the turning-point in his career. Fortune had now exhausted her malice and smiled consistently on the man she had been powerless to crush. Gradually, but surely, his business expanded and

#### HIS FORTUNE GREW;

premises after premises became too small for his expanding business, until he was paying \$30,000 a year for rent alone in Broadway; and when this establishment in turn became too small, he built a palatial structure at a cost of \$1,000,000—one of the most magnificent business places in the world.

Here, in spite of his blindness, Mr. Pous conducts a colossal business; he employs an army of many hundreds of assistants, and his turnover exceeds \$15,000,000 a year. In Fifth Avenue he owns a mansion which a King might envy, crowded with treasures of art gathered from all parts of the world; he makes a lavish use of his hard-earned riches in many charitable directions; he enjoys universal respect and generally, has all that life can give for his enjoyment—except the gift of sight; and this not all his millions can buy or compensate for its loss.

#### FIRE IS ESSENTIAL TO HUMANITY.

What It Means to the Aborigines of Australia.

The invention of fire was a great step in the progress of the human race, and it is not strange that so many uncivilized peoples have superstitious notions connected with it. When the Australian aborigines camp for the night a fire is lighted in front of each hut—the huts being made of boughs, with the openings carefully turned away from the wind—so that the feet of those who are sleeping within may be kept warm.

If one of their relatives has lately died an additional and solitary fire is lighted at a little distance from the huts, where the ghost of the deceased may sit and warm himself without disturbing the family hearth.

This same love of warmth creates an aversion to early rising, and natives are seldom seen abroad until the sun has been out one or two hours above the horizon. In wet weather it is usual to carry in the hand, beneath the kangaroo skin, a piece of smouldering wood, which compensates the bearer in some sort for the want of a flannel waistcoat, and enables him to light a fire at a moment's notice.

Each tribe possesses a territory of its own, and each family of the tribe has its own special tract of land within that territory. Here a man can light his fire and build his hut without fear of molestation. It is, in fact, his paternal estate, so that the word "fire" conveys to an Australian the same meaning of fatherland or birth-place as the word "hearth" conveys to a European, and is used by the aborigines in that sense.

If a boy doesn't earn more than he gets he will never amount to much as a man.

soldier in the Spanish army, where his real ability and passion for efficiency are appreciated by officers and private alike. When a lieutenant-colonel in a crack regiment General Weyler wooed and won a humble peasant girl of rare beauty, who, like himself, was a native of the Balearic Islands. He invited his brother officers to the wedding ceremony at the conclusion of which he committed the bride to the care of the abbess of a neighboring convent. There she remained until she had received an education befitting her new position in life.

#### THE RABBITS' GOOD POINT.

They Have Proved Beneficial to an Irish Agriculturist.

At last the rabbit—the much-hated, virulently-abused rabbit—has found a friend in the person of a well-known Irish agriculturist, who has discovered that the little animal has at least one good trait, to be numbered henceforth as the farmer's friend.

The gentleman in question owns a considerable tract of pasture land, which being on the banks of a river, has of late years been so overrun with butter cups as to very considerably interfere with the value of the ground as pasture-land.

A few seasons ago a number of rabbits were introduced upon the farm, and these—as is usual, and as the Australians know to their cost—soon multiplied so fast that they threatened to overrun the whole estate.

The chief warren was situated on a bank near the river, a circumstance which caused but little comment until the farmer accidentally made the discovery that the buttercups, formerly a scourge to the pasturage, had died down to isolated clumps.

It was then discovered that the rabbits had, during the winter, scooped out the centres of the buttercup roots, with the result that these had disappeared beyond all possibility of further growth. Grass had sprung up in the place of the flowers so distasteful to the cattle, with beneficial results that can be well understood.

#### THE SPONGE FISHER.

Description of the Skill and Exertion Needed.

Lying on his chest along the foal's deck, the sponge-fisher, with his water-glass—a pane set in a box fitted with handles—looks down forty feet into the clear depths. With one hand he grasps and sinks a slender pole, sometimes fifty feet in length, fitted at the end with a double hook. The sponge once discovered, the hook is deftly inserted at the rocky base, and by a sudden jerk the sponge is detached.

This curt description of what seems the simple work of sponge-fishing gives no idea of the real skill and exertion needed. The eye of the fisher has to be trained by long experience to peer into the sea and tell the commercially valuable sponges from those that are worthless. He must have a deft hand to detach the sponge without a fear.

Above all, while doing this with one hand, he must manipulate with the other the water-glass, as the waves sway it sideways and up and down. The strain on eye and body is most intense, to say nothing of the cramped position and exposure to wind and wet, which, first and last, make every sponge-fisher a victim of acute rheumatism. Yet, with all his arduous toil, an expert sponge-fisher earns not more than \$15 a month besides his "keep" on the boat, which barely deserves the name of existence.

#### HIS SENTENCE.

"You say you wouldn't like to get out!" exclaimed the prison visitor. "Why I thought you were in for life." "Oh worse than that, ma'am," replied the convict. "I'm in for a double life. I've got two wives waiting outside."

## ODDITIES OF INSURANCE

### PEOPLE WHO INSURE AGAINST BALDNESS AND SANITY.

Impossible to Imagine any Possible Risk That You Can't Protect Yourself Against.

It is fairly common knowledge that great musicians, like Kubelik and Paderewski, insure their hands against accidents that might disable them; singers insure their throats, athletes their limbs, and so on, no single part of the body which is a source of profit being overlooked; while, if you are a tea-taster, you can cover the risk of losing the delicacy of your palate, and a perfume expert can similarly protect his sense of smell.

There are companies which make a specialty of insuring against loss of sight, so that you may contemplate even blindness with comparative equanimity. In Germany a child can be insured against ophthalmia up to the age of thirty-five by an annual payment of twelve cents only. If the insurer's sight fails and he has to wear glasses, they are provided free, with treatment, as long as he lives. Baldness and loss of teeth can equally be provided against. At Grimsby, England, fishing-nets are insured against loss or damage; there is a company which confines its operations to the insurance of

#### CUT-GLASS AND CHINA-WARE;

and you can easily guard yourself against loss from burst pipes in winter.

But quite apart from risks of what may be called an ordinary nature, from loss of employment to loss of a limb, there is an extraordinary variety of risks against which the underwriters of 'Lloyd's' will protect you for a suitable consideration. Suppose, for instance, a man, after making his will in your favor or leaving you a fat legacy, becomes insane, they will insure you against the contingency of his recovering his sanity and cutting you out of his last testament. If you have been left a legacy on condition that you should marry a certain lady or change your religion, by paying the stipulated premium you will be assured of an equal amount if the lady won't have you or, on consideration, you prefer to remain single, or if you decide to stick to your faith.

If you want to sell your house and the title-deeds have gone astray and can't be found, you can secure a policy as a substitute for the title, so that you are relieved of

#### ALL FURTHER RESPONSIBILITY.

Similarly, if you have arranged for a garden-party and fear that a wet day will involve you in loss, you can have your expenses guaranteed, so that, as far as your pocket is concerned, you can smile at a falling barometer; and, equally, of course, a farmer can protect his crops against unkind weather.

Suppose, again, you are heir to a bachelor uncle and are fearful that he may marry and you may be supplanted, you can insure against such an undesirable contingency, so that, whether he weds or not, you will not be a penny the poorer; or if you are engaged to a girl with a nice little dowry we have no doubt you could protect yourself against the chance of being jilted even at the eleventh hour. If you are next-of-kin to a man who has not made his will, you can insure against his doing so to your detriment; or if he has already left you a legacy you can be guaranteed against his cancelling it.

#### IF YOU ARE A CHEMIST

you can guard yourself against the financial consequences of supplying a wrong drug to a customer; a dentist need not spend sleepless nights for fear of drawing a sound tooth instead of a

## MYSTERY OF THE SEA.

### Swedish Scientists Investigate Phenomena of Dead Water.

One of the most curious marine phenomena known to seamen is that called by Norwegian sailors "dead water," which, without any visible cause, makes a vessel lose her speed and refuse to answer her helm. The sailor's only definite knowledge of its origin, says the Scotsman, is that it exists solely where there is a surface layer of fresh water resting upon the salt waters of the sea. Several explanations have been advanced by the captains of ships of the effect of dead water, the commonest of which is that the two water layers move in different directions. The true explanation, however, was recently found by Swedish investigators. At least so it would seem from what follows.

The experiment carried out was an exceedingly pretty one. A large plate-glass tank was first mounted on a wooden frame. The tank was then filled to a certain depth with salt water, and a layer of fresh water was carefully poured on to the surface, so that two separate water layers were obtained. The salt water was blackened with liquid Chinese ink before the water layers were prepared, and in this way the different layers were made clearly visible. A boat model was then towed along the tank, and a silhouette of the waves produced was obtained by placing a white screen at a short distance behind the tank. The waves were also photographed by flashlight, and the results showed conclusively that waves actually were set up at the boundary line between the two liquids.

Further experiments were made to verify the sudden loss of speed due to dead water. The boat model was drawn across the tank, and the towing string suddenly slackened when the boat was about half way across. In cases where the tank contained salt water only the boat stopped gradually, moving some boat lengths after the towing string had been slackened. When the tank contained a layer of fresh water resting on salt water, on the other hand, the boat slackened speed quite suddenly, and moved only a very short distance. These experiments, carried out on a small scale, prove conclusively that the difficulties encountered within a dead-water zone are really due to the resistance experienced by the vessel in generating invisible waves at the fresh water-salt water boundary; although in some particular cases the influence of under currents must also, doubtless, be taken into account.

### THE BLIND MAN'S CLEVERNESS.

Exercise of the Ear Enables Him to Almost See.

The blind man has to depend almost entirely on the accuracy of his ears to guide him wherever he may wish to go, and it is remarkable in what a short time he becomes familiar with a new locality and fresh surroundings.

Few people are aware of the powers of the ear, but the blind, through constant exercise of that organ, are able to discover objects almost as rapidly as a seeing person.

For instance, when walking in a perfect calm, he can ascertain the proximity of objects by the feeling of the atmosphere upon his face; it would seem at first that the echo back, were it only from his breathing, might be sensible to his ear; but it has been ascertained by experiment that a blind man with his ears stopped can tell when any large object is close to his face, even when it approaches so slowly as not to cause any sensible current of air.

When he is walking along the street he can tell whether it is wide or narrow whether the houses are high or low, if any opening which he may be passing is a court closed up at the end, or whether it has an outlet to another street; and he can tell by the sound of his footsteps in what lane, or court, or square he is

## "BATTLES."

As I entered the club, I could see that the news had reached them.

Half a dozen fellows were standing around the notice-board in the hall reading a small scrap of newspaper pinned there and surrounded by a thin black edge.

In twos and threes the men were gossiping here and there and everything seemed a little hushed.

I sauntered idly up to read the "stirring" news. It was only a couple of lines headed "Deaths"; underneath was simply written:

"George Edward Bartlett, late Capt. 1st Life Guards, died at sea, aged 32."

A very bald statement, yet it roused memories that had slept for many years.

George Edward Bartlett! Old "Battles." He and I had been chums, shared rooms, and, in fact, it was rather a case of "David and Jonathan" up to date. Ah! they were good old times.

Young Ranger, a sub, in the Cold-streams, came over to me, idly swinging his eye-glass round and round his finger, and, in his high-pitched voice (which, by the way, always annoyed me intensely), yapped, "Evening, sir—heard the news? Bartlett's dead—member Bartlett? Guards, y'know, he's dead—best thing he ever did—what? Wonder he let himself live so long—bit of a bounder, wasn't he? What?"

Ranger has always annoyed me. His "what" annoys me, and to-night he annoyed me more than ever. I brushed by him and into the smoke-room with a curt "Good-evening."

They were talking "Bartlett" there. "Bout time he shuffled off, wasn't it?" queried one.

"Never quite heard the rights of the story. Money, wasn't it?" said another.

"Yes," said a third, "backed a bill, got let in, raised enough to clear it, Lord knows how, then had to resign, and went abroad. That's seven years ago now. Must have been something disreputable somewhere."

"Y'know his pater had plenty of money, it looked a bit shady at the time. I always disliked the man, awful prig. They always come a cropper eventually. He wasn't a gentleman," and number three lit a cigarette, and, I'll be bound, mentally thanked Heaven that he, at least, was a gentleman.

So these creatures went on till poor old "Battles" hadn't a shred of character left.

I sat and listened till I couldn't stand it any longer.

"Gentlemen," I said, "did it ever strike you that the person you're calling these petty names is dead? Don't you think you might let him rest?"

There was a general lull in the chorus of blackguarding and several mumbles of apology.

"Didn't see you, old fellow."

"Really awfully sorry."

"Forgot you and he were so chummy, but you know he was a rotter!"

These and several other apologies which were equally insulting were given, and then they started again.

I tried my best to keep my temper. I could still think of dear old Battles calmly leaning against the mantel and smiling at them (as he would have done, dear old chap) in his calm, satirical way; but I was, fortunately or unfortunately, hotter-headed than he, and their incessant slanging made me mad.

Then that ass, Ranger, eye-glass, drawl, came in and started his infernal yarn about Battles' past, probable future, and so on.

That finished me. I tried to be calm,

\$5,000 REWARD will be paid to any person who proves that Sunlight Soap contains any injurious chemicals or any form of adulteration.

## Sunlight Soap

is better than other soaps, but is best when used in the Sunlight way.

Sunlight Soap contains no injurious chemicals.

Sunlight Soap is pure soap, scientifically made. Every step in its manufacture is watched by an expert chemist.

Sunlight Soap saves labor, and the wear of rubbing which common soaps require in washing fabrics.

Your money refunded by the dealer from whom you buy Sunlight Soap if you find any cause for complaint.

Lever Brothers Limited, Toronto

154

years, he has enjoyed the fruits of his son's labors.

"Thanks to Bartlett junior, his father never will want for the rest of his life."

I paused and raised my glass.

Gregory spoke again.

"I think, sir," he said, "we have all got hold of the wrong story. You see—"

"One moment," I interrupted. "If you have no objection I should like to finish."

As you know, I have just returned from South Africa.

"On the same boat with me was Captain, now 'Mr.' Bartlett.

"It is unnecessary for me to go into details. We were glad to meet again.

"He was coming home to see his father.

his cancelling it.

#### IF YOU ARE A CHEMIST

you can guard yourself against the financial consequences of supplying a wrong drug to a customer; a dentist need not spend sleepless nights for fear of drawing a sound tooth instead of a decayed one; nor a medical man from fear of a wrong diagnosis. For a modest payment of about \$15 per cent. you can face the possibility of becoming the father of twins, and a much smaller sum will relieve your anxiety about triplets; while, if you are afraid your bank is shaky, you can insure it against disaster.

But one might quote similar examples almost indefinitely without covering the entire ground of out-of-the-way risks against which you cannot protect yourself nowadays; but we have told you enough, we think, to prove that if you are worried about any earthly contingency, from an earthquake to an attack of measles, it is your own fault if you are not protected against its financial consequences.—London Tit-Bits.

#### MINERAL WOOL.

##### The Varied Uses to Which the Article Is Now Put.

Mineral wool is every day finding a larger and more varied use by reason of its excellence as a non-conductor of both heat and cold. For this reason it is used for covering steam-pipes as well as the walls of rooms for cold storage, which are everywhere coming into general use for the preservation of meat, vegetables, and other food. This, therefore, makes it exceedingly valuable in buildings, for it is fireproof; while, placed on the floor, it has the effect of deadening sound more completely than probably any other material which can be used for that purpose.

There are at least two varieties of mineral wool, named respectively rock wool, which is derived from sandstone, and slag wool, which is obtained from the slag of blast furnaces. The former is, however, the better for covering pipes, and for similar purposes, because it contains no sulphur, which, under the influence of the action of the moisture in the air, produces a corroding effect on the metal of the pipes.

The process by which it is manufactured is exceedingly simple. The raw material is melted in a large vessel, and is drawn off by means of a tap, from which it flows in a sluggish stream. As it comes out, steam under high pressure is blown through it, which has the effect of at once converting it into soft, fleecy clouds, which sink to the ground in accordance with their weight, and thus offers a natural and simple method of differentiating the various qualities of the article.

#### BUYING BIRDS TO FREE THEM.

Birds are often purchased in the bird-market at Lucknow, India, in order to be set free again. This is done by Hindus as a work of merit, and by Mohammedans after certain rites have been performed as an atonement, in imitation of the Jewish scapegoat. It is essential that a bird used for this purpose should be strong enough to fly away; but that does not induce the cruel dealers to feed the birds, or to refrain from dislocating their wings or breaking their legs. They put down everything to good or bad luck, and leave the customer to choose a strong bird, if he can find one, and to go away if he cannot. The merit obtained by setting a bird free is not attributed to Deity, but it is supposed to come in a large measure from the bird itself or from its attendant spirit; and hence birds of good or bad omen, and especially kites and crows, are in much demand, and are regularly caught to be sold for this purpose.

he can tell whether it is wide or narrow whether the houses are high or low, if any opening which he may be passing is a court closed up at the end, or whether it has an outlet to another street; and he can tell by the sound of his footsteps in what lane, or court, or square he is.

He goes along boldly, seeming to see with his ears, and to have landmarks in the air. Of course, no blind man likes to go over a new route unattended; but after he has traversed it once, he knows every point of importance to him.

#### WORLD'S CLEANEST TOWN.

##### Broek, in Holland, Is a Wonderful Place.

The cleanest town in the world is said to be Broek, in Holland. It is only a few miles from the capital, and has been famous for its cleanliness from time immemorial. It is also notable on account of the fanciful style of its houses, and yards, and gardens, and streets.

The people, though only peasants, are all well to do, and all feel a pride in their town. It seems to be the first business of their lives to keep their houses freshly painted, their gardens in perfect order, and their yards and streets as clean as a new pin. No carts are allowed in the streets, and no cattle.

Though the raising of stock and the making of butter and cheese are their occupations, a stranger would never imagine that there were any cattle in the region, unless he went to the beautiful green meadows at the back of the houses, or the stables out there, where cows are kept in stalls scrubbed and washed like a kitchen.

The streets are too fine and neat for the feet of the animals to step on; all are paved with polished stone, intermingled with bricks of different colors, and kept so scrupulously clean that a lady could walk anywhere in white satin slippers.

#### PRINCESS'S LOST PEARLS.

##### Beggar Boy's Story of a Roadside Discovery in Rome.

Recently a notice was posted in the streets of Rome to the effect that a sum of \$300 would be given as reward to the person who found a pearl necklace.

A few days ago a boy begging on the Corso was driven away rather roughly by a policeman, whereupon a gentleman ran after the lad and gave him a few "soldi." The boy turned to his benefactor and said he would make him a present of some "pretty little glass balls" he had found, and saying this, he took out of his pocket and handed to the gentleman nine pearls.

Questioned as to where he had found the valuable stones, he answered that he had gathered them in a country road outside the walls of the city. Another boy who was with him when he found the pearls had twenty of them.

The pearls belong to a necklace which Princess Falconieri lost some time ago, and for which she offered the \$300 reward. It was worth \$5,000, and the number of pearls which have been now found (thirty in all) represent only half its value.

The children who had luckily found the precious stones were given \$120 by Princess Falconieri.

#### THOROUGH SATISFACTION.

According to a report of the Indian Office, not many years ago a Queen's messenger or some other inferior official was robbed, though not personally injured in any way, on his road to Cabul. The British Government wrote to complain of this, but no reply was received for some months. At last the Emir wrote: "The matter you mention has been thoroughly investigated and not only have the robbers of your messenger been put to death, but all their children, as well as their fathers and grandfathers. I hope this will be satisfactory to Her Majesty the Queen."

ately, hotter-headed than he, and their incessant slanging made me mad.

Then that ass, Ranger, eye-glass, drawl, came in and started his infernal yarn about Bartlett's past, probable future, and so on.

That finished me. I tried to be calm, but I'm afraid my voice trembled as I said:

"Now, look here, you fellows, I've had just about enough of this. I knew Captain Bartlett better, I think, than any man here.

"There was a mystery which was never publicly explained.

"I say publicly, for a few of his private friends were told the full facts of the case. I was honored to be among that number, and from his father's lips I had the full story.

"If you have nothing better to do than slang a dead man possibly I can find you a little more interesting occupation.

"I won't say more congenial, for you all seem thoroughly in your element in pulling my dead friend's reputation to pieces; however, if you feel that you could spare ten minutes, I would be pleased to lay the full facts before you and leave you to judge whether Bartlett is the 'bouncer,' 'blackguard,' and other sweet names that you have thought fit to call him.

"What do you say?"

I sat down rather heavily. It's hard work talking; at least I always have found it so.

One of the fellows rose, I think it was Gregory, who had been a sub. when Bartlett was in the Guards.

"Major Matthews," he said, "I think you have expressed yourself in a rather—shall we say—blunt manner. Personally, I should be the first to admit that we have spoken carelessly, that is, providing you can show us that we have done so.

"I liked and admired Captain Bartlett, but I have always understood that there was something distinctly shady about his chucking the service and leaving the country as he did. You know as well as I do that Bartlett's father has plenty of money, and why the mere fact of being let in over a bill should cause a fellow to chuck up everything and go abroad as he did, beats me. If you can explain, I am sure all here will be glad to accept your word.

"It wasn't over nice for the club at the time, and that no doubt has a lot to do with the unpopularity which he has left behind him.

"We all await your explanation, sir."

He sat down, there was a distinct hush, and I—well, I hardly knew where to begin. My first words were rather commonplace.

"Will you chaps have a drink?"

My invitation was accepted, and when we were all settled down, I began:

"At the time Bartlett left the service his father was financially in a very shaky position. This may seem strange to you, gentlemen, but it was so. Everyone seems to think that Bartlett's disappearance was connected in some way or other with the bill which he had backed. That was not so. The sum, to be precise, was £760.

"Though his father could not easily spare it, he found the money and the bill was paid.

"As things were, however, it was absolutely impossible for Bartlett to stay in the expensive regiment in which he held a captain's commission. He must either transfer or resign. He chose the latter. As you all know, he was very keen on soldiering and it was a great wrench. He did it, however.

"Had the facts been made clear at the time, nothing save a miracle could have saved his father from financial ruin.

"Well, young Bartlett sailed for Africa and the goldfields.

"He was very lucky. Partly through hard work, but owing a great deal to a little lucky speculation, he was enabled within four months to send his father £3,000. That pulled old Bartlett out of the mud, and he himself told me that his son saved him from bankruptcy.

"Now, and, in fact, for the past five

years, as you know, I have just returned from South Africa.

"On the same boat with me was Captain, now 'Mr.' Bartlett.

"It is unnecessary for me to go into details. We were glad to meet again.

"He was coming home to see his father.

"Two days south of Madeira it was—hot! Many of you who have been in India will know what I mean by hot. We were sitting about the deck, dozing, one afternoon; there was a scream from somewhere down the deck.

"A woman dashed to the rail where her child, playing, had crawled through and fallen overboard.

"My God, Bartlett, there's a child overboard!" I yelled.

"Bartlett started up, slipped off his jacket, picked up a cricket stump lying on the deck (some young fools had been playing in that awful heat).

"Looking at the stump he drawled:

"'Lot of sharks about here, old man; might be some use. Good-bye, if I don't see you again.'

"He was over the rail before I had time to take in his meaning.

"The skipper, of course, slowed up and stopped, lowered a boat and sent back. By this time we were at least three-quarters of a mile from the scene of the accident. I had a chat with the fourth officer afterwards and he told me how they found him. He had the kid on one arm, and with the other was lashing the water furiously.

"The sharks were about already and the water was all stained with blood.

"Just as they reached him one made a dash and a snap, and Bartlett couldn't lash the water any more for his arm had gone above the elbow.

"They hauled them aboard, the child was little the worse, but Bartlett was quite done for.

"As they carried him down the deck, the mother fell on her knees and kissed his one remaining hand.

"He looked up at me with a pale smile.

"'Silly asses women are sometimes. What?'

"We buried him the next day."

I couldn't go on. Poor old Bartlett, we shall meet no more.

Gregory rose. Words were useless I could see. He raised his glass; with one movement the others did the same. "Gentlemen," he said, "I give you the toast, Captain Bartlett, one of us."

We drank in silence, and Bartlett was back on his pedestal.

God rest his soul.—Pearson's Weekly.

#### PECULIAR CHURCH CHARITY.

One of the most ancient charities in connection with the Church is that at St. Swithin, Worcester, England. In 1688 William Swift decreed "that twelve loaves of bread be given by the churchwardens every Sabbath morning, and so to continue for ever, unto twelve aged poor people, such in his lifetime as he should appoint, and after his death according to the discretion of the churchwardens and their successors." Accordingly, twelve penny loaves are delivered every Sunday morning and are placed in each recess at the west end of the church, where they remain until distributed after the service.

#### COST OF THE POPE'S WARDROBE.

The outward robe of the Pope is red, and made from the wool of the lambs of the convent of St. Agnes, near the Porta Pia. The cloak and cape are lined with purple and trimmed with gold lace; the sombrero, or hat, is red and has a gold cord and tassel. Beneath the cloak is worn an alb, made also of wool of the lambs of St. Agnes, and girt about the waist with a sash of white moire antique, garnished with gold fringe. The Pope's hands are covered with kid mittens, and his feet are burdened with a pair of slippers worn over his ordinary shoes. The total value of his wardrobe is said to be \$150,000.

# CUSTOM TAILORING.

ARE YOU TIED  
TO ANY TAILOR

If you're not, don't make up your mind about anything—cloth, style or price—until you see what's going on here this season.

Perhaps we'll surprise you by making you clothes to order for less money than you think. We certainly will if you have been paying extravagant prices.

Suits to Order, \$15, 17 to 23

Overcoats to Order \$14 to 22.

Trousers to Order, \$3.50 to \$7

We are always busy making clothes for people who know our work, and have come back for more. Wouldn't you like a good fitting, well made suit—if so we can make one for you.

We have but one grade of Tailoring—the best we can do—that is the best there is.

## J. L. BOYES.

THE BEST FLOUR.  
DAFOE'S NONESUCH  
DAFOE'S MANITOBA PATENT

By numerous tests by the best Bakers the above mentioned grades have been proven to be the best Flours in the market.

When buying Flour ask for Dafoe's, and patronize your home mill, thereby producing Bran and Shorts that you can purchase cheaper than the product of the Western mills, which has to be transported thousands of miles at great expense, and usually, when it reaches you, of inferior quality.

The grocer complains if the farmer or the mechanic sends to Toronto or to outside points for an article he can get at the home store just as good, but he does not hesitate to buy Flour from mills hundreds of miles away, and sell you an inferior Flour for more money than you can purchase the home product for, every bag of which is guaranteed.

CHOICE CORN MEAL and BUCK WHEAT FLOUR always on hand.

FEED GRINDING a specialty, with the best feed mills known to the trade.

A full stock of the best ANTHRACITE COAL. Also in the market for the purchase of all kinds of Grain.

Ask for prices at the big Mill before purchasing your Flour, Feed or Coal.

**NAPANEE**

Work will shortly commence on the new channel and tower of St. John's Church Selby.

A battleship may be despatched to bring Stensland the defaulting Chicago bank President home.

Miss Helen Caton, of Thorpe, left this week for the Hospital in Brockville, as a nurse-in-training.

The 1901 Assessment Roll which was reported mislaid has been found. It was in the hands of the Assessor.

All kinds of heating apparatus, properly installed, and satisfaction guaranteed.

**MADOLE & WILSON.**

The next issue of The Canada Gazette will contain a proclamation fixing Thursday, October 13, for Thanksgiving Day.

Workmen are already busy improving the interior of St. Jude's Church, Kingsford. There will not be any service at Kingsford next Sunday.

Miss Eva Emsley and Miss Freda Holmes, of Napanee, left Wednesday for Washington, D. C. to enter a Hospital in that city as trained nurses.

Mrs. John Fraser, Napanee, and Misses Edna and Edith Fraser, of New York City, are home after spending the summer with Mr. Fraser at Westport.

Members of the Government are in favor of summoning Parliament to meet at an earlier date than was anticipated, and it is now considered that November 15 may be agreed upon.

Mrs. Burgess, of Ottawa, was killed at Carleton Place by a train striking the automobile in which she was driving. Mr. and Mrs. Torrance the other occupants of the automobile, were severely injured.

Dr. George Eakins, son of the late Dr. Eakins, of Belleville, left last Wednesday, for Port Arthur, where he will hang out his shingle. He spent his holidays with friends in Napanee and Glen Island.

Miss Edith Dafeo, A. T. C. M., (honorary graduate in pianoforte, teachers' course and organ) will resume her classes Sept. 10th. Pupils prepared for all Conservatory examinations in piano, organ and theory—special attention given to beginners for whom the Virgil Method is used.

Will put an sale Saturday morning August 14th, two cases containing six hundred pieces of China, all useful articles for household use in endless variety direct from the manufacturers in Europe, and at prices never heard of here before for such goods. See show window.

**THE COXALL CO.**

On Saturday evening, Justus Asselstine, a young farmer, of Ernestown, met Miss Janet Alphen Kenyon, formerly of Denbigh, in Kingston. On Monday they decided that they would like to get married, and Rev. S. Shibley was called upon to tie the knot at the home of J. L. Fraser, Williamsville on Monday evening. The happy couple left for their future home.

The Frontenac Business College, Kingston, has just closed the most successful term in its history—not only as regards numbers enrolled but from the success of our graduates in carrying off the best positions available. The fall term opens Sept. 4th and promises to bring together a larger number than ever to prepare for the ever increasing demands of the Business world. No time in the past was there such opportunities offered to young men and women who had acquired a thorough knowledge of business methods and their essential subjects. Are you at present drawing a good salary? If not write us for particulars. T. N. STOCKDALE, Principal.

**Music**

Owing to several cases of misapprehension being recently brought before Miss McHenry's notice, she wishes to state that the opinion, which seems to be maintained, that she receives for instruction only advanced pupils, is erroneous. She will discontinue teaching through July and August, resuming it September first. Residence, Centre St.

render all possible assistance toward making this part of the seasons work a complete success. Our Specialties—Pure Spices (full flavor strength) Garlic (fresh) Gem Jar Rings (best quality), Corks (all sizes), Proof Vinegar (Chemically pure), Fruit Vinegar (Crab Apple Brand), Bottle Wax Mixture (ready for use) Paraffine, Currie, Turmeric &c. Have you used Parke's Catsup Flavor and Preserver? It is good. The Medical Hall—FRED L. HOOPER.

**The Canoe Races.**

The last of the series of Canoe races held by the Napanee Yacht Club was run on Friday evening last. In the double event Messrs. Graham and Joyce finished first; Messrs. Carson and Pollard, second, and Madill and Dulmage, third. Messrs. Madill and Dulmage again had the misfortune to upset their canoe in rounding the buoy. In the single race, Mr. C. Madill finished first, Mr. F. H. Carson, second, and Mr. E. J. Pollard, third. The prize winners for the whole series are: Double paddles, M. P. Graham, first; Messrs. Carson and Pollard, second and Messrs. Madill and Dulmage third. In the single event Mr. C. Madill won first prize, Mr. F. Carson, second, and Mr. E. J. Pollard, third.

**Get your School Books at Paul's.**

E. LOYST has large stock of flour, Royal Household and all other grades, all kinds of feed, large quantities at the lowest prices. He wishes to sell out in the next month. Salt, Coal Oil Groceries. Highest price for eggs cash or trade. A call solicited.

**Forging Ahead.**

The Lennox and Addington Mutual Fire Insurance Company is steadily forging ahead to the first place of the Insurance Companies doing farm business in these Counties. The amount of Insurance passed upon at the July meeting of the Directors was \$125,000. The irresistible Agent, D. L. Green has a good running mate in the ambitious Mr. Jones, each vying with the other in writing the most business for the Company. The company never did more business, never had more policy-holders, or more insurance, has been able to meet its losses most promptly and has a good cash surplus on hand, and continues to do business at the old stand (despite reports to the contrary) first stairway west of Coxall's grocery, in the Town of Napanee.

**Married at Westbrook.**

A dainty wedding took place at eight o'clock in the evening of August 20th, on the lawn of Bunny Lea Farm, the residence of George Gates, when his youngest daughter, Estella, was united to Sperry Melbourne Burt, only son of the late Thomas Burt, of Morven. The parlor and dining-room were decorated with flowers, interspersed with greenery, while the lawn was lit up by Chinese lanterns, assisted by the moon which gave its brightest light. The bride was attired in white organdie, with beatha and yoke of lace; her hair was tastefully dressed with white flowers and satin bows. Earl Gates, brother of the bride, played Mendelssohn's wedding march, while the bride leaning on the arm of her father, passed out to the lawn through an arch of white ribbon, formed by four flower girls. Misses Vera McDonald, Alice Smith, Augusta Mabey and Patricia Burt. The rig was borne on the stem of a white lily, by Master Willie Rowson, of Nipissing, nephew of the bride. Rev. R. Stillwell, officiated. The guests about one hundred in number sat down on the lawn to a sumptuous supper. The groom's gift to the bride was a gold brooch, representing a spray of lily of the valley set with pearls, and a gold bracelet with initials to each of the little flower girls. The bride's travelling suit was of blue henrietta cloth, with hat to match. The happy couple drove in a carriage drawn by white horses, to Kingston, whence they left for New York. They will be at home at Morven after Sept. 21st.

**THIS WEEK.**

Tamworth, Sept. 22nd.

#### A Daring Escape

On Tuesday evening a sensational escape of a convict, Jacob Jerebski, 55 years old, a Jew, en route to the Kingston penitentiary from Chatham, where he was recently sentenced to seven years for bringing stolen furs from New York into Canada, was made from a G. T. R. car window between Napanee and Fredericksburg. The Jew was shackled and handcuffed to his seventeen-year-old son Simon, sentenced for the same charge to five years' confinement. The two prisoners were in charge of Sheriff Simmill, Jailor Davidson and Constable Peters. Jerebski went to the toilet room with his son, and the constable stood at the door. He soon heard a scream from the son. The constable looked in, and the older prisoner was gone, with the shackles. Simon was brought to Kingston. It is a mystery how the shackles were taken off, for there are no marks of violence on Simon. Constable Peters took the westbound train to Napanee, where he organized a search party to look for the escaped man. No trace has yet been found of the fugitive.

### RICHMOND MINUTES

Sept. 10th, 1906.

Council met at Selby. The members present were Messrs. Z. A. Grooms, Reeve, and Councillors Fred Sexsmith, Chas. Anderson, E. R. Sills and Al McCutcheon. The Reeve presiding. The minutes of the last meeting were read and confirmed. A communication was received and read from Mr. John English re Albert Reid's claim. Laid on the table.

Moved by Chas. Anderson and seconded by E. R. Sills that the communication of Herrington, Warner & Grange re Otter Creek Drainage Works be filed. Carried.

Moved by A. McCutcheon and seconded by E. R. Sills, that Councillor Anderson be appointed with power to employ F. F. Miller, Engineer, to examine Sucker Creek and all drainage works connected therewith and report to this council as to any liability the Township might be held (re) Albert Reid's claim for damages. Carried.

Moved by Fred Sexsmith and seconded by Chas. Anderson, that on the petition of Thomas Deline and others, that the road crossing lots Nos. 7 and 8 between the 9th and 10th concessions is in a bad state of repair. That the road Engineer be instructed to repair the same, said repairs not to exceed \$10.00. Carried.

Moved by Chas. Anderson and seconded by Fred Sexsmith that the following accounts be paid, A. Wood, \$11.50; V. Storms, repairing a bridge east of Selby, \$2.50; R. W. McCormick, shingling Township Hall \$18.31; E. Doidge, for 28 loads of gravel \$1.40; R. Shannon repairing five culverts in 1st Concession \$5.00; R. Pringle 135 loads of gravel \$9.45; Hugh McCormick work on Otter Creek Drain in 1906, \$16.47. Carried.

The By-Law for the closing of the road running across lot No. 5 in the 2nd Concession was read a third time and signed, sealed and finally passed.

The petition of the Municipal Council of the Township of Richmond in the County of Lennox & Addington, to His Honor the Lieutenant Governor in Council humbly sheweth, that whereas the Legislative Assembly of the Province of Ontario did at its last session pass an Act amending the Public Schools Act some of the provisions of which we do not consider fair or reasonable but on the contrary a class of legislative of the most vicious type. Be it therefore resolved that we the Municipal Council of the Township of Richmond in the County of Lennox & Addington in session assembled do hereby express our entire disapproval of, and humbly ask for the repeal at the next session of the Legislative Assembly of Sub-sections 2, 4, 5 and 6 of section 39 of the said Public Schools Act, the said sub-sections containing provisions which in our opinion are a direct insult to the intelligence and business ability of the Boards of rural School Trustees.

And in duty bound your petitioners will ever pray signed.

Be it further resolved that a copy of this petition suitably prepared and signed by the Reeve and Clerk with the corporate seal attached be forwarded to Mr. T. G. Carscallen M. P. P. to be presented to the proper Government Authorities.

Moved and seconded that the Council adjourn to meet on the 24th day of September at 10 o'clock a.m. which meeting will be held in lieu of the October meeting. Carried.

ABRAM WINTERS Clerk.

### No Electric Light.

Notwithstanding the success of the new municipal plant, there are many people who will not have the privilege of enjoying the convenience of electric lights. It is for this reason that we have been particular to secure the highest grade of Coal Oil made in America. As the long night season is

surpasses any previous season's collection, and we point with pride to this grand array considering the money saving qualities.

Ladies' Electric and Near Seal, Natural Rat, Russian Lamb, Astrachan, Bokhara and Persian Lamb Jackets.

Ladies' Alaska and Columbia Sable Natural Lynx, Sable Fox, and Sable Rat, White Fox, Austrian Sable, Male and Blue Hair.

German and Morano Mink, White and Black Thibet Ruffs and Stoles.

Ladies' Muffs, Alaska and Columbia, Black and White Fox, Natural Coon, Mink, White Thibet Ruffs.

Gents' Natural and Colored Wombat, Buffalo, Moscow and Coon Coats.

## Be Sure and Visit our Ready-to-Wear Dept.

Ready-to-Wear Garments for Ladies and Children. Save time and money by coming here first. There is something about our Jackets, Skirts, Ladies' Waists and Children's Wear that leaves nothing to be desired. Our styles are controlled by us and the latest Creations approved of by makers of Fashions. The charm of newness of these garments is fairly captivating. The New York Styles alone being different yet so many things are hinted at in the new arrivals that are bewildering to name, Taffetta and Jap Waists, short and long sleeves, notably pretty with delicate Silk Val combined with Pinch tucks in a really novel fashion.

## The Smallwear Department at Exhibition Time.

This Department is again the Centre of Attraction, the fall season finds us with many, many novelties in neck wear, having received consignments from New York. You can make no mistake in regard to fashion fable, also the new neckties with Persian ends, the new silk Belts and Belt Buckles, the new Gloves and Hosiery. We are agents for the everlast Lewis Hermsdorf Dye Hose. The new Veilings, Laces, Embroideries, Chiffons, etc.

Make a special visit to this Department, it will pay you.

## The Staple Dept. at Exhibition Time

New Fall Wrapperettes and American Printed Flannels, in neat small patterns and Floral Designs, range of prices 8, 9, 10, 12½, 15, 20 and 25 cents a yard, for Wrappers, etc.

Shirting Flannel, plain and stripe, (All Wool) 20c to 40c a yard.

Outing Ceylon Saxony and Baby Flannels, Shirting Flannellettes, Dark, Medium and Light patterns, 12½c and 15c a yard.

Plain Flannellettes in Pink, Blue and White, 5c to 12½c a yard.—Indigo Shirtings, our "Chamberlain and Argyle" brands which have proved their superiority over all other brands, for both wear and wash.—New Fall Prints, see the new designs and patterns.—LINENS This house is famous for its Linens, Irish Linens, Shamrock Linens. Sole agents for J. and T. Alexander of Dunfermline, Scotland.—Fancy Drawn Work and Embroidered Lunch Cloths, Sideboard Scarfs, Centre Pieces, D'Oylies, Etc., direct from Ireland, Mexico and Japan.

Cold Weather Comforts (BLANKETS) all-wool, a complete range Sizes and Prices.

## In Exhibition Array the

# Carpet and Housefurnishing Dept.

Everything pertaining to Housefurnishings is now open for inspection. Visitors afford yourselves of the opportunity of visiting this section, the new Floor Coverings in Carpets, Linoleums, Oil Cloths, Rugs, Crex Matting, Draperies, etc., are here in great profusion, also to be seen in this Section are Cretonnes, Denims, Art Satens, Foulard, Blankets, Comforters, Flannellette Blankets, etc. This Department being known throughout this district as having money saving merchandise of a high class nature, further comment is unnecessary.

Leave your Wraps and Parcels here during exhibition,

Purveyors to the People.

Notwithstanding the success of the new municipal plant, there are many people who will not have the privilege of enjoying the convenience of electric lights. It is for this reason that we have been particular to secure the highest grade of Coal Oil made in America. As the long night season is now upon us, we suggest that you try one gallon of this special oil.—The Medical Hall, FRED L. HOOPER,

Belleville, Sept. 7.—Mr. Ardagh of the C. P. R. engineering staff is in the city to-day, and states he is looking over the ground between Belleville and some point on the C. P. R. this side of Vaudreuil, with the idea of selecting a through route for the C. P. R. from Toronto to Montreal, and running closer to the St. Lawrence and Lake Ontario. The exact route cannot yet be definitely stated, but will be decided when full reports are made to the management. Prospects are bright for both the C. P. R. and Canadian Northern entering this city. Surveyors for both roads are now working in this vicinity.

Lamps, Lamps.

Never has such Lamps been seen as those that are now shown in Boyle & Sons' East window. Go and see  
BOYLE & SON.

## ALBERT COLLEGE, Belleville, Ont.

# HARROWSMITH

On Wednesday evening Miss Pearl Tallen, one of our bright young ladies, who has been ill for two weeks, was called away from our midst. She leaves a big space at home and also a large circle of heart-broken friends. She was liked by all. The large attendance at the funeral service showed in what esteem our young friend was held.

Again on Friday morning Mrs. Anson Charlton was taken away very unexpectedly. Deceased was ill only one week, but suffered much during that time. The funeral was conducted by Rev. Mr. Service, in the Methodist church on Saturday afternoon. Mrs. Charlton was of an amiable disposition and leaves a sorrowing family.

John McLean, Sr., who is on the sick was taken to the general hospital, Kingston, on Saturday.

Frederick Tallen, Brownville, N. Y., at home. Miss J. Phillips, Kingston, at James Phillips. Mr. and Mrs. Samuel Cowdy, Mountain Grove, also Miss Knight, from the city, at George Redmond's. Mrs. Bruff, Kingston, attended her cousin and grandmother's funeral on Friday and Saturday.

Mrs. Bertram Patterson, Camden East, intends spending the winter with her parents, Mr. and Mrs. J. Boyce.

George Redmond has returned home after spending a few weeks in the Northern Temagami district, calling at Haileybury, New Liskeard, also North Bay and various points.

Misses Myra Crun and Helena Redmond have returned to Sydenham High School.

Harry Sills and sister, Pearl Sydenham, spent Sunday at Mrs. W. Guess. Mrs. James Walker and daughter, Edith, Holleford, at Alexander Thompson's.

Miss Maude Patterson has left for a few weeks' holidays.

Mr. and Mrs. Elmer Alton and family Sydenham, at Anson Charlton's.

# Picton Business College

seems to be having a phenomenally good attendance as reports say the applications for admittance are over three times what they were last September.

Kingston, Sept. 8.—News comes from Parham that Willie McGregor, aged six, was shot through the heart by the accidental discharge of a gun in the hands of his elder brother, Charles. The McGregors live at Bobs Lake, three miles from Parham.

Michael Joyce, who had a leg cut off on Labor Day in Deseronto, while attempting to board a moving train, died Tuesday morning. He leaves a widow and one son.

Belleville, Ont., Sept. 11.—The wedding of Lieut. A. Percy Allen, of the 15th Regiment, this city, and Miss Mabel A. Vermilyea, which took place in Bridge street church, this city this morning, was a fashionable affair. The church was beautifully decorated with China asters.

The "Stove Exhibit" will be at Boyle & Sons' Store. This year we can show some new features in our first class stoves, which surpass any that have yet been shown. Go and see Good Stoves at BOYLE & SON.

Robert Richardson, Belleville, a sixteen-year-old boy, was on Tuesday found guilty of stealing \$70 from the pocket of Chas. Nunn, Grand Trunk despatcher, while the latter was bathing in the river, and to-day Judge Fradick sentenced him to six months in the Central Prison.

Kingston, Sept. 7.—The body of Samuel Lowe, clerk in Steacy's dry goods house, was found at noon in the water near the King street breakwater. He left his house on Princess street last night to go to the Foresters' Lodge but did not reach there. He was a prominent Conservative, an Anglican and a Forester. He leaves a wife and large family.

North Bay, Ont., Sept 12. One of the most serious accidents in the history of the C. P. R. occurred at Azilda, seven miles west of Sudbury, at 7:30 o'clock this morning. The death roll now totals eleven, and the injured number twenty-five.

The third section of No. 1 west-bound had orders to meet the second of No. 2 east-bound at Azilda. The west-bound train was made up of colonist coaches containing harvester excursionists, and was backing into the siding to allow the east-bound express to pass, when suddenly the east-bound train came around the curve and crashed into the harvester train, the baggage coach of the latter telescoping the first passenger car. The dead and injured were all taken out of the first car of the harvester train, none being injured in the other cars or on the east-bound express. The engineer of the east-bound train states that the brakes refused to work. The crews escaped by jumping. A scene of wild confusion followed the shock but rescue work began speedily, the survivors working hard taking out the dead and wounded, while the C. P. R. officials sent a special from Sudbury to bring in the injured. A number of people from Napanee and vicinity were among the excursionists, but a telegram arrived stating that all were safe.

Beautiful and Brilliant Colors  
Guaranteed When Ladies Use—

# DIAMOND DYES

Each year thousands of letters come in from all parts of this vast Dominion telling of victories and successes with Diamond Dyes in the home.

The marvellous and immense sales of Diamond Dyes in Canada have induced adventurers and speculators (who know nothing about the chemistry of colors) to go into the putting up of package dyes. Such dyes are adulterated and crude; the colors are muddy and blotchy, bringing ruin to the materials you try to dye.

DIAMOND DYES, the choice of wise women, are the kind used when bright, full, fast and brilliant colors are wanted. No disappointments possible when you use Diamond Dyes.

DIAMOND DYES are sold by all leading druggists and dealers. Refuse to accept substitutes when you ask for Diamond Dyes. Send to Wells & Richardson Co., Limited, Montreal, P. Q., for New Direction Book, Diamond Dye Cook Book and Illustrated Booklet, entitled "Diamond Dye Longjohns' Winter and Summer Sports," Sent FREE to any address.

# AI WANG;

## A TALE OF SOUTHERN CHINA.

### CHAPTER XXXIII.

The worst crisis was apparently past, and Lord Rackett had hard work to realize that they had come through with flying colors.

How they were to go back again was another question entirely, and one that might present some tough problems; but the time had not arrived for them to wrestle with what the future held—rather should they rest content with the glorious success which had rewarded their present efforts.

If Kai Wang had been able to steer their ship safely through the breakers on this occasion, surely he could be trusted to bring them over the next difficulty as well.

Besides, it was not Plympton's usual method to borrow trouble.

Why cross bridges until they had reached them?

The collection of high-class mandarins and their attendants had been fairly dazzled by the meteoric passage of the stranger and his suite.

Doubtless they would begin to compare notes, now that the coast was clear, endeavoring to discover who the other was, what his coming might portend, and whither he had gone.

These were important questions, and when an exchange of ideas and suspicions had been effected, perhaps something in the line of an awakening might take place.

Plympton hoped not. He did not fancy having that mob of soldiers and retainers descending upon them, filled with fury and a desire for bloodshed.

Should such a wretched contretemps occur, it might be possible they would find considerably more difficulty in leaving the Forbidden City than they had encountered in entering it.

Sometimes it is harder to drop a burden than to assume it.

The suspense must have borne particularly hard upon Avis, and Larry was glad more for her sake than his own when the fact became patent that the old idol-maker had piloted them through the hostile assembly without even one hand having been outstretched to detain them.

Perhaps such a move, however clever and bold, could never have been successfully engineered in any land under the sun save China.

Here such a wide domain exists, peopled with tribes and petty nations, that dozens of different languages are spoken.

It is impossible for a Cantonese Chinaman from the South to understand a native of Peking unless he has been peculiarly educated as a linguist.

Such things as this sometimes serve to a good end, and our friends certainly had cause to rejoice that they existed.

The wily Kai Wang knew those passages like a book, and could get more benefit from his knowledge than most men.

Turning sharply several times, he plunged down a flight of stone stairs. This began to look like business.

If the prisoner were in a dungeon, this must mean that he was below the surface of the ground, and the sooner they peroginated in that direction the more speedily would they accomplish their end.

The big Englishman had taken part in

to get ready to enact his part in the game.

It had been previously arranged with the clever guide in anticipation for just such a condition as now confronted them, and the big Englishman had volunteered to take care of any pilgrim whom Kai Wang might desire to remove from their path.

All he wanted was the signal, and he felt able to guarantee the result.

A man has to have considerable confidence in himself to be able to thus dispose of such matters before the emergency arises.

Plympton did.

He knew the prehensile power of his strong hand, and had no fear of the result even he was given the order to act.

So, while Kai Wang at once engaged the sturdy guard in animated conversation, and by means of some cock-and-bull story, possibly connected with the change of emperors, or the reputed marriage of Li Hung Chang to the great dowager queen, aroused his startled interest, Plympton worked his way to the rear of the unsuspicious man.

Really, it quite disgusted the Englishman, the Chinaman seemed so soft a mark. He was accustomed to rating obstacles according to the difficulty experienced in overcoming them; and yet he could not for this reason refuse to accept the easy prize the god of war had delivered to him.

Meanwhile Kai Wang was asking questions, having succeeded in arousing the wonder of the guard, andaved him also with certain statements which he delivered.

Perhaps the amount of information which was to be gathered in this way would not be at all startling, for such men of the line in the Chinese army are, as a rule, most lamentably stupid, and ignorant of all important occurrences, having just about sense enough to drill after a fashion and make fair soldiers.

In China the mass of the army has been under foreign officers and learned many of the methods that go to stamp the soldiers of Germany and England as model troops; but the lack of intelligence hampers the Celestials in their ambition to vie with the best.

Lord Rackett coolly selected his hold with the eye of a connoisseur, and no sooner did he hear Kai Wang give the prearranged signal, in the shape of a slight cough, than he went in to win.

Perhaps the soldier on guard believed a ton of rock had suddenly fallen upon his head from above, or his gun taken upon itself to open up a premature battle on its own account, making him the first victim.

The chances were, however, that he had little time to indulge in even the most trivial speculation.

Plympton had hurled his full weight against the fellow while taking hold of his thick neck.

As a football player at Oxford he had learned the science of making just such a forward plunge. Many a time had Plympton, as a full back, forced his way through the opposing lines with the ball.

Nor was this the first time in his life that these college tactics had served him well. Such an anæsthe must inevitably bless the day he decided on training his muscular abilities.

shaken by the sight like a mulberry tree in the wind.

"Wait for me outside, Children of the West," he said, quickly and hoarsely. So he stepped into the place, taking the lantern with him, and left the trio in the appalling gloom of the corridor, for the guard's feeble light had been overturned and extinguished during the scuffle that followed Plympton's onslaught.

Naturally, when the door closed behind Kai Wang the three crept closer together, and hands were outstretched and groping for each other as though in this way to gain reassurance by personal contact.

"Courage," said Larry, as his hand drew Avis closer to his sturdy little form. Since he was all she had to stand between herself and harm, he must be protector as well as cousin.

"This is very queer," remarked Plympton, with the air of a man who was puzzled; who suspected, and yet could not quite prove the facts wholly to his own satisfaction.

"What is?" asked Larry, eager to be in at the hunt, if there was one.

"Our friend's actions. Why does he desert us, even temporarily, and go in to see that remarkable prisoner? I say it's queer, and not altogether fair. Still, I have a suspicion—you know Kai Wang is a Li Hung Chang man, heart and soul. Didn't you recognize the gaudy chap on the divan, Larry?"

"By Jove! I failed to see his face," exclaimed the little man; "but I'm beginning to have suspicions myself, remembering what event is supposed to be taking place here to-night."

"Well, it's my honest conviction the man in yonder is the fallen Emperor; that he has been given a sleeping potion and carried here, or else lowered through some opening, and that a new ruler reigns in his stead, though it may be weeks or months before the true state of affairs will be known, so secretly are all such events carried on under the flag of the yellow dragon."

The impressive manner in which Plympton spoke carried conviction with it.

"Granted that this is true, what does it matter to us? One man is no better than another in the imperial chair, so long as that woman's orders are obeyed by the mandarins, who fear her threats and crawl on their stomachs before her."

"True. All we have to regret is that the palace should be such a scene of turmoil on this night, which makes our task the more difficult."

"Thunder! I don't like this dark—why don't Kai Wang come out of that?" and Larry gave a couple of smart raps on the door to call the attention of the other to the fact that they waited.

"Feel around with your foot and see if the fellow is still lying where I left him," said the Briton, a little anxious; for the game was in just such a condition, like Mahomet's coffin, suspended in space, that a very little thing was required to turn it one way or the other.

And when Larry, groping with his foot on the spot the guard was supposed to occupy, failed to discover anything, Lord Rackett, unable to stand the suspense longer, scratched a vesta and was able to see to his own satisfaction that the fallen soldier lay like a mummy, swathed in hemp rope.

It was Avis who uttered an exclamation, and her tone was so full of startled surprise, yes, even of alarm, that on the impulse of the instant Plympton dropped the wax match and clapped his foot on it.

The result was immediate darkness, deep and impenetrable, almost Stygian in its density.

"What was it?" asked Larry, fearfully, for well he knew Avis would not have uttered such a cry unless she had made some discovery.

"I saw a man," she answered, eagerly.

"Where?"

"Down the passage."

"The way we came?" asked Plympton, believing they had been followed

### JUVENILE HUMORISTS.

#### Essays Which Reveal the Comic Side of School Life.

Here are a few extracts from a book by Henry J. Barker, on the "Comic Side of School Life."

In an essay a boy wrote—"The turkey is king of the geese, and most other birds, but the eagle can fight it. It is like a very big cock, if it wasn't for the tail. It is not cruel to kill a turkey if only you take it into the back yard and use a sharp knife, and the turkey is yours."

"Turkeys lay very dear eggs what you can't afford, but they do not give butter or milk, because they can't do it, not if they tried three times."

A boy's visit to the Zoo brought forth many strange definitions. The skin of the hippopotamus, we are informed, "is so thick that it can stay in its pond all day without the water soaking through." As for the elephant, "it looks as if it couldn't all of it die, it is so big."

Of the cat an urchin discovered that "when you stroke this tame quadruped by drawing your hand across its back, it cocks up its tail like a ruler, so as you can't get no further."

Bue perhaps these remarks on politeness are the most delightfully ingenuous—"Never eat quickly or you might get bones in your throat. My father knows of a boy who got killed over his Sunday dinner. The greedy boy was picking a rabbit's head in a hurry and swallowed one jaw of it, and my father says he was choked to death there and then." Be very polite over your meals, then, especially when it's rabbits. Since my father told me that, I have always felt very queer over a rabbit dinner. I don't talk much, and don't ask for any more."

A definition that won a little girl the inspector's praise, despite its strangeness, was, "Turf, sir, is grass and clean dirt, stuck together by God."

### A MOTHER'S STORY.

#### She Tells How Dr. Williams' Pink Pills Saved Her Daughter.

Zanaemia is the doctors' name for bloodlessness. It is an ailment that effects almost every girl in her teens. Womanhood makes new demands upon her blood supply that she cannot meet. Month after month her strength, her very life, are being drained away. No food and no care can do her any good. No common medicine can save her. She needs new blood. New blood is the one thing—the only thing—that can make a healthy woman of her. Dr. Williams' Pink Pills actually make new blood. That is why they never fail to cure anaemia. That is how they save from an early grave scores of young girls whose health and strength depend upon their blood supply. Mrs. Anson Clark, Arden, Ont., says:—"Dr. Williams' Pink Pills have been a great blessing in my family as two of my daughters have used them with marked success. When my eldest daughter was about seventeen she began to fail in health. Her blood seemed to have turned to water. She was troubled with headaches and dizziness; the least exertion would cause her heart to palpitate violently and she could not walk up stairs without stopping to rest. She doctored for upwards of a year, and the doctor said she did not have as much blood in her body as an ordinary healthy person would have in one arm. The doctor's treatment did not do her a particle of good. She seemed slowly fading away. Then she became afflicted with salt rheum and her hands were almost raw. About this time a neighbor advised the use of Dr. Williams' Pink Pills and she began taking them. After using the pills for a few weeks we could see an improvement, her appetite began to improve and a trace of color came to her cheeks. She continued taking the pills until she had used thirteen boxes when she was as well and strong as ever, every trace of

of the ground, and the sooner they perished in that direction the more speedily would they accomplish their end.

The big Englishman had taken part in numerous dangerous forays during his checkered career, but he could not remember one that contained quite as exciting elements as the present.

Had he dared to give it serious thought, to have remembered how cruel and relentless the Chinese were toward those they consider enemies, and how sacredly they were wont to guard this holy of holies, the imperial palace in the heart of the Forbidden City, he must have been more or less appalled at the magnitude of the task they had so cheerfully assumed.

But men of his stamp are not accustomed to looking back, or even counting the number of barriers to be crossed, when once they have put their hands to the plow.

Thus far from the central palaver chamber through these terrible passages they had not suffered through a lack of illumination, thanks to the liberality that seemed to govern the actions of those in whose hands the lighting of the place was given, and who certainly cut did themselves on this particular night.

When the steps leading to the subterranean depths were reached, however, this generous policy came to an end.

Below all looked gloomy and forbidding.

Evidently the governor of the palace did not desire to attract attention toward this part of the great building, lest some of the visiting mandarins, in exploring the place, discover the dungeons prematurely.

Doubtless, most of them sooner or later would make the acquaintance of these strong rooms.

It is the usual fate of Chinese petty rulers who incur the severe displeasure of the authorities at the Northern capital.

Kai Wang apparently anticipated just such a call. Doubtless he had it in view when he thrust the lantern into Larry's hand.

The little man had inwardly maligned that same antique affair more than once when he banged it against his shins in walling, but he was now to receive the reward that would compensate for all the ill done in the flesh.

When they had carefully descended the flight of steps, the guide called for a light, and Larry, producing a match, soon had the venerable lantern sputtering again.

Poor as was the illuminating power of that snare lantern, no one left like feeling, fault with it, since their object was accomplished.

At least they could make sure that no yawning abyss opened at their feet.

This was what Larry dreaded worse than anything else. He had heard so much of the traps which Chinese ingeniously laid for trespassers upon royal property, that imagination kept him constantly on the alert for such dangers.

Kai Wang did not drop an iota of his haughty bearing, and from this fact Lord Rackett was of the opinion that they had not seen the last of their enemies. Perhaps guards were to be encountered in these gloomy corridors, especially upon this night when weighty matters seemed on the tapis under the imperial roof, and the will of the woman who reigned back of the bureau was about to find expression in the way of a quiet change of puppet sovereigns.

If the mock mandarin had this idea in his mind, subsequent events justified his extreme caution.

They had not proceeded far, and made only a couple of turns, when a dim light was discovered ahead, beside which the figure of a Chinese soldier could be seen.

Perhaps he stood at the door of the dungeon to which they desired to find entrance.

Lord Rackett did not know, and could only give a shrug and guess.

But something seemed to warn him

Nor was this the first time in his life that these college tactics had served him well. Such an amulet must inevitably bless the day he decided on training his muscular abilities.

The guard crashed down.

Avis gave an involuntary little cry and turned her head, possibly believing that it might be deemed necessary to finish the wretch in order to advance their cause.

Had Plympton raised his eyes to Kai Wang, as the gladiators in the ancient arena did to Caesar when an adversary was under their knee, he would doubtless have found that worthy ready to utter the fatal decree of "thumbs down," since the idea of mercy is seldom found in the Chinese lexicon.

But Lord Rackett did not take his orders from such a source when it came to butchery, and hence, having choked his victim into a state of unconsciousness, he proceeded to bind him.

#### CHAPTER XXXIV.

Merely may be a quality that is not strained, blessing him who gives and him who takes, when both parties to the deal are civilized beings, capable of appreciating its wondrous powers.

In many cases, however, men who have allowed the dictates of their heart to overcome the prudence of their reason have lived to bitterly regret having practiced mercy toward those semi-barbarous enemies who were not built to appreciate the kindness bestowed upon them.

Perhaps Lord Rackett might be in this boat.

He knew what chances he was taking even while stubbornly refusing to see the "thumbs down" of the idol-maker, and hastily securing the fallen foe with a piece of native rope that came fortunately to his hand, he arose, breathing heavily.

Kai Wang never said a word, but his look was one of reproach, as though he could not understand how any one could harbor scruples against taking a worthless life that had been given into their hands by the fortune of war, especially when safety demanded such removal.

At the same time he realized that Plympton had carried out his work grandly, and was a man well-fitted to decide for himself what line he should follow.

Kai Wang dropped down beside the fallen guard, and his hand hovered over his heart.

At first Plympton was under the impression that the Chinese guide meant to carry out his own ideas with regard to removing a living obstacle in their successful march forward.

Then he was as heartily ashamed of the suspicion when he saw Kai Wang suddenly hold up a big, rusty key, that was secured to the girdle of the soldier by a leather thong.

Larry's excitement increased when he saw by this that they were given the entire to one of the dungeons, at least.

As he held the wonderful lantern now, his one aim was to discover a door, and this proved to be an easy problem, since the light disclosed such an object only a few yards away.

Kai Wang had also discovered the same, and advanced theatrically upon it, armed with the ponderous key, which was of a size to make a creditable weapon of offense, should the occasion arise when its service in this line were really needed.

It was a moment of some suspense.

Even Larry held his breath while the key was being turned in the rusty lock.

Kai Wang took the light, and as the door swung open he held it up, while every eye in the little group at the door eagerly endeavored to see what lay beyond the threshold.

Plympton had a glimpse of a thin-faced Chinaman reclining upon a divan, and apparently either asleep or dead.

Something about his rich silken vestments and the gold ornaments to be seen upon his person aroused a vague suspicion in his mind.

As for Kai Wang, he seemed to be

ly. "Where?"

"Down the passage."

"The way we came?" asked Plympton, believing they had been followed from the great palaver central chamber by some emissary of a mandarin who had suspicions.

"No, no; in the other quarter—further on."

"Then that is a right, for if I have guessed the intentions of our friend, it is his design to let nothing escape us in that quarter," declared the Briton, calmly.

His confidence was enough in itself to restore any shaken feeling of belief in the ultimate result of their campaign.

A man who thoroughly believes in the success awaiting him does much to bring about the very result for which he strives, since such confidence is half the battle.

Larry was not quite so easy in his mind.

He had vague fears lest the other might slip past them in the dark.

"I say, Lord Rackett, would you mind giving me your hand? By Jove! now we can stretch quite across the passage-way, don'tcher know, and prevent the wuscal from getting to the rear."

Lord Rackett saw the point, and did not hesitate to give the desired grip; all the same, he was not altogether easy in his mind, knowing what he did of these Chinese soldiers when cornered, and how apt they are to copy their Malay cousins, who, open knife in hand, run "amuck," slashing right and left.

(To be continued).

#### CHINESE BABIES.

The Heathen Chinese has curious ideas as to the rearing of children, and especially on the amount of cleanliness desirable for them. A Chinese babe is washed on the third day after its birth, and generally with warm water. Occasionally a newborn infant is rubbed all over with raw eggs, but not washed till it is three months old. On the thirteenth day of its life the infant's head is shaved. This ceremony, among wealthy people, is accompanied by feasting and rejoicings, and poorer folk are as festive as their means will allow. A boy is allowed a birthday feast once in ten years. Evil spirits are held in great awe by the Chinese, who do their best to protect their offspring from them. With this end in view a baby is sometimes dressed as a priest, and sometimes decked with all manner of charms, one queer idea being to attach a piece of lamp-wick to its clothing. As boys are more valued by their parents than girls, they are supposed to be most under the eye of evil spirits, and accordingly parents often dress their infant sons as girls, and give them girls' names, hoping thus to deceive the spirits. Often the poor little things are treated to harsh words and even blows to assist in the work of deception.

#### UNCLE ALLEN.

"When you hear a fellow always saying, 'The mean men ain't all dead yet,' moralized Uncle Allen Sparks, 'you can generally spot him as one of the survivors.'"

her appetite began to improve and a trace of color came to her cheeks. She continued taking the pills until she had used thirteen boxes when she was as well and strong as ever, every trace of both the anaemia and salt rheum had disappeared and she has since enjoyed the best of health. Later on my youngest daughter, aged fifteen, began to lose her health, but thanks to our experience with Dr. Williams' Pink Pills we knew where to look for a cure and after using four boxes of pills she was all right again. I have also used the pills myself for nervous troubles with complete success."

Rich red blood is the secret of health—Dr. Williams' Pink Pills is the secret of rich red blood. They actually make rich red blood, that is why they cure anaemia, headaches and backaches, indigestion, nervous prostration, heart palpitation, neuralgia, rheumatism, sciatica, St. Vitus Dance and the ailments that make the lives of so many women and growing girls miserable. Sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

#### AMAZING WEDDING.

Couple Married in London While Living on Continent.

Inquiries by the Zurich (Switzerland) police have brought to light an extraordinary story of the alleged marriage in a London church of a couple who at the time were on the Continent.

M. Black, and his wife, the latter of Austrian nationality, were recently arrested at Zurich as dangerous Anarchists. Investigations resulted in the discovery that the couple had been married in a remarkable method. They sent papers relating to themselves to a friend in London, who, it is stated, took them to a clergyman, with the result that the marriage ceremony was celebrated, although the bride and bridegroom were at Zurich. English marriage laws have become notorious in Switzerland, adds correspondent, and the term "married in England" is one of reproach.

It is possible that an explanation of the correspondent's message may be found in the unscrupulous personation by paid agents of the couple who desired a record of their English marriage. The marriage laws of many Continental countries impose restrictions not known in this country, such, for instance, as considerable length of residence and the consent of parents.

Here, with a residence of under a month, it is quite possible to be married, and such marriage being confirmed by the foreign Consul is binding in the country from which the visitors come. Hundreds of couples visit England for the purpose of a speedy marriage.

It is quite possible, therefore, that an unscrupulous agent in London might procure two persons representing themselves as the couple whose papers were in his possession to go through the marriage ceremony. When it was completed, the papers and evidence relating to the marriage might be forwarded to the real couple, who have all the time been on the Continent.

#### SPOONING FOR A LIVING.

A curious industry in Russia, and one which, nevertheless finds employment for thousands of men, is that of making wooden spoons. In the district of Semenovsk, where they chiefly came from, no fewer than 7,000 men make a living at the trade. The spoons are generally made from birch wood, and a skillful workman can turn out several hundreds a day. No fewer than 2,000,000 spoons are manufactured during the course of the year, which are sold at six to eight roubles (\$3 to \$4) per thousand. They find a ready market, and penetrate as far as Persia, Khiva, Bokhara, and Khokand.

## Horse Owners! Use GONCAULT'S Caustic Balsam

A Safe, Speedy, and Positive Cure  
The safest, best BALM ever used. Takes the place of all liniments for mild or severe action. Removes all Bunches or Blemishes from Horses and Cattle. SUPERSEDES ALL CAUSTIC OILS. Invaluable to breeders and owners. Every bottle sold is guaranteed to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars.  
The Lawrence-Williams Co., Toronto, Ont.

## Cut Glass Bowl \$5.

Only as manufacturers is it possible for us to offer our special eight inch Cut Glass Bowl at \$5—packed at our risk and carriage paid to your door.

It is of the clearest crystal glass, deeply and brilliantly cut in "hob-nail" star design.

Our illustrated catalogue ready will tell you of other remarkable price-savings in highest quality cut glass.

**Ryrie Bros**  
LIMITED.  
134-138 Yonge Street.

## WONDERS OF VEGETATION

### THE GREAT LIFTING POWERS OF SOME PLANTS.

Remarkable Growth of Onions—Melons  
Raise a Weight Amounting to  
Two and a Half Tons.

The fertility of some members of the vegetable world is really astounding. Thus, an ounce of onion seed which was sown in a garden at Newton Abbot produced no less than 400 pounds of onions. This will give some idea as to the prolific nature of vegetables, but it is by no means an isolated example, says London Tit-Bits.

For instance, at Busbury, a village near Axminster, an agriculturist planted an ordinary winter cattle bean. The average individual if asked how many beans made five would make a different answer from that which the agriculturist would give. His single bean produced no fewer than 660 beans.

Very extraordinary is the force exerted by growing vegetation. A curious example of this fact has been furnished in the gardens at Kelsey Park, Beckenham. Signs of cracking were observed in the brickwork of a frame and gradually a block was pushed out of position. This weighed in the aggregate over 1½ hundredweight. Several bricks had to be cut out by the workmen, and then they found a mass of mushrooms

shrubs which will grow are hollies, laurels, japonicas, mountain ashes and almost any hardy evergreens.

### "REINCARNATED" QUAIL.

Novelist's Story of a Second-Hand Restaurant Bird.

"I was dining the other night at one of our best restaurants," writes Mr. Frank Richardson in the Pall Mall Gazette, "and on analyzing my quail, I found that it was only a scenario, that the skeleton existed, but the bulk of the bird had been 'made-up' with potted meat. My neighbor's quail, I noticed, lacked a leg. Now, what happens is this: During a long dinner, the chances are that one only cuts off the breast of the bird. The rest remains intact. The quail is then carefully collected, taken to the kitchen, and reconstructed.

"Most of the best hotels and restaurants are run in connection with cheaper restaurants, and to them the quail reincarnated is sent. It may then, provided it has not been too seriously damaged by the diner, be sent on to a third, fourth and even a fifth restaurant."

"Neither in London nor in Paris is it prudent, we imagine, to inquire too closely into the vicissitudes of fortune undergone by any dismembered bird or beast on the table, even though the restaurant be one which is beyond suspicion of its food coming from Chicago. Curries, minces, salmons, fricasees and viands in aspic are rarely made of fresh meat, and the wooden, savory taste of the meat in them is among the least of their disadvantages. They are quite out of fashion, it may be added (with the exception of the aspic) in most first-class restaurants.

Mr. Richardson's quail might, however, be a perfectly honest bird. To pick the flesh from a quail, pound it up, replace it on the skeleton, and serve the bird in aspic is a common, if foolish, effort of cookery, utterly ruining the two or three delicious mouthfuls of which a quail consists. Chickens are sometimes served in this fashion, and in the familiar "caneton rouennais" certain parts of the duck are pounded up into sauce for the reset.

One likes, however, to be well acquainted with the restaurant where these dishes are presented. At a cheap table d'hôte dinner in Soho or the Palais Royal they are best left alone.

### PLEASANT MOMENTS.

It has been said with a great deal of truth that you can never become really acquainted with a man until you have supped with him, and in order to ensure a pleasant time good tea must be used. During the past sixteen years "SALADA" has become a familiar word to every newspaper reader, and the fact that the demand is steadily increasing requires no comment; it tells its own story "SALADA" is king.

### NOT SAFE TO FOLLOW IT.

"Did you follow my prescription?" asked the doctor.

"No; and if I had it would have killed me," answered the patient.

"Why, how is that?"

"I threw it out of the window."

Dr. J. D. Kellogg's Dysentery Cordial is prepared from drugs known to the profession as thoroughly reliable for the cure of cholera, dysentery, diarrhoea, griping pains and summer complaints. It has been used successfully by medical practitioners for a number of years with gratifying results. If suffering from any summer complaint it is just the medicine that will cure you. Try a bottle. It sells for 25 cents.

### IN A CIRCLE.

"Did you ever stop?"

"What for?"

"To consider."

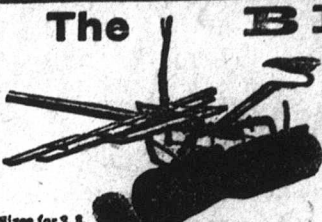

"To consider what?"

"What you stopped for."

## IT IS PURE! This is the paramount feature of "SALADA" CEYLON GREEN TEA

Free from dust, dirt and all foreign substances.

Lead Packets only. 40s, 50s and 60s per lb. At all Grocers.  
HIGHEST AWARD ST. LOUIS, 1904.

## LANDS In Western Canada

Saskatchewan, only 8 miles from two railways, C.P.R. & G.T.P. Strong soil, 90 per cent. plough land, spring creek, no sloughs. About 40 miles N.E. of Indian Head. Price \$10.50 per acre. Write for map and full particulars.

R. PARSONS, 91 Wellesley Street, Toronto, Canada.

## NOTHING More Safe and Sure

Than an Investment in  
Toronto Real Estate.

**\$34,000—FOR INVESTMENT**—Block of new solid brick houses, under five years' lease to pay over 10 per cent. net: most centrally situated on quiet residential street. As owner has other houses under construction these are offered at a bargain.

**S. FRANK WILSON, Owner, 73 Adelaide Street West, Toronto.**

TELEPHONE MAIN 15.

usually a block was pushed out of position. This weighed in the aggregate over 1½ hundredweight. Several bricks had to be cut out by the workmen, and when they found a mass of mushrooms, only 3 pounds 3 ounces in weight, growing in the centre of the wall.

Melons are extremely strong; in fact, one has been known to raise a weight amounting to

**TWO AND A HALF TONS.**

A well-known student of nature tried to estimate the strength of a melon when it was eighteen days old and measured 27 inches in circumference. He fixed a sort of harness around it, with a long arm or lever attached, and so was able to measure the force of the melon by the weight it lifted at the end of the lever. When about twenty days old—that is, a couple of days after the harness had been fixed on—it exerted a strength of sixty pounds, while seventeen days afterward it actually lifted 5,000 pounds weight.

The seed of the globe turnip measures only about the twentieth part of an inch in diameter, yet in the course of a month or two it will enlarge into 27,000,000 times its original bulk, in addition to the large crop of leaves.

In fact, by careful experiment it has been found that a turnip seed, under favorable conditions, will increase its own weight fifteen times in a minute. Turnips growing in peat ground have been found to increase more than 15,000 times the weight of their seed in a single day. By exceptional means, such as by drugging, even this may be exceeded.

In this connection it may be added that by drugging plants and other vegetables their rate of growth can be increased to an astonishing extent. When placed in air-tight dens and fed on ether for twenty-four hours, until they become permeated with the fumes, they mature in about half the time it takes them to develop naturally. It is confidently expected that this method of drugging will work a revolution in the methods of forcing flowers and garden vegetables.

**THE CLEVERNESS OF PLANTS**

is extremely remarkable, and some of them employ the most ingenious stratagems whenever danger threatens them. There is, for example, a species of mimosa in South Africa which feigns death in times of danger. This is evidently for the purpose of preventing grass-eating animals from plucking it. While in a natural state the plant is of a vivid hue, yet directly it is touched by any living animal it collapses into a tangle of apparently dead and withered stems. Among British wild plants, by far the most sensitive is that of the insectivorous sundew, which is found on boggy land.

Notwithstanding their vitality, members of the vegetable world will not flourish in smoky towns. Even the hardy trees have no love for those products of modern civilization. It is well to know that horticulturists are almost unanimous in giving their vote to the plane as the best tree for planting in smoky towns. Where the smoke is not too dense, it is found that limes, sycamores, poplars, elms, horse chestnuts and Turkey oaks do well, but that practically exhausts the list. Among the

"Did you ever stop?"

"To consider."  
"To consider what?"  
"What you stopped for."

**THEY KNOW IT.**

Thousands of people know that the ordinary remedies for piles—ointments, suppositories and appliances—will not cure.

The best of them only bring passing relief.

Dr. Leonhardt's Hem-Roid is a tablet taken internally that removes the cause of Piles, hence the cure is permanent. Every package sold carries a guarantee with it.

It is perfectly harmless. \$1. All dealers, or The Wilson-Fyle Co., Limited, Niagara Falls, Ont.

Benevolent Lady: "But, my poor man, if you have been looking for work all these years, why is it that you have never found any?" Tramp (confidentially): "It's luck, mum; just sheer good luck."

**Weak and Sickly People** envy those in robust health. No need to stay sick when by the use of the best tonic, "Ferrovin," you can get rich blood and renewed strength and vigor.

"Gentlemen," said the professor, "this is one of the most dangerous experiments known to science. The slightest mishap, and the experimenter will be blown to atoms. I will now step into the next room while my assistant performs the experiment."

Its Power Grows with Age.—How many medicines loudly blazoned as panaceas for all human ills have come and gone since Dr. Thomas' Electric Oil was first put upon the market? Yet it remains, doing more good to humanity than many a preparation more highly vaunted and extending its virtues wider and wider and in a larger circle every year. It is the medicine of the masses.

De Style—"What did your rich uncle leave you when he died?" Gunbusta—"Nothing." De Style—"Didn't he say anything to you before he passed away?" Gunbusta—"Yes; he said nothing was too good for me."

**Sunlight Soap is better than other soaps, but is best when used in the Sunlight way. Buy Sunlight Soap and follow directions.**

Caller—"I have here several bills which are long overdue." Harduppe (desperately)—"I am sorry to say that your cashier is out to-day." Caller—"Oh, well, it doesn't make much difference. I'll call and pay them at some future date. Good day, sir."

Impurities in the Blood.—When the action of the kidneys becomes impaired impurities in the blood are almost sure to follow, and general derangement of the system ensues. Parmelee's Vegetable Pills will regulate the kidneys, so that they will maintain healthy action and prevent the complications which certainly come when there is derangement of these delicate organs. As a restorative these Pills are in the first rank.

**SEEK ISLAND OF WEALTH.**

**Mysterious Expedition Has Started From London.**

Mystery surrounds the voyage of the steamer Xema, which has sailed from Gravesend on the Thames, for a destination which is a close secret. It is certain, however, that she carries a diamond-seeking expedition financed by a syndicate in London, and it is thought that she is going in search of an uncharted island off the African coast, of whose diamond wealth rumors were recently circulated.

The Xema is owned by Earl Fitzwilliam, who two years ago, fitted out the abortive expedition in the Veronique to Cocos Island in search of a pirates' buried treasure. The Earl, however,

and construction these are offered at a bargain.  
**S. FRANK WILSON, Owner, 73 Adelaide Street West, Toronto.**  
**TELEPHONE MAIN 15.**

**AUTOMOBILE FOR SALE**

**Fifty Horse Power "THOMAS" Motor Car, in perfect condition, cost \$5,000. Very low price takes it. Address,**

**5 Dale Ave., Rosedale, Toronto**

**TELEPHONE MAIN 15.**

has nothing further to do with the expedition, which is the enterprise of the Collis Diamond Syndicate.

The crew signed on for St. Helena, which lends color to the story of the African diamond isle. The ship is fitted up with great luxury and the officers are resplendent in gold lace. In addition she carries as passengers a party of ladies and gentlemen whose identity is a secret. So that nothing is lacking to make the voyage of the Xema romantic and interesting.

**GOING TO BE A GENIUS.**

"John's home from college?"  
"Oh, yes."  
"What's he goin' to do now?"  
"Well, twixt you an' me, I think he's just about decided to loaf around and be one of these geniuses that nobody can understand."

**TO BE FORGOTTEN.**

"Father," called James, after he had reached home from college, "what shall I do with my diploma?"  
"Forget it," yelled father, "and go out and look for a job."

**ADVANCE OF SURGERY.**

Twenty years ago fifty per cent. of cases of amputation terminated fatally; but under the modern system of antiseptic surgery the danger of this operation has been so far reduced that the rate of mortality does not now exceed from five to twelve per cent. of the number of cases.

Mother Graves' Worm Exterminator does not require the help of any purgative medicine to complete the cure. Give it a trial and be convinced. me with a Self Educator."

"Miss Lacy—"I don't feel comfortable in this bodice at all." Miss Ascum—"Why not?" Miss Lacy—"It makes me feel uncomfortable because it feels too comfortable to be good fit."

**You are right in regarding eczema as a dangerous disease. Anoint the swollen, itching skin with Wilson's Cerate: And take Wearer's Syrup internally.**

A man always making excuses leaves himself no time to make anything else.

Business based upon friendship threatens both; friendship based upon business strengthens both.

Sure Regulators. — Mandrake and Dandelion are known to exert a powerful influence on the liver and kidneys, restoring them to healthful action, inducing a regular flow of the secretions and imparting to the organs complete power to perform their functions. These valuable ingredients enter into the composition of Parmelee's Vegetable Pills, and serve to render them the agreeable and salutary medicine they are. There are few pills so effective as they in their action.

**SMOKE VERSUS FROST.**

In Germany some interesting experiments have recently been made in the protection of orchard trees against night frosts by means of fumigation. A part of an orchard in bloom was thus successfully guarded against an April frost by the dense smoke of naphthalene. But the experiment was very expensive, 50 kilograms of naphthalene being consumed by 7 flames in one hour. Later a new preparation of chemicals was tried, producing a comparatively large volume of smoke with the expenditure of only two kilograms of the material per hour. These trials are under the direction of an experimental gardening association.

# RUSSIAN GOVERNMENT'S POLICY

## It Includes Useless Restrictions Against the Jews.

**REFORM PROMISES.**

A despatch from St. Petersburg says: The declaration of policy by the Government, of which lately several forecasts have appeared, was issued on Wednesday. It promises many liberal reforms, including the immediate withdrawal of useless restrictions against the Jews, increasing provincial autonomy, reform of the police and other public services, the establishment of zemstvos in Poland and the Baltic provinces, and the institution of an income tax. Meanwhile the Government is determined to maintain order, and it accordingly decrees court martial for political crimes, and increases the penalties for carrying on the revolutionary propaganda.

**TWO HUNDRED ON TRIAL.**

A despatch from Cronstadt, Russia, says: The trial of two hundred participants in the recent mutinous outbreak, including M. Onipke, one of the peasant leaders in the outlawed Parliament, and fifty other civilians began here on Wednesday behind closed doors. There are over a thousand witnesses, and, therefore, the proceedings are expected to be protracted.

**OFFICERS RETURN THREAT.**

A despatch from Sevastopol says: In answer to the publication of a notice from the terrorists that a sentence of death has been imposed on Col. Dumbadze, commander of a rifle regiment here, the officers of that corps in an open letter have announced that in case of an attack being made on the colonel they will exact vengeance on the leaders of the progressive parties.

**FEARS THE NAVY.**

Admiral Skydioff, commander of the Black Sea fleet, and the military commander here are very apprehensive of the attitude of the sailors of the fleet and the garrison of the fortress. The annual cruise of the training squadron as well as the regular fleet manoeuvres have been abandoned.

**POLICY CLEARS THE AIR.**

A despatch from St. Petersburg says: The Government's declaration of its policy has had a favorable effect in commercial and financial quarters. There was a general rise in prices on the Bourse on Thursday, where the first business in the recent internal loan was transacted, while 4 per cent. bonds rose to 70.

The Moderate and Liberal newspapers praise the agrarian proposals, and only condemn the depression of the revolutionary propaganda in the army because it is retroactive. On the other hand, the revolutionists and extremists of all kinds continue irreconcilable.

**SECRET TRIALS.**

Under the Imperial ukase of Wednesday Governor-Generals and similar authorities in districts that are under martial law are empowered to send accused persons before a field court martial without preliminary examination. The court consisting of a president and four army or navy officers, will make its decisions in camera within eighteen hours, and the sentences will be carried out within twenty-four hours.

**CORRESPONDENT BEATEN.**

The London Standard's correspondent

sacre continued all day. The soldiers attacked all civilians, Christians and Jews, robbing and murdering without discrimination. The authorities have sent a regiment of infantry from Biela to restore order.

The Jews in Warsaw are panic-stricken. Alarming reports are circulated throughout the city:

### CHILDREN'S COURTS.

#### Law Now Requires That They Should be Established.

Youthful offenders under sixteen or homeless children should be removed entirely from the jurisdiction of the regular Courts and be dealt with by a specially organized Children's Court. In connection with this Court there should be a detention home and probation officers to investigate charges of youthful wrong-doing and homelessness, etc., and submit to the judge a report of each case. Children charged with petty offences should be placed temporarily under the care of these officers, who would supervise the home life, help to procure employment, or take whatever steps might be necessary to remove the cause of offence. Judge Tuthill, who had charge of the Children's Court in Chicago for a time, was asked what he thought about the born criminals and degenerates. He is quoted as replying "There are no born criminals. If I felt that I should lose faith in God, Society makes criminals, and environment and education makes criminals, but they are not born so." He further expressed the opinion that if the best children in the world were submitted to the same influences as the children daily brought before him they would commit the same offences. The home surroundings and early training of children are all important factors in determining their subsequent career. When children get into conflict with the law it is rarely their fault, and their cases should be studied in a kindly parental way by persons whose love of childhood is greater than their sense of so-called justice. Only in this way can they be permanently removed from the criminal classes.

J. J. KELSO, Toronto.

### BEATEN ON WAY FROM WORK.

An Englishman the Victim of a Brutal Assault.

A despatch from Bowmanville, Ont., says: Saturday evening, about dusk, a brutal assault was committed on an Englishman named Richard Ford while near the G.T.R. track, on his way home from work. Ford, who has not been in the country very long, resides with his wife and family in a house belonging to Mr. E. Burk, on the lake shore. He worked with Burk for a time, but some dispute arising between them, he left his employ, and secured a position in the foundry, walking some four miles to his work every morning and returning in the evening. He was on his way home on Saturday evening when he was attacked by three men and his hands tied. He was then blindfolded, knocked down, and severely kicked and beaten. He finally managed to get on his feet, and, with his hands still tied, kicked at the parties until they decamped. He found his way to the residence

# THE WORLD'S MARKETS

## REPORTS FROM THE LEADING TRADING CENTRES.

### Prices of Cattle, Grain, Cheese and Other Dairy Products at Home and Abroad.

Toronto, Sept. 11.—Flour—New Ontario wheat, 90 per cent. patents, are quoted at \$2.70 to \$2.75 in buyers' sacks outside, for export. Manitoba first patents, \$4.40; second patents, \$3.90, and strong bakers', \$3.80. Toronto.

Bran—The market is steady at \$14 to \$14.50 in bulk, outside. Shorts are quoted at \$18 to \$18.50 outside.

Wheat—No. 1 Northern Manitoba quoted at 78½¢, lake ports, and No. 2 Northern at 76½¢, lake ports.

Corn—No. 2 American is quoted at 59¢ on track, Toronto.

### COUNTRY PRODUCE.

Beans—Hand-picked selling at \$1.75 to \$1.80, and primes at \$1.60 to \$1.70.

Honey—Strained honey quoted at 9½ to 10¢ per lb, and combs at \$2 per dozen.

Hops—13 to 16¢ per lb.

Hay—Car lots of No. 1 timothy are quoted at \$9.50 to \$10 on track, Toronto, and No. 2 at \$8.

Straw—\$5.50 to \$6 per ton.

Potatoes—They are quoted at 50 to 60¢ per bushel in quantities.

Poultry—Turkeys, fresh killed, 12 to 14¢; chickens, 10 to 12¢ per lb, alive; hens, 8 to 9¢ per lb, alive; ducks, alive, 10 to 11¢ per lb.

### THE DAIRY MARKETS.

Butter—Pound rolls are quoted at 20 to 21¢; tubs, 18 to 20¢; large rolls, 18 to 20¢. Creamery prints sell at 24 to 25¢, and solids at 22 to 23¢.

Eggs—Good candled stock, 16½ to 17¢ per dozen. Splits, 12½ to 13¢.

Cheese—They are quoted at 13½ to 13¾¢, the latter for twins.

HOG PRODUCTS.

Dressed hogs in car lots nominal.

Bacon, long clear, 12½¢ per lb in case lots; mess pork, \$21.50 to \$22; short cut, \$24 to \$24.50.

Hams—Light to medium, 16¢; do, heavy, 15¢; rolls, 12½¢; shoulders, 11½ to 12¢; backs, 17½ to 18¢; breakfast bacon, 15 to 16¢.

Lard—Terces, 11½¢; tubs, 11½¢; pairs, 12¢.

### BUSINESS AT MONTREAL.

Montreal, Sept. 11.—Local dealers are well pleased with the way the demand for oats for local consumption keeps up. Large sales were made again today, and there is still a good inquiry; quotations are steady at 36¢, 37¢, and 38¢ per bushel for Nos. 4, 3 and 2, store.

Flour—Manitoba spring wheat patents, \$4.50 to \$4.70; strong bakers', \$4 to \$4.20, and straight rollers', \$3.30 to \$4.10 in wood; in bags, \$1.85 to \$1.95; extra, in bags, \$1.25 to \$1.50. Rolled oats—\$2.20 to \$2.25 in bags of 90 lbs.

Cornmeal—\$1.40 to \$1.45 per bag; granulated, \$1.65.

Millfeed—Ontario bran, in bags, \$1.18 to \$1.19; shorts, in bags, \$20 to \$21.50; Manitoba bran, in bags, \$18 to \$19; shorts, \$22. Oats—No. 2, 38¢ per bushel; No. 3, 37¢; No. 4, 36¢.

Hay, No. 1, \$10 to \$10.50 per ton on track; No. 2, \$9 to \$9.50; clover, \$7 to \$7.50; clover, mixed, \$8 to \$8.50.

Beans—Prime pea beans, in car load lots, \$1.35 per bushel; hand-picked, \$1.70 per bushel.

Peas—Boiling, in broken lots, \$1.20 per bushel.

Potatoes—40 to 50¢ per bag of 90 lbs, nominal.

Honey—White clover, in comb, 14 to 15¢; buckwheat, 10 to 11¢ per lb section; extract, 8 to 8½¢; buckwheat, 7½¢ per lb.

Provisions—Barrels short cut mess, \$23 to \$24; half-barrels, \$11.75 to \$12.50; clear fat backs, \$23.50; long cut heavy mess, \$21.50; half-barrels do, \$11.25; dry salt long clear bacon, 12½ to 12¾¢ per lb; barrels plate beef, \$12 to \$12.50.

# A DRIVER'S LUCK.

Son of Wealthy South African Leaves for Inheritance.

A despatch from Montreal says: On the Allan liner Tunisian there sailed on Friday a saloon passenger, one James Broderick Roach, who a week ago was worth a few dollars, and to-day is possessor of \$350,000. The story reads like a romance, with the difference that it is real, for the driver of a rig has become a wealthy man. Mr. Roach came to Canada and settled in Montreal some years ago. His father went out to South Africa in the days when Kimberley and Johannesburg were unknown to the world and the race of South African millionaires had not yet come forth. After his son left home at Newcastle, in Natal, the father was lucky, and at his death left a million dollars. By the terms of the will his son has not to come into his share until he reached the age of 25. The news was conveyed to Mr. Roach on his birthday week, by cable, from Messrs. Shirley and Johnson, solicitors, at Plymouth. Mr. Roach soon after his arrival in Canada joined the 8th Company of the 5th Royal Scots, and at the time of his departure was a sergeant. Friday night the non-commissioned officers and men of the company gave him as a token of their esteem and friendship, a handsome bloodstone signet ring.

# TRIED TO SAVE HAND-CAR.

Section Man Has Both His Legs Broken Near Guelph.

A despatch from Guelph says: In trying to save a G.T.R. hand-car from an on-coming freight near Guelph on Friday morning, section foreman Martin Sosnoski had a narrow escape, and one of his gang, Vincenzo Marticardi, married, aged 32, was struck by the train, and had both legs broken. The two were working on their regular run from Guelph to Rockwood, and were driving the lorry a mile out of Guelph towards Trainor's cut, when a west-bound extra freight came out of the curve of the cut. The sectionmen stopped their lorry as soon as possible, and the freight tried to slow up on the down grade. Sosnoski and his assistant had almost got the lorry clear of the track, and Marticardi, who was on the track side, sprang across to escape the engine, but the cow-catcher struck him below the knees, breaking both legs.

# IN NEWER ONTARIO.

Surveyors Find Good Soil Far North of the C. P. R.

A despatch from Toronto says: Messrs. Speight & Van Nostrand, Ontario land surveyors, have reported to Hon. Frank Cochrane, Minister of Lands, Forests and Mines, that they have surveyed 180 miles of base and meridian line in the district of Algoma. Their work lay in the valleys of the Missinabie, Opazatika and Kapuskasing Rivers, between 125 and 150 miles north of the C. P. R., the route being by canoe. Good farming land, clay and clay loam, was found in the area, which was nearly all surveyed, and Hudson's Bay Company officers had grown an abundance of fine potatoes there. The chief timber in the district comprises spruce, poplar, tamarac, balsam of Gilead, balsam and white birch.

# SPINAL CORD SPLICED.

A Remarkable Operation Performed at Medicine Hat.

A despatch from Medicine Hat, Alta., says: A very difficult operation was performed on Engineer Glover on Thursday afternoon in the Medicine Hat General Hospital by Dr. C. F. Smith, assisted by Dr. C. E. Smyth and Dr. Goodlands. In the head-on collision

ried out within twenty-four hours.

#### CORRESPONDENT BEATEN.

The London Standard's correspondent at St. Petersburg says that J. Foster Fraser, the Standard's special correspondent, and his secretary, were arrested in Tuesday's round-up of 2,000 persons in the streets and were taken to the yard of the Governor's palace, where they were beaten by the Cossack guards. Probably only the intervention of the adjutant of Gov.-Gen. Scallon saved their lives.

#### UNIVERSITIES TO REOPEN.

A despatch from St. Petersburg says: At a meeting on Thursday night of Social Democrats and Social revolutionary university students it was decided not to oppose the reopening of the universities, which is scheduled for Oct. 14, thereby furnishing a strong possibility that the paralysis of the educational life of the country, which has lasted for two school years, may soon be ended. Many revolutionary students favored abandoning entirely the obstructive attitude.

Reports from Moscow, Odessa and other university centres are to the effect that an unprecedented number of prospective students have registered, owing to the accumulation consequent on the two years' stoppage of instruction.

#### POLICE CHIEF KILLED.

A despatch from Sebastopol says: The chief of the gendarmes was assassinated on a street car here on Friday.

#### IMPRISONMENT FOR LIFE.

A despatch from Warsaw says: The trial of the agitators and soldiers of the Warsaw garrison charged with spreading the propaganda of the military league, including two officers, resulted on Friday in the sentencing of two of the accused to imprisonment for life. The officers were found guilty only of cognizance of the propaganda. One of them was exiled to Siberia, and the other was condemned to three years' imprisonment in a fortress.

#### MURDER AT LODZ.

A despatch from Lodz, Russian Poland, says: Twenty armed men on Thursday entered the house of a policeman, killed the policeman and a soldier and mortally wounded the policeman's wife.

#### BIG FIRE AT POWSIN.

A despatch from Powsin, Russian Poland, says: A fire started here on Thursday by terrorists, who were angered at the refusal of the inhabitants to grant their demands, resulted in the destruction of 177 houses. A boy perished in the flames.

#### KILLED FELLOW-LUNATICS.

A despatch from Warsaw says: An inmate of the asylum for the insane at Gorakalwaria, near here, secured an axe on Thursday and killed several of his fellow-lunatics before he was overpowered.

#### SIEDLICE RUNS WITH BLOOD.

A despatch from Warsaw says: At 6 o'clock Saturday evening two soldiers who were guarding the Government alcohol store at Siedlice, 55 miles south-east of Warsaw, were shot and killed by Terrorists. A detachment of infantry, alarmed by the sound of the firing, rushed up and fired a volley, killing two men and wounding two others. Sunday morning the Terrorists retaliated, beginning a massacre of policemen and soldiers patrolling the streets. At noon the infuriated troops attacked the Jewish quarter, destroying houses and shops. It is reported that over a hundred persons were killed. The city is in flames.

A late message from Siedlice, timed 1.35 a.m., Monday, states that the mas-

en. He finally managed to get on his feet, and with his hands still tied, kicked at the parties until they decamped. He found his way to the residence of Mr. Samuel Allin, who brought him to town, where his wounds were attended to by a doctor. During the scrimmage, tar was rubbed in his hair, and he was warned to leave the neighborhood at once. There is no doubt but that it was local parties who committed the crime, and it is likely that arrests will follow, as Ford is positive that he can identify his assailants, who also took what money he had. Chief of Police Jarvis has the case in hand.

#### GOLDEN PEACE RIVER.

What an Edmonton Correspondent Says About It.

An Edmonton despatch says: The Macdonnell Dominion Government survey party, which arrived in the city on Wednesday, brings a story of gold discovered in the Peace River country, which, if it answers to the surface indications, will put the Band to shame and make the celebrated Homestead or Treadwell mines look like the proverbial thirty cents.

The Peace River discoveries promise to furnish untold millions for people yet unborn, to establish the gold mining industry on the prairie side of the mountains, employing thousands of men and furnishing an immense market for Alberta produce right at the doors of farmers who will make their homes in the Peace River.

Samples of the rock brought down by the party are of a peculiar nature. They are a slate shale, which by its appearance is evidently the solidified product of millions of years of deposits of mud in the river bed, brought down probably from the mountains ages and ages ago. Scattered throughout this rock are the minute specks of gold. The crudest kind of assay, made with a mortar and mercury, gave values of seven dollars to thirty-two dollars to the ton, but these tests are certainly unreliable, and no mining man familiar with gold values would accept them as indicating anything like the real value of the rock.

#### THE HERRING INDUSTRY.

Scotch Expert Has Proved Value of Canadian Fish.

A Montreal despatch says: Mr. J. J. Cowie who has been employed by the Canadian Government for two seasons demonstrating the Scotch method of herring-curing and packing, has accomplished most encouraging results this summer in the Baie des Chaleurs. Heretofore the fishermen of Gloucester have made no use of the large runs of Spring herring excepting as bait and garden fertilizer. Mr. Cowie, however, with his up-to-date methods of handling this fish, has shown that they have a value quite equal to the Scotch article, and a pack has been made that will probably realize from ten to twelve dollars a barrel in New York.

The Fall run has now begun, and Mr. Cowie says he never saw such herring in his life. The Canadian fish of this class has never commanded a high price, owing to the primitive way in which it was cured and packed.

#### BRAVED FIRE FOR CHILDREN

St. John Mother Succeeded in Saving All—Badly Burned.

A despatch from St. John, N.B., says: Sinclair McKiel's bakery was burned early on Wednesday morning, and Mrs. McKiel and four children narrowly escaped being burned to death. Mrs. McKiel twice tried to pierce the smoke and flames before she was successful in reaching the air with her children, and all were badly burned about the hands and face. The bakery and stables were destroyed and also Cortell's stables next door. The loss will amount to \$5,000.

clear fat backs, \$23.50; long cut heavy mess, \$21.50; half-barrels do, \$11.25; dry salt long clear bacon, 12½ to 12½c per lb; barrels plate beef, \$12 to \$13.50; half-barrels do, \$6.75 to \$7.25; barrels heavy mess beef, \$11.50; half-barrels do, \$6.25; compound lard, 8 to 9½c; pure lard, 12 to 12½c; kettle rendered, 13 to 14c; lams, 14½ to 16c; breakfast bacon, 15½ to 16½c; Windsor bacon, 16½c; fresh killed abattoir dressed hogs, \$9.75 to \$10; alive, \$6.75 to \$7 per 100 lbs. Eggs—Straight receipts, 19c; No. 1 candled, 18c. Butter—Choice creamery, salted and unsalted, 24c; medium grades, 22½ to 23½c. Cheese—Ontario, 12½ to 12½c; Quebec, 12½ to 12½c.

#### UNITED STATES MARKETS.

Milwaukee, Sept. 11.—Wheat—No. 1 Northern, 76 to 77c; No. 2 Northern, 73 to 76c; December, 76½ to 76½c asked. Rye—No. 1, 57c. Barley—No. 2, 55 to 56c; sample, 38 to 54½c. Corn—No. 3 cash, 49 to 49½c; December, 42½ to 42½c asked.

Minneapolis, Sept. 11.—Wheat—September, 70½c; December, 71½c; May, 75½c; No. 1 hard, 75½c; No. 1 Northern, 74c; No. 2 Northern, 73½c; No. 3 Northern, 71c. Flour—First patents, \$4 to \$4.10; second patents, \$3.85 to \$3.95; first clears, \$3.25 to \$3.45; second clears, \$2.50 to \$2.60.

#### LIVE STOCK MARKET.

Toronto, Sept. 11.—The run was moderately heavy, but the percentage of medium to good cattle was extremely light and prices for these were decidedly firm.

Export Cattle—Choice at \$4.70 to \$4.90, medium to good, \$4.40 to \$4.60; bulls, \$3.50 to \$3.75; bulls, light, \$3.25 to \$3.50, cows, \$3.50 to \$4.

Butcher Cattle—Choice are quoted at \$4.50 to \$4.75; medium to choice, \$4.25 to \$4.40; inferior to medium, \$3 to \$4; bulls, \$2.25 to \$3; cows, \$2.50 to \$3.50; canners, \$1.50 to \$2.

Stockers and Feeders—Stockers, choice \$5 to \$3.65; light, \$2.25 to \$3; cows, \$2 to \$2.40; bulls, \$1.75 to \$2.25; short-keep feeders, \$1.35 to \$1.50; heavy feeders, \$4.20 to \$4.25.

Milk Cows—Quotations are unchanged at a range of \$20 to \$60 each.

Calves—Prices are quoted easy at 3c to 6c per lb.

Sheep and Lambs—Export ewes are quoted at \$4.25 to \$4.50 and bucks at \$3 to \$3.50. Lambs are lower at \$5.50 to \$6.15.

Hogs—Held about steady at \$6.40 per cwt. for selects and \$6.15 for lights and fats.

#### AN ADVANCE IN LEATHER.

A Radical Increase Decided Upon by the Tanners.

A Toronto despatch says: Leather is to go up in price. An advance, which will affect consumers throughout the entire Dominion of Canada, was decided upon on Thursday, when at a meeting of the tanners' section of the Board of Trade resolutions were unanimously adopted, that in view of the continued advance on hides and tanning material, harness leather be advanced two cents per pound above August prices, measured leather one cent per foot, and that all other leathers be advanced in proportion, and that the discount on all leather sold to the retail trade be 2 per cent., in accord with the cash discount now given by the jobbing and wholesale trade.

#### EMBEZZLER SENTENCED.

Customs Clerk Who Stole \$65,000 Gets Four Years in Prison.

A despatch from Montreal says: David Hobbs, the C. P. R. Customs clerk, who was accused of absconding with \$65,000, was sentenced by Judge Choquet on Friday to four years in the penitentiary. He had already served sentences for scuttling a ship in Scotland, and also for arson.

performed on the Medicine Hat General Hospital by Dr. C. F. Smith, assisted by Dr. C. E. Smyth and Dr. Goodlands. In the head-on collision here last Friday night Glover's back was broken and the spinal cord mangled. No hopes of his recovery could be entertained unless the cord could be replaced, and this operation was undertaken Thursday, the spinal cord of a dog being used to take the place of the original one for about an inch. The case is being watched with extreme interest by medical practitioners.

#### SOUTHERN INDIANA SHOCKED.

Succession of Earthquakes Cause a Panic in Many Places.

A despatch from Indianapolis, Ind., says: Southern Indiana was visited by a succession of earthquake shocks between 10 and 11 o'clock on Friday morning, and in some places they were so severe as to frighten the people, causing them to leave their homes and rush into the streets. At some points as many as three shocks were felt, while at others there was a succession of tremors that lasted several seconds, but not distant enough to be recognized as separate shocks.

#### GERMANY'S NEW BATTLESHIP.

Projectiles 280 Pounds heavier Than Any Used at Present.

A despatch from Berlin says: According to the Cologne Gazette the new German 19,000-ton battleship, which will be a rival of the British Dreadnought, will carry 16 big guns, compared with the Dreadnought's 10. They, however, will be of rather smaller calibre, although their enormous length, 46 feet, will enable them to carry an unusually heavy charge, while the projectiles will be 280 pounds heavier than any of the present German projectiles.

#### STEAMER SERVICE TO MEXICO.

Two Years' Arrangement, Conditional on Parliamentary Sanction.

An Ottawa despatch says: The Trade and Commerce Department was officially notified on Wednesday by the Mexican Government that arrangements had been entered into with Mr. War-nop, representing British capitalists, for a steamship service between both countries on the Pacific. The arrangement is for two years, and is conditional on the Mexican Congress and the Canadian Parliament approving of the same.

#### INDIA RICE FAMINE.

Prices Abnormal and Crowds are Looting the Shops.

A despatch from Calcutta says: The rice famine in the northern provinces of India is becoming worse and is extending toward Bengal. Prices are abnormal, and crowds are looting the shops.

#### DOUKHOBORS REFUSE TO EAT.

Incarcerated in Jail They Are Forced to Take Food.

A despatch from Winnipeg says: Fourteen Doukhobors, incarcerated in the jail here, absolutely refuse to partake of food. Nourishment has to be forced through their teeth by scientific means. These men are leaders of the famous band that braved the prickly cactus with naked feet while they wandered in nude condition over the face of the prairies. But humiliation has only steeled their hearts with a firmer determination, and they have resolved that if the police authorities will not allow them to turn Saskatchewan into a veritable garden of Eden they will starve their bodies.

## YOUNG FOLKS

### THE BROWNIE HOUSEBOY.

"It's a pity there isn't a brownie in our cellar to drink that," said mamma, as Harold rose from the supper table, leaving his glass half full of milk.

"Do brownies like milk, mamma?" "I have always heard they do," said the mother. "All the stories about them say that, if you'll put a saucer of milk on the cellar floor every night, a brownie will come and live there and help to do the housework."

"Help do the housework!" cried Harold.

"Yes. He'll make the kitchen fire and put on the kettle, and have things cosy and nice before it's time to get breakfast. He has to get up very early, because it would not do for him to let people see him."

"Is it really true?" asked Harold, his eyes round with wonder.

"No, Harold. I wish it was. Then I'd put this milk in the cellar and get a brownie to come and bring in all that wood that papa cut," said mamma, as she left the room.

"Maybe there really are brownies," thought Harold, "and mamma just thinks there aren't because she never saw one. I believe I'll put this milk in the cellar and see if I can't catch one. Won't mamma be surprised if she wakes up in the morning and finds the work done in the kitchen?"

So he crept out into the hall and down the stairs into the dark cellar. It was a good thing he was such a brave boy, or he couldn't have done it.

It might have been the newness of keeping a secret from his mother, or it might have been the excitement of catching a brownie; but something woke Harold the next morning long before his usual time.

He saw the faint daylight through the shutters and heard his mother's gentle breathing, and it seemed strange to be awake all by himself.

"I wonder if the brownie has come," he thought, and then he slipped out of his little bed and into his clothes as well as he could. He knew mamma would not like him to go out of the room undressed.

It was still so dark in the cellar that he had to put his finger into the saucer to find out whether the brownie had drunk the milk.

Yes, it was gone; the saucer was quite dry. Upstairs flew Harold and into the kitchen. But disappointment met him there. Everything was just as it had been left at night.

"The mean old brownie!" thought Harold. "So selfish drinking the milk and then going away without doing his work."

He wouldn't have any surprise for mamma after all. Then a quick thought came to him. Suppose he did the brownie's work himself! She would be just as surprised to find it done.

He couldn't light the fire, because mamma did not allow him to touch matches, and he stood a moment thinking what he could do.

Why, bring in the wood, of course! And out he hurried, toboggan cap on his head and coal bucket in his hand, to begin the job. It was surprising how much fun there was in carrying in load after load and piling it into the wood-box. He had just finished and was sweeping up the dirt he had made when he heard his mother coming and calling him.

Harold ran through the outer door into her room, pulled off his shoes and jumped into bed, clothes and all.

"Ma'am!" he answered, when he was safely in.

"Why, Harold," said his mother, coming back, "where were you when I got up just now? And what are you doing

### HAPPENINGS FROM ALL OVER THE GLOBE.

#### Telegraphic Briefs From Our Own and Other Countries of Recent Occurrence.

##### CANADA.

Toronto's share of the street railway receipts for August amounted to \$43,770. Passenger trains may be running into Toronto on the James Bay Railway within two weeks.

Samples of milk from Toronto analyzed at Ottawa were more than half adulterated or doubtful.

Fourteen men were injured by an explosion of gas at the Toronto Gas Company's works, on Saturday.

Discovery of silver on the farm of Mr. McNiff in Haliburton has caused much excitement in the neighborhood.

The next issue of the Canada Gazette will contain a proclamation fixing Thursday, October 18, for Thanksgiving Day.

Hon. H. R. Emmerson said at St. John that the I.C.R. would be double-tracked next year from Hampton to St. John.

C. P. R. surveyors are in Belleville with the object, it is stated, of locating a new line between Toronto and Montreal.

Mrs. Louisa Smith of St. Thomas, arrested on Saturday on a charge of murdering her daughter's infant, admitted giving the child poison.

Mr. W. D. Robb announces that the Grand Trunk shops at Stratford will not be enlarged this year, as planned, owing to the lateness of the season.

Prof. Macoun, naturalist to the Dominion Government, has returned from making a study of vegetation along the route of the G.T.P.

Mr. A. H. W. Cleave, who has been appointed Superintendent of the Coining Department, Ottawa branch, Royal Mint, has arrived in Ottawa from England.

Lieut.-Col. W. T. Bridges, Royal Australia Artillery and Chief Intelligence Officer of the Commonwealth forces, is at Ottawa to study the militia system.

It is stated that arrangements for the transfer of Halifax dockyards to Canada are practically completed, and that the Dominion Government will assume control about the middle of October.

Lieutenant-Governor Dunsmuir of British Columbia has offered, upon \$50,000 being raised, to build and equip a tuberculosis sanatorium in the dry belt of the province and to augment the subscriptions by \$10,000.

John Bishop, a deserter from the Allan liner Victorian who was arrested in Toronto, was sentenced in Montreal for the maximum term of twelve weeks. The company propose to end the whole-sale desertions that have taken place.

##### GREAT BRITAIN.

Hon. Frank Oliver said in an interview at London that Canadians were all Imperialists.

The suggestion is made that Canada acquire the Lord Amherst library. It is valued at £150,000.

In celebration of the quarto-centenary of Aberdeen University, Lord Strathcona, on Sept. 27th, will dine 2,400 guests.

##### UNITED STATES.

Robert Gordon, 16 years of age, beat an eight-year-old lad into insensibility at Chicago, and buried him alive.

Arthur D. Reece, teller of the Security Trust Co., Troy, N.Y., was \$10,000 short in his accounts, and committed suicide.

By the collapse of a floor in a factory building under construction at Elyria, Ohio, on Thursday, three men were killed and twelve injured.

Because the jury found him responsible for the fatal traction accident near

### MILK FED PUMPKIN LATEST.

Pint a Day Developed It Into Monster of 100 Pounds' Weight.

A despatch from Bloomington, Ill., says: A milk-fed pumpkin is the latest development in agricultural circles. Two pumpkins, grown on the same vine, were on exhibition at the Tazewell County fair. They stood side by side, but one was ten times larger than the other. The giant was given a pint of milk a day through a hole cut in the vine which was attached to the stem. The milk was completely absorbed over night. The small brother attained natural growth, but the milk-fed one weighed 100 pounds.

### MUST BREAK A RECORD.

C.P.R. Steamer Hurrying Across Pacific With English Mails.

A Victoria, B. C., despatch says: The Canadian Pacific Railroad steamer Empress of China sailed on Wednesday on her new mail schedule carrying the British mails in an effort to land the mails at Hong Kong 30 days from London. This involves a record passage across the Pacific.

### BOYS LOSE THEIR RIGHT ARMS.

Two Receive Injuries in Winnipeg of Similar Character.

A despatch from Winnipeg says: Harold Griffith, of Norwood, was thrown under the wheels of a work car on the Street Railway on Wednesday and his right arm was nearly cut off near the shoulder. The victim is 17 years of age, and now lies at the Winnipeg General Hospital in a critical condition.

A similar accident occurred on Main Street, when a boy named Hanley, 15 years old, a messenger of the C. N. R. Telegraph, roved under the wheels of a car and lost his right arm. The right grip of his wheel handle came off, causing him to lose his balance.

### NEW ENGINES FOR C. P. R.

Fifty Ordered from Montreal Machine Co.—Angus Shops' Output.

A Montreal despatch says: The C. P. R. have placed an order with the Locomotive & Machine Company, Montreal, for fifty locomotives of the heavy consolidated type for freights. These engines will mean a total outlay of almost one million dollars. While the order is being filled the C. P. R. Angus shops will continue to turn out one engine a week. This means that within the next year the locomotive equipment of the company will be increased by a hundred of the most modern and efficient engines.

### DEAD BESIDE HIS PLOW.

Sudden Death of Well-Known Farmer Near Elora.

A despatch from Guelph says: Mr. John Mutrie, one of the best known residents of the Township of Pilkington, near Elora, was found dead beside a plow on Thursday. Mr. Mutrie had not been in good health for some time past. He was engaged at plowing, and was in the house a little before 11 o'clock. Some time after, as he had not come in to dinner, Mrs. Mutrie went out to see what was detaining him. She found the team standing in the field and Mr. Mutrie lying dead, the reins in his hands.

### RIOTING IN JAPAN.

Trouble Between Street Car Companies and Employees.

A despatch from Tokio says: The trouble between the street car companies

## HEALTH

### JUICY FRUITS.

That the juicy fruits are a valuable item in our diet is by no means a new idea. It has long been known that the salts which they contain are useful to the tissues, while the indigestible fibre is in many cases an excellent preventive of constipation. It is a salutary irritant to the intestines. But these benefits of fruit-eating do not stand alone. There are other equally important effects.

Much of the iron which we take in with our food is not assimilated because of its insolubility. This is of little consequence when the blood is up to par but in anemic people it is a serious matter. The organic fruit acids combined with the iron of the more solid foods form salts. These are known as malates, citrates, and so on. They are acted upon by the digestive juices which are far down in the intestines, and here the iron becomes soluble and non-irritating.

Many of the common fruits also contain ferments which are most useful in digestion. They act on the coagulated albumen of egg and of fresh meat.

A simple experiment will show this property in strawberries. On the bottom of a glass dish put a double layer of thinly sliced fresh ripe strawberries. Next put a layer of thinly sliced coagulated egg albumen, completing the sandwich by a duplicate layer of the strawberries. At summer heat, after eight hours, the albumen is slowly digested, as has been proved by expert chemical tests.

Rich cherries act in the same way. The action of orange juice which is kept perfectly free from the rind also has a slight digestive effect on coagulated egg albumen. In comparing the action of pear juice and apple juice, it is found that pear juice has a more powerful digestive action than apple juice.

Fruits are better when ripe and fresh. The ferments are destroyed by prolonged high temperature. It must not be thought, however, that baking and stewing fruit entirely destroys its digestive ferments. To do this completely the heat must be very prolonged. A good test of the digestive power of the fruit is the presence or absence of its original flavor. If by cooking the fruit all of its flavor is lost, one may say that the ferment has been entirely destroyed.

Juicy fruits are most beneficial when eaten at the end of the chief meal of the day. To this statement there are some exceptions. Bananas have little digestive action. They may be eaten with any meal. Bananas are as much a food as a fruit. When the stomach can tolerate them, stewed figs or apples may be eaten before breakfast. They are advised for their laxative effects. Half a dozen stewed prunes will often have the same effect when eaten half an hour before breakfast. Twice as many, if eaten with the meal or after it, may be without effect.

Cares should be taken not to eat many fruits on an empty stomach, for they frequently cause acidity. Grapes rank high in this category, and should be eaten at the end of the heaviest meal.—Youth's Companion.

### CARE OF EARS.

Never put anything into the ear for the relief of toothache.

Never wear cotton in the ears if they are discharging.

Never apply a poultice to the inside of the canal of the ear.

Never drop anything into the ear unless it has been previously warmed.

Never use anything but a syringe and warm water for cleansing the ears.

Never strike or box a child's ears, this has been known to rupture the

jumped into bed, clothes and all. "Ma'am!" he answered, when he was safely in.

"Why, Harold," said his mother, coming back, "where were you when I got up just now? And what are you doing with your clothes on?" she added in surprise.

"Mamma," said Harold, "it's a secret I'm having. Won't you please let me have it for a secret?"

"I will this time," said his mother. "But you mustn't get up so early again. Little boys need lots of sleep, so they can grow big and strong, and they mustn't get up till their mothers tell them to."

When they opened the kitchen door, Harold watched his mother's face as she caught sight of the wood-box, and laughed when he saw how astonished she looked.

"Who in the world did this?" she exclaimed. "Harold did you put milk in the cellar and bring a brownie?"

"Yes, ma'am, I did; but he was a horrid, greedy brownie. He drank up the milk and didn't do his work either!" "Then who did all this work?"

"Oh, a kind of a brownie, but not a real one, replied Harold. I 'spect he'll do things for you every day if you don't look."

"Well, that will be nice," said his mother, "to have a brownie houseboy. Only he mustn't try to do things too early in the morning."

"Maybe that's the reason brownies are so little," said Harold. "They get up so early that they don't get enough sleep and stop growin'. Mamma, do you think it was a brownie that drank that milk?"

"Don't ask me. Ask another member of the family," replied mamma.

"But there isn't anybody else 'cept pupa and little sister, and little sister can't talk."

"Neither can the member of the family I mean," said his mother, smiling.

"Oh, who is it? Please tell me, mamma."

"Listen," said his mother. "There she is now."

Harold listened.

"Me-ow," came a voice at the kitchen door. "Me-ow-me-ow."

#### SWEPT OVER CATARACT.

**Italian Laborer Fell From Cribwork Above Niagara Falls.**

A despatch from Niagara Falls, Ont., says: Antonio Guillespo, a laborer, employed by the Canadian Niagara Power Company, while working on their cribwork on Thursday afternoon, lost his balance, and fell into the river, and was swept over the Falls. He had been in the employ of the company but two days, and had been warned of the dangers of the place where he was working. Other men on the works say he lost his life by his own recklessness. His hat was drawn into the Canadian Niagara Power Company's intake. The man had been in this country but a short time.

#### CANADA IN YORKSHIRE MARTS.

**Demand for Cheese from Dominion Increasing—Hints to Shippers.**

A despatch from Ottawa says: A report received from Mr. J. B. Jackson, commercial agent for Canada at Leeds, reviews the conditions of the Yorkshire markets as applicable to Canadian trade. Mr. Jackson gives some hints regarding the packing of fruit in view of the opening up of the export season from Canada. He says that the boot and shoe business in Leeds is flourishing, that a well-known manufacturer in that city is about to open up an agency at Montreal, and that other Yorkshire firms are looking into the condition of the Canadian market. The engineering business in Yorkshire is brisk. There is an extensive demand for Canadian spring mattresses. The demand for Canadian cheese has increased in Yorkshire in view of the Chicago canned meat revelations.

By the collapse of a floor in a factory building under construction at Elyria, Ohio, on Thursday, three men were killed and twelve injured.

Because the jury found him responsible for the fatal traction accident near Mattoon, John C. Backus, Assistant Superintendent of the Central Illinois Traction Co., committed suicide.

Too proud to accept alms which would have been freely given, Miss Annie Smith, seventy-three years old, was found dead of starvation in her home at New Haven, Conn., on Thursday.

#### GENERAL.

Advices from Kingston, St. Vincent, B.W.I., report that Soufriere volcano is again active.

#### MONTREAL HOTEL SET ON FIRE.

**Paper Saturated with Coal Oil Was Heaped Behind the Bar.**

A despatch from Montreal says: A daring act of incendiarism was committed on Wednesday night when a hotel at No. 1 Papineau Square was seriously gutted by fire. The blaze was discovered by a police officer in time to prevent the whole square from being destroyed. When the police and firemen forced an entrance they found an immense quantity of paper, saturated with coal oil, piled behind the bar. The rear of the place was all ablaze. Alphonse Daigneult and Josephine Perrault were found in the building, and they were placed under arrest, and were arraigned in the Police Court on a charge of having set fire to the building. They both pleaded not guilty and were remanded until next Wednesday.

#### ATTACKED BY LIONS.

**Crowd at Fair Grounds Witness Thrilling Slight.**

A Watertown, N. Y., despatch says: Capt. Richard Bass, a lion trainer, had a narrow escape from being torn to pieces at the Jefferson County Fair grounds late on Thursday afternoon. Bass was in a cage making three lions perform in the presence of a crowd of several hundred persons, when one of the beasts leaped upon him from behind and buried its teeth in his back. The trainer managed to keep his feet and beat the animal off, escaping with a painful laceration and a few scratches. He was taken to a hospital.

#### LOST IN THE WOODS.

**William Pink, an Englishman, Wanders Nearly Three Days.**

A Winnipeg despatch says: Wm. Pink an Englishman, employed in Greer's camp on the G. T. P., fifteen miles in from the C. P. R., left camp early on Sunday morning for Niblock. He lost his way and wandered aimlessly through the bushes until Tuesday afternoon without food or shelter. He reached the track in an exhausted condition. Pink has decided that he has had enough adventures in Canada, and will return to England.

#### LUMBER MILLS SHUT DOWN.

**Low Water in Ottawa Has Checked the Supply of Logs.**

A despatch from Ottawa says: The water is so low in the Ottawa River that it is impossible to get logs over the slide in Hull, and as a consequence mills whose supply comes from the Upper Ottawa have been forced to shut down. At Hawkesbury the big mills of the Hawkesbury Lumber Company are idle and about six hundred men are out of employment. In Hull the Eddy Company's saw mill has suspended operations in the day-time, and runs only at night. At J. R. Bobb's the big mill is running full in the day-time, but only half of it is operated at night. It is years since the water has been anywhere near so low as it is at present.

#### Trouble Between Street Car Companies and Employees.

A despatch from Tokio says: The trouble between the street car companies and their employees resulted on Wednesday night in a demonstration that degenerated into incipient rioting in several districts. Cars were stopped by mobs throughout the city, and five of them were smashed to bits. Several persons were seriously injured. Further agitation is expected.

#### KILLED BY RATS.

**Paralytic and Helpless Old Woman Met Awful Fate.**

A New York despatch says: Mrs. Elizabeth Vanhart, a paralytic, 60 years of age, was killed by rats in her home in Elizabeth, N. J., on Thursday. Mrs. Vanhart lived alone. Her daughter-in-law called early in the day and found her dead. Rats had attacked the helpless old woman as she sat in a chair, possibly asleep, and severed an artery in one of her feet that caused her to bleed to death. The flesh of both feet was much torn by the rodents.

#### GOOD LAND STILL UNSETTLED.

**Experts Report on Grand Trunk Pacific Route in West.**

A despatch from Ottawa says: Prof. Macoun, the well-known naturalist of the Dominion Government, has just returned from a long tour in the North-West, where he had charge of a party formed for making a study of the vegetation and soil along the route of the Grand Trunk Pacific Railway. Prof. Macoun spent the whole summer travelling from Portage la Prairie to Edmonton, studying the plants and animals and endeavoring to form an estimate of the resources of the country. He says there is splendid land not yet reached by the settler.

#### BIG DAIRY BURNED.

**Loss of Seven Thousand Dollars by Fire in Manitoba.**

A St. Boniface, Man., despatch says: Paquin's dairy, the biggest dairy on the east side of the Red River, was totally destroyed by fire on Thursday, entailing a loss of \$7,000. The stables and barn, erected at a cost of \$5,000, caught fire first, supposed by reason of a horse stamping on some parlor matches and setting fire to the straw on the ground. The windmill, pump-house, and other buildings except the Paquin residence, were also burned. The dairy is on the Springfield Road and outside of the town limits, and it was impossible for the fire brigade to get water to extinguish the flames.

#### BRAVE MEN GET MEDALS.

**Presentation to Officers of the Ionian at Liverpool.**

A despatch from London says: At the office of the Allan Line, Liverpool, on Wednesday, Capt. Nunan, and Miller, the second officer of the Ionian, were presented with silver medals and the certificates awarded them by the Liverpool Shipwreck Humane Society for brave conduct in rescuing the crew of the Norwegian barque Trio in mid-Atlantic last May.

#### INCREASE IN IMMIGRATION.

**July Returns Show 5,932 More Arrivals Than Last Year.**

A despatch from Ottawa says: The returns of the Immigration Department show that the arrivals in Canada for July were 18,176, or 5,932 more than for July last year. The arrivals by ocean ports were 13,207, an increase of 45 per cent., and from the United States 4,969, an increase of 50 per cent.

Never drop anything into the ear unless it has been previously warmed.

Never use anything but a syringe and warm water for cleansing the ears.

Never strike or box a child's ears; this has been known to rupture the drumhead and cause incurable deafness.

Never allow the hair to remain wet if you have a tendency to deafness; wear an oiled-silk cap when bathing and refrain from diving.

Never scratch the ears with anything but the finger if they itch. Do not use the head of a pin, hairpins, pencil tips or anything of that nature.

Never let the feet become cold and damp or sit with the back toward a window, as those things tend to aggravate any existing hardness of hearing.

Never put milk, fat or any oil substance into the ear for the relief of pain for they soon become rancid and tend to incite inflammation. Simple warm water will answer the purpose better than anything else.

Never meddle with the ear if a foreign body enters it; leave it absolutely alone, but have a physician attend to it. More damage has been done by injudicious attempts at the extraction of a foreign body than could ever come from its presence in the ear.

#### FRUIT FOR BREAKFAST.

It is a good thing to eat fresh fruit for breakfast, and baked or stewed apples generally agree with the most delicate digestion. Green or half-ripe apples, stewed and sweetened, are always a good summer dish, and raw apples are better than many liver pills. Oranges are extremely wholesome, as a rule, and tomatoes are beneficial, but the skins of the latter should not be eaten.

#### FOR THE TEETH.

To keep the teeth healthy and clean, brush regularly night and morning, using the brush with an up and down motion. Nor should the backs of the teeth be neglected, for it is here that the tartar, that in time tends to loosen them, accumulates. Precipitated chalk is one of the cheapest and best dentifrices.

#### HORSES AND ALL BURNED.

**Peculiar Accident Near Macgregor, Manitoba.**

A despatch from Winnipeg says: A peculiar mishap at the farm of W. J. Jeffries, near Macgregor, on Saturday. While a team and load of sheaves were passing a thrashing engine, a spark set fire to the load and the horses, taking fright, ran away, and crumpled the wagon, which was consumed, together with the animals. The fire also spread to the separator before being extinguished.

#### GUARDING ST. LAWRENCE.

**Powerful Guns in New Fortifications Below Quebec.**

A despatch from Ottawa says: Over 100 men are now employed upon the new fortifications, which are being erected ten miles below Quebec by the Militia Department. The fortifications consist of two masked batteries, each mounting two guns of the latest and most powerful description, and capable of sweeping a 12-mile stretch of the St. Lawrence. It is estimated that the work will be completed in two years.

A countryman walking along the streets found his progress stopped by a barricade of wood. "What's this for?" said he, to a person standing by. "Oh, that's to stop the fever from spreading," replied the other, by way of being jocular. "Ah," said the countryman, "I've often heard of the Board of Health, but I never saw it afore."

"Are you at all familiar with Plato?" asked Mr. Oldcastle. "No, that's one thing Josiah always blames me for. He says I never make real close friends with anybody."

# For Coughs and Colds

There is a remedy over sixty years old—Ayer's Cherry Pectoral. Of course you have heard of it, probably have used it. Once in the family, it stays; the one household remedy for coughs and hard colds on the chest. Ask your doctor about it.

The best kind of a testimonial—  
"Sold for over sixty years."

## WHAT OTHER PAPERS SAY

St. Thomas Journal.

Why is it that the producers do not get higher prices for their produce? It is because combines and those who toil not stand between consumers and producers, and demand what should go into the pockets of the producers, and also what should be kept in the pockets of consumers.

St. John N. B. Globe.

Under the existing law the bounties paid on steel and iron will cease to be payable in a year or two, but already there is an energetic lobby at work to secure their continuance, and that is ever the way in regard to protection, no matter what form it assumes.

Kingston Whig.

Do you notice how silent the conservative papers are with regard to the Healey's Falls deal? Scandal, do you say? It could be called scandal of the most flagrant kind because the Whitney government was pledged noisily against transactions of this kind.

Toronto Globe

"We are all Imperialists in Canada" says Hon. Frank Oliver in England, and certainly none has a better right to say it than the man who has taken up the task of transplanting Britishers from their overcrowded islands to our western prairies. There is no better imperialism than that which makes prosperous and contented citizens within the empire.

Montreal Gazette

A convention of Ontario farmers, held the other day in Toronto, declared in favor of a two cents per mile passenger rate on the railways. A convention of railwaymen next week may demand a fifteen cents per pound limit to the price of butter.

Clearing Sale.

In order to clear out the following lines at the close of the season, we will offer at cost for cash during August and September, our entire stock of gas stoves, gasoline stoves,

MADOLE & WILSON

## A THRILLING MINUTE.

It Made Up In Intensity of Terror  
What It Lacked In Time.

The adventure of a contributor to Science lasted but a minute, but it made up in intensity of terror what it lacked in duration of time. The writer tells his own story:

Some years ago while I was making researches in an excavation near Frankfort, O., the center wall of the mound was undermined by the workmen, and I was struck by a mass of falling earth. I had just stooped to examine a small bone which had been uncovered when earth to the amount of several cart loads dropped on me. No one else was in the excavation, the men having gone to the top of the mound.

The falling mass knocked me backward, and I fell with my head and shoulders on a small heap of earth. The falling wall of earth looked black to me, and I well remember the rush of wind it brought.

At first I felt little pain, only intense pressure, which forced the buttons of my costume partly inside my flesh. My watch was pressed tight against two ribs which were broken. The skin on my forehead seemed cut, but it was the pressure of my hat forcing the flesh between the straw. The knife in my pocket seemed burning hot. Just under the small of my back was a large clod which gave me unendurable pain, as if

Hammocks a fine assortment.  
MADOLE & WILSON.

## Gluttonous Eskimos.

The eating powers of the Eskimos, from the tales told in the books of northern explorations are to be believed, are most extraordinary. One writer tells of a young man scarcely full grown who ate four pounds and four ounces of frozen sea horse flesh, four pounds and four ounces of sea horse flesh broiled, one pound and twelve ounces of bread, one and one-fourth pounds of rich gravy in twelve hours. Besides eating the above he also drank one pint of grog, three glasses of raw spirits and nine pints of water.

## Convalescence.

When a sick person is becoming convalescent, the rule of a quiet time between 2 and 4 o'clock in the afternoon should still be adhered to until complete strength is regained. Even if the patient cannot obtain sleep the fact of lying quietly in a darkened room will rest both eyes and brain, producing that feeling of wide awake brightness which invalids so often feel in the evening, to them the pleasantest time of the day in consequence.

King Edward Toilet Paper, is not only the highest grade, but the cheapest Toilet Paper, more sheets in the roll.

on my forehead seemed cut, but it was the pressure of my hat forcing the flesh between the straw. The knife in my pocket seemed burning hot. Just under the small of my back was a large clod which gave me unendurable pain, as if my spine were slowly breaking. Then it stopped, and I felt nothing.

Thoughts raced through my head like lightning, thoughts of the past, present and future. I remember trying in vain to move a hand or a finger. I was perfectly motionless. My chest could not be inflated, and the downward pressure had forced the air out of my lungs. I could move my chin and open and shut my mouth. I tried to keep my mouth closed to prevent its being filled, but it instinctively opened, and the earth fell in. Then the assurance of strangling came to me, but I did not much care.

It was just sixty seconds, the surveyor said, before the men reached me and I felt the earth move slightly. A shovel struck my scalp and cut me. It felt like red-hot iron. When my head was uncovered the pressure on my body was so great the blood was forced to my head until my rescuers feared my veins would burst.

I observed everything, but could not move. The partial paralysis lasted several days. I have never wholly recovered from the effects of my adventure. I cannot enter a cave or stand near a bank of earth without terrible sensations.

## Base Slander.

"Your husband," said Mrs. Highmuss graciously, "is decidedly interesting and original, even if he does sometimes blow his own horn a little too."

"It isn't so!" indignantly exclaimed Mrs. Gaswell. "My husband always uses his handkerchief!"

It is a common fault to be never satisfied with our fortune nor dissatisfied with our understanding.—Rochefoucauld.

## Her Wide Experience.

Tottie I wonder if a blond is more attractive to men than a brunette? Lottie—Ask Tottie; she's been both—Cleveland Leader.

## FIFTY CENTS

IN some conditions the gain from the use of Scott's Emulsion is very rapid. For this reason we put up a fifty-cent size, which is enough for an ordinary cough or cold or useful as a trial for babies and children. In other conditions the gain is slower—health cannot be built up in a day. In such cases Scott's Emulsion must be taken as nourishment; a food rather than a medicine. It's a food for tired and weak digestions.

## DUDES OF OTHER TIMES.

Dress of a Dandy of the Early Nineteenth Century.

A cure for the confirmed railer against modern dress might be a course of inspection through a file of old fashion magazines or the perusal of such accounts as are given by the author of "Sketches of Lynn." The description is that of a suit worn in the first part of the nineteenth century.

The boots were an important article of dress. The toes were made as broad as the ball of the foot, with the corners well rounded, giving the shoe the resemblance to the snout of a shovel nosed shark. They were very snug and required strong straps. In order to get into a fashionable pair the heel of the stocking was well soaped and some pulverized soap sprinkled into the boot. The length of time it took to get one on depended on the strength of the owner and the strap.

The stylish overcoat displayed five capes, one above the other. The trousers were expected to fit as tight as the skin. Just how they were put on is a mystery. The coat was especially snug under the sleeves, and the velvet collar scraped up the back of the head. The camel overcoats after a little wear, became as stiff as birch bark.

The thing worn about the neck was called a stock. This name was appropriate in its suggestion of an instrument of punishment. The stock was from three to six inches high, and was made stiff. A man was forced to look straight ahead. Only by careful management could he see a little on either side. About halfway between his eyes and ears two little points of collar stuck up like toothpicks.

Ruffled bosoms and wristbands finished the costume, with the addition of a tall silk hat. When inclosed in this manner, with a dash of attar of roses on his handkerchief, the man of the period was considered irresistible.

## TOO HUMBLE A HUSBAND.

Position of Prince Albert, Royal Consort of Queen Victoria.

A woman looked up with a laugh from a heavy volume she was reading. "Now I know," she said, "why Queen Victoria was so fond of the prince consort. This husband did not merely regard his wife as his equal; he regarded her as immeasurably his superior, saying that it was his duty to stink his own individual existence in her. Listen to this letter that Prince Albert wrote to the Duke of Wellington. Here is a champion of woman's rights indeed. Don't you think, though, it is going too far for a man to humble himself so low as this?"

She then read from her book in a sarcastic voice:

My Dear Duke—In the question whether it is advisable that I should take the command of the army I have come to the conclusion that my decision ought entirely to be guided by the consideration whether it would interfere with or assist my position of consort to the sovereign. This position is a most peculiar and delicate one. While a female sovereign has a great many disadvantages in comparison with a king, yet if she is married and her husband understands and does his duty her position, on the other hand, has many compensatory advantages and in the long run will be found to be stronger even than that of the male sovereign. But this requires that the husband should entirely sink his own individual existence in that of his wife and that he should aim at no power by himself or for himself, being content to be the husband of the queen, the private secretary of the sovereign and the tutor of the royal children.

## THE GOOD OLD DAYS.

Try Now the Ways of Yore and See How You Like Them.

Good old times, says the San Antonio Light, are a delusion and a snare, and the man who sighs for them has little conception of what they were. Return to them, would you? Then rise on a cold morning and wash at the pump, pull on a pair of rawhide boots that rival a tin can in stiffness, pull on a woolen shirt over your back and sit down to a bare meal with your three legged stool dancing around on a split slab floor, eat corn pone and bacon for a steady diet and labor fourteen hours out of twenty-four. Go without a daily paper, a fly screen, a mosquito bar, a spring mattress, a kerosene lamp, gechaw your oxen to market and sit on the floor of an ox cart as you wend your way to church or a frolic. Parch corn and peas for coffee and sassafras for tea and see how you like it.

The old days are looked backward to affectionately, says the Galveston News, because they were the days of our youth, of bounding blood and supple joints, the days of hope and the days of love and laughter and song. The days of the present will be the good old days of the coming generation and will be regarded by our successors as rather crude in customs and harsh in many ways, yet withal not to be despised. The progressives of our age are the mossbacks of later eras. Fifty years hence we will be accounted as slow and immature as we now regard those of half a century ago.

## The Society Way.

Duty called.

The man looked at the card lazily. "Just say that I'm not at home," he ordered the maid.

## Bad Stomach Makes Bad Blood.

You can not make sweet butter in a foul, unclean churn. The stomach serves as a churn in which to agitate, work up and disintegrate our food as it is being digested. If it be weak, sluggish and foul the result will be torpid, sluggish liver and bad, impure blood.

The ingredients of Dr. Pierce's Golden Medical Discovery are just such as best serve to correct and cure all such derangements. It is made up without a drop of alcohol in its composition; chemically pure, triple-refined glycerine being used instead of the commonly employed alcohol. Now this glycerine is of itself a valuable medicine, especially in the cure of weak stomach, dyspepsia and the various forms of indigestion. Prof. Finley Ellingwood, M. D., of Bennett Medical College, Chicago, says: "It is one of the best manufactured products of the present time in its action upon enfeebled, disordered stomachs; especially if there is ulceration or catarrhal gastritis (catarrhal inflammation of stomach). It is a most efficient preparation. Glycerine will relieve many cases of pyrosis (heartburn) and excessive gastric acidity. It is useful in chronic intestinal dyspepsia, especially the flatulent variety, and in certain forms of chronic constipation, stimulating the secretory and excretory functions of the intestinal glands."

When combined, in just the right proportions, with Golden Seal root, Stone root, Black Cherrybark, Queen's root, Blood-root and Mandrake root, or the extracts of these, as in Dr. Pierce's Golden Medical Discovery, there can be no doubt of its great efficacy in all of stomach, liver and intestinal disorders and derangements. These several ingredients have the strongest endorsement in all such cases of such eminent medical leaders as Prof. R. Bartholow, M. D., of Jefferson Medical College, Chicago; Prof. Hobart A. Hare, M. D., of Medical Department, University of Pa.; Prof. Laurence Johnson, M. D., Medical Department, University of New York; Prof. Edwin M. Hale, M. D., Hahnemann Medical College, Chicago; Prof. John M. Scudder, M. D., and Prof. John King, M. D., Authors of the American Dispensatory, and scores of others among the leading medical men of our land. Who can doubt the curative virtues of a medicine the ingredients of which have such a professional endorsement?

Constipation cured by Doctor Pierce's Pleasant Pellets. One or two a dose.

## THE STAR CHAMBER

CONDENSED HISTORY OF A FAMOUS  
SCHEME OF OPPRESSION.

At First Its Objects Were Laudable,  
but It Subsequently Became a Cruel  
and Unjust Power—Some of Its Out-  
rageous Penalties.

When the Earl of Richmond had defeated Richard III. at Bosworth and had been crowned king as Henry VII., he found the times in so troubled a state that men whose rights were infringed upon or denied them dared not apply for justice to the ordinary courts. The unblushing manner in which bribes and threats were resorted to by those that had influence over the proceedings of these courts denied to them the security of a juror's oath.

To reach a mischief that had grown so intolerable Henry, feeling himself strong enough with his second parliament, created a court made up of the highest officers of the kingdom, embracing, theoretically, the king himself, who was considered the author of all justice, to which were confided unlimited power and discretion over a large, undefined class of offenses, many of which were of a political character, without the restraint of a jury and subject to no revision by appeal.

This was afterward known as the court of the star chamber, so called because the ceiling of the room in which it met was studded with stars or because in this apartment prior to the time of Edward I. the contracts of the Jews, called stars, were deposited in boxes or chests.

This scheme had good results at first. Wealthy landowners who had oppressed their neighbors with impunity were brought before this court, where neither fear nor favor could avail and

the of James. While enjoying his patronage he exerted his influence in behalf of Laud, afterward archbishop, who owed his first promotion to his good offices. Some disagreement arose between them. Nothing would satisfy Laud but the ruin of the man who had befriended him.

On some slight pretext the bishop was brought before the star chamber and fined £10,000, committed to the Tower during the king's pleasure and suspended from office. His furniture and books were levied upon to pay the fine. Among some refuse papers were found some letters from Obaldiston, a schoolmaster, directed to the bishop. In these letters the writer spoke of a "little great man" and in one place of a "little urchin." As Laud was small of stature, it was conjectured that these terms referred to him. They were both tried, one for receiving such scandalous letters and the other for writing them. Williams paid a fine of £8,000 and Obaldiston £5,000, and he had his ears nailed to the pillory.

Prynne, a barrister at law, of Lincoln's Inn, a Puritan of the strictest sect, published his famous "Histrio Mastix," a huge volume of 1,000 quarto pages, aimed at stage plays, music dancing, public festivals, Christmas sports, bonfires and maypoles. For this alleged libelous volume he was arraigned before the star chamber.

Mr. Prynne, in his general sweep for his historical illustration of the mischief of frequenting plays, referred to Nero and spoke of Flavius and others who conspired against him for his bad example upon the magistrates and the people. The chief justice from this inferred that the author intended to instigate the people to murder the king, and Prynne was deprived of his right of practice as a barrister, condemned to stand in the pillory at Westminster and Chesham, to lose his ears, one at each of these places, to pay a fine of £5,000 and to be imprisoned for life.

There was hardly a man in the realm who had not personal experience of the harshness and greediness of the star chamber. It became odious, and not without reason. It was abolished in 1641 as one of the acts of concession made by Charles I. to the demands of an indignant nation. Prynne and his fellow martyrs were recalled from prison. They entered London in triumph amid the shouts of the multitude, who threw laurels in their path.

### WHAT THE HAIR TELLS.

Auburn hair means a kindly, sympathetic nature.

Straight hair indicates more power to govern than curly hair.

Curis denote a feeble sense of right and wrong, gayety, vivacity, self confidence.

Straight black hair, growing coarse and thick, indicates more order and industry than mental power.

Fine brown hair only accompanies excellent minds. Generally the owner has intellectual tendencies.

Red hair is strongly characteristic—no halfway business there. It usually indicates a quick temper, though there are exceptions.

Beautiful golden hair is rarely seen on persons of a gross nature. Its owner loves fine arts and possesses exquisite sensibilities.

Hair and eyebrows differing in color indicate race mixture and bespeak a wavering, unsteady nature.

As a rule, smooth, fine, softly waving hair betokens gentleness, quietness, neatness.

## Dr. Agnew's Cure for the Heart

A cure that has stepped to the bedside of a sufferer in the clutch of death. A cure that has unloosed the grip and stopped the pain in 30 minutes and gently led the heart-wracked soul out from the darkness and despair to the brightness and happiness that comes to one whose heart beats true, whose blood tingles with life and vigor. Dr. Agnew's Cure for the Heart is not heralded as a miracle worker, but it has many miraculous cures to its credit.

Weak heart—weak blood—weak nerves travel hand-in-hand, and you find the symptoms in such sensations as palpitation, fluttering, shortness of breath, weak and irregular pulse, smothering spells, chilly sensations, fainting spells, swelling of feet and ankles, weariness, tired feeling; all these presage heart disorder and you cannot afford to neglect them. Dr. Agnew's Cure for the heart is a tried remedy—the sure remedy—the quick acting remedy—a real life saver.

ALL DRUGGISTS AND MEDICINE DEALERS SELL IT.

DR. AGNEW'S OINTMENT relieves Itching and Protruding Piles with one application. DR. AGNEW'S CATARRHAL POWDER cures Catarrh, Hay Fever, Cold in the Head.

Sold by F. L. Hooper.

This scheme had good results at first. Wealthy landowners who had oppressed their neighbors with impunity were brought before this court, where neither fear nor favor could avail, and tried for their offenses. The greatest merit of the court was that it was not dependent on a jury, for juries were unable or unwilling to render a verdict in keeping with their consciences.

One said, "A court thus constituted, with powers so broad and a discretion unlimited by prescribed rules, though called into existence for wise and salutary purposes, was in the end like invoking the spirit of mischief without a corresponding power in reserve to lay it or check its excesses if inclined to abuse its authority."

Instead of losing power as the necessity for its existence passed away it drew to itself new elements of strength and enlarged the extent of its jurisdiction. It became, after successive administrations, under the hands of ambitious leaders such as flourished in the time of Henry VIII., Elizabeth and the two Stuarts, a most potent engine of despotic rule and intolerance. Torture, intimidation and other devices were used to compel the accused to incriminate himself.

Charles I., through the star chamber, filled his coffers. During his reign such enormous fines were imposed for trivial offenses that the audience gathered about the courtroom at 3 o'clock in the morning to secure seats to hear the proceedings. The discretionary power of the court in the way of punishment made it a means of cruel injustice in the hands of bad men, instances of which disgrace the history of its administration during the reigns of James I. and Charles I.

One of the most remarkable cases was that of Bishop Williams, who had been lord keeper of the seal, a popular prelate and a man of learning and spirit and at one time a special favor-

#### The Earth's Three Motions.

The motion of the earth at the equator is equal to nearly 1,500 feet per second, and the earth has three motions—viz, the rotation on its axis in one day of twenty-four hours, the revolution around the sun in one year of 365½ days and a very slow gyratory motion at the poles. This last mentioned motion is a very peculiar one and has not long been known. The poles move around the outside of a line at right angles to the plane of the ecliptic, coinciding with the line of axle rotation once in 25,858 years.

#### A Charming View.

Dawley (to the house agent)—I thought you said there was a charming view from the front windows. Why, there are only houses to be seen. House Agent—So there is a charming view, sir. In the house opposite lives the most beautiful widow you ever clapped eyes on, and she's always at the window.—London Fun.

#### Habit.

Habit is our primal fundamental law. Habit and imitation—there is nothing more perennial in us than these two. They are the source of all working and all apprenticeship, of all practice and all learning, in the world.—Carlyle.

#### Cutting.

Mrs. Enpeck—I think Mr. Mahlstick paints such lovely pictures. I think that I shall have him paint portraits of Henry and me together. Mrs. Cutting—Oh, I didn't know that he painted battle pictures.

#### The Lesser Evil.

"I don't see how she could possibly be sillier—she giggles so constantly." "Well, if she didn't giggle all the time she might talk, and perhaps that would be worse."

## BILIOUSNESS AND INDIGESTION.

These two ailments often accompany each other. When bile gets into the stomach it causes nausea. When in this state, if you get heated, you may turn sick. If you hurry—say to catch a street railway car—sick again. When you walk quickly, dizziness may overcome you. You may imagine you could relish food, and when it is placed before you, be obliged to turn away in disgust! Store girls, stenographers and women who spend a good deal of time indoors are particularly prone to biliousness and indigestion, and find Bileans a veritable boon.

#### EXTREME CASE YIELDS TO BILEANS.

Even extreme cases of biliousness and indigestion yield readily to Bileans. Don't think therefore that because up to now you have not found a cure that your case is beyond the power of Bileans! Mrs. A. Laverack, of Wakefield says:—"I had biliousness and indigestion very bad. Every day I was tormented with attacks of nausea and retching. All my friends thought I was almost beyond cure and I was as yellow as wax. Headache continued unceasingly, and then I began to have attacks ofague and trembling fits. My tongue was thickly coated, my eyesight dim, and I always woke in the morning with a bitter taste in my mouth. This was my state when a neighbor advised me to try Bileans, saying they had cured both herself and husband of liver complaint and constipation. I procured a supply and my delight they soon began to do me good. I persevered with them and within a few months I was quite restored to health. I owe my wonderful recovery entirely to Bileans, and I shall never again be without a supply as long as I live."

#### WHAT BILEANS CURE.

Bileans are also a certain cure for debility, constipation, piles, anemia, headache, liver complaint, wind, gas, belching, blood impurities, female ailments and irregularities, and all ailments arising out of impaired digestion and liver disorder. Of all druggists 50c. box or post free from the Bilean Co., Toronto, upon receipt of price. 6 boxes for \$2.50.

AND WHEREAS the said Council are of opinion that the drainage of the area described is desirable:—

THEREFORE the said municipal council of the said Township of Richmond, in County of Lennox and Addington, pursuant to the provisions of The Municipal Drainage Act, enacts as follows:—

1. The said report, specifications, assessments and estimates are hereby adopted, and the drainage work as therein indicated and set forth shall be made and constructed in accordance therewith.

2. For paying the sum of \$630. the amount charged against the said lands for benefit liability, the following total special rates over and above all other rates shall be assessed, levied and collected from and upon the undermentioned lots and parts of lots, and the amount of the said total special rates against each lot or part of lot respectively shall be assessed, levied and collected, as aforesaid in the year after the final passing of this By-Law.

**CAMDEN EAST**

St. Luke's church was well filled with a splendid congregation Sunday evening last, when the Rev. L. Norman Tocker, D. C. L., preached on the subject of Missions in the great Northwest of Canada. The responses and singing were most hearty, reflecting the greatest credit on the organist and choir. The Rev. T. F. Dowdell, of Selby was present.

**Sporting Goods.**

Guns, Rifles, Loaded Shells, Cartridges, Wads, Reloading tools, Fishing Tackle, Tralls, &c.

MADOLE & WILSON

**BATH.**

Rev. F. T. Dibb and Mrs. Dibb, of Napanee, are visiting at J. J. Johnston's.

Miss Hattie Smith, of Toronto, is visiting at Max Robinson's.

School opened on Tuesday last after the summer holidays, the teachers all having arrived. The only change in the staff is the principal. R. H. Hutchinson, former teacher, resigned to attend Queen's University. E. J. Keenan, of Barrie, has been engaged for the principalship of the school.

Max Robinson, Robert Mott, E. P. Sheppard, William Topliff, H. Overt and Cyrus Barriage attended the industrial exhibition in Toronto last week.

Mrs. Beach, of Athens, visited her brother, Dr. C. C. Nash on Saturday last.

Joseph F. Johnston, of Kingston, is visiting his mother, Mrs. Mary Johnston, this week.

**DESMOND.**

The garden Party given by the kindness of Mr. and Mrs. Richard Quinn, at their residence at Desmond, was a very great success and thoroughly enjoyable by all who entered into the spirit of it. The Staff supplied with ice cream and soft drinks, was well patronized, and Mrs. John Milsap, Mrs. John Hannah, Mrs. Simon Shane, Mrs. Robert Milsap, and Mrs. Hughes assisted by Messrs Robert Milsap and Peter Quinn, waited most efficiently on the people. The Yarker Brass Band played well and a nice Programme was rendered in which Miss Beaveau, Miss Gertrude Hannah, Mr. F. G. Miller, Mr. Landersand and Master Adam, Hamilton, took part. There was a splendid platform and the young people enjoyed immensely a ncedance. The grounds and House were well adapted for the holding of a grand party, the Flags and Chinese lanterns made them look bright and pretty and the moon shone out brightly making the evening a delightful one in every respect.

Mr. and Mrs. Quinn are to be congratulated on the music attending and their kindness in giving them splendid grounds for the purpose. Proceeds \$59. Mr Charles Dewey acted most efficiently as gate keeper

**DENBIGH.**

Our farmers are about through harvesting and the threshing machines have started operations.

The municipal council for Denbigh, Abinger and Ashby, met on the 1st inst., at the Chatham House. Among other business the rates required for the current year were levied, and Anson Thompson, collector for last year, was re-appointed to the same office at a slight advance in salary.

Miss Genevieve Lane, Napanee, who has enjoyed a visit at her home and with other relatives, has returned to town. So has Miss Emma Stein, Renfrew, who also spent a month at her old home.

August Kattner, who sold his farm here to J. Rahm, left Denbigh Saturday

# WOMEN SUFFER NEEDLESS MISERY.

MISS MARY MAYGER.

MRS. LIZZIE SHARPE.

MRS. JAMES GOLLOHER.

*There are hundreds of thousands of women in America suffering from Pelvic Diseases, endangering their lives by neglecting treatment. If they will write to me I will give them the benefit of my extensive experience in treating this class of ailments.*

—S. B. Hartman, M. D.

**IN** view of the great multitude of women suffering from some form of female disease and yet unable to find any cure, Dr. Hartman, the renowned gynecologist, has announced his willingness to direct the treatment of as many cases as may make application to him during the summer months, without charge.

Miss Mary Mayger, 206 Delhi street, Philadelphia, Pa., writes:

"Before taking your medicine I was completely run down.

**Headache and Backache.**

"My back and head ached all the time and I was so nervous that it was impossible for me to attempt any work.

"After using two bottles of Peruna there was a wonderful change and I am now a well woman.

**Gratitude.**

"I cannot express my gratitude sufficiently and I am recommending it to all my friends."

Dr. Hartman's treatment will be conducted by correspondence.

The medicines prescribed can be obtained at all drug stores.

**Complete Treatment.**

The Doctor will prescribe all medicines, applications, hygienic and dietary regulations necessary to effect complete relief.

Furthermore, all correspondence will be held strictly confidential.

**Entire System Affected.**

Mrs. James Golloher, Norwood, Ontario, Can., writes:

"I was suffering from systemic catarrh for about two years.

"In damp weather I was unable to do my work, as my back and sides would ache, and I thought if I did not soon find a cure I could not live long.

"I saw where Peruna had cured hundreds who had suffered as I was suffering. I decided to try it.

"After taking the first bottle, I felt a big change.

**Completely Cured.**

"I have taken five bottles and I am completely cured.

"I thank Dr. Hartman for his kind advice to me."

Dr. Hartman's offer will hold good during the entire summer months.

Any woman can become a regular patient by sending a written statement of her age, condition of life, symptoms of her derangements, and previous treatment.

**Dr. Hartman's Advice.**

Mrs. Lizzie Sharpe, 203 Friendship street, Providence, R. I., writes:

"Some time ago I wrote you, asking advice in regard to my health, describing my symptoms.

"Following your advice and taking your medicine for only five weeks, I am thankful to say I am a well woman.

"I had suffered for a number of years with constipation, indigestion and female troubles of the worst form. I was unable to do my housework without help.

**Satisfactory Results.**

"After taking Peruna I have experienced the most satisfactory results. I am like a new woman.

"I do all my own housework for seven rooms, thanks to Peruna.

**Recommends Peruna.**

"I want to recommend Peruna to all who are similarly afflicted."

The principal remedy which Dr. Hartman relies upon in curing catarrhal diseases of women is Peruna.

Hundreds of women sufferers find Peruna a household remedy. Many of these women have written letters of thanks for the benefit they have obtained.

**Dr. Hartman's Experience.**

As is well known, Dr. Hartman is the President of the Hartman Sanitarium, an institution which has a department devoted to the treatment of female diseases.

He is thus brought to see a great many of such cases every year, the most of whom return to their homes to complete their treatment by correspondence.

Those wishing to become patients by correspondence should address Dr. S. B. Hartman, President of the Hartman Sanitarium Columbus, Ohio.

**CHEESE BOARD.**

Board met in Council Chamber in the town hall on Friday last.

**No Siren.**

Mr. City Boarder was being entertained by his rural sweetheart.

"Do you play and sing 'When the Cows Are In the Corn,' Miss Milky-weight?"

"Lord bless you, no!" she ejaculated; "I get the dogs and chase 'em out."

**Unnatural Finish.**

Mrs. Meeds—And did your husband die a natural death?

Mrs. Weeds—No, he died suddenly.

Mrs. Meeds—What was there unnatural about that?

**The Opinion She Sought.**

"Well, what do you think of my new hat?" she asked.

"Do you want a candid opinion?" he questioned.

"Heavens, no!" she replied. "Say something nice."

**And Insight.**

"What happens when people fall in love at first sight?"

"Usually marriage and second sight."

**Refrigerators and Hammocks.**

There is a lot of warm weather yet before us and it will pay you to improve

to town. So has Miss Emma Stein, Renfrew, who also spent a month at her old home.

August Kittner, who sold his farm here to J. Rahm, left Denbigh Saturday and will for a while at least, make Arnprior his home.

C. Breaker and daughter, Ph. Ladelphin, spent a couple of weeks here enjoying life in the Canadian backwoods have returned to the city.

G. Stein, Fred Chanson and F. Falk are going to start on a trip to the North-West, with the intention of viewing the country and removing there permanently if they find it to their liking. A number of our young farmers sons also intend to leave home soon to look elsewhere for better paying employment until next spring or summer.

Rev. G. Daedel has been very busy lately, and a good deal away from home. On Sunday the 12th ult., he assisted in conducting a series of missionary services at Eganville. On the 19th he took part at the dedication of a new church built by the congregation at Pembroke at a cost of upwards of \$15,000. On the 25th he conducted service at Denbigh in the forenoon, and at Raglan, Renfrew county, in the evening, and last Sunday he conducted service at Maynooth.

# TUMORS CONQUERED

## SERIOUS OPERATIONS AVOIDED

Unqualified Success of Lydia E. Pinkham's Vegetable Compound in the Case of Mrs. Fannie D. Fox.

One of the greatest triumphs of Lydia E. Pinkham's Vegetable Compound is the conquering of woman's dread enemy, Tumor.

The growth of a tumor is so sly that frequently its presence is not suspected until it is far advanced.

So-called "wandering pains" may come from its early stages, or the presence of danger may be made manifest by profuse monthly periods, accompanied by unusual pain, from the abdomen through the groin and thighs.

If you have my-terious pains, if there are indications of inflammation or displacement, secure Lydia E. Pinkham's Vegetable Compound right away and begin its use.

Mrs. Pinkham, of Lynn, Mass., will give you her advice if you will write her about yourself. She is the daughter-in-law of Lydia E. Pinkham and for twenty-five years has been advising sick women free of charge.

Dear Mrs. Pinkham:—

"I take the liberty to congratulate you on the success I have had with your wonderful medicine. Eighteen months ago my periods stopped. Shortly after I felt so badly that I submitted to a thorough examination by a physician and was told that I had a tumor and would have to undergo an operation.

"Soon after I read one of your advertisements and decided to give Lydia E. Pinkham's Vegetable Compound a trial. After trying five bottles as directed the tumor is entirely gone. I have been examined by a physician and he says I have no signs of a tumor now. It has also brought my periods around once more, and I am entirely well."—Fannie D. Fox, 7 Chesnut Street Bradford, Pa.

1805 boxes offered, 590 white, 1245 colored. 1416 boxes sold at 12 3-8.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

Address: F. J. CHENEY & CO., Toledo, Ohio. Sold by Druggists, 75c. Take Hall's Family Pills for constipation.

## Reading on a Train.

If you travel back and forth into town every day you no doubt read your paper or a magazine on the train. While this is not, indeed, the best practice for the eyes, it seems a pity to waste so much time which might be turned to good account. Much of the annoyance which comes from train-reading is due to the jolting of the cars, which continually knocks the printed line out of focus with the eye. This can be in some degree obviated by laying a card or some other object below the line to be read and moving it steadily downward while reading. This acts as a guide to the eye and helps to keep the sight fixed. Those who have tried it say that it wonderfully assists to decrease the difficulty of reading while in motion.

## Trade Emblems on Tombstones.

In Scotland it was for a long time usual to place on a man's tombstone the symbols of his trade. Especially was this the case at Dunblane, where, in the burial ground of the abbey, it has been found that of those tombstones which are from 100 to 200 years old about one-fourth are thus marked, the symbols being in low relief. A sugar cane may be seen as showing the grave of a grocer; an ax and saw, with hammer and nails, occur on the grave of a carpenter; an awl and a hammer on that of a shoemaker. There are many other graves similarly marked.—London Answers.

## Cutting Eyelashes.

An eyelash is pointed. A cut lash is blunt. A lash once cut never again becomes pointed. Every lash lives a variable time and then falls out to be replaced by a fresh one. When a cut lash so falls the newcomer is pointed. So any mischief resulting from cutting the lashes will be remedied by time. Opinions differ as to whether lash-cutting promotes growth. That it renders the lashes nastigly is very certain.

## A Lengthy Drop.

Mrs. Portly-Puffington (proudly)—We can trace our ancestry back to one of the Saxon kings.

Visitor—Indeed?

Mrs. Portly-Puffington—Oh, dear yes! We have been descending for generations.

I don't want to brag, but I've got my health and my friends, so what on earth more do I want?—Deland.

**Unnatural Finish.**  
 Mrs. Meeds—And did your husband die a natural death?  
 Mrs. Weeds—No, he died suddenly.  
 Mrs. Meeds—What was there unnatural about that?  
 Mrs. Weeds—Why, poor, dear John was the slowest man that ever lived.  
 "Love at first sight?"  
 "Usually marriage and second sight."  
 Refrigerators and Hammocks.  
 There is a lot of warm weather yet before us and it will pay you to improve this offer.

## "Let the GOLD DUST TWINS do your work"

## "Your Servants, Madam!"

The Gold Dust Twins are always ready to work; they are certainly artists in the cleaning line. There's nothing cleanable which

## Gold Dust Washing Powder

will not clean—and do it better, more quickly and more economically than anything else can. You are not serving your best interests if you're trying to keep house without GOLD DUST.

OTHER GENERAL USES FOR GOLD DUST | Scrubbing floors, washing clothes and dishes, cleaning wood-work, oil cloth, silverware and tinware, polishing brass work, cleaning bath room, pipes, etc., and making the finest soft soap.

Made by THE N. & FAIRBANK COMPANY, Montreal, P. Q.—Makers of FAIRY SOAP.

**GOLD DUST makes hard water soft**

# IN ANGEL'S UNIFORM

The Story of a Great Betrayal.

Home—and Lottie! Dan Joyce, that staring man with the haggard, boyish face, at whom the other passengers had glanced so often, gripped his teeth to keep back a shout—or a sob. Home! For him, the gap in those white cliffs looked like the gate of a Paradise. Dear England—after two and a half years in the Australian bushland! London, and then—his precious Lottie, waiting for him all these dull months!

He would catch the pale, slight figure by surprise in his strong brown arms, and tell her that love alone had drawn him back six months before his allotted time. And how it had secretly almost broken his heart to leave her to her lonely nurse's routine, with only his old chum Ferrars to watch from a distance that no harm befell her. Only his love—not because of that incredible letter that had reached him in the wilds two months ago!

He was clutching it now. He would tear it up and throw the pieces at her feet. Her tired eyes would fill and brim over; she would sob out on his shoulder that she had written it on a wild, inexplicable impulse, when the loneliness of life seemed too heavy to bear. Yes! He had not once doubted it. His quiet, trusting Lottie! No, there was some strange mistake that would be puffed away in a moment. Ferrars would have whispered the word of comfort for him! Ferrars was the one man living whom he had cared to trust with his heart's deepest longing. For that last brief letter that her fingers had penned had been one to crush and brutalize any man not so sure of the woman he had asked to wait!

"Dear Mr. Joyce—I shall not be able to write again. You will think it hard, for a time, maybe; but you would think still less of me as a woman if I let you go on hoping and looking forward. Against my will, my feelings have gradually changed. I shall only ask you, as a man, not to cause unnecessary pain by ever trying to see me again. I hold you to that. Good-bye,—Lottie Haynes."

Oh, to see her lips quiver close to his own again!—to kiss away all the haze of misunderstanding! Through all the long railway ride to Waterloo, and the rumble by bus to Brixton, he sat in a dull but sweet thrill. A little longer, and the golden sunlight would pour back into her lonely life. "Lottie! Lottie!" he was whispering to himself all the way.

Brixton—Annie Street—the house itself—at last! One look up to the never-forgotten corner window, and then he had grasped the knocker firmly. One minute more! . . . It passed. He was turning away, quite steadily, but with a queer pallor under his tan. Miss Haynes was gone away to some hospital, they told him, staring curiously; that was all they knew. Not that he had asked more; the lump in his throat stopped that. Lottie had promised never to give up that room of hers until he came to take her from it as his dear wife. She had gone, leaving no clue. He was too late!

Mechanically he moved away in the grey twilight. To where? All seemed changed; all was muffled and unreal—till he drew up in that quiver. Ferrars! He had been forgetting all else. Ferrars could surely tell him something. If there were some blow to be faced Ferrars' hand would be waiting to grip his in the silent grip of sympathy. The bare idea of going anywhere but straight as a die to his old chum's rooms!

Ten minutes more and he had reached them, and rung the same old bell. He waited, his heart thumping dully. Then

past, seemed to see nothing. "I left her in your keeping, as my one friend on earth. You could have told me, for my life's happiness—and hers. You'll tell me now, because, night or day, I shall never rest until I have it from her own dear lips that woman's love—Lottie's love—could die like that."

A long silence. Dan was not quite sure—there seemed to come a thick mist over everything—but he believed that Ferrars had slipped from the room in that nameless pause. He knew nothing more for certain until Ferrars' hand closed upon his shoulder. Ferrars' voice itself seemed to come from a distance.

"Here, then, take this. I've written it; I've not told you—not broken my word literally. I can't stay to talk to-night; I have to be at the theatre by seven, and my friends are waiting. She's staying there, at that address, with friends, not far off. Send this telegram to her with your own hands. I tried to spare you pain by keeping silence. She won't see you—of that I'm certain; so this is supposed to come from a friend of hers, asking her to be at the main park gate by nine o'clock, on a life-and-death matter. It's quiet there—the gates close at dusk. Just this! I gave her my promise. Say nothing as to how you found out, and don't go near the house itself. Simply wait, and call here to-morrow to tell me. Old chap, it would be cruel to wish you luck!"

Some word rose in Dan's throat, but it would not sound. He pressed the other's hand and went out. Almost unconsciously he despatched the telegram. He was like a man moving without volition in a dark dream. And then at last he found himself standing under the tall poplars by the main park gate. He had set his teeth and nerved himself—to wait. In that next hour the blow was to be driven home to his heart—or love would have brought Lottie back into his lonely life.

Eight o'clock. Nine o'clock! A thin powder of snow was falling. Past nine! He stood on there in the grip of the cold lethargy because there seemed nowhere to go—nothing more to live for. And, then, suddenly, the great vague sobs shook him; a boom of sound went through his dulled brain.

Lottie! Over there, just about to cross the white stretch of roadway, came the dear, slight figure that had moved through his many dreams. He wanted to leap forward, to shout her name; he could only stand rigid, struggling for the supreme effort of his life.

She knew nothing. He could barely see her face beneath the lifted umbrella, but something in her quick, expectant step breathed unconsciousness of what lay before her. "Dearie! Dearie!" he whispered, his hands straining. She wore the same gray nurse's uniform, with the white collar and flowing skirts. He could recall every movement of her figure now. It seemed but yesterday that he had waited for her in the thrill of assured devotion. And to-night—

She had paused, looking around. Only the kerb railing was between them. Then she had seen him, and given the thrilling little cry for which he waited. She realized! To her he was a ghost from a dead past. He could just make out the deathly whiteness of her face in the surrounding gloom. She had quivered back; she was going without a word—out of his life forever! Just in time his husky voice would sound.

"Lottie! Lottie, dear, hear me! One word—if you ever loved me!"

"Not one—no, not one!" She faltered it faintly, but with determination that went to his heart. "Don't come near me—I am not worth it! It was not—not like you to stoop to such a trick with a weak woman!"

"Hush! I won't move; I am not going to frighten you, dear! Only let me speak quietly; only tell me what it all means!" He stood motionless on his

down his square figure. He stood on, gazing blankly like a man through whose brain some lightning streak of revelation had flashed, leaving all darker than before. "What—what—"

He heard a knocking at the hall door below. And then a voice—low, clear, sad. A woman's voice; the voice that had answered him not an hour ago—Lottie's voice! Here!

He stumbled across. He had heard the maid answer that Mr. Ferrars was at home. He stood rooted, a hand to his forehead staring out. Was it real? Should he wake presently in a sweat to find himself still upon the ocean liner? For a door on that lower landing had opened, and Ferrars' pale, clear-cut face looked out. Ferrars, unconscious of his return to the house, had been in that other room all the while. And Ferrars had called anxiously down.

"Miss Haynes, is it? . . . Why, dear, what has brought you here? What is the matter? I was not well—I did not go to the rehearsal to-night. How strange you look! Come this way—sit down—tell me—you must!"

Flat to the wall the listening man shuddered back as Ferrars leaped up the stairs, sprang in, set the gas blazing, and reached out for a chair.

"No—no!" It was the same dear voice, but trembling, and somehow different; it went through Dan's brain with a strange thrill. "I could not rest—I was going straight on to the theatre to find you." She paused. Framed there in the doorway so close, she seemed to strain her hands together. "He is back!" came her whisper. "He is back in England—in London! He was seen only this afternoon. He went to my old address, someone told me. He looked ill and troubled. No, no—let me think. . . . Archie, I can't—I can't be your wife yet. I think of him still—I must, whatever he has done, however faithless he may have been to me out there. You don't know; you couldn't understand a woman's heart. Oh, it would break, if I thought he had come back to realize the love he had thrown away—come back to find me another man's promised wife! I wrote that letter. Yes, you made me; but something told me that a true woman would have waited to know from his own lips that he had met a woman he loved better. I have lived in an agony, and I wouldn't tell you; you had won my promise when all seemed so dark and bitter. He is here—here! Oh! if ever I thought that you—that you had tried to win me from him when he was not here to—"

"Lottie!" It broke in a moan from Dan's lips. "Lottie! He is here! Yes; here for love of you!" He stood there, his shaking arms put out. All was silence. The cry in her throat seemed to be frozen. Ferrars, his friend, had reeled back, and covered away as from a descending death-blow. Only his lips worked soundlessly as Dan Joyce took that second step, his finger pointing, his voice suddenly strong and calm.

"I know. I know now! What have you done? What have you written, to blacken my struggling life in her eyes? What part was it you played to-night—you, the actor—as the last vile resource of a man in extremity? The part that that paper says you play with such rare success?" There was no answer. He waited for none. He turned, his voice going soft.

"Lottie! The light has come—Heaven meant this to happen. An hour more and I should have lost you—lost you to this man who has sunk himself body and soul to win you away in my absence—this man who could veil himself in angel's uniform as a nurse—as your own self, to crush me with a lie! Believe it! Forget all else—let your own heart speak. You never doubted me; you were blinded, as I was blinded to-night, by the genius of a villain!"

"You wrote!" came the weak breath in that pause. Her filmed eyes looked past as at something too deep to be understood. "You wrote twice, saying

# HOME.

SOME DAINTY DISHES.

Boiled red cabbage makes a delicious vegetable course. Procure a good red cabbage, such as is generally used for pickling, boil it in milk, strain it and mash up with some butter, pepper, and salt, also a little vinegar. Serve this very hot with fried croutons of bread, and you will have a delicious vegetable course.

Cheese Savory.—Trim off the crust from two slices of a stale tin loaf, cut each slice into four squares and fry them a light brown in good beef dripping. Stew these very thickly with grated cheese, adding a little made mustard and a dust of cayenne pepper. Place in a hot oven till slightly brown. Scatter chopped parsley over and serve.

Liverpool Pie.—Line a shallow dish with a thin layer of pastry. Chop up some cold meat coarsely, with a boiled onion. Season with mixed herbs, pepper, and salt, mixing all together thoroughly and moistening with a little stock. Fill the dish, cover with nice crust. Bake till the pastry is cooked, and serve hot or cold according to taste.

Canary Cream.—Dissolve half an ounce of gelatine in half pint of water by first soaking and then heating. Strain and add the liquid of two small oranges, half the grated rind of one, half the juice of a lemon, the yolks of two eggs well beaten, and one and a half ounces of white sugar. Mix all thoroughly and stir in china-lined saucepan till it just boils. Then put into a mould and serve when cold.

Kedgeree can be made with any cold fish, picked carefully from the bones, either salt or fresh. Take a teacupful of boiled rice, one ounce of butter, a teaspoonful of mustard, two lightly boiled eggs, salt and cayenne to taste. Mix all these ingredients together in a saucepan, add the flaked fish, and heat. Place in a dainty pile on a hot dish and garnish with slices of hard-boiled egg. A seasoning of curry-powder is an addition appreciated by most people.

A Delicious Savory.—Cut some thin slices of bread into circles, spread them with butter and cover each with a thin slice of cucumber seasoned with pepper and salt. Remove the oil, skin, and bones from some sardines, break the fillets up freely with a silver fork, flavoured with a squeeze of lemon juice, a drop or two of ketchup, pepper and salt. Put a layer of the sardine on the cucumber and press the slices together to form sandwiches. Garnish with slices of cucumber cut into fancy shapes and serve on a folded napkin.

Haricot of Veal.—Take two and a half pounds of the best end of a neck of veal, cut the bones quite short and leave the neck whole. Put the meat into a stewpan and cover with stock, simmer gently till nearly cooked, add one pint of green peas and a large cucumber peeled and cut into slices half an inch thick, some young carrots and two lettuces (each cut in four pieces). All the vegetables should previously have been stewed in a little broth. Cook all together with the meat for ten minutes, season with pepper and salt. Dish up the meat, put the vegetables over, thicken the gravy and color it a nice brown, stirring in some chopped parsley. Serve hot.

BERRY DAINTIES.

Blackberry Pyramid.—Cook 1 teacup rice until thoroughly done; try not to break the grains or have them gummy. While hot spread a thin layer on a large plate and cover with large ripe berries. Put another layer of rice over these and so on, each layer a little

in the silent grip of sympathy. The bare idea of going anywhere but straight as a die to his old chum's rooms!

Ten minutes more and he had reached them, and rung the same old bell. He waited, his heart thumping dully. Then the servant had answered; and the smile that dawned over her face seemed angel-like at such a moment. "Oh, yes, Mr. Ferrars is still with us! We knew he expected some friends, but he is not at home yet—!" She hesitated.

"Thanks—thanks! Archie won't mind me waiting!" he said, clearing his husky throat. And he found himself going dazedly up the stairs and pushing at a door. How familiar, yet strange, it all seemed!

"Not in there, sir!" came up the maid's quick voice. "That's a store-room. Mr. Ferrars has all the first-floor suite now!" And he stumbled into a front room confusedly.

He moved to and fro, struggling to be calm, touching something here and there to convince himself that this at least was living reality, full of possibilities. He did not want to realize what these new, well-furnished rooms suggested—that Ferrars was pushing his way in the world as an actor, and had left him far behind in a background. He only wanted to grasp the same old hand.

And then presently he drew in his breath sharply. A sudden buzz of voices below; men laughing and chattering. Now they were coming up—Archie leaping on ahead. He could pick out the old carefree, rich voice that he would know among thousands. They had all gone into that next room; he stood listening in a quiver, afraid to sound his own voice—he could not have told why, and then suddenly the door was pushed back, and Ferrars stood there. Ferrars not changed an atom!—the old smile on his dark, keen, good-looking face.

It died out. Dan Joyce had sprung his hand out, that husky "Archie, old fellow!" warm and broken on his lips. But that was all. In the dying light all the blood had seemed to drain from Ferrars' face and left it gray; he stood like a thing of stone. For a full minute, while that muffled laughter came in from the next room, life seemed to have no meaning; and then with a little throat-rattle, Ferrars had closed the door and held it fast.

"You!" he strained out. "You here—back in England! What—what—"

"I'm sorry," Dan whispered. "I never meant to give you that shock, Archie, she—she's gone! Gone!" His voice broke; he reached out again, gropingly. "Don't you remember? Don't you want me here? Won't you take my hand?"

"—I can go!"

And Ferrars, with what seemed the effort of a lifetime, moved forward, lit a new gaslight, and took the hand. His own shook in the convulsive grip; it was damp and nerveless—it did not seem real flesh and muscle. But he had forced a faint little laugh.

"Dan! I thought of you as thousands of miles away, and—and to see you standing in my room!" The hand fell away. He stood back as if scarcely breathing, his face turned. He seemed to be listening to something more than the uncertain sounds in Dan's throat.

"Where is she?" Dan asked, thickly. "I came—I came home because I couldn't live longer without her. Tell me that, if you know, and I'll go. Where's my Lottie?"

"I do know." He had tiptoed to the door and clicked the key. When he turned there was sweat on his forehead, as after a great mental ordeal. Watching, the other stood motionless. "Dan!" it came across. "I do know—and can't help you. Now you know why I have not written lately—I could not. I heard—I heard there was another man. What could I do when she asked me, on my honor, never to tell where she had gone? I promised; I had to. I can't break my word to a woman!"

"You must—and will," Dan whispered, never moving. His blue eyes, staring

like you to stoop to such a trick with a weak woman!"

"Hush! I won't move; I am not going to frighten you, dear! Only let me speak quietly; only tell me what it all means!" He stood motionless on his side of the iron railing. She had gone back step by step; whatever the agony of self-suppression at such a moment, he must keep his distance or lose her. She had changed—yes! There was something in her attitude to-night, in her chilling resolution, that he had never known in the old days. His Lottie!—yet not the Lottie who had clung to him and bade him be strong and brave for her sake. "If you know what I have suffered you would forgive me this!" he said, imploringly quiet. "It's all mist; I know nothing—except that I have done nothing to forfeit your love. I had your cruel letter and would not believe it; I came back home to tell you so. You never meant those words, Lottie, you can't—you won't—say that you have given to some other man what you gave to me—all that I held precious in life! I worked for you out there; I waited, for your future's sake; I never will believe that you turned from me of your own accord, knowing that I prayed for you on my knees every night—that I—"

It quavered off. His effort had been made. He caught at the rail and put a hand to his eyes. She was looking down as if in deepest shame, but without a visible tremor.

"It is too late," she said, in the same faint, cold way. She could pause to flick the snow-powder from her skirts. "I—I did not realize you would take it so to heart. There is no need to make a scene here; I am known, and—and I ought not to have been trapped by a trick like this. No, I can't tell you any more than I wrote. I don't ask you to forgive me, but just to forget me. If you persist now, I—I must go still farther away, and give up my work here. But, if you're the man I think, you'll go back and find some better woman who will repay you for all. I dare not stop; I must say—good-bye!"

"Good-bye!" The man's lips echoed it in a far-away whisper. His staring eyes saw nothing now. The lump in his throat could not be gulped back this time. Only once his hand wavered out, as if in hopes of touching hers; but the dear figure in gray had gone. Gone! He would never realize it—not in this life; but she was gone, forever.

Ten o'clock! A groping, haggard figure, he found himself back at the house where Archie Ferrars lived. He had no motive; he was moving still in the muffled dream. As he stood he saw the maid trip down the steps and leave the front door momentarily ajar. Never pausing to try and think, he went mechanically through, and up towards Ferrars' rooms. Instinct alone seemed to impel him toward that last possible refuge—the silent hand-grip of Ferrars, the man who had known all, and had kept a silence to save him pain.

In that front room the gaslight still burned, but no one was there. He moved to and fro just as before, with simply the dull idea that he had come to say "good-bye" before he turned back to that lone life in the bush. All unconsciously it was that he took up a newspaper lying there; vaguely his strained eyes focused a blue-pencil mark around one paragraph. He read and re-read as a child might have done.

"Successful male impersonators are legion; but it is rare indeed that we find the man who can don woman's garb, and don with it the graceful charm and femininity essentially exclusive to the tenderer sex. Mr. 'Archie' Ferrars has evidently made a careful study and mastered the subtleties of a difficult role. Not a few among his appreciative audience at the Ambigu last night were left sceptical as to the artist's real sex. Incidentally, we understand that any such doubts are dispelled by the fact that Mr. Ferrars is shortly to be married to a charming lady who . . ."

The paper fluttered from his fingers. He stood, tremble after tremble running

down the stairs; you were blinded, as I was blinded to-night. By the genius of a villain!"

"You wrote!" came the weak breath in that pause. Her filmed eyes looked past as at something too deep to be understood. "You wrote twice, saying that you wished to release me. I was crushed; I had no one to turn to. And yet—and yet—oh, Dan!"

"Come to me," he whispered. "It's all dawning now! I never wrote that. My real letters have not reached you. Look! He has played many parts trusting that I should never come back in time; but to-night he has played his last. My friend! . . . Come to me, Lottie! Only believe, and love will bring the light!"

Next moment he stood in the grip of a happiness that paid for all. Two soft hands had framed his face; a slight breast heaved against his own; a trembling figure was locked within his arms, and he knew for certain that a woman's love, once given, can never be taken away. In that sweet pause Ferrars had stolen from the room—perhaps from the house; but neither knew it. The dawn of truth, after that long darkness, blotted out all else. Dan Joyce had come into his kingdom.—London Tit-Bits.

## GIRL SMUGGLER IN BATTLE.

### Guards Passage of Her Sister Across Italian Frontier.

Two girls named Vachero, aged 17 and 19 years, have just accomplished a daring feat of smuggling. They belong to a family whose ancestors have been smugglers for a century. Their hunting grounds are in the mountains where the Swiss, Italian and Austrian frontiers nearly touch at the Stelvio Pass.

Many desperate fights with the Customs officials have taken place at this spot, until the Vacheros have been almost wiped out. There now remain of the family only the father and mother and the two daughters, who are the heroines of this latest exploit.

At present the father is suffering from a rifle shot through the elbow, which he describes as an "accident." He was unable to get a large cargo of tobacco across the Swiss frontier into Italy, and his daughters determined to smuggle the contraband themselves.

They started, but near the summit of the pass were discovered by two customs officials. While the elder girl proceeded on the journey the younger one kept the officers at bay with a rifle from a sheltered position. The men replied, and the fusillade continued until the sister with the tobacco had got a good half hour's start. The younger sister then disappeared, and returned home by making a long detour in the mountains, every path of which she knows.

## PRACTICAL PATRIOTISM.

### Chinese Lady Devotes Large Fortune to Service of Her Country.

Miss Hsu, of Szechuan, is a young lady of whom her native China may well be proud. The only child of the late Tao-tai Hsu Tsung, she received a careful education at an American mission, where as a child she showed great aptitude and promise. Her father's death left her at the age of 20 the sole heir to a fortune of \$500,000. Animated by sincere patriotism and desirous of making her fortune useful in the service of her country, Miss Hsu called a family council, and announced her intention to devote \$115,000 to the building and maintenance of a high school for girls, which should be a model establishment in China; \$10,000 to start a native progressive newspaper in her father's birthplace, Tchongchuan in Honan, and \$50,000 for a school in her own birthplace, Miss Hsu, who speaks English fluently, and has a knowledge of German, has recently visited Peking, whence she has started on an educational tour round the world, beginning with Japan where she is at present studying the system of female education.

rice until thoroughly done; try not to break the grains or have them gummy. While hot spread a thin layer on a large plate and cover with large ripe berries. Put another layer of rice over these and so on, each layer a little smaller around than the preceding one, so that, finished, you have a pyramid. Serve cold with sugar and cream. It will cut in nice slices.

**Blackberry Sponge Pudding**—Bake a thin sponge cake and cut in squares. Beat whites of 2 eggs stiff with one-quarter cup powdered sugar. Spread this over half the cake, placing large blackberries thickly in this frosting. Lay on the other half, then cover the top with berries and cover them with powdered sugar. Serve with cream or whipped cream or milk.

**Blueberry Gingerbread**—Stir together 1 tablespoon butter, 1 egg and one-half cup sugar. Mix in 1 cup good molasses and one-half cup sweet milk. Sift together 1 pint flour, 1 teaspoon baking powder or soda and pinch of salt. Mix this and 1 pint of berries with the first ingredients. Shallow pans are best and a sauce may be served with squares of the cake, if desired.

**Cup Puddings**—Make a batter of one-half cup sugar and 1 tablespoon butter, the beaten yolks of two eggs, one-half cup milk and pinch of salt. Mix this to a soft batter with flour in which 1 teaspoon baking powder has been stirred and stir in the beaten whites of the eggs. Butter some cups and fill one-third full with berries, dropping on top batter enough to make cups two-thirds full. Steam or bake about twenty minutes. The puddings may be eaten from the cups, or may be turned into other dishes and served with cream.

**Pudding**—Place a layer of uncooked blueberries in a glass dish. Cover with powdered sugar, then with whipped cream. Alternate in this way until the dish is full, the last layer being of cream. Chill thoroughly on ice and serve with tiny hot biscuit or shortcake, if desired. This is a very nice dish for lunch. The cream may be flavored with lemon.

**Blueberry Bread Pudding**—Line a pudding dish with pieces of buttered bread. Stew 1 quart blueberries, sweetening to taste, then pour into the dish and cover while hot with more pieces of buttered bread and let stand several hours. It will turn out of the dish whole and can be served with milk or any preferred sauce.

## HINTS FOR THE HOME.

Cook acid fruits in earthenware pans and they will have a lovely color and superior flavor.

Bacon rinds, after being scalded and scraped, should be saved for flavoring stocks and stews.

Panes of glass may be easily removed by being covered with soft soap for a few hours. This softens the gully, which can then be scraped off.

Before applying furniture polish, wring out a cloth from very hot water and rub it over the furniture; quickly wipe dry. Then apply the furniture polish in the usual way, and a very high polish may be obtained which will not finger mark.

**To Keep Flowers Fresh**.—Place the stalks in very hot water (roses will bear almost boiling water) and let them stand till the water is cold. Then mix a little carbonate of soda with the water in which flowers are arranged and they will often keep fresh a fortnight.

**When Boiling either Beef or Ham, etc., to Serve Cold**.—Immediately the meat is done plunge into cold water and let it remain for an hour. If pressed beef is to have this treatment, put the press and its contents in cold water as soon as possible after removing from the fire.

**When Preserving Fruits**.—If you wish your jams to be a good color and clear, boil the fruit before adding the sugar. By long boiling both before and after the addition of the sugar, but especially before, a smaller quantity of sugar will be found sufficient to preserve the fruit. To stir jams use a wooden spoon, and for strawberries use the stick end of the spoon, so as not to break the fruit.

## BRITISH INDIFFERENCE

**BIG BUSINESS WHICH JOHN BULL SCORNS.**

**Merchants and Manufacturers are Losing Trade to Foreign Competitors.**

Some put it down to the British master, some to the man. Some blame Free Trade, and others the climate. But all are agreed upon one point, which is that British trade is not increasing in anything like an equal ratio to that of our German, American, Japanese, and other competitors, says Pearson's Weekly.

The real fact of the matter seems to be that our merchants and manufacturers—most of them at least—are content to rest on the laurels their fathers won. They won't go out and hunt for new fields for commerce, nor trouble to find out what new customers want.

To take a case in point. The Hindu, especially the educated or half-educated Bengali, has conceived such an affection for the umbrella that he would as soon think of leaving home without his clothes as without his gamp. At one time the Indian umbrella trade was in British hands, and millions of British umbrellas were sent to India for sale at a rupee and a half apiece.

But the wily German saw that an even cheaper article would find a market. He makes an umbrella for sale at eight annas (about eighteen cents), and is cutting out the British merchant. Remember, the natives' umbrella is

**ONLY FOR SHOW, NOT USE;**

but yet the British manufacturer has made no effort to compete with the German in the supply of a cheap article of this kind.

A Consular report from Alexandria has pointed out that the Egyptian egg is smaller than the English. There is a good opening in the land of the Nile for the sale of a smaller egg-cup than the ordinary. Yet our merchants continue to send the stock size, apparently considering such a trifling alteration quite beneath their notice.

Once we owned the South African needle trade. Our needles were excellent—none better. But in spite of all protests to the contrary, we insisted upon wrapping them in black paper, which the superstitious Spanish-American lower classes disliked. Along came the Germans with needles not half such good steel as ours, but wrapped daintily in scarlet paper. They very soon captured the whole trade.

In South Russia the women wear red handkerchiefs as head-dresses. Manchester used to supply them. They were oblong in shape, and over and over again the women begged that they might be supplied with square ones, which were

**MORE CONVENIENT TO TIE.**

But the Manchester makers only sneered when their travellers told them this. "We can't be bothered to put down a new plant just for the whim of a parcel of women," said they.

But it was not very long before a German bagman nosing about in South Russia found out what was wanted, and promptly supplied it. The Russian women still wear red handkerchiefs, but they do not come from Manchester.

If you go to a tailor for a suit of clothes he puts bundles of patterns before you, and you choose for yourself the color and texture which you prefer. He does not take one roll of cloth from the shelf and say, "This is the fashion. This is what you require. I will measure you for a suit of this." Were the man of shears silly enough to do anything of the kind he would very soon lose all his custom, and appear in the Bankruptcy Court.

Yet, on a larger scale, that is exactly what the average British manufacturer

## ON THE FARM

**PREPARING LIVE STOCK FOR THE RING.**

In the various live stock departments there is a certain class of professional exhibitors who need no instruction regarding the preparation of animals for the show ring. Some of them have certain methods of feeding and ways of handling live stock for rounding them off for exhibition purposes. It is impossible to secure a detailed description of their methods. As a rule, many breeders take their cattle direct from the pasture to the fair. A few weeks before the fair the cattle are brought in daily and kept up for a short time they become accustomed to their feeds. In this way they are not disturbed or affected by the sudden change when transferred from the pasture to the fair grounds stall. With plenty of good chopped hay in sacks, the exhibitor will be able to adjust the meal and cut feeds in sacks to the needs of the animals so that they may be kept on their proper feed and in good tone. Good alfalfa and clover well cut makes one of the most satisfactory cut feeds.

Care should be taken not to overcrowd the animals with food on the way to the fair. Frequently the appetite slackens in transportation and experience shows that it is better to keep them under, rather than overfed. The feed given them during transit should be dry rather than possessing too much succulence. It is a well-known fact that some animals will not take much water when on the road, hence the necessity of care in this respect. The individuals should be watched. The more nearly they can be kept and fed as they were when at home the better.

Animals should not be washed until they are thoroughly rested after their journey. The facilities for washing, including soap, brushes, buckets and plenty of fresh water. It is important that this work be pushed rapidly. Animals are taken to the fair for show purposes and the oftener they are in the show ring the better for the individual who shows them. After the animals have been thoroughly washed they should be groomed carefully daily, the more the better.

The character of the stalls and pens rests usually with the management. The exhibitor should be careful not to unduly expose a valuable animal to inclement weather. Frequently the stalls are open and valuable animals are subject to drafts and beating rains during heavy storms. Frequently blankets can be tacked up affording ample protection. There should be more individual exhibits of first-class pure-bred stock from farms. Frequently stock of this sort take the ribbons away from professional showmen. It is competition like this that adds interests to the live stock department of an agricultural fair.

**HINTS FOR THE PRUDENT FARMER.**

October—Sow cover crops, rye and buckwheat, on ground that would otherwise be bare during winter. Late in the month harvest roots and store in pits or root cellar. Finish harvesting and storing apples, pears and grapes. Leave only hardy vegetables such as parsnips, Jerusalem artichokes, horse-radish in the field. These may be dug as needed through the winter or in early spring. Fill cold frames with lettuce, radish and onion sets for winter use. Sow spinach for spring cutting. Transplant all flowers for house use before frost. Dig and start in a dry place cannas, gladioli and similar bulbs and roots. When temperature goes below 50 degrees at night start fire in the greenhouses. Plant last seedlings of strawberries in pots early in the month. Celery must have final earthing up. Asparagus and rhubarb for forcing must be dug and allowed to freeze before re-

# LOVE'S WASTES

**It Is Selfishness That Makes Man a Moral Pauper.**

"To what purpose has this waste of the ointment been made?"—Mark xiv. 4. Love is a foolish thing to the man who has none; it is wasteful, extravagant, fruitless. Yet the riches of life spring from the wastes of love. Frigid Pharisees always are ready to sit and calculate what might have been done with the money that a great, loving heart flung away. If they had fed the poor of all the Orient with their pennies the deed would have been forgotten long ago; it would have borne far less fruit than the act of the woman that looked so like folly to them.

To the calm economist love makes many mistakes; but heaven sees her prodigality is but seed sowing. The harvest lasts through the ages. It is not the good we do with calculating nicely that counts for most; that is but charity. Never until love lays hold of our lives and we fling away some things that men say we should prize do we know the joy of giving.

The world forgets the wise things it has done—the things that seem wise at the time of their doing. The world remembers the foolish things, those that men despised, counted quixotic, impulsive, and wasteful. It is a good deal more likely to remember Joseph's love for his brethren than all his executive ability in

**STORING CORN IN EGYPT.**

The day will come when we shall honor men not for their profits in the business of living—of these we may be ashamed—but for their gifts to life; when we shall know that there is no living without giving; that he alone finds life who loses it; that the measure of success is not the things of which we may die possessed, but the things of which our living has made the world to be possessed.

No matter how successful a man may have been in acquiring riches, he goes out of this world morally destitute if he has failed to lose some of his life, to scatter some of himself as seed sown for the future. He may wax fat and arrogant now, but none shall hang his

head lower when life is shown in its real value. God pity the man who has enriched his substance by impoverishing his soul.

And just there lies the secret of it all—the great advantage of love's wastes come back to the giver. A man is impoverished not by what he gives away, but by what he withholds. He is wasting his substance in the worst way who is seeking to store it all up for himself. The flowers cast their seeds with prodigal hands; the strict economist finds waste written all over nature; he knows not that that is the

**SECRET OF HER WEALTH.**

The heart grows rich by its losses; and as soon as we have learned that the heart is the true measure of life we begin to find our wealth not in getting but in giving. Many a man has gone down to death labeled a fool by this world's wisdom because he has been too generous to accumulate anything, who yet has taken more out of life than all his critics put together.

From the viewpoint of the infinite, the wastes, the follies, and the losses of true love are more than justified. The odor of that ointment has come down through the ages. It has prompted to a thousand generous deeds; it has taught man to spurn the calculating of profits and losses when some great purpose appealed to him. It has enriched the world with an ideal, something always and eternally worth more than all things real.

Whoso feels a fine impulse, such as stirred in the woman's breast, if he be wise, will not check or deny it. It is better to do the most foolish thing in love than the wisest in calculating selfishness. The holiest things of our lives, the memories we cherish, and the things that remain to cheer our often drooping hearts are the fruits of just such deeds; they are like flowers, sweet immortelles, springing from the seed lavishly scattered by love.

HENRY F. COPE.

## THE S. S. LESSON

**INTERNATIONAL LESSON.**

**SEPT. 16.**

**Lesson XII. Jesus Silences the Pharisees and Sadducees. Golden**

**Text: Mark 12. 17.**

**THE LESSON WORD STUDIES.**

Note.—The text of the Revised Version is used as a basis for these Word Studies.

Pharisees, Herodians, Sadducees.—The Pharisees were a separatist-religious party. They represented the religious views, practices, and hopes of an earlier and less corrupt generation, and of a remnant of zealous Jews of the old orthodox school in their own time. As rigid legalists they were scrupulous observers of the law as interpreted by their learned scribes and rabbis, and of the ceremonial regulations touching levitical purity. They were pledged by the secret vows of their own order to conscientious payment of tithes and temple

one time allowed a special coinage to be struck for Judea on which the image did not appear. Hence Jesus says, "bring me," instead of simply "show me."

17. Render unto Caesar the things that are Caesar's—Pay to the emperor as a rightful obligation every legal due. And unto God the things that are God's—Possibly there is here a reference to the temple shekel, as well as to the deeper spiritual obligations to Jehovah.

They marvelled greatly—Appreciating at least the skill and shrewdness of his answer, if not also the deep spiritual insight involved therein.

18. The utter failure of the Pharisees to catch Jesus in their net of words must have given to the Sadducees much secret satisfaction. It is now their turn to question him. Theirs is, however, a doctrinal rather than a legal question, though equally subtle. It is aimed at discounting his standing as a teacher among the people, which would be involved in his failure to answer satisfactorily.

19. Moses wrote—In Deut. 5. 5 "If brethren dwell together, and one of them die, and have no son, the wife of the dead shall not be married without unto a stranger," etc. The purpose of the law was the preservation of families and family names, which under the old

you for a suit of this." Were the man of shears silly enough to do anything of the kind he would very soon lose all his custom, and appear in the Bankruptcy Court.

Yet, on a larger scale, that is exactly what the average British manufacturer is doing. He seems to fancy that, because a customer lives in America or Africa, he does not know what he wants.

#### AND MUST BE TAUGHT.

That plan was all very well in days when Britain had no serious competitor as a manufacturing country. To-day, when German, American, French, and Japanese travellers are doing all they know to suit every customer, it no longer answers.

Again, Jamaica, which had been using American locomotives, ordered some from a British firm. The latter were to cost nearly \$20,000 apiece, while the Americans only cost a little over \$10,000; but the Jamaica railway authorities considered that the superior quality of the British engines would pay them in the long run.

One of the new engines was tested with five loaded and two unloaded cars, and quite failed to pull them up a gradient which the American engines had regularly crossed with a similar load. The British makers had been instructed to build good hill-climbers, but instead had sent the ordinary pattern.

Such cases might be multiplied indefinitely. One of our latest losses is the match trade of Burnmah, a small thing, perhaps, but still worth \$175,000 a year. Burnmah is a damp country, and the heavy English match failed to keep alight, the wood collecting too much moisture. Japan saw what was needed, a smaller match with more resin in the wood. Now Japanese matches are used all through further India.

#### HER FATE DECIDED BY CARDS.

Hearts, Her Lucky Color, Failed to Turn Up.

Miss Nesthe, of Soleure, Switzerland, a handsome girl, gambled with death the other day—and lost.

Her father, who died recently by his own hand, was regarded as a wealthy man. His only daughter was, however, left penniless owing to serious losses in speculations. When the house and furniture were sold by public auction to meet the father's liabilities, Miss Nesthe went to live with some friends, and her mind seems to have become unhinged by her troubles.

"My Lucky day is Thursday," she said to a girl friend, "but even my luck seems to have deserted me, and I cannot bear life any longer."

Thursday she asked her friend to come and see her play cards, and as her manner seemed strange, her friend humored her. "You will see that hearts, my lucky color, will not turn up," Miss Nesthe explained, and, true enough, no matter how she cut and shuffled, a black suit always appeared.

At last she announced to her unsuspecting friend that the cards foretold "a long and peaceful sleep," and went up to her room without uttering another word.

The friend being used to Miss Nesthe's eccentric humors, took no more notice of the affair, and went out shopping. On her return, on entering her friend's bedroom, she found Miss Nesthe dead, still holding in her hand a small phial which had contained prussic acid.

#### A THOROUGH JOB.

In the cook's absence the young mistress of the house undertook, with the help of a green waitress, to get the Sunday luncheon. The hurried maid, who had been struggling in the kitchen with a coffee-machine that refused to work, confessed that she had forgotten to wash the lettuce.

"Well, never mind. Eliza. Go on with the coffee, and I'll do it," said the considerate mistress. "Where do you keep the soap?"

roots. When temperature goes below 50 degrees at night start fire in the greenhouses. Plant last seedlings of strawberries in pots early in the month. Celery must have final earthing up. Asparagus and rhubarb for forcing must be dug and allowed to freeze before removal to cellar.

November—Final harvesting of cabbage, celery, roots, etc., and final planting of spinach. Make cuttings and scions of grapes, currants, gooseberries and tree fruits, tie in bundles and bury butt end upward. Stratify seeds of peaches, plums and other stone fruits and store where they will not freeze. Spread mulches on bulb beds, around shrubs, upon herbaceous borders, and when the ground is frozen hard, upon strawberry beds. Prune grape vines and other trees. Plow or dig heavy soil and leave in loose condition to freeze. Cover cold frames with straw mats or shutters on cold nights. Tidy up the place for winter. Review season's practice and improve plans for next year.

#### DAIRY RECORDS ESSENTIAL.

The daily record of the herd is a matter of the most importance, says Prof. C. B. Lane. The highest degree of success cannot be attained unless dairymen know the productive capacity of each individual cow. The record should include not only the dairy performance, but a concise history and description of each animal. The former requires a daily record of the milk yield of every cow and a fat test of several consecutive milkings, if accurate records are to be secured. Samples for this test may be mixed and this composite sample tested, thus obtaining the average.

#### KING'S INDIAN ORDERLIES.

Curious Impressions Formed of the Mother Country.

The King's four Indian orderly officers, who have spent three very crowded months in England, sailed for India recently.

So impressed have been these fine-looking, black-bearded men with the order of things in the mother country that they admit to a certain feeling of awe when speaking of the great sights they have seen.

Londoners have become accustomed during the season now dead and gone to the spectacle of these impressive Orientals in their uniforms of black, pale blue, and red and gold; but they scarcely realized perhaps what was passing in their minds.

Last season the Indian orderly officers were Gurkhas, the year before Sikhs. The men who sailed recently were Punjaub Mahometans. They have never tasted alcohol, and their meat must be prepared for them by men of their own faith.

They have all seen much active service, and wear several medals and clasps.

The four officers were taken to the Hippodrome, and before their departure they gave, through an interpreter, some of their impressions to an Express representative.

"There is no ruler in the world like our Shanhinshah-i-Hind"—Emperor of India—"and no Empress like our Empress," said one of the turbaned giants. They never speak of the King and Queen. It is always "our Emperor and Empress."

"We have seen much—the great battleships, the arsenal at Woolwich, the Palace of Crystal," said another. "But what can be more wonderful than the order in the streets of London? The London policeman has but to raise his arm, and great and small do his bidding."

"So he said I was a polished gentleman, did he?" "Well, yes. It was the same thing." "Ah! what was the exact word?" "He said you were a slippery fellow."

rigid legalists they were scrupulous observers of the law as interpreted by their learned scribes and rabbis, and of the ceremonial regulations touching levitical purity. They were pledged by the secret vows of their own order to conscientious payment of tithes and temple dues, and to the literal observance of rules and ordinances established by the traditional interpretation of the law. They were the bitter opponents of both Sadducees and Herodians. In contrast with the former, they believed in a future life and in the coming of the kingdom of Heaven in visible form on earth. Compared with the common people they formed an aristocracy of the learned and virtuous, despising heartily the ignorant populace which knew not the law. After the fall of Jerusalem and the destruction of the temple the Pharisees again became the dominant party in Judaism, exerting a strong influence on its later character and history.

The Herodians were a religious-political party in power in Jerusalem during the reign of King Herod and his successors. By Jewish rabbis they were called Boethusians after Boethus, father of Marianne, the murdered wife of the tyrant Herod, the latter having successively appointed the sons of Boethus to the office of high priest. In political sympathies and ethical principles the Herodians were closely allied to the Sadducees.

The Sadducees were the aristocratic-priestly party, fewer in number, richer, less rigidly legalistic, and less strict in their habits of life than the Pharisees. From the latter they differed also in the fact that they did not believe in a future life, nor in the existence of angels, etc., and did not accept the traditional interpretation of the law as insisted upon by scribes and rabbis. They were in league with the Herodian and other ruling families and therefore more influential in religious and civil affairs, in the councils of the Sanhedrin, as long as the Jewish state existed. But with the downfall of that state at the time of the destruction of Jerusalem, their power and influence came to an end, and they soon disappeared from history.

Verse 13. And they send—The exasperated priests and scribes, namely, who had been angered by the pointed Parable of the Unfaithful Husbandman spoken by Jesus, and recorded in the preceding verses of this chapter.

Certain of the Pharisees—Chosen leaders learned in the technicalities of the law, and skilled in debate.

And of the Herodians—The combination of these two antagonistic parties against Jesus is a significant comment on his power and influence at this time.

14. Teacher, we know that thou art true, and carest not for anyone—Words spoken, doubtless, with a fine show of sincerity, but the bald flattery and hypocrisy of which did not escape Jesus. What these Pharisees said may be taken to indicate what was the general reputation of Jesus among the people at this time.

Is it lawful to give tribute unto Caesar?—A subtle question from the snare of which there seemed to be no escape, since a negative or an affirmative answer alike would give them a cause for proceeding against Jesus by process of law. It was a question, however, which in their own hearts they answered with an emphatic negative.

15, 16. But he, knowing their hypocrisy, said—The answer of Jesus was always determined by the spirit of the question put to him.

Bring me a denarius—As zealous patriots who hated everything that reminded them of their subject relation to Rome, they would not be likely to carry with them this little silver Roman coin, with its image and superscription of Caesar. This image of the emperor was by the stricter Jews abhorred as idolatrous, and in deference to their religious sensibility on this point, the Romans at

19. Moses wrote—in Deut. 5, 5 "If brethren dwell together, and one of them die, and have no son, the wife of the dead shall not be married without unto a stranger," etc. The purpose of the law was the preservation of families and family names, which under the old tribal division of the nation had been highly desirable.

20. There were seven brothers—Probably a fictitious or hypothetical case.

21. Ye know not the scriptures nor the power of God—Their error was a twofold one: (1) Ignorance of the Scriptures; (2) Of the profound truths which those Scriptures teach. Jesus deals first with the second of the two points.

25. Neither marry nor are given in marriage—The carnal relations of this life are not to be thought of as extending into the future life, or as being repeated there. Compare Paul's argument (1 Cor. 15, 39-44), based on the endless variety of the creative power of God.

As angels in heaven—The existence of angels was denied by the Sadducees; in his reply, therefore, Jesus embraces the whole area of their unbelief.

26. Have ye not read in the book of Moses?—They had quoted Moses in their question, and Jesus answers by referring them to the same authority.

In the place concerning the Bush—Exod. 3, 4-6.

27. Ye do greatly err—The answer of Jesus to the Sadducees was thus as conclusive and final as had been his answer to the Pharisees. Still another question put to Jesus by a more sincere inquirer is recorded in this connection by Mark in the verses following our lesson text.

#### THE DANGER OF WHITE LEAD.

Probably lead-working, and particularly the manufacture of white-lead is the most dangerous calling. In this industry it is inevitable that, sooner or later, the workers must succumb to lead poisoning, and there would appear to be no part of the body that the poisonous fumes and floating particles which permeate the atmosphere of the workshops do not affect. The complexion takes on a ghastly corpse-like pallor, the gums turn blue, the teeth decay rapidly and fall out, the eyelids are hideously inflamed. A scratch or an abrasion of the skin becomes an unhealable sore. Later on, when nerves and muscles become affected by the poison in the blood, the eyeballs are drawn into oblique positions, and take on a dim and bleared appearance. The joints, especially the knee and the wrist, become semi-paralyzed, and the whole form is gradually bent and contorted.

#### PEASANTS STONE MOTORISTS.

It Is Dangerous Now to Travel on Swiss Roads.

The crusade against motorists in Switzerland continues, despite the warning of the Swiss Automobile Club and many hotel proprietors that the tourist season is seriously affected thereby.

It is becoming positively dangerous to motor on certain roads. Outside the large towns motorists are frequently stoned, and large boulders are placed on the roadway with the intention of wrecking their cars.

While travelling from Lucerne to Interlaken a Party of English and American motorists were stoned by a gang of young hooligans, all the glass and lamps in the car being smashed.

11. Evans, of New York, who crossed the Brunig Pass at the rate of six miles an hour—two friends in the car timed him—was fined \$10 on his arrival at Sarnen for excessive speed.

One young American, who has been unjustly fined a number of times, is now dashing about the country in a fifty horse-power car at the rate of 40 miles an hour, trusting to luck and to the cloud of dust which envelops him to prevent the number of being taken.

"I may as well have my money's worth," he explained.

# Diana's "No"

The course of true love might have run smoothly enough in the case of Diana Lowbray had she not parried the all important question, and implied "No" when she really intended her final answer to be "Yes."

Dick Reiton, her lover, was, unfortunately for her, one of those prosaic, matter-of-fact individuals who expect a plain answer to a plain question. He contemplated matrimony with even an unusual degree of seriousness, for he loved Diana truly and felt assured, moreover, that she loved him.

In this momentous question of his life he came straight to the point at once, even though it meant the turning point of his easy-going bachelorhood existence. He put the question in the concise and simple form in which it occurred to him without any preliminary assertions or unnecessary expansiveness of expression, so indulged in by the lovers of to-day.

He never troubled about fluency of speech or flowery language, for he reasoned that Diana understood all that prompted the question. "She knows that I love her," he thought. "What need to talk about what is so apparent?"

It chanced one summer afternoon that Dick found Diana in her favorite nook among the flowers in her garden, and he stood to watch her for a few moments, or she made a picture fair enough to delight the heart of any man. She was unaware of his coming, her thoughts were far away in the world of romance; he was intent upon a book, an ideal love story, wherein the lover made love in a manner entirely after her own heart. She put herself in the heroine's place and pictured just such another wooing in real life.

Then all at once she heard her lover's footsteps; she closed her book, perhaps a little reluctantly, and waited for the realization of her dream and fancies. There followed the lovers' glance into each other's eyes, the lovers' touch of hand, a few moments speaking silence, and the question fell abruptly on Diana's ears.

"Diana, will you marry me?"

Diana's moods were varied as her charms. Her mind was wandering in the land of ideals, and so the question came to her an unpropitious moment. It sounded so abrupt, and it wounded Diana's romantic susceptibilities. Where were her protestations of love, the endearments, the ardor of the anxious lover? Diana glanced up surreptitiously at the all figure beside her, careful, however, not to show in her face all the love that was in her heart, for she knew that she owed this matter-of-fact wooer, but why, oh, why couldn't he make love in the proper way.

She meant to say "Yes" in the end, but, well, she had a fancy to be wooed after a fashion of her own, with vows of eternal fidelity, with more lover-like demonstrativeness, and so she resorted to prevarication as a means to an end, confident of her own power, never doubting what that end would be.

"Marriage? I? Absurd," she exclaimed, and made pretence of finding the lost place in her book; and, alas, he did not see the smile which curved Diana's mobile lips, or the light which shone in her deep grey eyes. The words without the smile spoke volumes, and her tone conveyed perhaps more than she had wished. Her lover came hastily to a conclusion.

"And so," he said, "you've just been amusing yourself all this time, you never really cared. Diana, you're just a heartless flirt," and he strode away without even a backward glance in his

himself the prerogative of "setting things right" without impairing his own dignity or asking a woman's advice.

Dick had a tiresome feeling that he had been too precipitate in accepting Diana's "No," and he desired nothing more than to be quite sure of the real state of her feelings. So by a strange coincidence he hit upon the same method of procedure as Diana herself.

"Absence makes the heart grow fonder," he mused, "I'll go away, and if she does care I shall see her coming once more across the meadow. We shall meet and she will try to say 'Good-bye.'"

Dick's lover-like intuition pictured the scene which would follow, and in which he and Diana would once more be made happy.

Hence it came about that the day after these lovers had resolved to put the ocean between them that rural gossip set the ball a-rolling, and with something like dismay Diana heard of Dick's intended voyage to Australia, and he in turn heard that she was off "almost immediately" to America. How terribly distant and unenchaining these country sounds to their anxious ears.

Diana almost gave in; then she stood her ground once more. For one weak moment she contemplated a complete surrender and an inevitable explanation, then she drew back again into her shell of well-assumed indifference.

Dick's love almost got the better of him; he longed to take Diana in his arms and ask her that same question with ardent protestations of his love; then he scorned his weakness and let the moment pass.

So they waited, each for the other to speak, to give some sign. The waiting grew tense, and apprehension dawned on Diana's lovely face. Each morning they gained new courage with the thought "One more chance," each evening they acknowledged that "Hope deferred made life unbearable."

Obstinate determination at last gave way to desperation, and one morning the early train puffed and panted out of Fairtree station carrying a resolute young man with a huge portmanteau.

Then, reflecting that she would not be behindhand, Diana also packed and made her exit, calmly, judiciously, with a pile of luggage and a deck chair.

Alas for the dreams of youth and the mighty resolutions formed in lover's minds! As the train dashed on, carrying Dick farther and farther away from the home of his youth and from Diana, he sat and gazed moodily out on the passing landscape, the sweet English pastures, the woodland hills, and the quiet homesteads. How peaceful it all looked, how familiar, bathed in the afternoon sunlight, and he was leaving it all for—"Banksmere," called out a porter. The train had stopped, and Dick noticed with an appreciative eye some well-remembered hills over which he had had many a delightful scramble. "I'll give Jack a look up," he decided suddenly, "Australia can wait. Diana won't know where I am," and then he made his way out of the station with the air of a person thoroughly accustomed to his surroundings and with a happier look upon his face.

Diana's train likewise bore her swiftly along; she, like her lover, beguiled the time in sad reflectiveness and mute farewell. "What might have been," she mused in the melancholy quiet of her first-class compartment; "how happy we might have been if only—" "Hillsdene," screamed a voice outside the window. Ah, how well she knew Hillsdene. What jolly times she had often had there. It was near here that she had first met Dick. That dance, how she recalled it now.

Without another moment's hesitation (for the train would have started on) Diana alighted, gathered her belongings, and vanished in a station cab. "Won't Molly be surprised?" she thought, "and there is no hurry about America, Dick won't know and the rest of the world doesn't matter."

So Diana stayed at Hillsdene and

## OUT FOR THE SUPREMACY

### FIGHT OF STEAMSHIP LINES FOR BLUE RIBBON OF THE OCEAN.

Vessel Must be Gigantic, Indeed, and Well Equipped to Outclass Present Service.

Yet another bid for the blue ribbon of the Atlantic! Hardly has the colossal Cunarder Lusitania left the slips than the Hamburg-American line announces its determination to take up the challenge for supremacy. Not satisfied with their mammoth Amerika and Kaiserin Augusta Victoria, the Germans are to build a vessel which will exceed in size and speed the Lusitania, at the present the fastest, largest, and heaviest steamship in the world, says the London Express.

The Lusitania and Mauritania, sister ships, each have a gross tonnage of 32,200, as against the Kaiserin's 25,000. The next Hamburg-American must, therefore, very greatly exceed the Kaiserin in size and weight. She must be over 787 feet long and 88 feet broad. Her speed will have to be over 25 knots, her horsepower above 800,000, and she must carry at least 3,200 passengers and 800 crew.

A quarter of a century ago an expert in the Engineers declared an ocean speed of 25 miles an hour an impossibility. But the Lusitania will steam 29½ miles, and the forthcoming Hamburg-American well over 30. Another quarter of a century and ocean speed may have increased another 50 per cent.

### AMAZING FORECASTS.

Later experts have made amazing forecasts. In the last third of a century the tonnage of Atlantic liners increased fivefold; if, therefore, their capacity were to increase in like ratio during the next third of a century, the largest steamer in the year 1940 would be nearly 70,000 tons. Her corresponding dimensions would be: Length, 1,000 feet; breadth, extreme, at upper deck, 120 feet; depth, 75 feet. The Lusitania's length is 787 feet, breadth 88 feet, depth 60 feet.

This, however, is merely the modest prognostication of a practical shipbuilder. H. G. Wells, dreamer and romancer, might picture whole cities afloat by 1939.

We are told that the next Hamburg-American will go one better in the matter of luxury as well as size. She is to be equipped with Turkish baths, and a swimming tank for the use of passengers.

But she will have to be a very wonderful creation indeed if she is to excel existing liners in luxury of accommodation. Shipowners vie eagerly with each other in providing accessories to passengers' comfort, as a survey of their recent announcements will show.

Handsomely fitted gymnasia are the latest allurements. The Hamburg-Americans have them, of course, so have the R.M.S.P. Aragon and the North German liner Prinz Eitel Friedrich. The gym on the last-named is 25 feet long, 21 feet wide and fifteen feet high. It contains machines for rowing, swimming and cycling, and Swedish electrical health machines.

### A PLAYGROUND FOR CHILDREN

is a feature of the C.P.R. company's Empress of Ireland. An imitation beach composed of Clyde sand is constructed on the upper deck and here juvenile passengers may shovel and build sand castles all day long. The vessel also has a nursery, well stocked with toys.

Ocean libraries have not been too well stocked heretofore and the companies are beginning to give better consideration to this department. The Cunard line has just undertaken to provide passengers with first-rate service of books, the volumes being renewed after each voyage in order to include the newest

## AMOUNT OF SLEEP REQUIRED.

Expert Opinion on the Subject Varies According to Habits.

"Should we sleep longer?" is the question which has arisen from the address delivered by Dr. T. Dyke Acland to the Physiology Section of the British Association. Dr. Dyke Acland's conclusions were:

1. Sufficient rest is a physiological necessity, especially for those who have not reached maturity; short hours tend to a diminution of bodily vigor and retardation of bodily and mental development.

2. To stint a child of sleep is to stunt his growth.

3. To give a child sufficient sleep is simply teaching him how to take care of his body.

The following are experiences or advice as to the duration of sleep by distinguished men:

Sir Frederick Treves: The average amount of sleep for myself is seven to eight hours.

Mr. Beerbohm Tree I should say in my case eight hours' sleep is better than seven, and nine hours' better than eight. I take nine hours whenever I can.

Dr. Josiah Oldfield: It is certain that every man must have a certain minimum of sleep per twenty-four hours. Most find that minimum eight hours, but an enormous number are satisfied with five and a half hours. I always sleep eight hours, and regard that as, on the whole, the proper minimum for a man. Certainly five and a half hours is not enough. Women, I say without hesitation need less sleep than men.

Sir Alfred Jones, K.C.M.G., head of the Elder-Dempster Line, and a man of great activity at sixty years of age, says: "It is my regular habit never to be out of bed after 10 p.m., and never in bed later than 6 a.m. This has served me well for fifty years."

Sir T. J. Lipton says: "I consider eight hours quite sufficient for any man, but personally am satisfied with 6½."

Mr. C. B. Fry says: "The average for an adult should be nine hours. For myself, I take ten if I can get it."

A headmaster of one of the large English public schools, who has changed the breakfast hour from seven to eight, says that the whole school is brighter and does better work. Nothing would lead him to recur to "the fetish of early rising."

## CANCER DISCOVERIES.

The Question of Heredity May Soon be Solved.

There is the happy possibility of the mystery of the terrible disease of cancer being solved at no very remote date.

This was hinted at when the results of the experiments made during the year by the Imperial Cancer Research Fund were described at the annual meeting in London, England, by Dr. Bashford, the general superintendent of the fund's laboratory. He dealt chiefly with the results of the inoculation of 100,000 mice.

The scientists, he said are now able to reproduce at will in mice all the features of spontaneous cancer, and to protect healthy mice from all the consequences of inoculating them with experimental cancer. "This having been achieved it is not too much to hope that the further development of the experimental study of cancer will yield results having a direct bearing on the nature and treatment of the disease," added Dr. Bashford.

After repeated failures during thirty years the fund have been able to obtain offspring from mice suffering naturally from the disease, and in the near future it may be in consequence be possible to conclude whether cancer in man is or is not hereditary.

Sixty per cent of the "spontaneous" cancers which Dr. Bashford referred to had been got to grow in mice previously healthy, and in the view of the scientists this points to the conclusion that all malignant growths are trans-

yourself all this time, you never really cared. Diana, you're just a heartless flirt," and he strode away without even a backward glance in his ladylove's direction.

Little wonder that Diana's pride was hurt—no woman likes to be called a heartless flirt—especially by the man she really loves. Things had assumed an unexpected aspect. Diana had not anticipated such a contingency. She could not raise her voice in protest, she would not now if she could, she would assume complete indifference.

"Absurd," she said to herself, "but he'll come back. I'll wait." And Diana went on waiting and presumably reading till late on that summer afternoon. She waited in vain, for her lover did not come back. She turned the pages of that last romantic chapter of her novel without so much as a glance to see "how the story really ended," and then wended her way across the old world garden to the house beyond, a smile still upon her lips but with the light of battle in her eyes.

The worst of it was that this foolish pair of lovers lived very near together—a stone's throw Diana called it, from her own ivy-covered house to Dick Relton's more imposing residence.

Diana had been wont to roam at will across the sunlit meadows through the flower-decked orchard into her lover's domain, and he had grown to watch for her daily coming, and to delight in the moments when they wandered together over the sunny fields. Then they had drifted from friends to lovers, happy in the thought that each knew the other's secret.

Now everything was changed. Diana turned her steps obstinately in the opposite direction and took her daily walks in uninteresting pathways and dusty roads, while Dick ignored the orchard and the meadow and went out of his way to avoid Diana's favorite nooks. Alas for the course of true love.

The days went by and their thoughts were ever of each other; a fortnight passed, a month, it seemed so long to waiting lovers; Diana grew uneasy, thoughtful lines puckered her smooth brow.

"Everything has a limit," she reflected; "my patience might wear out, Dick's love might grow cold," but somehow it was hard to picture his love as anything but enduring always; yet the time was ripe for action and Diana was resourceful. She did not, however, mean to be the first to bridge over the little gulf that divided her love and herself, she would not speak the first word of reconciliation, only by some means or other she wanted "things put straight." She pondered on the ways of lovers, their eccentricities, their weakness, and, possibly judging her lover by herself, he came to a conclusion.

"I'll go away," she decided on returning one day after an unusually uninteresting ramble. "Right away, somewhere."

The "somewhere" was vague, but Diana's future destination was at present only in her imagination. "Distance lends enchantment," she remembered, and she meant her lover to be brought to reason by the distance she would put between them.

The distance might be real to him, imaginary to her, that did not matter, her result would be the same—thus Diana reasoned with a lighter heart. She felt sure there would be no need for actual departure. Dick would hear through local gossip of her contemplated flight to lands afar, then old reminiscences would crowd upon him, for he sake of old times he would come to say good-bye to her, if only as a friend, and Diana smiled to herself as she pictured the silent natural process by which she would make him understand. There were somethings, however, which Diana had not duly considered, and she had yet to learn that man may occasionally act upon impulse or resort to a ruse as a means to an end; moreover, that he may sometimes take upon

thought, "and there's no hurry about America, Dick won't know and the rest of the world doesn't matter."

So Diana stayed at Hillsdene and found some consolation in a true friend's sympathy, whilst her lover was at Banksmead with no intention of quitting his friend's hospitable roof—just three miles apart—all unconscious of each other's nearness.

In the rosy hues of morning, life looked somewhat brighter. Diana sauntered out for an early ramble and, passing strange, she wandered love-wards, while Dick, unaware of her proximity, took a walk towards Hillsdene. Presently Diana rested beneath the welcome shade of an overhanging tree; Fate led Dick in that same direction.

She looked up to see a casual passer-by, then a pair of grey eyes and a pair of blue ones met.

"You?"

"You?"

"I thought—" she stammered, and left her thought unspoken.

"And I thought, too," he remarked, and came to a full stop.

"Australia?" she questioned, veiled sarcasm in her tone.

"America?" he said, reproachfully.

There was silence for some moments, and then a smile broke over Diana's face like the one which her lover had missed before. Diana had not spoken, but Dick read all that he wanted to know.

"Why didn't you say before, Diana, that which would have put things right?" he questioned.

After all Diana had to be content with a very simple wooing. — Pearson's Weekly.

#### FREE FOOD IN SCHOOLS.

British Parliamentary Committee Recommends Midday.

A midday dinner will be provided for hungry children in elementary schools if the suggestions contained in the report of the Select Committee on the Education (Provision of Meals) Bill issued are acted upon, says the London Daily Mirror. The committee's chief recommendations are:—

The local education authority should be empowered to organize the provision of a midday meal for children attending public elementary schools, and to establish committees to deal with school canteens.

That power should be given for the local education authorities to raise loans and spend money on the provision of suitable accommodation and officials, and for the preparation, cooking, and serving of meals.

That in extreme and exceptional cases, and after the consent of the Board of Education has been obtained, a local authority may have recourse to the rates for the cost of the actual food, the rate for this purpose not to exceed 3d in the £.

That steps should be taken to secure that parents able to do so and neglecting to make provision for the feeding of their children shall be proceeded against for recovery of the cost.

The committee urge that it ought not to be part of the conditions of the appointment of any teacher that he (or she) shall assist in dispensing meals provided for children.

#### AN OLD PLAN WITH HIM.

Layman: "A railroader friend of mine told me the other day that on nearly every line of road they had changed the make-up of the trains so as to have the sleepers in front."

Minister: "That's no innovation. My congregation have been built on that plan for years."

#### BUT SHE MINDS THE HELM.

Nubbs: "I understand that the starboard is on the right side of the ship."

Dubbs: "Exactly. and the star-boarder is on the right side of the land-side."

passengers with first-rate service of books, the volumes being renewed after each voyage in order to include the newest and most important works of the day.

The catering system is being revised in a somewhat remarkable way. On the newest Hamburg-Americans meals are now served a la carte. Passengers may take tickets to include the customary dining-saloon meals, or they may book with the liberty of using the restaurant when and as they please.

The Amerika's a la carte restaurant is on the sixth deck, and its accommodates 120 persons. This is in addition to the main dining-room, where 400 persons may take the usual table d'hôte service. The Kaiserin's a la carte restaurant, adapted for 140 people, is the largest afloat.

Bathing facilities on Atlantic liners have been considerably improved of late. The Kaiserin has well-furnished suites of apartments connecting with private bath and toilet-rooms, while many single rooms have their own baths. The Amerika has luxurious electric and hydropathic baths, attended by professional masseurs. On the Carmania even the steerage has its own needle and shower baths.

#### A GREAT NOVELTY.

aboard the Kaiserin is the palm-court and garden, a delightful lounge where afternoon tea is served and where the surroundings all tend to realize the atmosphere of a palmarium in a London hotel.

The invention of wireless telegraphy is revolutionizing the amenities of ocean travel. A Marconi installation of the most up-to-date type is a feature of the Amerika and the Cunard boats publish a "Marconi daily newspaper." Liners converse with each other by wireless many miles apart in mid-Atlantic, and keep in touch with the shore from Liverpool to Sandy Hook, receiving daily all the current news from both shores. Thus the fear of disaster is lessened, for assistance may be summoned from considerable distances, while the facilities for social and business intercourse are immeasurably increased.

Electricity, indeed, has worked wonders in the development of the ocean greyhound. Lifeboats are now raised and lowered by electric-power; electric motors heave the sounding line, hoist the passenger lifts, and drive all the auxiliary machinery in the stokeholds, bakery, galley, pantry and refrigerating-rooms. Electricity lights and ventilates the ship, works the searchlights and signaling apparatus, conveys stores, mails and baggage and closes the watertight doors, while even the siren is subject to its control.

And the decorative setting of all these luxuries is superb. Smokerooms and drawing-rooms are garnished and upholstered like West End mansions; famous artists have designed and executed the mural adornments; the magnificent sitting and sleeping-rooms, music-rooms and saloons are furnished with Louis XV suites, Sheraton couches and tapestried walls. There is \$10,000,000 worth of comfort and splendor on nearly every liner afloat. And the Hamburg-American liner, envious of the Lusitania, has promised to "go one better" than all this!

#### CHANCE FOR TOMMIES.

Soldiers May Wear Plain Clothes If General Consents.

The following amended regulation has been issued by the British Army Council, and is to be put into force at once: "Officers and warrant officers will wear uniform in camp and quarters while on duty, and other ranks at all times; but it is left to the discretion of generals commanding to permit plain clothes to be worn for purposes of recreation. Permission to dress in plain clothes when on furlough or pass may be given by commanding officers to non-commissioned officers and men of good character."

cancers which Dr. Bashford referred to had been got to grow in mice previously healthy, and in the view of the scientists this points to the conclusion that all malignant growths are transplantable.

The "protection" experiments were so successful that, whereas of 100 ordinary mice ninety developed tumors after inoculation, none of the protected animals developed the disease.

At the same time Dr. Bashford added a note of warning in case the results might give rise to exaggerated expectations.

It was not yet possible, he said, to arrest the progress of experimental tumors, much less effect the cure of the disease occurring naturally.

Sir William Church, in moving the adoption of the report, said that radium had not given satisfactory results.

Lord Strathcona presided at the meeting, and the Prince of Wales, the president of the Fund, was represented by Sir Arthur Bigge.

#### DUST HEAP CURE.

New Health Resort for Fashionable London Women.

The prospect of daintily dressed damsels asking a policeman to direct them to the nearest dust heap is unfolded by Mr. Hugh Colin Smith (ex-governor of the Bank of England), who declared at the quarterly meeting of the Bermondsey Municipal Association that sorting dust heaps was a healthy occupation.

He went further than this, and drew a picture of the time 100 years ago when all the great physicians used to prescribe for the fashionable women who suffered from weak lungs a course of visits to the dust heaps of London, to stand over them and breathe in their fragrance, because the gases emitted from decaying vegetable matter strengthened the chest.

Mr. Hugh Colin Smith is unfortunately unable to give his authority for the "dust heap" cure.

"I read it somewhere, but I cannot recall the name of the book," Mr. Smith told a London Express representative recently. "I am convinced, however, that the women sorters of dust heaps are an extremely healthy lot."

A medical man who was consulted on the dust heap cure contented himself with a few brief remarks.

"The accumulation of refuse," he said, "means the accumulation of dangerous germs, and dust is the worst thing for the lungs. Happily, the physicians of to-day are not what they were 100 years ago."

#### DUTCHMAN IN A BOX.

To Escape Further Domestic Quarrels Travels in Packing Case.

It was not, perhaps, a novel idea that prompted an Amsterdam Holland, tailor, who, after a domestic quarrel, left his home and found himself stranded in Rotterdam, to seek cheap transportation back to his domicile packed in a box.

Some days ago, a case bearing a certain address, and marked "Glass, with Care," was delivered for shipment at the goods office of a cargo boat to Amsterdam. The case was placed on the quay ready to be taken on board, when a nightwatchman became aware of a strange noise, proceeding as it seemed, from the box. Other employees of the line were called, and, as a mysterious murder case had recently occurred in Rotterdam, all sorts of weird theories were hazarded as to what the box might contain. It was finally agreed that there was something wrong, about the box, and it was promptly placed on a cart and driven to the nearest police station.

With utmost precaution, the box was opened, and behold! our friend the tailor gasping for air. It appeared that some workmen to whom he had related his sad plight had readily fallen in with his notion to put him in a wooden packing case, and ship him as fragile goods back to his home.

## DOGGER BANK CRIME.

To be Retold in Letters of an Engineer of the Fleet.

Letters written to his wife in diary form by a M. Politvsky, Chief Engineer of Admiral Rojstvensky's fleet, are about to be published through an English translation with a London imprint. The letters dealing with the Russian attack upon the defenseless Hull fishermen on the morning of October 22, 1904, throw such a strong light upon the commission's report on the Dogger Bank outrage that it is not strange that M. Politvsky, who finally met his death in the battle of Tsushima, was not called upon to testify.

The report states that at 1 o'clock in the morning a "suspicious vessel" was observed from the Suvaroff, which bore every appearance of being a torpedo boat. Of this incident M. Politvsky wrote:

"A small fishing vessel was tossing helplessly on the sea! We saw her quite distinctly, the black and red of her sides, her single funnel and the bridge, but nobody was on deck; panic-stricken, all had probably taken refuge below. The unhappy vessel had been the target for the concentrated fire of our guns. I watched our shells explode. . . . The whole world will now ring with this shameful outrage."

Concerning the fate of the Russian vessel Aurora he wrote:—

"A terrible incident has just been reported from the Aurora; her hull has been pierced above water line in four different places, her funnels are riddled, the chaplain is severely and her commander slightly wounded. The Aurora had evidently drawn the fire of our squadron. In company with the Donaskoy she was far away in the distance, our order of advance being in divisions of six. In the confusion of the firing somebody evidently mistook her for a Japanese ship, and brought the six-inch guns to bear on her—she was at a great distance."

M. Politvsky added that "permission has been asked to make for the nearest port to convey him (the chaplain) to a hospital, but the admiral has refused this."

## ARMADA'S TREASURE AGAIN.

One More Attempt to Recover Treasure Ship of Spain.

Another attempt—the third within two years—will shortly be made to recover the treasure said to have been on board the Admiral of Florence, the treasure ship of the Spanish Armada, when she sank off Tobermory, Isle of Mull, in 1588. The difficulty of reaching and exploring the sunken vessel is owing to the fact that the floor of Tobermory Bay is composed of fine shifting sand. Capt Burns, of the British Marine Salvage Association, who is in charge of the operations, has now invented an apparatus by which this sand may be removed. The expenses of the enterprise are being defrayed by a syndicate of Glasgow merchants to whom the Duke of Argyll delegated his ancient rights conferred on an ancestor by royal charter in 1641.

As early as 1661 a Swede identified the ship with the poop, where the gold bullion is still, sanding up, undamaged by the explosion which had blown up the deck from the mizenmast forward. This Swede brought up a heavy iron cannon. Later the ninth Earl of Argyll instituted a search by which a metal-bound chest was recovered. In 1687 William Phipps invented a new form of diving bell, and companies were formed for the recovery of goods and treasure from sunken ships around the coast. The Argyll of the period headed one of these companies, which carried on operations in Tobermory Bay, and on the other side of the Sound of Mull, where another galleon was reported to have been sunk. In 1740 John, Duke of Argyll, recovered a beautiful brass cannon in Tobermory Bay. This was three yards twenty-two inches in length, and of most elaborate and excellent work-

NEWS BY MAIL ABOUT JOHN BULL AND HIS PEOPLE.

Occurrences in the Land That Reigns Supreme in the Commercial World.

An "Anti-Sweating League to Secure a Minimum Wage" has been started in London.

Lord Ridley unveiled a statue to the late Joseph Cowen at Newcastle on the 7th ult.

The corporation of Brunley are about to provide a time gun to go off each day at one o'clock.

The removal of the War Office Department from Pall Mall to Whitehall, London, will begin shortly.

A workman found a bright half sovereign of the reign of Queen Elizabeth under the flooring of a shop in Colchester.

A statue has been erected to the memory of Mr. Archibald Hood, who did so much for the development of the South Wales industry.

The British Secretary of War has changed the terms of the army meat contract so as to permit the use of cattle fed abroad, but killed in Britain.

The Lord Chancellor's judgments are commendably short. When written, they have never, so far, exceeded a half sheet of notepaper.

The Astronomer-Royal in his annual report refers to the serious danger to Greenwich Observatory caused by the tremors set up by machinery in new works in the vicinity.

The Countess of Aberdeen has won the first prizes in the open and novice classes for West Highland terriers at the annual show of the Ladies' Kennel Association in London.

The treasurer for the Society for the Propagation of the Gospel in Foreign Parts acknowledges receipt of an anonymous donation of £1,000, and also a donation of £500 for Western Canada.

A cannon ball, which had lain buried since 1634, has been recovered from a field at Heton, Nantwich, the headquarters in Cheshire of the Parliamentary generals, Fairfax and Brereton, and where the Royalist forces were located.

A Tunbridge Wells veterinary surgeon received the body of a dog with the request that he would make a post-mortem examination to ascertain the cause of death. Two hours later he had returned the animal as lively as a kitten to its delighted owner.

The Rev. James Davidson, for 52 years vicar of Nafferton, East Yorkshire, died recently in his 91st year. He entered Aberdeen University in 1833, took his degree four years later, and at the time of his death was probably the oldest university graduate.

The amalgamation of the Burton Brewery Company with Allsopps is a good deal like the lying down of the lion with the lamb. The capital of Allsopps is £1,870,000, while that of the Burton Brewery Company is a mere £200,000 (£124,000 issued). In 1903 the capital of Allsopps was £3,300,000.

At a brick kiln on the Surrey Canal, North Camberwell, the kiln fire has never been permitted to go out since it was first set alight 100 years ago. During all that time it has been subject to the heaviest rainfalls. It consists of only a few feet deep of lime and coke, which have been constantly renewed.

Mr. Coffin, who was at the wheel of the troopship Birkenhead when she sank, is living at Hinton road, Lower Easton, near Bristol.

The Somerset County Council has adopted a by-law against loitering or smoking near the entrance to any church or chapel during service.

The ringers at Newbury Parish church have struck on learning that if they did not attend the Sunday service they would be fined.

# THE SUNLIGHT WAY

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way (follow directions).

Hard rubbing and boiling are things of the past in homes where Sunlight Soap is used as directed.

Sunlight Soap will not injure even the daintiest fabric or the hands, and the clothes will be perfectly white, woollens soft and fluffy.

The reason for this is because Sunlight Soap is absolutely pure, contains no injurious chemicals—indeed, nothing but the active, cleansing, dirt-removing properties of soap that is nothing but soap.

Equally good with hard or soft water.

**YOUR MONEY REFUNDED** by the dealer from whom you buy Sunlight Soap if you find any cause for complaint.

LEVER BROTHERS LIMITED, TORONTO

## WON WRONG WOMAN.

Wanted the Daughter, But Her Mother Fell in Love With Him.

At Grenoble, a grocer has just hanged himself, and thereby hangs a story, which, despite its tragic sequel, has in it more of the elements of farce comedy than tragedy.

The grocer had established a snug little business. He was 27, good looking and of good address. He cast around for a wife. His choice fell on the pretty eighteen-year-old daughter and only child of a rich tradesman. From the grocer's point of view it was a most desirable match. But he was aware that it would hardly present itself in the same light to the rich tradesman. A girl with a big dot in France and especially a pretty one, to whatever class she belongs, is considered as entitled to a husband higher in the social scale than a retail grocer.

To overcome this difficulty the grocer decided on the plan which generally proves most effective in overcoming parental obstacles. He resolved to make himself exceedingly agreeable to the rich tradesman's wife—his intended mother-in-law—a buxom woman still under 40 and by no means unprepossessing. He succeeded so well that she soon gave her consent to his suit. Unfortunately for him, his success did not stop there. She found his society much more agreeable than that of her own husband, who was too much engrossed in business to fill a woman's life.

She began to talk of her own heart-hunger, and he listened sympathetically. She said she wished that she had her own life to lead over again and sighed. He soon found that he was seeing considerably more of the mother than of the daughter. She received him with long and tender pressures of the hands and

## LANGUISHING GLANCES.

At last the terrifying discovery dawned upon him that he had won not the daughter but the mother. It was an embarrassing situation. Discretion suggested that he should cease visiting the house. But if he did that, he would lose all chances of winning the daughter. So he continued to play the dangerous game. He wasn't cut out to play the role of Joseph to Potiphar's wife. The death of the rich tradesman left

## FROM ERIN'S GREEN ISLE

NEWS BY MAIL FROM IRELAND'S SHORES.

Happenings in the Emerald Isle of Interest to Irish-Canadians.

During the celebration of 8 o'clock mass at Dungan Catholic church County Roscommon, one Sunday lately the ceiling collapsed, injuring about 40 people, including some constabulary who were at the service and went to the assistance of those in danger. Some of the injured are in a precarious condition.

Business at the foreign docks in Belfast has been unusually brisk of late and such a collection of sailing tonnage has never previously been seen in the port.

At Sligo harbor a destructive fire took place, two large warehouses containing about 3,000 tons of corn being burned to the ground, and damage effected which is estimated at £20,000. It is stated that the value of the corn is partly covered by insurance.

In a claim by the Duchess of St Albans for £345 compensation for alleged malicious burning of a plantation of her estate in County Waterford, the Lord Chief Justice, at Waterford Assizes, said he was satisfied the occurrence was malicious in consequence of the fact that the estate agent had given evidence against the tenants on an adjoining estate, and awarded £130 compensation, with costs.

An extraordinary panic took place of Sunday at Mullinshoe Roman Catholic church, County Tyrone, where a "reat" was being held. Some person raised a cry that the gallery was given way, and the whole of the large congregation assembled in the church made mad rush for the doors. The scene, a hundreds of men, women and children frantically endeavored to reach the open air, was indescribable. Several persons were slightly injured and many women fainted, but fortunately, nobody was killed. Eventually the panic having subsided, the service was concluded.

on the other side of the Sound of Mull, where another galleon was reported to have been sunk. In 1740 John, Duke of Argyll, recovered a beautiful brass cannon in Torberrny Bay. This was three yards twenty-two inches in length, and of most elaborate and excellent workmanship. The ornamentation and engraving showed it was a French piece, and the metal work was attributed to the great Benvenuto Cellini.

#### HYPNOTIZED IN TRAIN.

##### Man with "Shining Eyes" Robs a Lady Traveller in Geneva.

A new danger threatens the travelling public. Recently, when the train arrived at Lausanne from Pontarlier, Switzerland, and everybody had departed, the guard found a woman sitting in a rigid position, with her arms and legs held out before her and her eyes fixed in an expressionless stare. He failed to arouse her, and, thinking she was in a fit, called a doctor, who at once stated that the woman had been hypnotized.

The doctor made the regulation passes and the woman recovered slightly, but was unable to speak. On searching her some valuable shares were found, but she had neither purse, money, nor jewels. Her name, according to some papers discovered in her possession is Melaine Verne.

She was conducted to the hospital and placed under the care of Dr. Houdart, who also confirmed the fact that she had been hypnotized in the train and probably robbed. The woman, who is of middle age, has not yet recovered her senses completely, and talks vaguely about "a man with shining eyes."

#### LUNATICS STOP BALLOON.

##### Funny Affair in Grounds of an Italian Asylum.

A couple of aeronauts had a queer adventure while passing over Giandola recently.

They were travelling low down preparing for a descent when they happened to cross some fields attached to a lunatic asylum in which a number of the patients were working.

At sight of the airship the lunatics set up a shout and one of them seized the trail rope and clung on. Others joined him, and then tried to haul down the aeronauts.

The balloonists, fearing mischief, began to pet them with ballast to make them release their hold, but the lunatics appeared to enjoy the proceedings as a great joke, and continued hauling.

The uproar they made finally attracted the keepers, who ran to the assistance of the aeronauts, and knocking over several of the more stubborn patients, released their hold on the rope. The balloon then shot away, carrying from the ground one lunatic who had become entangled. He fell several yards on another inmate, but neither appeared to be much the worse for the encounter.

#### MILK DIET THE CURE-ALL.

##### Austrian Physician Has Drank Three Gallons a Day for 23 Years.

Dr. Hermann Schwartz, an Austrian physician now in London, is the apostle of the milk diet cure for all the ills to which flesh is heir.

For 23 years he is said to have eaten no solid food, and to have drunk instead three gallons of milk per day. He is now in the very best of health and strength, and considers himself a young man at fifty.

The Encyclopedia Britannica says: "A good milch cow should yield during the milking period of eight or nine months about 500 gallons of milk"; in other words, about two gallons a day. Hence it takes two cows (allowing for the dry period) all the year round to keep Herr Schwartz in health and strength. With the average milk-yielding life of a cow at four years, more than a dozen cows have been milked dry for him.

adopted a by-law against loitering or smoking near the entrance to any church or chapel during service.

The ringers at Newbury Parish church have struck on learning that if they did not attend the Sunday services they might be called on to resign.

An order to pay 6d a week on a debt of £35 was made at the Bow County Court against a man who earns 19s. a week and has a wife and six children.

"Perhaps it takes a little education to get used to talking through the telephone. I never tried it myself," Judge Lumley Smith, K. C., said in the city of London court.

#### COLORING CHEESE.

##### Canadian Makers Color It to Please British Peculiarities.

That different parts of Great Britain have very strongly marked tastes as to the color of cheese was emphatically demonstrated by a cheese expert to a London Daily Mail representative.

"We could not sell at any price in Birmingham a cheese that is in great demand in Coventry," he said; "and if we sent some of the kind demanded in Norfolk to Manchester, it would at once be returned."

"East Anglia demands a cheese of brick-red color, while Lancashire must have 'Manchester white,' and the other southern counties go in for a gold-tinted cheese. Nearly all our cheese comes from Canada, and is prepared to the carefully worded order of the importers."

#### KING'S CLOCKS KEPT FAST.

##### Peculiar Fancy of King Edward Which Bewilders Visitors.

During the summer season, when the King and Queen are away from Sandringham and the park and grounds are occasionally open to visitors, the platform of Wolferton, the station for Sandringham, is now and again occupied by bands of people who complain angrily that they are half an hour too soon for their train. They have not discovered in time that all the clocks at Sandringham are kept half an hour fast.

This is a curious fancy of the King's, and at Sandringham all the clocks in the house, stables, and kennels, and even the church clock, are kept exactly half an hour fast.

#### ANTS CAPTURE A TOWN.

##### Millions of the Insects Put Englishmen to Rout.

At Sandwich, England, what is described as resembling a black thunder-cloud advanced out of a fog which overhung the sea on a recent afternoon, and crossing the sandhills spread over the town and then descended. The cloud proved to consist of millions of winged ants. Pedestrians covered their heads with handkerchiefs and fled precipitately into shops and houses, while thousands of the insects covered horses and vehicles in the street. The River Stour was covered with a thick black layer. Later the visitation continued toward Beal and Ramsgate.

London is suffering from a plague of mosquitoes and from Halesden in the north to Wimbledon in the south there are complaints of their ravages. Physicians in all parts have been consulted by persons suffering from septic poisoning caused by bites.

South Kensington's residents who have suffered severely suggested that the pest had been imported in cases arriving at the museum from various parts of the globe, but entomologists discredit the theory. According to one authority, there are twenty-five known species of the family which can live in the British climate and some have the disagreeable characteristics of the foreign mosquito.

gested that he should cease visiting the house. But if he did that, he would lose all chances of winning the daughter. So he continued to play the dangerous game. He wasn't cut out to play the role of Joseph to Potiphar's wife.

The death of the rich tradesman left him in a worse plight than ever. The widow wanted to marry him and he wanted to marry the daughter. At last he summoned up courage to tell her that he would never take the place of her departed husband. Tears and protestations, threats and entreaties failed to move him.

He set to work courting the daughter for all he was worth, and dodged her mother as best he could. His wooing prospered. The girl accepted him and they were married.

Scorned and rejected, the affection of the elder woman turned to hate. She planned a terrible revenge. When the bride retired after the wedding to change her dress for the honeymoon journey, her mother told her all. Then there was a scene. The bride refused to see her husband. The mother saw him, though. It was her hour of triumph and she made the most of it. She just let her tongue loose upon him.

In the commotion the bride was lost sight of. When the grocer finally succeeded in escaping from his mother-in-law and went in search of her, he found she had left the house. The best man was also missing. She had speedily found consolation.

For a week the grocer hunted the couple in vain. Then he closed his shop, shut himself up in his lodgings and hanged himself. Maybe there is a story somewhere. Several dramatists are of the opinion that there is a good play in it—for the French stage—and are working upon it.

#### DEAD MAN'S FACE AT WINDOW.

##### English Member of Parliament Relates Strange Story.

Preaching in the Congregational church, Seaford, England, on Sunday, Compton Rickett, M.P., related the following coincidence, which he vouched for as true.

"A gentleman, whose son was attached to the British forces in South Africa as doctor during the Boer War, paid a visit to two of his sisters. They remarked that they were glad his son had returned home. On the father replying that his son was still in South Africa, they exclaimed that they had seen him looking through the glass panel of the door of the corridor about 6 p. m., just before the father's arrival."

"The father returned to London, and next morning made enquiries at the War Office. He was told that information had just been received that his son had died the previous evening from enteric fever, the time of death being 6 p. m. English time."

#### ELOPES WITH FATHER-IN-LAW.

##### Bride Leaves Husband Few Hours After the Wedding.

A wedding party in a country district near Paris, France, had an unexpected ending the other night. A little before midnight the bridegroom, tired of dancing, sought his bride, intending to slip away with her to their new home.

She was, however, not to be found, and the bridegroom rushed to his home to see if by chance she had gone there by herself. Not finding her, the bridegroom and his mother-in-law became anxious and made enquiries, and at last learned that the bride had been seen getting into a carriage with the bridegroom's father, and had then driven off to the station.

A few hours later the distracted bridegroom received a letter from his bride of an hour, in which she explained that her love for his father made it impossible for her to be happy with his son, and that she had therefore run away with her lover.

hundreds of men, women and children frantically endeavored to reach the open air, was indescribable. Several persons were slightly injured and many women fainted, but fortunately, nobody was killed. Eventually the panic having subsided, the service was concluded outside the building.

The lake in Lurgan Demesne was the scene of a sad drowning accident recently. It appears that a young man named Michael Toner, of Shankill street, Lurgan, about 25 years of age, with some comrades, was walking in the demesne, and whilst proceeding round the path which borders the lake, a cork was observed floating in the water, about 20 yards from the shore. Surmising that the cork indicated the presence of a fishing net, Toner, who was a strong swimmer, divested himself of his clothing and swam towards the object, but he had just reached it when it became evident he was in trouble. He shouted. A quantity of fishing tackle had got attached to deceased's legs, drawing him under, and thereby causing his death.

A married woman named Margaret Devanny made a determined attempt to commit suicide by drowning herself in the canal which runs close to Carrigans village. She was rescued, and was found to be insane.

Sir Donald Currie, whose gift of £100,000 has enabled University College Hospital, Dublin, to build a new wing, may be called the "Father of the Shipping World," for he is well over 80, and for many years has owned the superb Union-Castle line steamers. A keen-eyed, sharp-featured, sturdily-built Scotsman.

Mr. Bryce has visited a spot where the foot of a Chief Secretary has never been set before—Cape Clear Island—where he went to see the new harbor works in progress. The fishermen of Cape Clear lit bonfires in honor of the event.

After some exciting scenes a ton of coal was sold in Dublin a few days ago for a shilling. It belonged to a Mr. O'Carroll, who some time ago refused to pay a fine imposed by a police magistrate because he paid it in his name in Irish characters on his carts. The police seized the coal, and it was offered for sale in Messrs. Hill's auction rooms.

The vigorous evangelical propaganda entered upon in Belfast some months ago by that peculiar religious sect known sometimes as the "Cooneyites," the "tramp pilgrims," or "the dippers," shows no sign of abatement. The sect came into existence about a couple of years ago, when they established themselves at Crookmacreeve, a large farmstead situated two or three miles from Enniskillen, and there held conferences and revival meetings, and conducted baptismal ceremonies in the Ballycassidy river.

An heir to £30,000 has been discovered in Celbridge Workhouse, County Kildare. Recently Mr. Dunne, solicitor, New York, advertised in Ireland for the heirs to the White estate, America, and he now believes he has discovered in the person of James Nolan, an infirm patient, the long-sought heir.

#### WHAT HE COULD DO.

An unkempt-looking fellow stopped at a suburban residence, and asked for employment. The lady of the house, who at the moment was superintending the removal of some plants, emerged from the greenhouse, and asked him if he were a gardener.

"I ain't had much experience," was the reply.

"Well, can you plant these shrubs?" "I shouldn't like to risk spoilin' 'em, ma'am."

"Well, what can you do?" "Well, ma'am," he replied, meditatively, "if you'll give me one of your husband's cigars, I'll sit in the greenhouse and smoke out the insects that's eatin' up the leaves of them rose bushes."

In Japan, fish have to be sold alive, and they are hawked through the streets in tanks.

# Perfect Tailoring.

Our Fall and Winter Woolens are very greatly admired by men who "Know."

We're busy as bees in our Tailor Shop, and still we've room for you. We've a cutter whose ability and taste are unquestioned, and our Tailors are workmen of unusual skill. You'll run no risk whatever in leaving your order here.

**The Fabrics We Show are  
To be Seen Here Only.**

If your leaning is towards having your Clothes made to order. You can trust us with the work, with absolute confidence in its proving all you hope it to be.

Moderate Prices Always

## J. L. BOYES.

**THE BEST FLOUR.  
DAFOE'S NONESUCH  
DAFOE'S MANITOBA PATENT**

By numerous tests by the best Bakers the above mentioned grades have been proven to be the best Flours in the market.

When buying Flour ask for Dafoe's, and patronize your home mill, thereby producing Bran and Shorts that you can purchase cheaper than the product of the Western mills, which has to be transported thousands of miles at great expense, and usually, when it reaches you, of inferior quality.

The Grocer complains if the farmer or the mechanic sends to Toronto or to outside points for an article he can get at the home store—just as good, but he does not hesitate to buy Flour from mills hundreds of miles away, and sell you an inferior Flour for more money than you can purchase the home product for, every bag of which is guaranteed.

**CHOICE CORN MEAL and BUCK-WHEAT FLOUR** always on hand.  
**FEED GRINDING** a specialty, with the best feed mills known to the trade.

A full stock of the best **ANTHRACITE COAL**. Also in the market for the purchase of all kinds of Grain.

Ask for prices at the big Mill before purchasing your Flour, Feed or Coal.

### MADOLE & WILSON.

Master Wilfred Fralick the little son of Mr. and Mrs. M. H. Fralick, met with a painful accident on Monday afternoon. He was riding on a wagon and in attempting to get off he fell and the wagon passing over his foot crushed it. Luckily no bones were broken and a few weeks' confinement to the house will heal the injury.

The Frontenac Business College, Kingston, has just closed the most successful term in its history—not only as regards numbers enrolled but from the success of our graduates in carrying off the best positions available. The fall term opens Sept. 4th and promises to bring together a larger number than ever to prepare for the ever increasing demands of the Business world. No time in the past was there such opportunities offered to young men and women who had acquired a thorough knowledge of business methods and their essential subjects. Are you at present drawing a good salary? If not write us for particulars. T. N. STOCKDALE, Principal.

Jacob Jelebski, unshackled and free from irons was, at noon on Saturday, driven in a cab, in charge of Sergt. Nesbitt, to the penitentiary, and delivered into the hands of Warden Platt. He was anxious as regards two things. He desired to know if his attempted escape would put a longer sentence on him. The warden was of the opinion that the matter would not be pressed. The prisoner could be made to answer the charge of stealing the king's property, handcuffs, etc. His second thought was of his son. To the constables at the police station Jelebski gave many side lights of a personal character. He remarked that he had been with the British army through the South African war as a marker and mender of bolts and cartridge pouches. He said he had only been in Canada the past seven months, coming from London, Eng. His trade was a finisher of fur goods.

Will put an sale Saturday morning August 1th, two case containing six hundred pieces of China, all useful articles for household use in endless variety direct from the manufactories in Europe, and at prices never heard of here before for such goods. See show window.

THE COXALL CO.

### Music

Owing to several cases of misapprehension being recently brought before Miss McHenry's notice, she wishes to state that the opinion, which seems to be maintained, that she receives for instruction ONLY ADVANCED pupils, is erroneous. She will discontinue teaching through July and August, resuming it September first, Residence, Centre St.

### Marks Bros.

"It is a mystery to me how Marks Bros. can draw such crowded houses," said a local theatre-going man, as he saw the large crowd filing into the Opera House to witness the Marks Bros.' plays. When Manager Joe Marks was asked why their show was so popular, he said "We give the best and cheapest show for the money. Our specialties are always new and the people go away satisfied. Then, when we come again, the public know what to expect." All who attend are delighted with the show. The tragedy queen Miss May A. Bell, took her part with her accustomed skill, receiving also splendid support from the other members of the company. A continuous performance is given and the specialties between the acts are the best. May A. Bell sang a number of songs illustrated by pictures. Baby George is a little fellow, but as an entertainer he is without a peer. His songs and dances would make a grown-up man famous.—Exchange.

for the young patients who are well known to most Napanee Citizens. The retiring gentlemen Messrs Andrew and Stephen Madden have been in business in Napanee for a long number of years and were among the town's most successful merchant's. We understand they will still carry on the slaughter house and some other branches of their former business.

### Fireman Killed.

On Saturday evening a shocking accident occurred at Marlbank. A Bay of Quinte Ry. fireman named Conrita Henass was beneath the locomotive checking his fire when the engineer, without knowing of his position, pulled the throttle, and as the engine began to move Henass attempted to get from under and in doing so had both legs cut off at the thigh. The man lingered several hours and was relieved of his agony by death at 1 o'clock on Sunday. He came from Montreal, was 25 years of age and was on the road about four years. His body was taken to Erinville for burial.

### Object to the Poles.

An application from the Town of Napanee has been received by the Railway and Municipal Board. In it the town points out that the Napanee Water and Electric Light Company, which some time ago became insolvent and went out of business, has not removed its poles and wires from the streets, and that they constitute a menace to life and limb. As the town is about to install a lighting plant of its own it wants the poles removed, and asks the Board to take action in the matter. It is doubtful, however, whether or not the Board has the power under the Act to interfere. It will, however, constitute another opportunity for the Board to find out what its powers really are.—Toronto Star.

E. LOYST has large stock of flour, Royal Household and all other grades, all kinds of feed, large quantities at the lowest prices. He wishes to sell out in the next month. Salt, Coal Oil Groceries. Highest price for eggs cash or trade. A call solicited.

### Forging Ahead.

The Lennox and Addington Mutual Fire Insurance Company is steadily forging ahead to the first place of the Insurance Companies doing farm business in these Counties. The amount of Insurance passed upon at the July meeting of the Directors was \$125,000. The irresistible Agent, D. L. Green has a good running mate in the ambitious Mr. Jones, each vying with the other in writing the most business for the Company. The company never did more business, never had more Policy-holders, or more insurance, has been able to meet its losses most promptly and has a good cash surplus on hand, and continues to do business at the old stand (despite reports to the contrary) first stairway west of Coxall's grocery, in the Town of Napanee.

### Barns Burned.

On Friday, about noon, the barns of James Wilson and Frederick Macdonald, at Strathcona, were destroyed by fire. Mr. Wilson's barn caught from a spark from the thrasher at work for him, and in a few minutes the large barn filled with grain and hay was consumed. The fire spread so quickly that the workers could not get the cleaner out of the barn, and it, with implements and a few pigs, were burned. A strong wind, blowing from the north-west, carried the flames across the river, and soon the barn of James Macdonald, on the Newburgh road, was on fire. He lost the building and contents, including 800 bushels of barley, all of his implements, two seasons' cut of hay and sixteen pigs. A straw stack and a stack of unthreshed grain, standing outside, were also burned. We understand that James Wilson had \$1,700 insurance and F. Macdonald \$2,000. The bridge and several nearby houses caught fire, but the flames were subdued after slight damage. Mr. Wilson only removed to the farm in the spring, from Selby. The loss is severe to both men.

Rev. and Mrs. McIntyre, of Brandon were the guests of Mr. and Mrs. A. W. Grange a few days this week.

Miss Geneviva Lane, has returned to town after a visit to her parents Mr. and Mrs. John Lane, Denbigh.

Mr. Jas. A. Ferguson spent last week advertising the King Edward in Toronto and surrounding towns.

Misses Ada Stevens and Florence Ming, spent Sunday with friends in Kingston.

Mrs. Sidney Scott, Newburgh Road and Mrs. Stuart Bowen, Deseronto left on Wednesday to spend a few weeks in Detroit, Michigan.

Mrs. Travers received on Thursday and Friday of last week, assisted by Mrs. J. S. Ham.

Miss Pearl Perry is visiting friends in Ottawa.

lows: Kingsford, 10.30 a. m., weather permitting; Selby, 3 p. m.; Strathcona, 7.30 p. m. The dates for Harvest Festival Services at Kingsford and Strathcona will be announced shortly.

#### Watch Records.

"That man's watch holds the record for his town," a jeweler said. "It has run for twenty-two years without stopping. Aside from a little regulating, oiling and cleaning, it has never needed a repair. I know lots of men who try to establish records for their watches. I know five men in this little town whose watches have run day and night for ten years. Give a good watch to a man and he takes a pride in it. He never forgets to wind it. Soon he is trying to make a record for it. The record for continuous running is held, I believe, by a Swiss watch in Geneva that has run for twenty-eight years."

One gallon of Prism Brand Paint will cover 360 sq. ft., two coats. Every can guaranteed. The Medical Hall.—Fred L. Hooper, sole agent for Napanee.

mass of lava, entering the upper windows with a ladder and bringing forth their household goods to transport them to a place of safety. One vineyard was surrounded on three sides by this dividing current, and it was possible to walk into it among the lines of trimmed vines and to perceive the fire still glowing in the towering walls of lava on each side. The people attributed this remarkable phenomenon to the miraculous intervention of their Madonna, "Our Lady of the Snows," with whose sacred image they had confronted the all devouring monster sweeping implacably down on their apparently doomed homes.

Step by step the priests and the faithful, singing the litany, retreated as the awful flood swept on, and still the sound of singing and prayer rose above the fearful roar of the torrent and the thunder of the mountain above, belching forth from the central crater fiery bombs and enormous swirls of cinder, sand and smoke, which rose to great heights. Yard by yard the lava swept onward. Now a palatial villa would be surrounded by the torrent, crushed down and disappear in smoke; now a weeping peasant would see his little cottage and vineyard, his all, go under in an instant.

One poor woman was thus watching the fate of her earthly belongings from a little eminence when a smaller crater came roaring forth at her very feet. She turned to flee, fell, rolled to the bottom of the little hill, and the next moment the lava flowed forth like the foam from a glass of beer and swept over the spot where she had been standing an instant before.—William P. Andrews in Century.

#### Part of the Battle.

"A pleasant disposition goes a long way," said Uncle Eben. "I sympathizes wif de Indian, but I don't believe he'd have had near as much hard luck if he'd er been good natured an' learn'd to play de banjo."

There is no duty we so much undertake as the duty of being happy.—Stevenson.

#### Work the Post Office.

If you cannot get what you want at home, it is not necessary to wait until you can come by train or drive to town. We keep everything usually kept in a first-class drug store. Our mailing department will give you the same service as though you came yourself, and the post office is in our employ. The Medical Hall—FRED L. HOOPER.

## The Ladies Ready-to-Wear Department.

This season's stock consists of New York's latest garments, modelled with a "classy" air. They have the tone—the quality that others have strived to equal, but without avail. They have a stirring manly virility, and are the aristocrats of the ready-to-wear world. Dress critics in respect, for style and fit and finish we assure you that German manufactured garments are in no one way to be compared. Also the dainty new Waists (silk) the Waists high quality, fashioned after New York's latest designs, with neat rows of insertion, pin tucks and pleats, in colors of Ivory, Cream and Black on display Ready-to-Wear Section..

New York's approved styles are here represented.

## AN UNRIVALLED DISPLAY OF NEW DRESS FABRICS

The Dress Goods display is now at its best, at no time can the fall buying be done to better advantage than now. The lines of colors are complete including the new wine tones, the greens, the blacks, and the blues. The

## LENNOX FAIR.

Beautiful weather greeted the Napanee Fall Fair on Tuesday and Wednesday and contributed much to a very successful fall show. In most of the classes the entries were quite numerous and the quality of the products up to the standard of former years.

### THE BABY SHOW

On Tuesday evening the usual baby show was held and brought out an unusual number of promising infants and drew a large crowd of spectators. The prize winners were as follows

Boys—1st, Mrs. William Smith, 2nd—Mrs. T. J. Draper; 3rd—Mrs. Guy Pybus.

Girls—1st—Mrs. Jas. Davis; 2nd—Mrs. Rosamond Baker; 3rd—Mrs. David Pritzer.

Gibbard Special, for smallest baby—Mrs. C. Sheffel.

The exhibition of Ladies' Fancy Work was the largest and best seen here in many years.

The Merchants' exhibits were numerous and varied. Probably the first exhibit was that of Napanee's most popular store. Their magnificent display was one worthy of special comment. Large crowds of spectators were delighted, so truly captivating and enchanting was this exhibit, and it could not fail to evoke highest admiration, the display generally representing four of the leading departments of this up-to-date firm. The Carpet and Housefurnishing, Furs, Ready-to-wears, and Dress Goods, each and every one, was most artistically and modernly arranged, the original design being very appropriate for the allotted space. It may be stated that the merchandise displayed is a part of this season's newest arrivals (from stock). This enterprising firm is to be congratulated on their undertaking not only as prize winners, but on the able and efficient business manner every detail was carried out. A visit to Napanee's city like store will convince our readers that for strictly high class dry goods, housefurnishings, and furs, the name of Madill Bros. is an absolute guarantee.

### MADILL BROS.

### J. J. HAINES.

The display made by this well known Shoe House was first class in every respect a large variety of shoes were shown such as the Slater Shoe for men, the Empress shoe for women and the Dorothy Dodd shoe for women. These lives are sold exclusively by the J. J. Haines Shoe House in all the branches, and are a few of the many fine lines of footwear carried by this firm. The display of trunks valises, travelling bags, etc. was also large and varied. The J. J. Haines Shoe Houses pride themselves on the excellence and variety of the travelling goods carried by them, carrying the largest stocks between Toronto and Montreal.

THE GIBBARD FURNITURE CO  
This firm occupied their usual position near the northern entrance to the palace. The few elegant pieces of furniture exhibited, show beyond doubt that the quality and finish of Gibbard furniture is all that is claimed for it. A beautiful lounge had some

# AN UNRIVALLED DISPLAY OF NEW DRESS FABRICS

The Dress Goods display is now at its best, at no time can the fall buying be done to better advantage than now. The line of colors are complete including the new wine tones, the greens, the blacks, and the blues. The styles and weaves most favored by fashion are here, foreign and domestic manufacturers have sent us of their best and they are all ready for your inspection and approval. Strictly exclusive variety and assortment not equalled hereabouts are the Dress Fabrics, the Dress Trimmings, the Laces and Ruffings.

See our Dressmakers the (Meses Sanderson) about your Fall Costume.

\* Our Show Window's and store interior by Electric Light.

## Home Comforts in Our Carpet and Housefurnishing Department.

It is gratifying to think that such an extensive and complete Housefurnishing Store is so close at hand. Being interested as we are in the making of Home as complete as possible, you will find by inspection, that the selecting of merchandise throughout this department has been done for the interests of the buying public in Central Ontario. The New Axminster Velvet, Brussels and Tapestry Carpets, the new Velvet Brussels and Tapestry Rugs, the New Linoleums and Oil Cloths, the Blankets, Comforters, Flannellette Blankets, Live Curtains and Draperies, are now being displayed to best advantage.

We do all Kinds of Artistic Darapng.

## VERY ATTRACTIVE NEW FURS.

Women have good reason to be enthusiastic over the Furs at Madill's. There's a distinctly feminine feeling about them that makes a strong appeal to every woman who enters this Department. We take such pride in our display, that it's a real pleasure to show anyone about—not merely because they buy—but because they're always so enthusiastic over their purchases. The Fur Section is again situated on the East Side of the House Furnishing Department, a very appropriate place for Fur showing. Consult our (Mr. E. W. Scott) in regard to Furs.

P.S. Are you aware that an experienced Lady Furrier has been engaged to superintend all alteration work.

Your are Invited to Attend this Grand Opening,  
Saturday Evening, at 7.30.

# MADILL BROS.

## Gettin' Wisdom

is a comparatively easy task if you start it while you are young. Don't allow your children's eyes to be ruined for all time because "they look too 'ded' with glasses on."

We'll tell you the truth as to whether they need glasses or not, and charge you nothing for the telling.

Headaches in children are suspicious. We are also the best people to guarantee the quality of our frames, it being part of our jewelry business to acquire that ability and knowledge.

**SMITH & HAWLEY.**

**ALBERT COLLEGE,**  
Belleville, Ont.

—O—

Business School Founded 1877. Practical and thorough. Five complete courses. Many graduates occupying important places at book-keepers and shorthand reporters.

\$53.10 pays board, room, tuition, electric light, use of gymnasium and baths, all but books and laundry, etc. for ten weeks, longer period at same rate. Special reduction to ministers on two or more entering at same time from the same family or from the same place. A specialist in Book-keeping, who is also an expert penman, and a specialist in shorthand in constant attendance. The teachers in the literary department also assist in the work. The high character of the college is a guarantee of thoroughness.

Catalogue with specimen of penmanship free.

Address **PRINCIPAL DYER, D. D.,**  
Belleville, Ontario.

This firm occupied their usual position near the northern entrance to the palace. The few elegant pieces of furniture exhibited, show beyond a doubt that the quality and finish of Gibbard furniture is all that is claimed for it. A beautiful brass bed, some beautiful pieces of Flemish oak, and a number of pieces finished in golden oak, the whole being grouped in a pleasing manner made a very attractive exhibit as evidenced by the number of people who paused to examine the goods.

**MADOLE & WILSON.**

Messrs. Madole & Wilson's exhibit was on the ground floor and occupied one side of the eastern wing. A few samples of the many lines of stoves and ranges carried by this firm were shown, among them the Imperial Oxford Range, of which the firm make a specialty in the stove line. They had also on exhibition an assortment of hardware, tools, etc., but the space at their command served to give but a faint idea of the immense line of goods carried by this firm.

**ART DISPLAY.**

Mr. H. C. Campbell of the Market Square Studio, had a very fine exhibit of enlarged photos, in crayon work, oil, water colors and India Ink, also some artistic burnt wood goods and picture framing.

**F. W. VANDUSON**

Had a large and well displayed exhibition of harness, robes, and horseman's requisites, in the palace upstairs. His display of lap rugs, and robes was especially fine and tastefully arranged. Mr. Vanduson also had an exhibit of Oeure stock food of which he is the local agent.

**FRED CURRY**

Had a large and tastefully displayed exhibit of boots and shoes, trunks and valises etc., bringing prominently before the public his many lines of fine footwear. Foot-rite and Dolly Varden shoes for ladies were quite prominent in the display.

**PIANO DISPLAY.**

The piano and musical instrument displays were down stairs in the building, and Messrs S. G. Hawley, R. B. Allen and F. W. Hart, all had displays, showing the many excellent features of the various lines of musical instruments sold by them. Mr. S. G. Hawley also had an exhibit of Sharples Cream Separators, which attracted a good deal of attention.

### DUDLEY L. HILL,

Acting Manager, Napanee Branch.

### A Stove Talk.

The stove season is nearly here again and you are beginning to plan for that new up-to-date Range and thinking of the comforts, which it will bring to you. We wish to announce to you that we find ourselves in a much better position than formerly to accommodate this growing trade. Increased floor space and light enables us to make a much larger exhibit of this class of goods. Imperial Oxford Ranges still lead, but we have several other good and up-to-date lines. Sizes and prices to suit everyone. Be sure and inspect our stock before you purchase. It will be a pleasure for us to show you the goods.

MADOLE & WILSON.

## TAMWORTH.

The continued draught will make a scarcity of water.

Threshing is being pushed so it appears like a competition, each farmer wishing to get his grain threshed before the rain.

Mr. J. Joseph McKeown had the misfortune to have his house burned on Sunday last, supposed by a spark from the chimney igniting the shingles.

Mr. Fred Haines' little child, died on Monday evening last, aged three months.

Miss Lockridge, of Tamworth, passed peacefully away on Wednesday, after a lingering illness.

Norman Green, who broke out of the lockup here about two months ago, where he had been placed awaiting trial, at the instance of John Finn, for stealing a wheel-barrow, was captured at Ivanhoe, by Constable Wilson, and placed in the Tweed lockup, where if he had a few minutes more at his disposal he would have got out again but Constable Woods brought him to Tamworth, where he had a hearing before Magistrate Jas. Aylesworth, who sent him to Napanee Gaol to await trial and sentence.

Mr. Jos. McKeown, Ernsville, was united in Holy Matrimony by Rev. Father Carey, to Miss Ciscely Kearns, Tamworth, on Tuesday. After the knot was tied, the party hoisted sail and steared their course to the home of the bride's Father, where a sumptuous repast awaited them, the table being furnished with all the delicacies of the season. After each guest had partaken of a welcome meal, the number of whom were over one hundred. They began to trip the Light Fantastic toe until the (we small hours)

The Misses Bridget Ann and Margaret McAlpin, of Montegale, were visiting their relatives in this vicinity for the past two weeks.

Preparations are being made for the Addington District show to be held here on Friday and Saturday.

The Surveyors, of the C. P. R., who were here the past two weeks locating a route for the new road from Toronto to Ottawa, have gone to Centreville to survey there.

The Telegraph line men are erecting poles along the track of the B. Q. R. in the direction of Tweed.

## Diamond Dyes

—VERSUS—

### COMMON IMITATION DYES

The DIAMOND DYES are the only package dyes admitted to the homes of wise and economical women. Why? Because they have every quality which true home dyes should possess. DIAMOND DYES are, to-day, the only dyes guaranteed to give decided and happy successes. All druggists and general merchants who desire to please their customers, sell only the DIAMOND DYES, for the simple reason that they always give complete satisfaction.

Common and adulterated package dyes put up to imitate the DIAMOND DYES are sold by some merchants because of the extra cash profits they yield. The deceptively dyes are, in every case, worthless as coloring agents. They produce weak and blotchy colors and invariably ruin good garments and materials. Their use has caused grief and loss of money in many homes.

Always use the reliable and popular DIAMOND DYES and you will make the old and faded things as good as new. Send to Wells & Richardson Co., Limited, 200 Mountain St., Montreal, P. Q., for New Direction Book, Diamond Dye Cook Book and Illustrated Booklet, entitled "Diamond Dye Long-johns' Winter and Summer Sports," all sent FREE to any address.

# KAI WANG;

\*\*\*\*\*

## A TALE OF SOUTHERN CHINA.

\*\*\*\*\*

CHAPTER XXXIV

Fortunately for his peace of mind, the door of the dungeon opened just then, and Kai Wang appeared, lantern in hand.

The maker of graven images showed no sign of undue excitement, but this was no reason to believe he had not been under an unusual strain, for, like the majority of his countrymen, Kai Wang possessed the power of a sphinx when it came to disguising his real feelings.

They saw him calmly lock the door again and retain the great key, as though of the opinion that it might come in handy on other occasions.

Which Plympton agreed was "rattling good politics" on Kai Wang's part, and proved him to be the possessor of what he styled a "level head."

Surely, it would be most difficult to rattle such a cool customer.

Larry believed it the part of wisdom to acquaint their leader with the little incident that had occurred while he was absent.

The fact that some one had looked upon them, some one who had deemed discretion the better part of valor, and fled incontinently, was a matter which Kai Wang should know, as the knowledge might have a bearing upon his plans.

He seemed quite unmoved—indeed, it looked as though nothing could cause him to lose that calm and confident demeanor.

Larry remembered that on the occasion when they were so desperately assaulted by the Thugs of China, those dare-devil Black Flags, this strange man had gone through the fight with a coolness that was simply amazing, and had dragged him away at the proper time, without an atom of excitement.

At least Larry felt easier when, as a result of his warning, the old Chinese compatriot of General Charles Gordon vouchsafed the simple words:

"We catch him if we want him."

They were all this while on the move, on the keen lookout for more world's to conquer, other doors that might yield a better harvest.

Whether or not the richly-clad prisoner of the first dungeon were the Emperor, temporarily there until he could be taken to some distant place of exile, a Chinese Island of St. Helena, mattered very little to them; they were only grieved to think he had not been the mysterious foreign prisoner who was known to be kept under the imperial palace, and to whose rescue they had committed their fortunes.

Kai Wang might keep his profound secret closely locked in his own bosom until doomsday, if he could only conjure the god of good luck, causing him to guide them to where the object of their bold search might be found, and so arrange matters that this lone prisoner of the Chinese Bastille might turn out to be Dr. Jack.

"Heaven speed them in their design," said Larry, as he followed deeper into the recesses of the labyrinth, where other strange adventures that would possibly exceed their wildest dreams awaited them.

When Larry saw him push in vain he felt a sudden thrill.

Had the critical moment come? Unconsciously he put out his hand and caught the arm of his cousin.

Not a word did he say, but there was something in his manner and his eager look that must have warned her, for she drew a long breath, and the glow of resolution appeared in her clear eyes.

Meanwhile the good Kai Wang swung his big key forward and thrust it into the lock.

It must have been a master key, for it appeared to fit any door equally as well.

No doubt, in the average Chinese mind, a key was a key, and they saw no reason why it should not do double duty.

As Kai Wang pushed the door open there was a general advance all along the line, each of them, having a desire to enter the chamber first.

On the part of Larry and Avis the reason would not be hard to find, since the deeper emotions of the heart entered into it.

With Lord Rackett it was simply a desire to meet any danger that might by chance lie beyond.

Thus the whole four pushed in.

And Kai Wang forgot to remove that enchanted key from the lock.

Perhaps he had good and sufficient reasons—perhaps he had grown weary of the manual labor involved in carrying it around; or it might be the blessed thing slipped entirely from his mind.

This last was more than likely the case, for Kai Wang was almost as eager with regard to the 'identity of the prisoner under the imperial palace as Larry himself, and now that the time seemed at hand when this enigma was about to be solved, it was perhaps excusable in him to forget such a small thing.

Upon such minor matters great events often turn, however.

When the light of the lantern dispelled the darkness that had hung like a pall upon the cell, eager eyes ranged around, searching every inch of space, looking for some sign.

A great wave of disappointment rolled over the brave heart of Larry when his vision failed to connect with any moving figure.

There was a rude pallet at one end of the grim dungeon, and an earthenware bowl or two near by, but no human being.

Had the authorities, in some secret manner, learned of this contemplated raid on the palace, and removed the mysterious prisoner either temporarily or permanently?

The bare thought gave him a chill.

On his part Lord Rackett experienced a feeling of keen chagrin and disappointment, but he would not give up so easily.

These Englishmen can be stubborn when they choose, and dislike exceedingly to yield to unpleasant conditions.

As for Kai Wang, he did what was the proper thing under the circumstances—walked directly forward to the cot to make an examination.

The others clustered about him, eager to learn what the sagacious Chinaman might have to say concerning matters.

Kai Wang made a hasty examination.

It did not take those keen, slanting eyes of his long to discover certain facts,

never been discovered they had evidently feared to assassinate him.

Now that the resolute woman behind the throne had shown her true colors, and her one-time grasp upon political affairs had been resumed, it might be expected that some move would be made toward cutting the Gordian knot, either by releasing the famous prisoner, with a severe admonition to never again enter the sacred streets of the Forbidden City, or else disposing of him after some usual cruel Chinese fashion, probably the latter.

Lord Rackett was not satisfied.

Things looked too natural to suit him. He did not believe Dr. Jack would suffer them to drag him from his cell to execution without a most desperate resistance.

There was a bit of wood lying by the pallet that might have served in lieu of a cudgel, and in the hands of one entirely great, would have proven mightier than a sword.

Yes, Lord Rackett was inclined to believe that had such a tragedy occurred on this night, there would be much evidence of it in the immediate vicinity.

A few dead Chinamen and gore galore would be the natural indication that Dr. Jack had been overwhelmed.

Nothing of the kind greeted their scrutiny. And, more than this, the door had been locked.

Had they dragged the inmate of the dungeon off to decapitation, in order to thus celebrate the new regime inaugurated this night, it did not seem likely that any one would have taken the trouble to lock the door upon an empty cell.

Lord Rackett was by nature of an investigating disposition. Many of his countrymen are, and this peculiar nature has led them to all corners of the earth worth possessing.

After they investigate they conclude to settle down, send for their cousins, and grow up with the country.

It runs in the blood.

Investigation is the avant courier of civilization.

Plympton had walked over to the farther wall, where something had attracted his attention, and the others speedily hurried to his side when they heard him utter an exclamation that announced a discovery.

Here they found evidences of labor.

In the wall was a series of holes one above the other, and leading upward, like the successive rounds of a ladder.

Only a persistent nature could have dug these out, hour by hour, during the weeks that had elapsed since the prisoner was thrown into the dungeon.

Plympton snatched the lantern from Larry and held it aloft, but its light was feeble and failed to disclose what he sought.

Still he did not lose hope, and fancied he saw an indistinct object clinging up beyond.

"Dr. Jack, are you there? We are friends, come to rescue you!" he bawled.

Then those below heard a voice exclaim:

"Thank God!"

There was a distinct movement of the uncertain object above them; a human form descended the rude ladder in the wall and landed with a bound just in front of them.

(To be continued).

**TEETHING TIME**

Every mother dreads that period in her baby's life known as teething time. The little gums are swollen, inflamed, and tender; the child suffers greatly, and is so cross and irritable that the whole household is on edge. All this is changed in homes where Baby's Own Tablets are used. This medicine allays the inflammation, softens the swollen, tender gums, brings the teeth through painlessly. In proof Mrs. W. C. McCay, Denbigh, Ont., says: "I have found Baby's Own Tablets a splendid medicine at teething time. My baby was very sick at that time, was cross, rest-

## NEWLY MARRIED.

"Dearest," she said, and there was a slight tremor in her voice, "will you have a slice of bacon?"

He would, as he had been married only a week, and would have accepted a slice of sandstone or papyrus from her hands with equal willingness.

"I thought," he said, as with difficulty he removed his eyes from the dainty morning jacket, surmounted by her lovely face, to the sordid bacon, "you said you would have some of those meat-balls I like so well for breakfast."

The lovely eyes were filled with tears.

"George," she said, with rising indignation subduing her grief, "it was that horrid, mean butcher's fault, and I want him never, never to dare to expect my patronage again."

"Never mind, dear," he said, "it doesn't matter. Forgot to send the meat, did he?"

"No; he sent the meat, but not what I ordered. After I had planned having this nice dish for you this morning, after I had taken the pains to go in person and explain carefully to him the kind I wanted; and after I was so happy at the thought how you would enjoy the meat-balls, to have my whole pleasure spoiled by that detestable butcher's mistake almost breaks my heart."

More tears.

He went around the table and comforted her.

"I ordered," she sobbed, "some round steaks to make the balls with, and, George, the ones he sent were—as flat—as—your hand!"

## FEASTING FOR EIGHT DAYS.

At Szeged, in Hungary, there has come to a close a triple wedding-feast on a scale of profusion rare even for that country of medieval survivals. Three brothers were married together, and the festivities lasted eight days. Seven hundred guests assembled, and at the first day's feast there were served two oxen, four calves, eighteen lambs, 130 head of poultry, 200 dishes of pigs' feet and ears in jelly, and eighty enormous cakes. When the first dance, a mazurka, was called, 200 couples stood up. Feasting in this way, with singing and dancing, continued daily, and during the whole of this time music never ceased day or night, quite a number of bands taking successive turns. But the company could hardly stand the strain. When the eighth day closed, only a dozen young folks remained to take leave of their hosts.

In Fields Far Off.—Dr. Thomas' Electric Oil is known in Australia, South and Central America as well as in Canada and the United States and its consumption increases each year. It has made its own way, and all that needs to be done is to keep its name before the public. Everyone knows that it is to be had at any store, for all merchants keep it.

the recesses of the labyrinth, where other strange adventures that would possibly exceed their wildest dreams awaited them.

## CHAPTER XXXV.

For one, Larry was glad to know the crisis must be close at hand—whether for good or ill, they could not long be prevented from knowing what the result of their mission was to be.

His hopes still ran high, but his fears managed to keep on a level with them, so that much of the time he was engaged with an unruly team, first one and then the other plunging ahead.

He could not get quite out of his mind the man whom Avis had discovered in the act of spying upon them.

The fact that Kai Wang considered the matter so trifling went far toward quieting any fears he might have felt on this score.

Having passed through one experience, however, Larry felt as though some similar calamity was impending. The conditions seemed favorable, just as on that other occasion.

Then it had been Dr. Jack who had suffered; now the rest of them might be in line to receive the flings of outrageous fortune.

As the little man was something of a philosopher in his way, he could accept even the roughest decrees of fate with a degree of patience; besides, bravery and coolness entered into the deal to a considerable extent.

Avis had hold of his arm, and he believed he felt her hand tremble, which would not have been at all singular under the peculiar conditions governing the case.

So Larry for the third time whispered the word "courage" in her ear; and, thus strengthened, she again faced the uncertain future.

Other doors greeted their vision.

Some were ajar and received no consideration.

Then, again, they would come to one that had the appearance of being fast.

Kai Wang evidently did not mean to allow any good thing to slip his notice; he was a man who believed in getting the worth of his money once he had made an investment, and this venture could surely be looked upon in such a light.

One does not always have to risk money in such a case—there are other chances to be taken; and when life itself is the stake, surely the investment becomes worthy of the name.

At any rate, Larry realized why their guide had taken the heavy key; it might serve to open other doors besides that in which the supposed Emperor was confined.

Thus far, however, no door had been found that could not be readily opened upon the exercise of a little muscular power.

And, as each was passed in turn, poor Larry's hopes, which at the start had been so high, began to sink lower, as he realized how much smaller their chances became.

What if, after all the risks they had assumed, the rumor turned out to be without foundation.

This he could not believe, since Kai Wang had it on the best of authority, and he was not the one to make a mistake on this score.

Of course, there was always a possibility that the prisoner of the palace might turn out to be some other than the friend they yearned to find—a stranger, perhaps, who had fallen into the hands of the Chinese authorities, and for certain political reasons was treated with this severity.

It now began to look very serious, for they must be near the end of the passage, and unless something turned up speedily, disappointment would overwhelm them.

Kai Wang showed no sign of weakening.

He strode over to another grim looking door that was closed, and tried it to find whether any resistance would indicate the need of that wonderful key.

cut to make an examination.

The others clustered about him, eager to learn what the sagacious Chinaman might have to say concerning matters.

Kai Wang made a hasty examination.

It did not take those keen, slanting eyes of his long to discover certain facts.

When one has educated himself in this line, small things become patent that might easily escape the vision of the ordinary beholders.

"The man we seek was here confined," declared Kai Wang, holding something aloft.

Larry looked at it, and his heart seemed to almost cease beating; the article thus displayed to their gaze was a belt with a singular buckle in the front, a buckle probably two and a half by three and a half inches in diameter, composed of bronze representing in a rude manner some East Indian scene such as might be common enough in Hindostan.

Larry knew that buckle as well as he did his own name, and when last he had set eyes upon it the belt was upon the person of the bravest of the brave—none other than Dr. Jack himself.

And, even in that dreadful moment, when doubt gave way to certainty, and this in turn was succeeded by new, alarming fears, Larry remembered who was at his side, and he turned to ascertain how Avis took it.

The shock had been a severe one, but, even under such a strain, that brave heart never thought of giving way.

Larry saw a face that, despite theellow pigment used to give it the true Chinese tint, was transformed with rare delight; a sudden radiant joy flashed from dazzling eyes, and she reached out her hand to Kai Wang.

"Give it to me, please—it belonged to my Jack," and as the belt fell into her hands she pressed it to her lips with holiest emotions.

Thereupon Kai Wang and Larry exchanged glances, and nodded their wise heads after the manner of men who knew it all.

Although it afforded great pleasure to discover in this fashion that the man they sought had at least survived the affair of that dreadful night in the Forbidden City, still there were other problems yet to solve that needed their immediate attention.

Where was he now?

What new and terrible disaster had befallen him?

Had the change of rulers, supposing such to have taken place in the Manchu dynasty, made any difference with regard to the fate of this mysterious prisoner?

It was always possible.

So long as Li Hung Chang remained in power there existed a friendly feeling toward foreigners, but now that he was virtually exiled from Peking, and his influence at a low ebb, it was reasonable to suppose this bitter animosity on the part of the Dowager Empress toward the funquey, or "foreign devils," would make itself felt in every way possible.

The prisoner of the palace was one of whom the party in power stood in more or less awe—his boldness in seeking an audience with the Empress dazed them, and so long as the signed papers had

Tablets are used. This medicine allays the inflammation, softens the swollen tender gums, brings the teeth through painlessly. In proof Mrs. W. C. McCay Denbigh, Ont., says: "I have found Baby's Own Tablets a splendid medicine at teething time. My baby was very sick at that time, was cross, rest less and had no appetite. After giving her the Tablets there was a marked improvement, and in the course of a few days she was not like the same child. The Tablets are just the medicine to help little ones over the trying teething time." You can get Baby's Own Tablets from any druggist or by mail at 25 cents a box by writing The Dr. Williams' Medicine Co., Brockville Ont.

## BATTLE FOR FREE DRESS.

Revolt in Nordhausen Against Fines for Wearing Trains.

The women of the little town of Nordhausen, Germany, have risen in revolt against the order of the municipal authorities forbidding them for sanitary reasons to wear dresses with trains.

All dresses which touch the ground come within the definition of "trains," and the police have received orders strictly to enforce the new decree. A fine of \$2 is the penalty for the first offence, \$2.50 for the second, and a day's imprisonment for the third.

The women who are resisting the law have scored one point by obtaining the opinion of eminent legal authorities to the effect that the town council has partially exceeded its rights in issuing this draconic decree. It appears that the council has a right to prevent women from trailing their dresses along the ground, but cannot prevent them from wearing dresses which would touch the ground if not carried in the hand.

The council then replied that women can wear skirts yards in length if they like, but they must hold them up. One inch of skirt trailing on the ground makes the wearer liable to arrest and punishment.

A league of resistance has been formed, and the members have pledged themselves to wear long skirts and to defy the authorities. They declare that they will pay the necessary fines, and even go to prison rather than sacrifice their right of arraying themselves in the most becoming costumes.

"Geel I wonder whose automobile that was? It felt like Jim Brown's."—Life

## MR. CARNEGIE AT HOME

### HOW THE MILLIONAIRE AMUSES HIMSELF AT SKIBO CASTLE.

Enjoys Himself in Summer Time at His Beautiful Scottish Home.

If anyone doubts that a multi-millionaire can be a perfectly happy man, said a friend of the writer, I should advise him to arrange, if possible, to spend a day or two with Mr. Andrew Carnegie at Skibo Castle, in his summer house in Scotland, and I guarantee that his doubt will speedily take wings; for I do not think there are many men in Great Britain, rich or poor, who so thoroughly enjoy life as this wonderful Scotsman, who has made almost as many millions as he has lived years. This at least was the conviction forced on me when I spent a few delightful days as his guest a couple of years ago.

But, indeed, it would be rather difficult for any man not to enjoy life under such ideal conditions and in such a lovely environment. Skibo Castle, you must know, stands on a slight eminence near the shores of Dornoch Firth, in the far north of Scotland and but a few miles from Dunrobin, the regal home of the Dukes of Sutherland. Behind it rise magnificent, heath-covered hills, and in front stretches a glorious panorama of loch and moors and hills, such as you will scarcely match even in romantic Scotland; while the castle itself, which Mr. Carnegie has largely rebuilt, is a stately pile, beautiful to look upon and FULL OF HISTORIC ASSOCIATIONS.

To this splendid retreat the millionaire "laird" loves to retire every summer; and here he spends an ideally happy time with his wife and little daughter, entertaining his countless friends and finding each day too short for his many recreations and activities.

Naturally a man who has led such a strenuous life finds no pleasure in idleness. Full of irrepressible energy, he must always be doing something, and at Skibo he finds plenty to occupy his time very agreeably. In fact, the place is his hobby, and he is always planning some improvement to add to its charms. Now he is enthusiastically superintending the laying out of golf links; now he is diverting the course of a stream to make a beautiful lake; and again, he is constructing a road through the mountains—schemes which give him infinite pleasure and also provide employment for a small army of men.

And these are but a few of his many activities, mental and physical. Every day, from all quarters of the world, there pours in on him

A PERFECT DELUGE OF LETTERS, all of which demand attention; and although the majority of them (chiefly of the begging order) are suppressed by his secretary and never come into his hands, his daily correspondence usually occupies a large part of his morning. He is a great reader, too, and spends an hour or two daily with the newspapers and periodicals which are scattered in lavish profusion all over the place, or with the treasured volumes in his splendid library.

Almost more than his books Mr. Carnegie loves music, and one of his greatest pleasures is to sit in the hall of Skibo while the castle organist, a highly-paid artist of great skill, conjures sweet music from his magnificent organ. Another form of music which delights the millionaire is the skirl of the pipes, to which the household, in good Scottish fashion, awakes every morning. Mr. Carnegie also spends many pleasant hours in the billiard-room, where he handles the cue with great enthusiasm and no little skill; he

## ITALIAN GIRL'S ESCAPE.

Romantic Maiden Adopts Male Attire and Earns Applause.

There is a sequel to the story from Ancona, Italy, of a young girl, Elisa Copiato, who disappeared from her parents' home in San Giorgio, and was subsequently discovered serving as a groom, in men's clothes. When her secret became public property, she was obliged to resume female attire, and had to return home. Her romantic, though short career, fired the imaginations of the citizens of Ancona to such an extent that thousands of people turned out to give her a rousing farewell. A special force of police and carabinieri was required to keep the approaches to the railway station clear of the crowd of spectators anxious to see the heroine of the daring escapade.

Wild enthusiasm reigned when she made her appearance, and shouts of "Bravo, Elisa! Evviva!" rent the air as the train steamed out of the station. On her arrival at San Giorgio a similar scene was enacted, and it was with the greatest trouble that Elisa succeeded in escaping from the pressing attentions of her numerous admirers.

Signorina Copiato has received numberless offers of marriage, and it is understood that she has accepted one from a young countryman, who intends emigrating to America to found a home for her.

## FREAKS OF DISEASE.

No medical man needs to be told that even disease has its freaks, and that recovery has occasionally been brought about by means inexplicably trivial. One of the most remarkable of even these unaccountable eccentricities of disease has taken place within the past month at Halver, in Westphalia. The case was that of a boy who, as the result of a very heavy fall backwards on his head while skating, had for a year and a half been absolutely deaf and dumb. One morning his brother went to awake him and finding him sleeping heavily tapped him lightly on the forehead. To his amazement the deaf and dumb boy awoke with a loud cry. Both speech and hearing had been restored.

## SPANISH SHEEP.

There are said to be 10,000,000 migratory sheep in Spain, which travel on occasions as much as 200 miles from the plains to the mountains. They are known as trashumantes, and their march resting-places and behavior are governed by special regulations dating from the fourteenth century. At certain times no one may travel the same route as the sheep, which have the right to graze on all open and common land on the way.

If attacked with cholera or summer complaint of any kind send at once for a bottle of Dr. J. D. Kellogg's Dysentery Cordial and use it according to directions. It acts with wonderful rapidity in subduing that dreadful disease that weakens the strongest man and that destroys the young and delicate. Those who have used this cholera medicine say it acts promptly and never fails to effect a thorough cure.

Miss Dukkets: "Did you tell Mr. Get-there I was not in?" Bridget: "I did, murr." Miss Dukkets: "What did he say?" Bridget: "He said, 'Well, tell her to come down as soon as she is in.' He's in the parlor."

After Wasting Fevers hasten recovery to health by the use of "Ferrovin." It is the best tonic. It builds, strengthens and gives new vitality. Try it, it will make you feel strong.

Lady: "Have you had much experience as a cook?" Applicant: "Oh, indeed, I have! I was the cook of Mr. and Mrs. Peterby for three years." "Why did you leave them?" "I didn't leave them; they left me. They both died." "What of?" "Dyspepsia."

good Scotch fashion, awakes every morning. Mr. Carnegie also spends many pleasant hours in the billiard-room, where he handles the cue with great enthusiasm and no little skill; he loves to work in his beautiful gardens, and to take long tramps over the hills.

#### WITH THE BRISK STEP OF A BOY.

But undoubtedly Mr. Carnegie's happiest hours are those spent with his wife and daughter—"Madam" and "Missie," as he playfully calls them—to both of whom he is devoted.

When, as is often the case, the castle is filled with his friends, he is one of the most hospitable and thoughtful of hosts, and the days programme is a full and merry one. He takes his guests for long and delightful drives, accompanying them on fishing expeditions (he is a keen disciple of the great Izaak), takes them on his steam yacht to explore the romantic castles on Dornoch Firth, and arranges shooting parties on the moors and matches on the golf-links.

Mr. Carnegie, by the way, is one of the most enthusiastic of golfers, and it is said that he is prouder of his progress in the game than of making his millions. In this connection an amusing story is told. One day an interviewer ran him to earth on the links to ask his opinion of a threatened crisis in the steel trade. After Mr. Carnegie had listened patiently to a long string of questions, he said: "Well, I know nothing about all that, but I'll tell you something. Yesterday I broke my record. I went round this course in five strokes fewer than ever before."

#### TERROR AND BLOODSHED.

##### Results of the Greek and Slav Feud in the Balkans.

The murder of Greeks in Bulgaria and the destruction of their property is bringing about a dangerous complication in the Near East.

Race hate, as between Slavs and Greeks, and religious hate, as between the Bulgarian and Greek Churches, have become intensified by the present outrages, and preparations are being made for reprisals on a large scale.

Macedonia will again be the field of action, for it is there that the rival factions can freely make war. Already 200 people a month are being murdered by the bands, and property is being destroyed wholesale. This in spite of the supervision of the powers.

A leading Bulgarian comitadj, who is now in Vienna, says that plans are being made to carry the war more actively into the Greek camp. It is known that Greek bands are crossing the frontier in large numbers. They are well armed and well supplied with funds. The Bulgarians are not so well off. They are short of money and are sending agents to their countrymen to make an appeal for help.

Meantime the Turks are interested onlookers. They regard their duty not so much to prevent disorders as to allow the bands to destroy each other. They occasionally destroy a small band themselves, and it is noteworthy that in these encounters the band is almost invariably Bulgarian and not Greek.

There is every probability that the powers will be compelled to take drastic measures to put an end to the prevailing anarchy.

deed, I have! I was the cook of Mr. and Mrs. Peterby for three years." "Why did you leave them?" "I didn't leave them; they left me." They both died. "What of?" "Dyspepsia."

The delicious flavor of "SALADA" Tea is due largely to the care used in the cultivation and preparation and to the fact that it is packed in sealed lead packages which prevent it coming in contact with articles that would affect its flavor.

"Am I to understand that you were cashiered from the army for a mere breach of etiquette?" queried the interested friend. "Yes, sir," boldly asserted Colonel Blupher. "What was it?" "Turning my back to the enemy."

They Wake the Torpid Energies. — Machinery not properly supervised and left to run itself, very soon shows fault in its working. It is the same with the digestive organs. Unregulated from time to time they are likely to become torpid and throw the whole system out of gear. Parmelee's Vegetable Pills were made to meet such cases. They restore to the full the flagging faculties, and bring into order all parts of the mechanism.

Mrs. Klubbs (severely): "I've been lying awake these three hours waiting for you to come home." Mr. Klubbs (ruefully): "There now! And I've been staying away three hours, waiting for you to go to sleep."

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way. Buy Sunlight Soap and follow directions.

Lying is like trying to hide in a fog. If you move about you are in danger of bumping your head against the truth; as soon as the fog blows up, you are gone anyhow.

Pale, sickly children should use Mother Graves' Worm Exterminator. Worms are one of the principal causes of suffering in children and should be expelled from the system.

He: "Five years ago when I saw her she was looking for a husband; but she's married now." She: "Yes; and she's still looking for him, especially at nights."

Tiny tubercles on the skin of scrofulous people produce the hideous disease called lupus. Weaver's Cerate, used in time, will save the skin from destruction. Apply to all affected parts. Cleanse the blood with Weaver's Syrup.

Anne Tecke: "Mr. Gasser is such an interesting talker. Always saying something one never hears from anyone else." Hattie Hottewunne: "Has he been proposing to you too?"

Suffer no More.—There are thousands who live miserable lives because dyspepsia dulls the faculties and shadows existence with the cloud of depression. One way to dispel the vapors that beset the victims of this disorder is to order them a course of Parmelee's Vegetable Pills, which are among the best vegetable pills known, being easy to take and are most efficacious in their action. A trial of them will prove this.

#### MORE OR LESS WALKING.

When his careful examination of his new patient was at last completed, the specialist looked for a moment in silence at the tall, stooping figure opposite his own.

"You need more exercise," he said, with his most impressive manner. "You must walk, walk, walk, man! Throw back your shoulders, fill out your chest, expand the lungs, and walk!"

"Um-m!" said the tall man, dryly. "Do you know I am the father of six-week-old-twins, and I have the care of them at night, as their mother is very delicate. I get some exercise in that way, but I can't expand my lungs as much as you'd like, possibly."

and the business may stop there. Or a gun thus built may be reinforced by the addition of one or more tubular jackets at the breech. To place a jacket it is first heated so as to expand the metal sufficiently to allow it to slip on over the rest of the gun. When it cools it contracts and fits snugly. Still another plan is to make the gun chiefly out of steel wire, the latter sometimes being wound around a set of thin, loose segments which resemble barrel staves.

Lieut. A. Trevor Dawson, a British ordnance expert, has recently indicated in the columns of The London Times his reason for thinking that the wire wound gun is preferable to the "built up" gun. Flaws occur in metal which are not discoverable if it is used in masses. With wire one can be absolutely certain about its condition. The wire is tested before being used throughout its entire length, whereas in the case of the solid steel construction of guns the test is only carried out upon a small sample taken from the steel forming each part of the gun. At Woolwich the practice is to use steel wire of a breaking strain of between ninety and a hundred and ten tons a square inch, and of this something like 110 miles are used on a 12-inch gun, forming a band around the tube more than equivalent in strength to the series of shrunk rings in the

#### SOLID STEEL CONSTRUCTION.

In England it is usual to substitute for the segments a tube. Indeed, two tubes, one inside of the other, are commonly employed, the outermost being known as the A tube, and the inner one being scarcely more than a lining to the bore and intended for a novel and renewal when it becomes badly affected by the gunpowder gases. For the A tube it is customary in England to use a grade of steel having a tensile strength of from 34 to 44 tons a square inch. That is to say, it must be strong enough to stand a lengthwise strain of so many tons. Other qualities, such as the ability to stretch 17 per cent. before breaking, are required.

The effect, so far as the strength of the whole structure is concerned, may be briefly explained. The wire tension and shrinkage are so arranged as to give an internal compressive stress of twenty-five tons a square inch at the breech end, varying to fourteen tons a square inch at the muzzle—this, of course, is the condition when the gun is in a state of repose. Even when the gun is fired with charges to attain the high velocities now reached there is still an enormous margin of safety. This is due, first to the fact that the steel for the inner and A tubes has a yielding point of over twenty-one tons to the square inch, while the working stress, based upon accurate calculation, is estimated not to exceed eighteen tons to the square inch. The tension with which the wire is wound on the gun results in a very much higher yielding point than would be the case with solid bands. This tension depends, of course, upon the thickness of the inner and A tubes, and upon the number of layers of wire, or tape, as it might more correctly be termed. As a rule, it ranges from about fifty-four tons to the square inch on the inner wires to thirty-two tons to the square inch in the outer wires. It varies at the different sections in the length of the gun to suit the gaseous pressure along the bore to be supported.

#### ROUGH ON THE LIEUTENANT.

They certainly were rather a hopeless lot of recruits, and their stupidity as they bungled through their drill roused the ire of the captain in charge. For the hundredth time they turned to the left when the order had been right, and ran about like lost sheep at the order "Form fours." That was the last straw.

"You knock-kneed, flat-footed idiots!" he yelled. "You're not worthy of being drilled by a captain. What you need is a rhinoceros to teach you."

Then, sheathing his sword in a passion, he turned to his companion. "Now, lieutenant," he roared, "you take charge of them."

# REGULATORS IN RELIGION

## Man Should Grow In Religion as a Child Develops.

"Except ye be converted and become as little children, ye shall not enter into the kingdom of heaven. — Matt. xviii., 3.

Nowhere do the regulators abound more than in religion. Ecclesiasticism seems to breed the worm of criticism. When religion becomes only a profession its followers feel their first duty to be the discovery of abnormalities in others of their craft. Those to whom religion means certain formal statements generally are convinced that, if the church should be reduced to those who absolutely were orthodox, there would be but one member, and they know who that would be.

The narrow heart always feels called upon to gauge the things that are infinite. It is the shrift of laziness to set up mechanical standards for things that are moral and spiritual. The caste spirit that cannot base itself on blood or breeding proceeds to create its little clique on lines of belief or ceremonials.

He is his disciple who learns of him, who takes the child's attitude toward this new life. He is not a philosopher who carefully would set out a logical statement of what this way of life means; he is not a mechanic who would set up engineering by which its purposes should be accomplished; he is a child, learning, living approximately to its ideals unconsciously.

### THE ESSENTIAL THING

about the child is that he is growing, developing. Things with him are not set, determined, formal. There only is one thing that always is the same about the child; that is the trend of his life, its upward, outward, enlarging movement. A child lives not by rules but by unconscious forces, not by efforts at certain results, but by the outliving of the life within. Vitality is the chief virtue; the others take care of themselves because he is too busy growing even to think of the vices that are but forms of death.

So is the life of the true child of the

most High. It is marked only by one steady, unvarying characteristic, its general trend toward larger life and into the Father's likeness. No certain set of features prevails here, no set out of garments, no undeviating routine of conduct and formal acts, no forms of words. But through their play and their tears, their schooling and their toil, the children grow into larger life.

Christianity is a trend rather than a type. It is the life that goes toward the things infinite, wholly good and true; its ideals move higher as the ages go by. Life enlarges before its children. It comes back to God. It is a life not a philosophy; a life eternal and therefore unending in its development.

This, then, is the only possible test of my religion, a vital test, a deep test

### AM I GROWING?

am I moving toward larger life? are my sympathies broader, finer? compassions deeper? knowledge and humility, power and pity growing side by side?

Gone are the days when a man could reach his ideal in a single moment; when he was saved in a second to stay at that point. To stand still is to die, even though one be standing on a mount of transfiguration. Alas for the still born Christians in the world! Gone the old ideal of a type to which one might by niceties and oddities of speech, garb and custom speedily conform. A life is not made thus mechanically.

Religion is larger and deeper than that; it is the learning of life's great, unsearchable lesson as a child by living is learning the laws of life. The larger the life in all the things that are noble, sweet, and beneficent the more truly is it religious, and only as it ever, unceasingly moves toward higher things is it religious at all. Begin to learn to live, take a child's place before the great Master, and you shall find the way of life. Not by their buttons or their badges shall men enter the kingdom, but by their being and becoming like the best.

It is very difficult to come to any clear conception of the order in time, and location in place, of the lessons of the quarter. Indeed, scholars are quite undecided concerning the matter, and all schemes are merely provisional. The harmony of the gospels in our Teachers' Bibles will give what light is accessible, but it must be remembered that many of the arrangements for this period of our Lord's ministry are made more or less in the dark.

### BRITAIN'S TRADE IS SUPREME.

Imports and Exports for Six Months Exceed Other Countries.

Britain's supremacy as a commercial nation is again shown in a Board of Trade return issued recently concerning the domestic trade carried on by typical countries for which recent figures are available. It will be seen that both the imports and exports of the United Kingdom far exceed those of the United States, which comes next in order. Moreover, the increase under each head in 1906 over 1905 is much larger than that of any other country.

In the figures given in the appended table, the imports in all cases, except that of the United States, are intended to represent goods for home consumption only, while in all cases the exports represent articles of domestic production. The Belgian returns are for principal articles only.

# ATTRACTIONS AT OTTAWA

## ITS PUBLIC BUILDINGS AND NATURAL ADVANTAGES.

An American Magazine Describes the Beauties of the Capital of Canada.

When Ottawa—which likes to call itself the Washington of the North—was selected as the capital of Canada, a vast pile of Government buildings was begun.

There was no ransiose city design like that by which Washington has been jacked up in spite of itself to the level of a great capital. The street plan of Ottawa was drawn, says Collier's, to the immediate needs of a small provincial town. But the Parliament buildings have stood year after year as an example and a stimulus to civic pride.

Crowning the boldest promontory that juts into the river, the great Gothic tower of the Library of Parliament soars like a mountain peak into the sparkling Canadian air. The library is the dominating feature of the Government buildings, which form three sides of a quadrangle, its back to the river and its front on a terraced court facing the city.

In completeness of effect Ottawa is incomparably more fortunate than Albany. The New York State capital cost at least six times as much as the whole group of Government buildings at Ottawa; yet it is so elbowed and jostled by mean houses that it

### LOOKS CHEAP IN COMPARISON.

When the Parliament buildings were designed practical men at Ottawa thought they were laid out on a scale of wanton extravagance, but now the Government has overflowed its accommodations. It has had to build one new block outside of the original quadrangle and it is paying so much rent for other quarters that it is preparing to build more, which will double the extent and impressiveness of the civic centre.

At the foot of Parliament Hill are the locks of the Rideau Canal. It is not often that a canal is one of the attractions of the city; but the Rideau's long flight of stone locks, running up the hill from the river like a giant's stairway, is a decorative feature and a source of endless entertainment.

People stand for hours watching the boats lazily climb the stairs, while the skippers' wives nurse their babes on deck. It lies between two parks, an attraction for each and a permanent refutation of the theory that business and ugliness must necessarily go together.

In 1899 the Dominion established a permanent improvement commission and endowed it with a standing revenue of \$60,000 a year—not very much, but enough to make a showing when judiciously used.

### THE "GOVERNMENT DRIVE"

along the Rideau Canal is the Improvement Commission's greatest exploit as yet. To build it without neglecting the other works on hand, including the acquisition of some necessary land, called for more money than the commissioners had in a lump, so they hit upon the ingenious idea of capitalizing their expectations.

They issued bonds based upon their promised appropriations, and in that way raised enough to do at once what otherwise would have had to be spread over a number of years.

The glory of Ottawa is its wonderful variety and extent of water frontages. The Ottawa, here as wide as the Mississippi, there as narrow as the Harlem, flows with an infinite complexity of rugged shore lines along the whole length of the city.

The Rideau encircles the greater part of the town, leaping at last into the Ottawa over a cliff forty feet high. The Rideau Canal parallels at a little distance the river of the same name. The latter

# GAMBLING FOR FORTUNES

## YOUNG RUSSIAN OFFICER LOST \$50,000 IN AN HOUR.

A Hungarian Nobleman Won Nearly \$500,000 in an Hour and a Half's Play.

It was recently reported in a Russian newspaper that the Czar had cashiered a young officer of the Imperial Guards for having played cards for such high stakes that he won 80,000 roubles (\$50,000) in rather less than an hour, his adversaries being two famous gamblers. Doubtless his Imperial Majesty considered that such a reckless young man could not be a reliable guardian of his person, and very probably, also, he thought it a fitting opportunity to put a veto on what constitutes one of the worst vices of the Russian aristocracy. But if his Majesty imagined that this express rate of gambling constituted a record he was very much mistaken, for it fell far below many feats which gamblers have accomplished.

M. Justh, a Hungarian nobleman of great wealth, holds the world's record for winning fortunes at cards, and he has on three or four occasions exceeded the rate of \$50,000 an hour. A few years back, for instance, M. Justh, whose name is almost a synonym for luck among his acquaintances, won a trifle less than \$500,000 during an hour and a half's play at the National Casino at Buda-Pesth; and this was at a rate exceeding \$5,000 a minute. Of this immense fortune Count Michael Karoly lost more than half, the other portion being won by M. Justh from two other players.

On another occasion the same lucky gambler, whose honorable play is, by the way, absolutely beyond suspicion, sat down to the card-table and lost nearly \$40,000 without winning a cent; but at that point the game turned in his favor so completely that he rose from the table some \$70,000 richer than when he had started play. Thus in an evening he lost \$40,000 and won \$110,000.

Russians are perhaps the greatest gamblers of this generation. It was another Russian nobleman, Count Potocki, who startled Europe a few years ago by losing \$800,000 in a single evening at cards—the largest amount, it is believed, ever lost at a card-table by a single individual; and the whole of this great fortune was won from the Count by two gentlemen in a little less than four hours.

The game played was baccarat, and the scene of this remarkable contest was the Jockey Club at Vienna, which has witnessed the ruin of some of the richest and most reckless gamblers of modern times, for Austrians rank only second to Russians in the love of gambling. To this club go the most daring card-players of the wealthy aristocracy of Europe, attracted by the high play which is the rule there. It is said that on the particular occasion when Count Potocki lost \$800,000 he was only concluding a series of games which had already cost him \$150,000 before he sat down on the eventful evening. Of the \$800,000 he lost, H. Von Szeni, a Hungarian Deputy, won \$500,000, Prince Braganza winning the balance of \$300,000.

Extremely high play, has, happily, gone out of fashion in London, and even the opportunities afforded by the popularity of bridge has not effected a revival of gambling on the scale which was common enough when White's Club was the scene of so many games of cards on which fortunes hung. But occasionally even now-a-days very large sums of money are lost and won in the card-rooms of London's great clubs and mansions; and it is but a little while ago that a certain young gentleman lost \$20,000 in an evening at bridge, playing with ladies; while it is reported that a young Guardsman sent in his papers some weeks ago at the sugges-

# THE S. S. LESSON

## INTERNATIONAL LESSON,

SEPT. 23.

Lesson XIII. Third Quarterly Review.  
Golden Text: Luke 4. 32.

### QUESTIONS FOR RESEARCH.

1. In how many lessons of the quarter do we find the sympathy of Jesus for the weak, helpless, and outcast members of the community emphasized?
2. In which lessons of the quarter are the Pharisees and other religious respectables of Jewish society exhibited in an unfavorable light?
3. In which lessons of the quarter do we find especial emphasis upon the goodness and grace of God?
4. Which of the lessons of the term have their geographical location plainly indicated by the text and its surroundings?
5. Group together briefly the teachings of Jesus on prayer, thus far considered, noting first his own example and habit as illustrated at his baptism (Luke 3), after his day of miracles (Mark 1), before the sermon in the mount (Luke 6), after the feeding of the five thousand (Mark 6), before the Transfiguration (Luke 9), and before the Olivet Discourse (Luke 11).

as illustrated at his baptism (Luke 3), after his day of miracles (Mark 1), before the sermon in the mount (Luke 6), after the feeding of the five thousand (Mark 6), before the Transfiguration (Luke 9), Second, his encouragements to prayer, as illustrated in his graciousness to suppliants in the case of those who besought him for healing for themselves, upon themselves and their friends (notably in the case of the Gentile woman, Mark 7, 24-30), and also as illustrated in his parables concerning prayer, the Importunate Friend (Luke 11, 1-13), the Unjust Judge (Luke 18, 1ff), and the comparison between the generous instincts even of evil parents and what might be expected from the Good Father in heaven. Third, the teachings of Jesus as to the true spirit of prayer, as shown in the parable of the Pharisee and the Publican, and enforced in the Beatitudes (Matt. 5, 1-16). Fourth, the suggestions as to what we should pray for, contained in the prayer which Jesus taught his disciples.

#### GENERAL SUGGESTIONS.

The principal task before most of the classes will be the mastery of the story of the lessons. Even the teacher who retains them all in mind will do well. The next point is the fastening in the mind of some clear-cut point from each of the twelve lessons. This should be done if at all possible. Let the teacher remember that a term's work which cannot be reviewed has been a term's work more or less disjointed and unworkmanlike.

One is impressed as he reads the lessons of the quarter by the picturesqueness of our Master's preaching. There are no formal lectures, no systematic presentations of great doctrines, but everything is connected with some happening in his life. There is always a scene for the imagination to paint, and the play of emotion as well as of thought. Run through the lessons of the term w. this point in mind. See Jesus, at the beginning with the little child in his arms, then behold the miserable suppliant begging for mercy of his king—a mercy which, when he receives it, he is in no wise willing to bestow upon his fellow; then behold the scene in some wild gorge between Jerusalem and Jericho, where the Good Samaritan finds the unconscious victim of the robbers. Behold Jesus teaching how to pray, and hear the knock of the friend at midnight and the gruff and unwilling response from within. Then see the Master as he rebukes the vulgarity of the Pharisees who choose the best seats at the feast, and as he tells them whom they shall bid to their banquets. Then behold the servants of the rich man compelling the ragged denizens of alley and street to come to the great feast; recall the scene in the far country where the prodigal dreams of his father's house; behold the widow as she pleads for justice before the fierce and unprincipled judge who fears not God, neither regards man; look again into the eager face of the rich young man who inquires, "What must I do to be saved?" and see the incredulous look on Peter's face when Jesus declares that it is easier for a camel to enter in through a needle's eye than for a rich man to be saved. Imagine the smiling face of the Master as, looking up into the tree, he invites himself home to dinner with the despised publican, Zaccheus, and then see the calm, sad, but majestic Jesus riding into his capital amidst the acclamations of the peasants, and then finally behold him as he stands amid the tempting doctors of the law, and puts them one by one to shame as they seek to entangle him in his talk. Thus we see that there is not one of these lessons that does not have a picture in it with the colors of life—a picture, too, full of feeling, intense with human interest. These pictures by study and contemplation we should strive to see, bringing them out real and lifelike before our classes with all their lines. Indeed, one of the best ways to make men see the Christ is to make them see the men with whom Jesus talked and lived.

to represent goods for home consumption only, while in all cases the exports represent articles of domestic production. The Belgian returns are for principal articles only:

#### —Six Months' Imports.—

|               | 1906.        | 1905.        |
|---------------|--------------|--------------|
| United K'd'm  | £256,154,000 | £233,077,000 |
| United States | 132,812,000  | 122,904,000  |
| France        | 106,580,000  | 97,405,000   |
| Belgium       | 63,459,000   | 56,895,000   |

#### —Six Months' Exports.—

|               | 1906.        | 1905.        |
|---------------|--------------|--------------|
| United K'd'm  | £180,594,000 | £155,706,000 |
| United States | 175,961,000  | 151,263,000  |
| France        | 96,939,000   | 92,284,000   |
| Belgium       | 47,550,000   | 41,010,000   |

Another portion of the return gives the "imports and exports of merchandise" of various foreign countries for different periods. The following are Germany's returns for two full years, which may afford some ground of comparison with the half year's returns given above:

#### —Germany—Twelve Months.—

|         | 1905.        | 1904.        |
|---------|--------------|--------------|
| Imports | £336,500,000 | £318,206,000 |
| Exports | 279,272,000  | 261,132,000  |

It will be seen that her imports again largely exceed her exports, and that in the light of the British figures—which, it must be remembered, are of a later date—the rate of progress was not startling. These totals are exclusive of bullion and specie.

#### LUNATICS IN BRITISH ISLES.

##### The Number is Growing at an Alarming Rate.

A most disquieting volume for the British reader is the sixtieth report of the Commissioners in Lunacy. From this it would appear that lunacy is increasing in the British Isles in a most alarming fashion, while the cost of maintaining the pauper lunatics appears to be rapidly mounting out of all proportion to the numerical increase.

As showing what a burden they are to the British taxpayers, one finds from the report that 122,000 persons were detained last year at a cost of 15 shillings a week each, every penny of which had to be found by the efficient members of the community.

In less than fifty years the number of insane has more than trebled. From 3,000 in 1859 it has risen to 122,000, an increase which is parallel to the recent increase in the unemployed and paupers.

An important section of the report deals with the question how far insanity is due to heredity. The number of cases which can be definitely ascribed to this cause is given at about one-quarter of the total.

One startling feature of the report is that annually some 8,000 persons are discharged from asylums as nominally recovered, such persons, as is known from experience, being a source of danger of contamination to the population. But over and above this is the large number of patients sent into freedom every year "not recovered."

Last year there were 1,872 of such and the report calculates that "rather more than one-third of the discharged, including in this calculation those who have nominally recovered, have to be sent back to the asylums."

There is, accordingly, a constant stream of lunatics flowing out of the various asylums as well as a larger flood that is always flowing inward. This, of course, helps the production of hereditary lunatics. One-sixth of the women more than 20 years old admitted into asylums during the last four years were widows. Less than one-tenth of the men admitted were widowers.

The world's most remarkable book, at least so far as its appearance is concerned, is in the National Library of Paris. The letters are cut out of tissue paper with a pair of scissors. Each sheet of blue tissue, out of which the letters are cut, is placed between two pages of white, and so the matter is easily read.

The Rideau encircles the greater part of the town, leaping at last into the Ottawa over a cliff forty feet high. The Rideau Canal parallels at a little distance the curve of its river. The Gatineau enters the Ottawa on the other side.

At the other end one of the greatest natural attractions possessed by any city in the world has been given entirely to bald commercialism. The Chaudiere Falls, which for volume of water and sublimity of effect rank second only to Niagara among the cataracts east of the Mississippi, remain outside of all Ottawa's plans of civic improvement.

Like the Rideau Falls, which ought to be another superb embellishment of the city, they have no other present purpose of existence than to run sawmills. Of course that purpose will have to be recognized.

#### THE CHAUDIERE FALLS.

represent 70,000 horse-power at low water and 300,000 at high water. That means too much to the commercial prosperity of Ottawa to be thrown away.

At present there is a great volume of water which is not used. The falls are still a magnificent spectacle from the old bridge, the only point from which they can be seen to advantage, and there seems no reason why some attempt should not be made to beautify their surroundings without interfering with their commercial value.

Within a radius of forty-five miles it has water powers that can develop the energy of nearly a million horses at low water and more than three times as much at high. That is more than will ever be allowed to be taken from Niagara. To be a clean, smokeless, electric city, with some of nature's most glorious spectacles freely displayed in a crystal atmosphere seems to be Ottawa's fortunate destiny.

#### 11,000 YEARS OF WORK.

##### Old Country Firm's Proud Record of Long Service.

Some remarkable records in long service were revealed at the celebration at Sheffield, England, of the centenary of the firm of Messrs. James Dixon and Sons, electro-plate manufacturers of Cornish place.

The business still remains in the hands of descendants of the original founders, and to-day employs 850 hands. An analysis of the records of these employees showed that together they had passed 11,000 years in the service of the firm, an average of just under thirteen years each. The service records of the oldest hands are:

|                 |           |
|-----------------|-----------|
| Charles Gregory | 63 years. |
| Mary Hutton     | 60 years. |
| Ann Windle      | 60 years. |
| Wm. Fletcher    | 59 years. |

In all there are eighteen men and women who have been in the service of the firm from 56 to 60 years, 38 from 45 to 50, and 57 from 30 to 40 years.

In several instances the grandfathers of present employees were workmen under the first partners.

The workpeople were all entertained at the residence of the senior partner recently and they presented to him two beautiful pieces of silverware. The presentation was made and toasts proposed by some of the oldest employees.

#### NOT FAR TO GO.

The sort of conversation in which Martha Hackett often indulged was peculiarly trying to her cousin, Mr. Lane. "Martha's been here all the morning," said Mrs. Lane wearily at dinner one night. "She talked on and on about things that didn't amount to anything and were all disconnected. I endured it as well as I could, but it does seem sometimes as if she was wandering in her mind."

"Well, there's one thing," said Mr. Lane, grimly; "you needn't ever worry about her going far if that's where she's wandering."

ago that a certain young gentleman lost \$20,000 in an evening at bridge, playing with ladies; while it is reported that a young Guardsman sent in his papers some weeks ago at the suggestion of the War Office because it had become known to his commanding officer that he had lost \$22,000 in two evenings' play at a well-known club where high play is not the rule.

On the whole, however, it seems generally agreed in English society that reckless gambling shall not be tolerated, and at the majority of clubs it is firmly disallowed. But not so very long ago society regarded the man who would coolly throw away a fortune at a game of cards as something like a hero "broke in our way." The famous Colonel Mellish was a type of the gambler who lived in the palm days of this state of society. He was not a notoriously unlucky player, but he lost a very large fortune at cards. At a single game he once lost approximately \$500,000, and on other occasions he "dropped" sums ranging from \$50,000 to \$200,000 without rising from the tables; while he was known to lose \$50,000 by a single throw of dice, and to cut cards at \$5,000 a time.

#### PRECEPTS TO SECURE LONG LIFE.

##### Eat Little, Drink Plenty of Water, Exercise, and Have Purpose in Life.

Seven pithy precepts for the attainment of old age were given by General Booth recently, in explanation of his surprising activity and vigor at the age of seventy-eight. He said:

"Eat as little as possible. The average man eats too much. Instead of nourishing his body he overtaxes it, compelling his stomach to digest more food than it has capacity for.

"Drink plenty of water in preference to adulterated concoctions. Water is wholesome nourishment.

"Take exercise. It is just as foolish to develop the mind and not the body as it is to develop the body and not the mind. Perform some manual labor or: dig, walk, chop wood, or, if you can talk with your whole body, why, then, talk; but do it with your might.

"Have a system, but do not be a slave of the system. If my hour to rise is 8 a.m., and at that time I haven't had sufficient rest, I take longer time.

"Do not fill your life with a lot of silly and sordid pleasures, so that when you come to die you will find you have not really lived.

"Abstain from indulgences which overtax the body, and injure not only yourself, but the generations that come after you.

"Have a purpose in life that predominates above all else, that is beneficent to those about you, and not to your own greedy self alone. If there is one thing for which I am glad it is that I have found a purpose which involves not me alone, but all humanity."

#### A DUSTLESS CITY.

##### Nottingham Corporation Solves Dust Nuisance to Large Extent.

Nottingham, England, has solved the dust nuisance to such an extent that although hundreds of motor-cars are daily driven through or about the city, they now speed along without the suspicion of a dust-cloud in their trail.

The corporation, after three months of experiments, has found that calcium chloride, dissolved in the water with which the streets are sprinkled, keeps the roads perpetually damp. One dressing every three or four weeks is quite enough even in the hottest weather.

The cost of keeping a road free from dust by this method for a year is about £60 per annum, but as there are several months when no springing is necessary, it is estimated that the expense will not be greater than was entailed by the old method. For country roads, however, the cost is prohibitive.

# HOME.

## HONEY COOKING RECIPES.

**Honey Gums**—Take two quarts flour, three tablespoons melted lard, three-quarter pint of honey, one-half pint molasses, four heaping tablespoons soda, one level teaspoon salt, one-third pint of water, one-half tablespoon extract vanilla.

**Honey Jumbles**—To two quarts of flour add three tablespoons melted lard, one pint honey, one-quarter pint molasses, one and one-half level tablespoons soda, one level teaspoon salt, one-quarter pint water, one-half teaspoon vanilla. These jumbles and gems are from recipes used by bakeries and confectioners on a large scale.

**Cake or Cookies without sugar or molasses**—To two cups honey add one cup butter and four eggs; mix well, add one cup buttermilk, one quart flour, level teaspoon soda or saleratus. If it is too thin, stir in a little more flour or it will fall. It does not need to be as thin as sugar cake. Use very thick honey. Be sure to use the same cup for measure and to mix the honey, eggs and butter well together. You can make it richer if you like by using clabbered cream instead of buttermilk. Bake in a rather slow oven, as it burns very easily. To make cookies, use a little more flour, so that they will roll out well without sticking to the board. Any kind of flavoring will do. Use ground orange-peel mixed soft. It makes a very nice gingerbread.

**Aiken's Honey Cookies**—One teacup extracted honey, one pint sour cream, scant teaspoon soda, flavoring if desired, flour to make a soft dough.

**Fowl's Layer Cake**—To two-third cup butter add one cup honey, three eggs beaten, one-quarter cup milk. Cream the honey and butter together, add the eggs and milk, then add two cups flour containing one and one-half teaspoons baking powder previously stirred in. Then stir in flour to make a stiff batter. Bake in jelly tins. When the cakes are cold take finely flavored or candied honey, and after creaming it spread between layers.

**Nut Cakes**: Take eight cups sugar, two cups honey, four cups milk or water, one pound almonds, one pound English walnuts, three cents' worth each of candied lemon and orange peel, five cents' worth citron (the last three cut fine), two large tablespoons soda, two tablespoons cinnamon, two tablespoons ground cloves. Put the milk, sugar, and honey on the stove. Put in the nuts, spices, and candied fruit and stir in as much flour as can be done with a spoon. Set away to cool, then mix in the soda; don't make the dough too stiff. Cover up and let stand overnight, then work in flour enough to make a stiff dough. Bake when you get ready. It is well to let it stand a few days as it will not stick so badly. Roll out a little thicker than a common cookie and cut in any shape you like. This recipe originated in Germany, is old and tried and the cake will keep a year or more.

**Drop Cakes**—One cup honey, one-half cup sugar, one-half cup butter or lard, one-half cup sour milk, one egg, one-half tablespoon soda, four cups sifted flour.

**Shortcake**—To three cups flour add 2 tablespoons baking powder, one teaspoon salt, one-half cup shortening, one and one-quarter cups sweet milk. Roll quickly and bake in hot oven. When done, split the cake and spread the lower half thinly with butter and the upper half with one-quarter pound of the best flavored honey. Candied honey is preferred. If too hard to spread well it should be slightly warmed or creamed with a knife. Let it stand a few minutes, and the honey will melt gradually and the flavor will permeate all through the cake. It is to be eaten with milk.

**Tea Cake**—To one cup honey add one-

paste, then rinse out with plenty of hot water, and dry with soft cloths.

**To Boil Salmon**—Select a fresh, firm fish, wash and prepare it for dressing. Lay the salmon on a strainer, scatter salt over it very thickly, then cover with cold water. Let this heat gently, and only simmer, allowing three-quarters of an hour slow boiling for a fish of eight or nine pounds. Brush the skin over with salad oil just before serving.

**To Stop a Leak in a Pipe**—A very good temporary stopping for a leak in either a gas or water pipe may be produced by working powdered whiting and yellow soap into a paste. Press it into the leaking part of the pipe, and put on sufficient to make the hole airtight. This is only a temporary remedy, and should not prevent the plumber being secured at the first possible moment.

**To Destroy Cockroaches Easily**—Before retiring to bed, place a large basin where the cockroaches are most troublesome. Into this pour a glass of stout or beer. Place round the basin several pieces of firewood to form a ladder to the top of the basin. The cockroaches, attracted by the smell, climb up to the basin and topple in. By day scatter some powdered borax wherever black-beetles are noticed. If this trap is set for a few nights the plague will entirely disappear.

**An Ant Destroyer**—These disagreeable little insects can be effectually exterminated in the following way. Heat together in an earthenware vessel till dissolved half a pound of flowers of sulphur and four ounces of potash. Allow the mixture to get cold, then infuse with water, and with a brush apply to the infested place. Not many ants will survive a dose of this solution. For an "ant tray" slightly moisten a large-holed sponge, which can be procured at a small cost, and scatter sugar over it. The ants will go after the sugar until the sponge is full, when it can be lifted up and dropped into the basin of boiling water. The ants will thus be destroyed.

## PERSONAL PARAGRAPHS.

### A Few Interesting Facts About Some Well-known People.

Violets have always been the favorite flowers of the ex-Empress Eugenie.

The Duke of Devonshire was once asked for his silence. To a friend who asked him how many words he spoke a day he replied: "Count your own, deduct all needless ones, reduce one-third, and you'll be near to the number."

The Dowager Empress of Russia is very fond of the Danish black or rye bread, such as is baked for the soldiers. During Her Majesty's visits to Denmark she eats this kind of bread every day, and when at home a loaf is sent to Russia every fifth day.

The Emperor of China's tea is grown in a garden surrounded by high walls, so that none but the cultivators can approach it. The pickers must bathe three times daily, wear special gloves, and abstain from eating fish lest their breath should spoil the leaves' aroma.

Mr. Justice Phillimore is the only judge on the English Bench who can boast of being ambidextrous. It is curious to watch him taking notes in court or writing a letter, using his pen first in one hand and then in the other, apparently perfectly indifferent which hand is placing his thoughts on paper.

The Emperor of Japan draws a regular salary from the Treasury of \$3,000,000, and out of this he is expected to pay the expenses of his household. His private fortune is not supposed to be used for the purpose of keeping up his state, and since the Emperor is of a frugal mind the sum answers its purpose fully.

Mr. Charles Santley, the famous baritone, who is still singing, by the way, despite the fact that he will be seventy-two this year, is probably the greatest linguist in the concert world. He speaks French, German, Italian, and Spanish fluently, while he has also a wide knowledge of Latin and Greek.

The latest prodigy is an infant pain-

## NEAR THE MIDNIGHT SUN.

BASEBALL GAMES BEGAN AT 6.30 P. M. AT EDMONTON.

Indians on Their Travels Pass Com-  
modious Brick Banks — A New  
Yorker's Impressions.

In his sixth letter from the Canadian Northwest the special commissioner of the New York Post writes in part as follows:

Crossing the Gilbert Plains, we saw our first Northwest mounted policeman. We brought him into the car and asked him questions. In a strange country the most reliable sources of information are cab drivers, barbers and policemen. Lake, for that was the constable's name, proved no exception to the rule. He had been down to Brandon with a violently insane man, and had not slept for two days and nights. His adventures with his charge were a story in themselves.

He was stationed at Fort Saskatchewan, twenty miles from this point, and one of the things that he told us stuck in our minds—that on guard duty in June he had read a newspaper until 10.45 o'clock in the evening before the light failed, and had resumed his reading at 1.30 in the morning, when the sun was shining again. This sounded too much like an Arctic tale to be true. But the first thing seen in Edmonton was a large banner stretched across the street, bearing this inscription,

"BASEBALL TO-NIGHT AT 8.30."

The advertisement in the paper read, "Go to the baseball game after dinner to-night."

Edmonton is one of the big fur depots of the Northwest. The Hudson's Bay Company have been in here for years, and now they have a competitor in Revillon Freres, whose trappers are working over the same territory with the older company.

On the high hills above the river on which the city is built the prospect is pleasing to the eye. In the river below there are gold dredges seeking in a desultory sort of way to extract the precious dust from the sands of the river. "Farthest north" is the centre of an apparently rich farming district instead of a jumping-off place. The fields are diversified by frequent pieces of timber land. Coming north from Edmonton over the miles of flat prairie dotted with raw frontier towns, the contrast is striking. If you have ever seen Ashtabula, O., where so many people were killed in the famous wreck, you have seen Edmonton.

### BANKS AND INDIANS.

At a guess, though, Ashtabula has not eleven banks on its principal thoroughfare, each housed in a commodious brick building of its own. Nor is it any hotter in Chattanooga to-day than it is here, thousands of miles to the north. After you come within the zone of the warm winds from the Japan current, latitude ceases to be a factor in making temperature. While the land is new, the contrasts are startling. Within rifle shot of a railroad passenger office that could not be distinguished from the most spacious one on lower Broadway, I came upon an Indian family on their travels. First came the squaw pulling at the head of a reluctant piebald pack pony. The second pony was drawing a travois loaded with outfit and surmounted by a baby. On the third pony was an Indian girl with the lead line of another pack pony, and bringing up the rear without burden or responsibility was the old Indian who was the head of the outfit. They were travelling across country to visit friends and paid not the slightest heed to our comments or presence.

### THE FIGHT WITH THE C. P. R.

Edmonton had but 1,500 or 2,000 people in 1898, when the rush to the Yukon

## ON THE FARM.

### WESTERN METHODS WITH SILO.

In my western experience frosted in nature corn has been put into the silo and has given better results than when handled in any other way writes M. Thos. Convey. Overripe corn containing but little moisture has been used. When thoroughly wetted during cutting it made a fair quantity of silage. However, there is a best time and it should be conformed to as nearly as possible.

If silage is put in too green it will cure with a strong acid flavor and smell like vinegar. It does not have best food value in this condition. Fed generously, it is too laxative and will get stock out of condition. In dairy work it does not produce a well flavored milk. There is no excuse for putting up this kind of silage, except in latitudes so far north that corn of proper maturity cannot be grown every year. This would apply for instance, to parts of the North-West where dry feeds are abundant and succulent feed very scarce. This grade of silage, fed moderately, would give good results in combination with ground feed and dry forage. Corn that is too ripe develops too much heat in curing.

As it usually takes several days to fill a silo, it is better to have corn of different degrees of maturity. Generally the ripest is put on top. The better way would be to put the most mature corn in the bottom and greenest on top. Filled in this way there will be little loss on top. Silage spoils there by drying out and then moulding; so guard against the drying out.

Where it is possible to get corn into the silo in a few days I would prefer to cut when it takes on that light green color found in corn just fit to shock. To the trained eye this is just as discernible as a field of ripe, small grain but in a majority of cases, it is unsafe to wait so long. Allow for accidents, wet weather, etc., and start in time, so that you will get most of it in in best condition. Try to finish with some green stuff. We have cut at various lengths from one-half to 1½ inches and have not found any difference, except that on the top of silo the shorter cut was best. The longer cut left ¼ more air spaces and the silage would not keep so well.

When through we rarely cover the silo. If you want to let it stand some time before feeding, husk the corn out cut fine, wet down thoroughly and there will be little waste. If your silo is large enough, feeding may be commenced at once. While it will spoil more than settled silage, yet in this way you will have least loss.

Care should be taken that there is no unnecessary labor. It is just as easy to load corn on a low wagon as it is to carry a shock. With a proper arrangement of cutter there is little more lifting. The carrier should deliver as near the centre of silo as possible, and silage should be leveled and tramped next to the wall just as it is cut. It is not possible to have evenly mixed and well settled silage where the loading is done at long intervals. It is preferable to keep it highest next the walls.

The corn binder is the best implement for cutting in the field as the tied corn is so much more easily handled. With the large cutter it is not necessary to cut bands. We have our own engine and cutter and run a small crew. One would suppose this the most economical, but in figuring with three friends who own a large cutter and hire an engine, they cut more economically than we do, as they run the help of three farms and cut in 100 tons a day. It costs us about 60 cents a ton to get into the silo, just for labor of men and teams and time. We drill corn about six inches apart. The corn is good enough to husk and would yield from 80 to 100

the best flavored honey. Candied honey is preferred. If too hard to spread well it should be slightly warmed or creamed with a knife. Let it stand a few minutes, and the honey will melt gradually and the flavor will permeate all through the cake. It is to be eaten with milk.

**Tea Cake.**—To one cup honey add one-half cup sour cream, two eggs, one-half cup butter, two cups flour, scant one-half teaspoon soda, one tablespoon cream of tartar; bake thirty minutes in a moderate oven.

### SOME DAINY DISHES.

**Orange Cream.**—Into a pint of boiling water mix two tablespoonfuls of arrowroot. Add a cupful of sugar and the juice of two lemons; boil five minutes and remove from the fire. Beat thoroughly the yolks of two eggs, turn into a mold and when cold serve with the whites of the eggs beaten to a froth with four tablespoonfuls of powdered sugar, spread over it.

**Tomato Pie.**—Line a pie plate (one of the deep kind) with a good and not too rich crust. Turn the contents of a can of tomatoes into a stewpan and set over the fire. When boiling hot, add a little flour and allow the mixture to simmer until it begins to thicken, then remove from the fire, stir until cool and turn into the pie plate. Cover thickly with coarse cracker crumbs, drop bits of butter over it and a dash of pepper, salt and sugar and bake.

**Creamed Finnan Haddie.**—Pour two eggs well beaten into a cup of milk and stir thoroughly. Have a cupful of pickled finnan haddie browned in butter in a saucepan and turn the milk and egg mixture in. Thicken with a little flour and milk, season and serve hot with baked potatoes for breakfast.

**Prune Cornstarch.**—Set a quart of milk over the fire in a double boiler; beat up two eggs with three tablespoonfuls of sugar, two of cornstarch, and make thin with a little milk. Add this to the milk, stir until it thickens; take from the fire, adding a little vanilla, and stir in some chopped prunes which have been soaked over night. Stir well and pour into a mold to cool.

**Eggs A la Martin.**—Have ready a dish that can be put in the oven and baked. It should be like a deep, ordinary soup plate, without the wide rim. It is easy enough to find plenty such at any store. Have it heated, but not too hot. Put into a small saucepan a teaspoonful of butter. Let it melt, but be careful that it does not brown. Then add a teaspoonful of flour or more, if it is preferred thicker, and then very slowly, after the flour is well mingled, a cup of milk or cream. Then add four tablespoonfuls of grated cheese. Stir well, and when thoroughly heated pour into the dish you have ready; and with great care (so as to keep the shape) drop into the mixture four eggs. The ordinary dish will hold about four eggs and look well, but it may be possible to find larger ones. Put at once into the oven, and when the eggs are set serve at once.

### HINTS FOR THE HOME.

To remove iron rust, soak the stain in lemon juice, sprinkle heavily with salt and bleach for four or five hours in the sun.

In washing glassware a bit of bluing added to the water in which glass is washed is said to enhance the brilliancy of the crystal.

To Color Your Lace Curtains.—When the curtains are nicely washed rinse in cold clear water, and squeeze perfectly dry. Plunge into water that has been tinged with strained coffee and hang out to dry.

To Whiten and Improve the Complexion.—Take two teaspoonfuls of flowers of sulphur and mix it in a cupful of milk. Let this stand for three hours so that the sulphur will settle, then apply the milk to the face, leave it on for a minute, then wash it off in warm water.

To cleanse brass pans that have not been used for some time, scour with salt and vinegar to remove any sign of verdigris. Clean with a good polishing

Mr. Charles Santley, the famous barton, who is still singing, by the way, despite the fact that he will be seventy-two this year, is probably the greatest linguist in the concert world. He speaks French, German, Italian, and Spanish fluently, while he has also a wide knowledge of Latin and Greek.

The latest prodigy is an infant painter. Two of the most striking pictures in this year's Paris Salon are by an artist who has not yet passed his fifteenth year. His name is Tade Styka, and he is the son of a Polish painter. The boy has been an accepted exhibitor at the Salon ever since 1903, when he had a portrait of Tolstol accepted.

The King of Spain declared in boyhood that to be a monarch is a hard fate. When questioned why, he explained: "Kings always have to learn to do nasty things, then do them, and then are expected to look as though they liked doing them." His Majesty is very fond of tennis, and handles a racket with no little skill. Though he has some musical talent, he cannot sing, having a poor voice.

The King of Italy, whose fondness for music is well known, is probably the first Prince of the House of Savoy who has taken an interest in musical matters. His grandfather, Victor Emmanuel II., frankly detested music, and said when the cannon were roaring at the Battle of Solferino, "That is the only music I have ever been able to appreciate." And his son, King Humbert, was much of the same opinion.

The Rev. S. Baring-Gould wrote the popular hymn, "Onward, Christian Soldiers," forty years ago, when in Yorkshire. One Whit-Monday some Sunday-school children were to march in procession from one village to another, and, as he could think of no suitable hymn for them to sing on the journey, he wrote that one at the last moment, never dreaming that its popularity would be instant and would extend all over the world.

Mr. Thomas A. Edison is exceedingly fond of music. His favorite instrument is the organ, from which he derives much mental rest. Often in the early hours of the morning, when he has been in his laboratory for eighteen hours at a stretch and is overcome with fatigue, he sits down at his organ, and such is the effect of the music upon him that, after two or three tunes, he feels quite refreshed, and is able to continue his labors for several hours longer without unduly distressing himself.

Sir Lawrence Alma-Tadema, the distinguished painter, is a strong believer in the luckiness of numbers. His lucky number is seventeen. His wife, he will tell you, was seventeen when he first met her; the number of the house to which he took her when they were married was seventeen; his present house bears the same number doubled; and the first spade was put to the work of rebuilding it on August 17th, 1886. It was on November 17th that he and his family first took up their residence there.

Mark Twain has been telling this billiard story in New York: "Once when I was an underpaid reporter in Virginia City, a stranger came and opened a billiard parlor. I went to see him, and he proposed a game, to which I agreed. 'Before we begin,' he said, 'just knock the balls around a little so that I can get your gait.' I do so for a while, and then he said, 'I will be perfectly fair with you. I'll play you left-handed.' I felt hurt, for he was cross-eyed, freckled, and had red hair, so I determined to teach him a lesson for his audacity. He won first shot and ran clean out, taking my half-dollar, and all I got was the opportunity to chalk my cue. 'If you can play like that with your left hand,' I said, 'I'd like to see you play with your right.' 'I can't,' was the prompt reply; 'I'm left-handed.'"

### A DAILY HABIT.

Farmers ought to make good financiers.

"Why so?"  
"Because they have so much practice in watering the stock."

den or responsibility was the old Indian who was the head of the outfit. They were travelling across country to visit friends and paid not the slightest heed to our comments or presence.

### THE FIGHT WITH THE C. P. R.

Edmonton had but 1,500 or 2,000 people in 1898, when the rush to the Yukon gave the town its first impetus to a larger growth. Notwithstanding, four years later the population had not increased. The Hudson's Bay Company has had a trading post at Edmonton for more than a hundred years, but the Saskatchewan River was the only outlet to the world. Freight was prohibited. A keg of nails was worth \$50. The greatest need of the town was a railroad. Time after time the citizens besought the Canadian Pacific to come to their aid. When the road finally decided to come in, its officers concluded that they would save the cost of a bridge over the river by founding a new town on the opposite bank. Strathcona came into being, six miles away, and Edmonton was invited to cross over. Strathcona was at first called Edmonton, and the old town was calmly requested to give up its name.

The next move of the railroad people was to request the Dominion Government to move the land office across the river. The loss of this institution, of course, meant the death of the town. However, the Federal Government issued the order, the agent packed up the property at his office, and started to move when the citizens of Edmonton with rifles, stopped the proceedings. The Mounted Police came in and averted bloodshed. The officer in charge persuaded the land agent not to move until an appeal had been made to Ottawa. The citizens of Edmonton posted armed sentries and waited. The Ottawa Government changed its mind and the land office stayed.

### RAILROADING IN EDMONTON.

For fourteen years that followed the single ambition of Edmonton was to keep ahead of Strathcona in growth, despite the advantage the new town had in its railway connection. Now the Canadian Northern has come into Edmonton. The Grand Trunk Pacific will stop here, and it will be on the main line of "Jim" Hill's new Western Canada. Finally, the Canadian Pacific is building a high level bridge that will bring its line to Edmonton, and that without a single concession from the town that would have been glad to have donated any amount of land for this railway station at any time since the conflict began. Though Edmonton is not the northernmost point in Alberta yet developed, it is south of the centre of this great Province, more than half of which is still given over to the Hudson's Bay posts and to traders and hunters. It is the section of Western Canada next to be opened after Saskatchewan and the lower half are filled with settlers.

### CHEAP AT THE PRICE.

Old Mrs. Mullins was pretty rich, but rather parsimonious. She attended church regularly, but what she put into the collection plate was hardly worth mentioning. One Sunday, at dinner, after the old lady had returned with her small grandson from the morning service, her daughter asked the natural question, "How was the sermon?" "Poor," said Grandma Mullins, emphatically; "mighty poor."  
"But, grandma," said the little boy, "What could you expect for a cent?"

### NEW ZEALAND'S PROSPERITY.

The general prosperity of New Zealand is remarkable. Out of a population of a little less than 1,000,000 one-third have money in the savings banks. The wealth per head is nearly £300, which is the largest of any country in the world. Statistics show for New Zealand the highest health and the lowest death rate of any country.

own a large cutter and hire an engine they cut more economically than we do as they run the help of three farms and cut in 100 tons a day. It costs us about 60 cents a ton to get into the silo just for labor of men and teams and time. We drill corn about six inches apart. The corn is good enough to husk and would yield from 80 to 100 bushels per acre. This makes rich feed and lots of it.

### MERITS OF TAMWORTH SWINE.

Tamworth swine seem to be peculiarly adapted to grazing or foraging and will just as readily respond to closer confinement if necessary. I find during my 11 years' experience that Tamworths will thrive well and do well on pasture alone, writes Mr. A. C. Hallman. Brood sows will not require anything else but pasture in the summer. In fact, at any age, with a liberal supply of pasture or succulent food, they will thrive well with very little grain. In England where they are quite extensively raised, they have become very popular and are known as a grass pig, owing, no doubt, to their inherited qualities and tendencies.

The packer calls for a pig of the following description: A long-bodied, deep-sided animal; small head, light shoulder, well fleshed loin, showing the same width along the back, not widening out at the shoulder or narrowing in at the flank, not too fat nor yet lean, weighing as near 180 pounds as possible.

While we have other desirable breeds of hogs, there is no other breed that measures up as close to the standard for a model bacon pig as a good typical Tamworth.

The general characteristics are: Color, red; head small; light bowel; less waste to the packer than any other breed; neck and shoulders light; long bodies; deep sides; backs well fleshed; hams full; good bone, but not coarse; quiet disposition, very hardy; good mothers; very prolific; good feeders; large weights and early maturity. Their looks are very deceiving. Instead of being of a wild nature, they are very docile and make the best of mothers.

Where the Tamworth would be of immense value to the hog industry would be for crossing purposes with the fat breeds. Cross breeding makes a much better and more profitable pig, gives large weights at an early age and a pork or bacon that would touch the palate of the most fastidious consumer.

Repeated experiments prove that where Tamworths were put in competition with other breeds at the different experiment stations they will always hold their own with the best of them in point of rapid gain for amount of food consumed; and more than their own in point of first-class bacon, such as the most particular consumer demands.

I depend largely on grazing in the summer, with a fair allowance of grain at finishing, or a little at all times. In the winter, a liberal allowance of roots with some grain is given. Brood sows run under a shed or some cheap protection for shelter in winter with a good allowance of roots and whole oats scattered on a feeding place. Young and growing pigs have good warm pens with plenty of light, good ventilation and a good, clean, dry bed and a frequent run outdoors.

"I market my pigs at from six to eight months old, giving them plenty of chance to grow, rather than fatten too fast, weighing from 180 to 220 pounds, always commanding the highest market price."

Tamworth swine deserve a more prominent place with our hog industry in the future than they have received in the past, and I have no doubt as their merits become known, both to the producer and the consumer, they will get their proper standing and that they, in no distant future, will rank among the most popular breeds in America.

Jack had been taken to have a tooth filled. "Mamma," he asked, after it was all over, "is that man called a dentist because he fills dents?"

# The Song of the Hair

There are four verses. Verse 1. Ayer's Hair Vigor stops falling hair. Verse 2. Ayer's Hair Vigor makes the hair grow. Verse 3. Ayer's Hair Vigor cures dandruff. Verse 4. Ayer's Hair Vigor makes the scalp healthy, and keeps it so. It is a regular hair-food; this is the real secret of its wonderful success.

### WHAT OTHER PAPERS SAY

Kingston Whig.

Expediency is not going to cut any figure with Mr. Whitney. So he alleges. But has it not been crowding him already? He is not redeeming the promises he made before the election.

Hamilton Herald.

It is now stated that woodenware made at the Central Prison is being marketed in large quantities in this province. That is in direct violation of the provincial secretary's pledge. There is no redeeming feature about that prison contract.

Toronto Globe

The men who water milk will have to explain in court. Those who skimmed the cream off the insurance companies will find their time coming later.

Galt Reporter. (Cons.)

Let Mr. J. H. Whitney once get fighting mad, the Hon. Adam Beck will get all the backing he wants in his fight with the Niagara power interests. Those syndicate letters emanating from the combine in Toronto should have the effect of making the Premier square before the magnates.

New Westminster Daily News.

The faith of the Liberal Government in Canada's future is fully justified by the event. The men who told us two years ago that the policy of the Government spelled ruin for Canada would hardly care to be reminded now of those pessimistic prophecies. That the means of transportation available will be taxed to the utmost is quite certain; indeed, the progress of the country will outrun the utmost efforts of the railway builders to keep abreast of it.

Clearing Sale.

In order to clear out the following lines at the close of the season, we will offer at cost for cash during August and September, our entire stock of gas stoves, gasoline stoves.  
**MADOLE & WILSON**

## WATERLOO.

**Grouchy Was Solely to Blame For the Downfall of Napoleon.**

Napoleon would have won the battle of Waterloo had Grouchy prevented the junction of the Prussians with the English army, because he would not have had to fight two battles at once. Few persons realize that the so called battle of Waterloo is in reality a double battle, somewhat like Jena and Auerstadt. Napoleon fought one battle at Waterloo against the English. On the arrival of the Prussians he was forced to go in person toward Planchenoit and there fight another battle against the Prussian army, leaving to Ney the conduct of the troops at Waterloo. It is a well known maxim in war that a very great or decisive victory cannot be gained unless one commander makes a serious blunder of which the other takes immediate advantage. It is very evident that the fact of the emperor having to fight two battles at once instead of concentrating his attention on one alone enormously increased the possibility of a mistake. Moreover, Napoleon did not have the able lieutenants of his former campaigns. Bessaix, Kleber, Lannes and Bessieres were dead, Massena and Macdonald had taken the oath of allegiance to the Bourbons, and Murat had split with the emperor. Napoleon's personal attention was therefore imperative. To Grouchy alone all blame must be attributed for his defeat.

## POWER OF CHEERFULNESS

The Way One Druggist Lightens the Ills of His Customers.

A pale, weak girl entered a downtown drug store the other day. She seemed about to collapse. The proprietor assisted her into a chair and prepared a mild stimulant for her. The druggist's manner was so sympathetic that a little later she confided to him that she suffered with her heart and feared she had not much longer to live.

"Heart disease?" inquired the druggist genially. "Why, I have heart disease myself; have had it for years. That's nothing. I don't worry myself about it. I don't look like a man with a load on his mind, do I? You probably think that you are liable to drop off any time. On the contrary, any doctor will tell you that the average person with heart disease generally lives to a good old age. The very care that a sufferer from heart disease takes of himself or herself is calculated to lengthen the years indefinitely. You see, a man with a weak heart naturally is careful of himself a bit. He doesn't commit any excesses, never overdoes anything, lives in moderation and thus keeps his vitality unimpaired. That's all you have to do—just take care of yourself. What's the use of worrying?"

The druggist's cheerfulness was infectious, the genial interest of his talk made depression appear foolish, and the girl soon began to look more hopeful and even smiled. After the druggist had gayly chatted with her awhile she rose and walked out of the store

## GERMAN GLEE CLUBS.

Early Days of the Saengerfests in This Country.

In the early days of saengerfests in this country they were held annually. The third saengerfest was held in New York in 1852, and many Newark Germans attended. Below are given extracts from the Newark Daily Advertiser, printed at the time:

June 10, 1852.—The German glee clubs of New York will celebrate the third annual festival in New York this year on the 19th to 22d of June. The New York Journal of Commerce states that the glee clubs from abroad will be received by the New York clubs and honored with a torchlight procession. The principal performance will take place at the Academy of Music, Fourteenth street, when the choruses will be sung by over 1,200 male voices, accompanied by an orchestra of 100 pieces. On the 22d will be held a picnic on the Bloomingdale road, opposite Striker's bay.

June 22.—Third musical jubilee of German singers, Saturday to Tuesday, 19th to 22d. The execution of the "Magic Flute" overture by 1,200 voices was very uncommon and surprising by the New York clubs and was received with great applause. The Eintracht of Newark sang "Wallisicher Schiffergesang" in a distinguished manner. But the most marked performance was Martin Luther's "Ein feste Burg ist Unser Gott," arranged by J. C. Hatcher. We felt immediately what religious music really is—how grand, solemn and sub-

split with the emperor. Napoleon's personal attention was therefore imperative. To Grouchy alone all blame must be attributed, for had he prevented the union of the Prussians with the English the emperor would have had to fight only one battle at a time and could have given his entire personal attention to that one battle.

In the second place, Napoleon would not have been forced to fight with 71,947 men against two armies numbering about 125,000—nearly two to one against him. He would have had 71,947 good soldiers pitted against a raw, undisciplined army of 67,601 men under the Duke of Wellington, which was not only inferior in mere numbers, but far inferior in morale and experience. The chances would have been greatly in favor of the French. Then, too, the French army was commanded by the acknowledged master of modern warfare, whose brilliant successes at Rivoli, Marengo, Austerlitz, Jena, Friedland, Wagram, the Borodino and Dresden had dazzled the whole world. Until then Napoleon had never been defeated in any great decisive battle except Lelispic, and the French were strong in their confidence of the emperor's success. Two of the best writers on the Waterloo campaign, Shaw-Kennedy and Sibourne, both Englishmen, concur in saying that had Grouchy kept the Prussians away the English army would have been badly beaten. This view is also held by the ablest writer of all, Mr. Ropes.

### No Wool Over His Eyes.

Uncle Abe, a grizzled old negro, visited a zoological garden. He stood fascinated before a cage containing a chimpanzee and could not be induced to move. After awhile the animal came to the front of the cage and Uncle Abe spoke to him.

"Howdy?" he said. "Howdy?" The chimpanzee not making any response, Uncle Abe chuckled and winked at him knowingly.

"Dat's right; dat's de way ter do! Doan' you nebber 'gin ter talk. Ef you does white man put er hoe in yer han' en meck yer wuk?" he said.

## If a Cow gave Butter

mankind would have to invent milk. Milk is Nature's emulsion—butter put in shape for digestion. Cod liver oil is extremely nourishing, but it has to be emulsified before we can digest it.

## Scott's Emulsion

combines the best oil with the valuable hypophosphites so that it is easy to digest and does far more good than the oil alone could. That makes Scott's Emulsion the most strengthening, nourishing food-medicine in the world.

SCOTT & BOWNE, Chemists

Toronto, Ont.

50c. and \$1.00. All druggists

ful and even smiled. After the druggist had gayly chatted with her awhile she rose and walked out of the store with a firm step.

This druggist, though he would scorn the idea if suggested to him, is a benefactor to humanity. He is a believer in the power of cheerfulness, and the good that he does in his peculiar way is not easy to estimate.

Not a day passes that he does not impart his message of the cheerful life to some despairing individual. He makes all others' ailments his own and points out the uselessness of worry. A man will come in bent and suffering. Perhaps he confides to the druggist that he has kidney disease and fears his days are numbered. The druggist immediately informs him that there is no cause for alarm; he has had kidney trouble himself for, oh, so many years, and has no intention of dropping off. That druggist, in the course of a week, probably will acknowledge that he is afflicted with every ailment except housemaid's knee. He makes every complainant feel better. He fairly radiates good cheer and optimism. It is his belief that half the sufferers in the world have complaints that bright spirits will overcome. But even when they have a real disease it is his theory that a little cheerfulness doesn't hurt and that the malady is only aggravated by constant depression. He makes it his mission in life to drive away depression and turn the thoughts of people toward brighter things. His cheerfulness is a tonic that never fails to act.

### Test For Ready Boiled Lobsters.

Should ready boiled lobsters be purchased, test them by gently drawing back the tail, which should rebound with a spring. If the tail is not curled up and will not spring back when straightened the lobster was dead when boiled and should not be eaten. Choose the smaller lobsters that are heavy for their size, as the larger ones are apt to be coarse and tough. Lobsters weighing from one and a half to three pounds are the best in size. All parts of the lobster are wholesome and may be used, except the stomach, which is a small hard sack and contains poisonous matter and lies directly under the head, and a little vein which runs the entire length of the tail.

### A Queer Wager.

There are men whose pride is in the stolid endurance of acute discomfort. They insist upon doing unpleasant things in order to convince themselves that they can do them. At Oxford some years ago there was an eminent Rugby football player whose passion was to discover the most uncomfortable things and then to do them. One evening a humorist suggested that—as it was January—it would be rather beastly to sit in a cold bath all night long. The footballer at once offered to wager that he could sit till morning chapel time in his cold tub. And he did it.—London Chronicle.

### Ease and Fluency.

When Thiers was president of the French republic, he was about to issue some important manifesto and submitting the draft to a critical friend.

"Yes," said the critic, "the matter is clearly expressed, but I miss the ease and fluency of your usual style."

"Ah," replied Thiers, "I have not worked those in yet! The ease will cost me much labor, and the fluency I shall have to drag in by the hair of its head."

### CASTORIA.

The Kind You Have Always Bought  
Bears the  
Signature  
of  
*Charles H. Fletcher*

Martin Luther's "Ein Feste Burg Ist Unser Gott," arranged by Finke. We felt immediately what religious music really is—how grand, solemn and sublime such a hymn is when performed by a large orchestra and hundreds of voices. It was something to be remembered long. Kossuth was present during an intermission and was cheered.

## THE SERPENT'S VENOM.

Mohammedan Legend of the Origin of the Tobacco Plant.

The prophet was taking a stroll in the country when he saw a serpent, stiff with cold, lying on the ground. He compassionately took it up and warmed it in his bosom. When the serpent had recovered it said:

"Divine prophet, listen. I am now going to bite thee."

"Why, pray?" inquired Mohammed.

"Because thy race persecutes mine and tries to stamp it out."

"But does not thy race, too, make perpetual war against mine?" was the prophet's rejoinder. "How canst thou, besides, be so ungrateful and so soon forget that I saved thy life?"

"There is no such thing as gratitude upon this earth," replied the serpent, "and if I were now to spare thee either thou or another of thy race would kill me. By Allah, I shall bite thee."

"If thou hast sworn by Allah, I will not cause thee to break thy vow," said the prophet, holding his hand to the serpent's mouth. The serpent bit him, but he sucked the wound with his lips and spat the venom on the ground. And on that very spot there sprang up a plant which combines within itself the venom of the serpent and the compassion of the prophet. Men call this plant by the name of tobacco.—Conte Arabe.

## DO YOU KNOW

That Dr. Pierce's Favorite Prescription is the only medicine sold through druggists for woman's weaknesses and peculiar ailments that does not contain large quantities of alcohol? It is also the only medicine, especially prepared for the cure of the delicate diseases peculiar to women, the maker of which is not afraid to take his patients into his full confidence, by printing upon each bottle wrapper all the ingredients entering into the medicine. Ask your druggist if this is not true.

"Favorite Prescription" too, is the only medicine for women, all the ingredients of which have the unqualified endorsement of the leading medical writers of the several schools of practice, recommending them for the cure of the diseases for which the "Prescription" is advised. Write to Dr. R. V. Pierce, Buffalo, N. Y., for a free booklet, and read the numerous extracts from standard medical authorities praising the several ingredients of which Dr. Pierce's medicines are made, and don't forget that no other medicines put up for sale through druggists for domestic use can show any such professional endorsement. This, of itself, is of far more weight and importance than any amount of so-called "testimonials" so conspicuously flaunted before the public, in favor of the alcoholic compounds.

The "Favorite Prescription" cures all woman's peculiar weaknesses and derangements, thus banishing the periodical headaches, backaches, bearing-down distress, tenderness and dragging-down sensations in lower abdomen, accompanied by weakening and disagreeable catarrhal, pelvic drains and kindred symptoms.

Dr. Pierce and his staff of skilled specialists may be consulted free by addressing as above. All correspondence is treated as sacredly confidential. By consulting in this way the disagreeable questionings and personal "examinations" are avoided.

The People's Common Sense Medical Adviser contains some very interesting and valuable chapters on the diseases peculiar to woman. It contains over one thousand pages. It is sent post paid, on receipt of sufficient in one-cent stamps to pay cost of customs and mailing only, or 31 cents for a copy in flexible paper covers, or 50 cents for a cloth-bound copy. Address Dr. R. V. Pierce as above.

Dr. Pierce's Pellets regulate and invigorate stomach, liver and bowels. One a laxative, two or three cathartic.

# Camden Agricultural Society Fall Fair.

The Camden fall fair at Centerville on Saturday last, drew an unusually large turn out. The weather was all that could be desired and in consequence the fair was more than usually successful. The exhibits were filled, The Yarker Band discoursed music on the grounds during the afternoon. The horse races were well contested and were quite interesting.

## CLASS I—HORSES IN HALTER.

Judges—W. G. Hawley, W. M. Chamberlain, A. F. Reid.  
Best stallion, draught—Jas. McCormick, Vanluven Bros.  
Stallion, general purpose—Alf Milligan.  
General purpose brood mare and colt—W. J. McGill, Andrew Moore, Jas. Oray.  
Brood mare and colt, draught—Moore Bros. Levi Evans, Jas. McDonald.  
Brood mare and colt, roadster—J. R. Lochead, Alf McCutcheon, John Dunn.  
3-year-old mare or gelding, general purpose—Andrew Moore, C. D. Wagar.  
3-year-old draught mare or gelding—Moore Bros, Jas. Hinch.  
3-year-old mare or gelding, roadster—S. G. Hogle, Jas. Reid.  
2-year-old mare or gelding, general purpose—Pat Evans, Jas. Oray.  
2-year-old draught mare or gelding—Moore Bros, Wagar and Card.  
2-year-old mare or gelding, roadster—C. H. Lochead, T. F. Reid.  
Yearling colt, General purpose—Wagar and Card, George Milligan.  
Yearling colt, draught—P. E. R. Miller, Jas. McCormick.  
Yearling colt, roadster—John Vanalstine, S. G. Hogle.  
Special—Best pure bred stallion with pedigree, with five of his colts—Alf Milligan

## CLASS II—HORSES IN HARNESS.

Judges—Chas. Anderson, Jos. Marsh.  
Best stallion, any age, roadster—John Chatterton, Levi Vanness.  
Best span heavy draught, horses—Jas. McCormick, F. Clancy.  
Best span horses, general purpose—R. H. Cook, F. H. Henderson.  
Best span matched carriage horses, over 15½ hands—Michael Doyle, J. D. Wagar & Son.  
Best span of matched carriage horses, under 15½ hands—R. H. McGuinness, S. P. Fitzmartin.  
Carriage mare or gelding in harness—C. D. Wagar, Chas. Loyst, Alf Milligan.

## Special Prizes—

By the Track Co., Trotting Horse, action and style considered—M. J. Whalen, R. H. Caswell.  
By the President, Saddle horse, breed, action and speed considered—E. L. Hinch, W. R. Finnegan.  
By Mr. P. Evans, Green Trotting Horse—Thos. Cook, R. Paul, C. Loyst.

## CLASS III—HORNED CATTLE.

(Pure Bred with Pedigree)

Best bull, 2-year-old and over, age considered—R. H. McGuinness, C. D. Wagar.  
Best yearling bull—J. R. Lochead, John Vanalstine.  
Best cow giving milk—J. M. Lochead, John Vanalstine.  
Best 2-year-old heifer—J. M. Lochead, J. R. Lochead.  
Best yearling heifer—J. M. Lochead, J. R. Lochead.  
Best bull calf, 1906—J. M. Lochead, R. H. McGuinness.  
Best heifer calf, 1906—J. M. Lochead, John Vanalstine.  
Best pure bred bull with pedigree, Diploma—R. H. McGuinness.

## GRADES.

Best cow giving milk—J. M. Lochead, J. R. Lochead.  
2-year-old heifer—J. M. Lochead, J. R. Lochead.  
Best yearling heifer—J. M. Lochead, R. H. McGuinness.  
Best heifer calf, 1906—J. M. Lochead, R. H. McGuinness.  
Special prize—Silver cup for best grade heifer 2-year-old, donated by Crown Bank, Enterprise, J. M. Lochead.

## POULTRY.

Best half bushel peas—J. B. Aylesworth, P. E. R. Miller, Alf Milligan.  
Best half bushel barley—P. E. R. Miller, Alf Milligan, M. A. Gilmore.  
Best half bushel oats—J. B. Aylesworth, J. Vanalstine, P. E. R. Miller.  
Best half bushel buckwheat—Alf Milligan, P. E. R. Miller, Jas. McDonald.  
Best half bushel timothy seed—P. E. R. Miller, Alf Milligan, M. A. Gilmore.  
Best peck of beans—P. E. R. Miller, M. A. Gilmore, Levi Vanness.

## CLASS 6—DOMESTICS

Judges Mrs. W. Hawley, Mrs. J. A. Wagar.  
Best five pounds honey—R. H. McGuinness, Wagar and Card.  
Best five pounds maple sugar, in cake—R. H. McGuinness, Alf Milligan.  
Best loaf home-made bread—John Vanalstine, Geo. Clancy.  
Best knit bed spread—P. E. R. Miller, M. A. Gilmore.  
Best coverlet—Geo. Clancy M. A. Gilmore.  
Best quilt—M. A. Gilmore, P. E. R. Miller.  
Best pair woolen socks—R. H. McGuinness, J. Cassidy.  
Best pair woolen stockings—R. H. McGuinness, Joe Clancy.  
Best pair woolen mittens—P. E. R. Miller, R. H. McGuinness.  
Best batenberg work—P. E. R. Miller, P. D. Shorey.  
Best popcorn work—J. B. Aylesworth, M. A. Gilmore.  
Best sample etching work—P. E. R. Miller M. A. Gilmore.  
Best table drapery—P. E. R. Miller, R. H. McGuinness.  
Best collection of doilies—P. E. R. Miller, P. D. Shorey.  
Best pair pillow shams—R. H. McGuinness P. E. R. Miller.  
Best collection of fancy work—R. H. McGuinness, P. E. R. Miller.  
Best collection of paintings—P. E. R. Miller.

## CLASS 7—FARM IMPLEMENTS AND MANUFACTURES

Judges—Charles Dewey, Jas Hinch.  
Best plow—A. C. Connolly, John Burgoyne.  
Best drill—Levi Vanness, J. M. Lochead.  
Best field cultivator—Herb Clancy Fred Clancy.  
Best corn cultivator—P. E. R. Miller, J. M. Lochead.  
Best lumber wagon—Herb Clancy J. B. Aylesworth.

Best pump—F. S. Wartman.  
Best piano, to remain for the concert—Vanluven Bros.  
Best sewing machine—M. W. Simpkins.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for Address: F. J. CHENEY & CO., Toledo, Ohio. Sold by Druggists, 75c. Take Hall's Family Pills for constipation.

## Money and Marbles.

Once there was a man who thought Russell Sage ought to stop work. He spoke to him about it. "Why get together any more money, Mr. Sage? You can't eat it; you can't drink it. What good will it do you?" "Ever play marbles?" Uncle Russell asked. "Yes, when I was a boy."

Do you know you can buy Red Rose Tea at the same price as other teas? Then, why not?

## DRS. KENNEDY & KERGAN

Specialists in the Treatment of Nervous, Blood, Private and Sexual Diseases of Men and Women. 25 Years in Detroit.

No Names used without Written Consent. Cures Guaranteed.

Thousands of young and middle-aged men are annually swept to a premature grave through early abuse or later excesses. Chas. Anderson was one of the victims, but was rescued in time. He says: "I learned an evil habit. A change soon came over me. I could feel it; my friends noticed it. I became nervous, despondent, gloomy, had no ambition, easily tired, evil forebodings, poor circulation, pimples on face, back weak, dreams and drains at night, tired and weak mornings, burning sensation. To make matters worse, I became reckless and contracted a blood disease. I tried many doctors and medical firms—all failed till Drs. Kennedy & Kergan took my case. In one week I felt better, and in a few weeks was entirely cured. They are the only reliable and honest Specialists in the country."

**READER—We guarantee to cure you or no pay. You run no risk. We have a reputation and business at stake. Beware of frauds and impostors. We will pay \$1,000 for any case we take that our NEW METHOD TREATMENT will not cure.**

**We treat and cure Nervous Debility, Varicocele, Stricture, Weak Parts, Kidney and Bladder Diseases.** Consultation free. Books free. Call or write for Question List for Home Treatment.

# THROUGH THE HEART!

WHEN THE NERVES BECOME A WRECK AND VITALITY RUNS LOW BECAUSE THE HEART FAILS TO DO ITS WORK—THROUGH THE SELFSAME HEART—IF CURE COMES—MUST IT COME

## Dr. Agnew's Cure for the Heart

Cures the nerves through the heart. Experience of the highest medical authorities has conclusively proven that the quickest way to cure diseases of the nerves is to fortify the heart with "food" that is natural to it, and that enriches the blood; and it has been proven also, beyond the shadow of a doubt, by this same high medical authority, that Dr. Agnew's Cure for the Heart is the most potent nerve nourisher and heart strengthener that has been "gathered in" from nature's lap to assuage sufferings, stop pain and heal the heartsick; and when you know that with the heart, the main spring, the balance wheel of life, out of order, the future looks out on nothing but darkness and suffering, why postpone applying the remedy? Why delay taking hold of the healing hand that will lift you back to health? Dr. Agnew's Cure for the Heart will relieve any and every form of heart disease in 30 minutes.

Margaret Smith, of Brussels, Ontario, says: "Many a time my suffering was so great that I would have hailed death with a welcome, but four bottles of Dr. Agnew's Cure for the heart wrought a wonderful cure in me."

SOLD BY ALL DRUGGISTS AND MEDICINE DEALERS.

DR. AGNEW'S LITTLE LIVER PILLS cure Sick Headache, Biliousness, Indigestion and Constipation—they never gripe—40 for 10c.

DR. AGNEW'S CATARRHAL POWDER relieves in 10 minutes.

 Best bunch celery—Geo Clancy, Alf Milligan.  
 Best head cauliflower—R. H. McGuinness.  
 Best field pumpkin—Alf Milligan, Wagar and Card.  
 Best squash—P. D. Shorey, John Harrison.

## GRAIN OF 1906.

Best half bushel fall wheat—J. B. Aylsworth, C. W. Neville, J. Vanalstine.  
 Best half bushel spring wheat—M. A. Gilmore, Alf Milligan.  
 Best half bushel rye—J. B. Aylsworth, Levi Evans.  
 Best half bushel Indian corn in ear—J. B. Aylsworth, Levi Evans, Wagar and Card.

"Yes, when I was a boy."  
 "Couldn't eat 'em, could you? Couldn't drink 'em, could you? No use to you, were they? What did you play marbles for?"

### The Result of Environment.

"I saw the oddest freak the other day," says the man with the honest eyes and the trustworthy face.  
 "A three legged cat?" we ask, smiling.  
 "No. It was a chicken that had fur instead of feathers."  
 "Fur?"  
 "Yes. It was hatched from a cold storage egg."

### Virtue's Reward.

Where is the reward of virtue and what recompense has nature provided for such important sacrifices as those of life and fortune, which we must often make to it? Oh, sons of earth, are ye ignorant of the value of this celestial mistress? And do ye meekly inquire for her portion when ye observe her genuine beauty?—Hume.

### Never Recovered.

"You say you are a woman hater, Mr. De Smith?"  
 "Decidedly so," he replied. "In my youthful days a woman made a confounded fool of me, and"—  
 "You never got over it. I understand, Mr. De Smith."

## 8 Doctors and 17 Kinds of Medicine Failed.

### BILEANS THEN CURED HER.

Canadians suffer more from biliousness, headache, indigestion, constipation and liver troubles than any other people. For these ailments Bileans, the great vegetable remedy, beats all other known preparations. Bileans were recently tested in a remarkable Norfolk case. The subject was Mrs. James Dixon, of Crostwight. This is what she says: "All my life I had suffered from biliousness, headache and indigestion. I frequently had a pain at my heart and palpitation. A dryness used to come in my throat at night and nearly choke me, my husband dared not smoke in the house, as the smoke stifled me."

"Almost every day I was sick, bile continuously coming up. All late disagreed with me, and I had very bad headaches. Eight different doctors have attended me, and, apart from what they gave me, I tried seventeen different special medicines. The medicines brought no relief, and the doctors said they could do me little good as my weakness was constitutional. Yet I am well now, free from pain, at last—thanks to coming to know about Bileans. My daughter persuaded me to commence taking them, and I underwent a thorough course. I improved after the first few doses, and gradually but surely they made this great change in me, and restored me to perfect health. I am never without them in the house now."

If you suffer from headache, indigestion, wind, biliousness, summer-heat, debility, blood impurities, liver complaint, piles or any stomach or intestinal trouble, you will find a cure in Bileans. Of all druggists at 50 cents a box, or from Bilean Co., Toronto; upon receipt of price (6 boxes, \$2.50.)

Builders Hardware of every conceivable kind. Rathbun's Star Brand of Portland Cement, it pays to buy the best.

# Removed the Growth.

DOUGLAS & CO., NAPANEE, ONT.

DEAR SIRS,—During year 1890-91 I was troubled with a large lump growing on the right side of my neck near the ear. Had consulted several physicians and used everything I could hear of, all to no use. Was told to use

## Douglas' Egyptian Liniment.

I did, and before I had used half a twenty-five cent bottle was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. No man has any idea of its value until he has used it; would not be without it under any circumstance

Respectfully yours,

NATHANIEL W. REID.

When a person is bilious, the liver is not giving up enough bile to move the bowels regularly,—and some of the bile is being absorbed by the blood. In other words, the liver is in a weakened, unhealthy condition.

FRUIT-A-TIVES  
LIMITED,  
OTTAWA.

The streets of Peru, especially on gala days or when they wear the special dress of some celebration, are said to be among the most picturesque in the world. In their narrow proportions

West street in New York presents a network of piers and docks for its whole length. Most of the great steamship and railway transportation companies have their pier terminals there, and other steamship companies have built their terminals on the New Jersey shore opposite, so that all transatlantic and a large share of the continental travelers must cross West street in coming to or leaving the city. When one considers the great number of short trip travelers, including commuters, who daily make their way in and out of the metropolis across this busy thoroughfare a faint idea of its importance may be gained. Manhattan Island has thirty-two miles of water front.—John P. Fritts in Leslie's Weekly.

## A HEALTHY OLD AGE OFTEN THE BEST PART OF LIFE

Help for Women Passing Through Change of Life.

Providence has allotted us each at least seventy years in which to fulfill our mission in life, and it is generally our own fault if we die prematurely.

Mrs. M. J. Dabruz

Nervous exhaustion invites disease. This statement is the positive truth.

When everything becomes a burden and you cannot walk a few blocks without excessive fatigue, and you break out into perspiration easily, and your face flushes, and you grow excited and shaky at the least provocation and you cannot bear to be crossed in anything, you are in danger; your nerves have given out; you need building up at once! To build up woman's nervous system and during the period of change of life we know of no better medicine than Lydia E. Pinkham's Vegetable Compound. Here is an illustration. Mrs. Mary J. Dabruz, of 150 Main Street, Winnipeg, Manitoba, writes:

"Lydia E. Pinkham's Vegetable Compound has been a blessing to me through that delicate period known as the change of life. For six years it disturbed my entire system. I had hot flushes, was extremely nervous, became pale and debilitated, very irregular in the monthly flow, and the blood all seemed to be in my head. I had frequent palpitation and throbbing of the heart; in fact, my whole system seemed to be in disorder.

"I received no relief from the suffering incident to this period until I took Lydia E. Pinkham's Vegetable Compound; but I date my relief from the time I took the first bottle. I gradually improved, nature took her course painlessly, and in due time I was a well woman."

Mrs. Pinkham, daughter-in-law of Lydia E. Pinkham, of Lynn, Mass., invites all sick and ailing women to write her for advice. Her great experience is at their service, free of cost.

Manners are of more importance than laws. Upon them, in a great measure, the laws depend. The law touches them but here and there, now and then, Manners are what vex or soothe, corrupt or purify, exalt or debase, barbarize or refine us, by a constant, steady, uniform, insensible operation like that of the air we breathe in. They give their whole form and color to our lives. According to their quality, they aid morals, they supply them or they totally destroy them.—Burke.

## Peculiar Custom of the Arab Ladies of Zanzibar.

The Arab ladies of Zanzibar live in great seclusion in the large white houses, never going out in the daytime from one year's end to another, says the Manchester Guardian. A little cooking and sweetmeat making is their only recognized employment, though some few of them can do beautiful silk embroidery. To lie on their beds and be fanned by their slave girls is the usual occupation of the richer women.

If they want to visit their friends, or, as is more often the case, to perambulate the town, they wait until 8 o'clock in the evening, when a gun is fired warning all Mohammedans that it is the fifth and last hour of prayer; then they may go out. They are entirely enveloped in large mantles and their faces completely hidden by very ugly gilt masks, with oblong slits for the eyes, and many of them wear these even in the privacy of their own homes. Their other garments are trousers and a tunic reaching below the knee, which is often embroidered and trimmed with gold braid. They have a number of gold and silver ornaments, nose rings and earrings, bracelets, anklets, and so on.

They are very light in color, many of them cream colored. Their features are regular and good, and they have dark eyes and silky black hair. They paint under their eyes and stain their hands and nails a reddish color with senna. If they want to go any distance from home they ride through the narrow streets on large white asses stained a brick red, their slaves running by their sides, but you generally meet them stalking solemnly along, surrounded by their slaves, who carry enormous lanterns as big as a London street lamp.

Very often they do not return home till 4 in the morning, when another gun is fired proclaiming the first hour of prayer. It is very awkward at times when you meet in the streets some of these ladies whom you ought to know and are greeted by them. You cannot see their faces, it is not always easy to recognize a voice, and nothing would offend them more than to ask their names.

## The New Suburb.

Mrs. Suburbs (with paper)—I see that the site of the garden of Eden has at last been located. Mr. Suburbs—Yes? When will the sale of lots take place, and what's the fare from the city hall?—Puck.

Grant me, O Father, enough of wisdom to live well. Prosperity to live easily grant me not, as thou seest best.—Carlyle.

Every saint in the calendar is said to be provided with a floral emblem

Coal Oils, Canadian, American. The Genuine Pratt's Astral. Highest grade of Oil and best lamps to burn it, at BOYLE & SON.

## STELLA.

A severe electric storm passed over the island on Thursday. Lightning struck and completely destroyed the stables belonging to Arthur Howard along with about 150 tons of hay, and his season's crop of grain. Some of the grain was still in stack. He also lost a valuable horse, a hayloader and waggon, with some other articles. It was just about an hour from the time that the barn was struck till it was a mass of smoking cinders. The owner himself was knocked down and stunned in the stable while getting a horse out. The light shower of rain, which fell just after the fire broke out, kept it from spreading. The dwelling house and a small cottage which the hired man lived in, the drive house and nearly all the implements were saved. The barns were partly covered by insurance. Building operations will likely begin at once.

Mr. and Mrs. Hugh Filson have returned from the Toronto exhibition.

Miss D. Caughey, Jr., attended the Allan-Vermileyea wedding in Belleville on Tuesday.

Visitors: Mrs. Bliss, Cleveland, Ohio, at Mrs. A. E. Howard's; Mr. and Mrs. Baker and daughter have returned home after spending a week with Mrs. Stevenson; Mr. and Mrs. Mackenzie and daughter, North Bay, have returned home, after spending a few days with Mrs. P. Allen.

## DENBIGH.

Our farmers are now also through harvesting and Mr. Melbourne Rose, who has invested in a steam engine to run his threshing machine, has started threshing.

Mr. John A. Dool has also purchased a twelve horse-power threshing outfit from the Ottawa Machinery Co., and will start operations at once.

The Municipal Council met on the 1st inst., at the Chatson House. Among other business the Rates required for the current year were levied, and Mr. Ansen Thompson, Collector for 1905 was reappointed to the same office at a small advance in his salary.

Mr. Paul Stein has sold his store lately occupied by Mr. E. Sallans, to his former tenant, who is getting some alternations and improvements made. Mr. Walter Crabtree is the architect.

Our new schoolhouse is nearly completed and will be ready for occupation soon, but the Trustees have not as yet succeeded in engaging the services of an efficient teacher for the balance of the year.

Mr. A. Kittner, who has sold his farm here to Mr. J. Rahm, has left for Arnprior, where he will reside for the present.

Mr. Rudolph Stein has returned from a much enjoyed pleasure trip to Ottawa. Miss Emma Stein, of Renfrew, who enjoyed a lengthy visit at her old home, has returned to town.

Mr. and Mrs. Emil Warlich spent last Sunday as guests of the latter's

MR. OZIAL ROUNDS.

A Resident of Welland Finds Relief in Pe-ru-na.

## SUFFERED 15 YEARS.

Mr. Ozial Rounds, Welland, Ont., a retired lumberman and a resident of Welland for half a century, writes:

"For fifteen years prior to 1900 I was a sufferer from hay asthma and chronic diarrhoea. I grew weak and emaciated and was tortured with insomnia.

"I was treated by eminent physicians but, if anything, was worse than ever. In fact, I was in as miserable a condition as a man could be.

"However, I chanced to try Peruna and noticed an improvement. Thus encouraged, I continued, and after taking several bottles of your precious Peruna, I was entirely well and a wonder to myself and friends.

"If, at my advanced age, 83 years, I have obtained such good results from Peruna, after so many years of needless suffering, there can be no doubt of its efficacy in the treatment of younger persons."

parents, Mr. and Mrs. A. Kossinack, of Vanbrugh.

Several of our farmers who intended to make a trip to Saskatchewan last week, have abandoned the idea, and think that Denbigh is a good enough place to stay in a while longer at least.

# MADE of NORMAL-CALF

IMPROVEMENT NUMBER TWO

## IMPROVEMENT NUMBER TWO

The way "Normal-Calf" is made.

The foot is one of the tenderest members of the body. Of course the ball and heel are tough, but no human part, excepting the eye, is more delicate than the top and pit of the foot.

If you subject that tender top to the rough ravages of hard, stiff, lifeless calfskin, you're sending a helpless, tender weaking to ignominious defeat at the hands of a rubbing, pinching, blistering foe whose battle scars can be seen on nine feet out of every ten.

"Normal-Calf" is a new leather invention, devised, patented and exclusively controlled by the Foot-rite makers. No matter what retailers may tell you, "Normal-Calf" can be found only in Foot-rite Shoes. This leather is tanned and curried by a new process which preserves nearly all of the soft, clothly suppleness of the live calf's skin.

We'll explain:

Tanning is merely rendering animal skin undecayable. This is accomplished by soaking the skin in tannic acid. The tannic acid chemically combines with the skin's chief component part—gelatine—forming tanno-gelatin, or leather which is insoluble and unputrefiable.

The tannic acid is secured from various tree barks. Hemlock is used principally because it's cheapest, but it fills up the pores, destroys the fibre and deadens the skin, forming leather as stiff and hard as tin. This is the foot-rubbing, foot-pinching, foot-blistering calfskin used in nearly all shoes. It's not worthy the name "leather." It's merely pickled calf hide, more suitable for sandpaper than for shoes.

"Normal-Calf" is rendered undecayable with scarce and expensive tannic acid extracted from oaktree bark, so accurately and scientifically administered that the pores and fibre remain natural; stiffening of the skin is avoided; and almost the original, soft, clothly suppleness of the live calf's hide is retained.

Then it's put through a new and special Foot-rite process of shaving, scraping, drying, oiling and annealing, which further enhances its suppleness.

What are you going to do about it? There's a Foot-rite retailer in your town. His name's below. You'll find his door swinging inward but never outward to find a more welcome store.

Anywhere in America, Canada or Great Britain—\$4.00 and \$5.00. Every pair Goodyear Welted.

# STORY OF THE WRECK

## Many Witnesses of the Azilda Tragedy Return Home.

Apparently slippery rails, combined with obstinate air-brakes, had a great deal to do with the terrible wreck on the C. P. R. at Azilda, near Sudbury, according to reports given by passengers who were in the speedy Imperial Limited at the time it crashed into the harvesters' special, and passengers who were in the latter also. A number of these passengers arrived in Toronto from North Bay by Grand Trunk, on Thursday, and their hurried descriptions convey an idea of the magnitude of the disaster in which fourteen lives were lost.

### THE KILLED.

Viola Schade, aged 12, Monkton, Ont.  
Olive Schade, aged 14, Monkton.  
Dr. Milne, South Woodlee, Ont.  
Frank Blackwell, Toronto.  
Rev. J. J. Noble, Methodist minister, Luton, Elgin county.  
Nelson Schatz, New Hamburg, Ont.  
A wire from New Hamburg says Mr. Schatz is still living, but his name has not been withdrawn from the official list of dead.  
Henry Harmann, North Easthope.  
W. B. Puddicombe, N. W. T., formerly of Haysville, Ont.  
Thos. Puddicombe, Haysville, Ont.  
Louis Pfaff, New Hamburg.  
Charles Palmer, Miller's Hollow, York county.  
Samuel Kingston, Frankfort.  
Unknown, but believed to be E. May, Winfield, Ont.  
Percy Baker, Collingwood.

### RAIN WAS FALLING

as the Imperial Limited dashed up on the special, making the rails decidedly slippery, and thereby causing an additional difficulty in bringing the heavy flyer to a stop. So far as is known at present the special was barely moving, being just about to enter the switch at Azilda. Latest reports indicate that no person in the Limited was injured, though it is said the fireman was bruised by jumping from the cab. Almost every passenger seen unhesitatingly said that the speed of their train had been checked considerably before the crash came. The grinding of the air-brakes on the wheels was distinctly audible, though it is said these did not work as they should have done.

### HARROWING SCENES DESCRIBED

The description of the scenes subsequent to the collision are harrowing in the extreme. In the downpour of rain the work of rescue was immediately commenced. Passengers and neighboring farmers nobly assisted the train crew in their duty. The injured and dead arrived in Sudbury at about noon, and their removal from the cars afforded one of the most mournful spectacles in the whole history of the town.

### WAS AN ILL-FATED CAR.

In some cases these had lost their baggage or had been shaken up so that they did not care to continue the western trip. Among the number was James W. Bartley of Murray township, Northumberland county, whose coat was torn in the collision and who received a number of scratches as well as a bad shaking up. Mr. Bartley admitted that his escape was little short of miraculous, since he was in the car where all the deaths occurred.

"I was three seats from the front of the car," he said, "and I saw that ponderous baggage van come right into our car with hardly a moment's notice. I crouched down, but two men who oc-

centre and jacked the two parts off and got in at the wreckage underneath.

"The two sisters were taken out first. They were near the top, both of them badly crushed. But lower down was a man who was still living, and for hours we worked to get him. He did not complain, however, though he was being crushed and almost smothered. When we got near him we found that his legs were caught in Policeman Blackwell's, just as firm as if you locked legs. The policeman was farther down, and we had to clear most of the stuff off his body before we got the living man. Just there we found another dead body, and the last of all to be cleared of the whole wreck was the Toronto constable. All this time little could be heard of the cries of the wounded above the roar of escaping steam. It was a terrible time."

### NO ONE TO BLAME.

General Superintendent Brady of the Lake Superior division has issued the following official statement:—

"I was over the ground and I know that no one was to blame for the accident. There was no negligence. There was no mistake. It was simply a mechanical failure. Both trains intended to stop. In fact, both trains were where they ought to have been. The train going west had halted two car lengths from the east end of the switch, which is 2,500 feet long. The train going east was to stop four car lengths from the westbound train to allow the latter to enter the siding. The east-bound train was not going fast, and Engineer Thurlow put on his air brakes, but, owing to a closed angle-cock only the engine, refrigerator and mail cars responded, and the trains telescoped."

### YEAR'S BUMPER YIELD.

#### September Report of U. S. Agricultural Department.

The New York Journal of Commerce of Tuesday says: The Department of Agriculture's September report on the cereal crop was a decided surprise so far as corn was concerned. It indicated an improvement of 2.1 points on the September 1 average condition comparing with August 1, and this improvement is figured by the statistician of the New York Produce Exchange, Henry Heinzer, as the equivalent of 67,000,000 bushels. The indicated corn harvest is now 2,780,069,000 bushels, which compares with a 1905 yield of 2,707,993,540 bushels, and which has until now been the bumper crop of corn. The condition of spring wheat on the other hand, shows a decline of 3.5 points, or according to the produce exchange estimate 12,000,000 bushels, but the indicated crop is still about 2,000,000 bushels ahead of 1905, and adding the indicated spring and winter yields this year, we have a total of 759,671,000 bushels—66,000,000 bushels above the combined 1905 wheat harvest and 11,000,000 bushels ahead of the heretofore record yield of 748,460,000 bushels in 1901. The minor crops are as a rule satisfactory.

### FIVE CHILDREN DROWNED.

#### A Pitiful Drowning Accident at Port Felix, Nova Scotia.

A despatch from Halifax, N.S., says: One of the most pitiful drowning accidents in the history of the Province occurred on Thursday at Port Felix.

### OTTAWA HOTEL BURNED.

#### Many People Jump From Windows and Receive Injuries.

A despatch from Ottawa says: The Gilmour Hotel on Bank Street was gutted in less than an hour on Friday night. The fire was of the fiercest description and it spread through the great hostility with lightning rapidity. The Gilmour has since its erection about ten years ago been essentially a family hotel. Many of the best people in Ottawa have been domiciled there from time to time. This week, however, the hotel was crowded from cellar to attic with strangers attending the fair. The building is a five-storey one. The lessee of the hotel was a French-Canadian, Edward Babin. A few minutes after eleven the guests who were in the rotunda of the hotel suddenly noticed smoke emerging from the elevator shaft, and then there came a rush of flame up the shaft and also into the office. At once the alarm was given. Employees ran through the house to awaken the guests who had retired. The difficulty was to reach those on the upper floors, as the main stairway wound round the elevator. The fire department was speedily on the spot, but it was at once apparent that the hotel was doomed. The firemen had for the moment to abandon their duties, as the saving of life was the first consideration.

### MANY LEAPED FROM WINDOWS.

At many of the upper windows persons in scanty attire cried for help. It was a thrilling time. The heroic spirit of the Canadian people was manifest. Scores of heroes rushed to the rescue. Men who will simply have the satisfaction of knowing that they had responded to the call of duty, and who can get no further recognition by reason of the fact that no one knows their names, risked their lives to save the guests.

Many were injured in endeavoring to escape from the burning building. Mr. Arch. Blue, Census Commissioner, and his family, had a narrow escape. They had to use the ladders, and Mrs. Blue fell for some distance, and had her left shoulder broken and received injuries from burns.

A Torontonian named George Montgomery jumped from the second storey, and was picked up with a fractured thigh and a severe scalp wound. He was taken to St. Luke's Hospital.

Those taken to the Protestant Hospital were:

H. T. WALKER, of Mullica Hill, Gloucester County, N. J., both legs broken.

Mr. Walker jumped from the third storey.

MRS. ROBT. PENTICOST, of 407 Huron Street, Toronto, jumped, both limbs broken.

MRS. E. B. BUTTERWORTH, of Ottawa, who was only married a fortnight ago, and her sister, Mrs. De Garry, of Galt, were severely burned and are in the hospital.

At the Water Street Hospital there is a Miss Amelia Leforest, address not known. She is burned, but not severely. Mr. T. Smith, of Montreal, had hands and limbs severely burned.

Others who were less severely burned went to convenient drug stores and doctors' residences to get their wounds dressed.

### LATER.

When the ruins of the Gilmour Hotel come to be searched it is certain that they will unfold a sad story. At least three persons have perished, and it is feared that there are more.

### THE DEAD.

MISS LIZZIE O'NEIL, head waitress, home address, Ella Street, Ottawa.

MRS. A. BECKETT, milliner, 197 Sparks Street, Ottawa.

MRS. L. LOVEDAY, Peterborough, inspector Barnado homes.

## THE WORLD'S MARKETS

### REPORTS FROM THE LEADING TRADING CENTRES.

#### Prices of Cattle, Grain, Cheese and Other Dairy Produce at Home

Toronto, Sept. 18.—Wheat—No. 2 white offered at 70½¢ outside, with 70¢ bid, and No. 2 red, 69¢ bid outside. No. 1 Manitoba hard offered at 78¢ on track, Owen Sound. No. 1 Northern offered at 76½¢, Point Edward, September shipment, with 75¢ bid.

Barley—No. 2 wanted outside at 47¢, and No. 3 extra at 45¢, without sellers.

Oats—No. 2 white wanted at 32½¢ outside, and two cars of old No. 2 mixed sold at 35½¢ to arrive, Toronto.

Flour—New Ontario wheat 90 per cent patents are quoted at \$2.70 to \$2.75 in buyers' sacks outside for export. Manitoba first patents, \$4.40; second patents, \$3.90, and strong bakers', \$3.15, Toronto.

Bran—\$14 to \$14.50 in bulk, outside. Shorts are quoted at \$18 to \$18.50 outside.

Corn—No. 2 American is quoted at 57½¢ on track, Toronto.

Peas—Car lots of No. 2 quoted at 73 to 74¢ outside.

### COUNTRY PRODUCE.

Beans—Hand-picked selling at \$1.75 to \$1.80, and primes at \$1.60 to \$1.70.

Honey—Strained quoted at 9½¢ to 10¢ per lb., and combs at \$2 per dozen.

Hops—13 to 16¢ per lb.

Hay—Car lots of No. 1 timothy are quoted at \$9.50 to \$10 on track, Toronto, and No. 2 at \$8.

Straw—\$6 per ton.

Potatoes—50 to 55¢ per bushel in quantities.

Poultry—Turkeys, fresh killed, 12 to 14¢; chickens, 8 to 10¢ per lb., alive; ducks, alive, 9 to 10¢ per lb.

### THE DAIRY MARKETS.

Butter—Pound rolls are quoted at 21 to 22¢; tubs, 18 to 20¢; large rolls, 18 to 20¢. Creamery prints sell at 24 to 25¢, and solids at 23½ to 23¢.

Eggs—Good candled stock, 16½ to 17½¢ per dozen; splits, 12½ to 13¢.

Cheese—They are quoted at 13½ to 13½¢, the latter for twins.

### HOG PRODUCTS.

Dressed hogs in car lots nominal. Bacon, long clear, 12½¢ per lb in case lots; mess pork, \$21.50 to \$22; short cut, \$24 to \$24.50.

Hams—Light to medium 16¢; do heavy 15¢; rolls, 12½¢; shoulders, 11½ to 12¢ backs, 17½ to 18¢; breakfast bacon, 15 to 16¢.

Lard—Tierces, 11½¢; tubs, 11½¢; pails 12¢.

### BUSINESS AT MONTREAL.

Montreal, Sept. 18.—Grain — The market was steady to-day, with nothing of particular interest. Flour — Manitoba Spring wheat patents, \$4.40 to \$4.50, strong bakers', \$3.90 to \$4; Winter wheat patents, \$4 to \$4.10; and straight rollers, \$3.80 to \$3.90; in wood; in bags, \$1.75 to \$1.85; extra in bags, \$1.50 to \$1.60. Rolled oats—\$2.05 to \$2.15 in bags of 90 lbs. Cornmeal — \$1.40 to \$1.45 per bag; granulated, \$1.05. Millfeed—Ontario bran in bags, \$18.50 to \$19.50; shorts in bags, \$20 to \$21.50; Manitoba bran in bags, \$18 to \$19; shorts, \$22. Oats—No. 2, 38½¢ per bush; No. 3, 37½¢; No. 4, 36½¢. Hay—No. 1, \$11 to \$11.50 per ton on track; No. 2, \$10 to \$10.50; clover, \$8 to \$8.50; clover, mixed, \$9 to \$9.50. Provisions—Barrels, short cut mess, \$22 to \$24; half-barrels, \$11.75 to \$12.50; clear fat backs, \$23.50; long cut heavy mess, \$20.50; half-barrels do, \$10.75; dry salted long clear bacon, 12½ to 12½¢; barrels plate beef, \$19 to \$19; half-barrels do, \$6.50 to \$7.

lous, since he was in the car where all the deaths occurred.

"I was three seats from the front of the car," he said, "and I saw that ponderous baggage van come right into our car with hardly a moment's notice. I crouched down, but two men who occupied the double seat with me were killed. I was pinned down for a few minutes, but releasing myself I crawled through a window, wondering at my escape. The baggage just seemed to chew everything to pieces that was in its path. I lost all my baggage, but was very thankful to get away so luckily."

#### MANY BODIES MANGLED.

Sitting at breakfast, James F. Kennedy and his daughter, of Lindsay, who also returned, were interrupted by the shock, followed by a shower of broken glass from the chandeliers, while the victuals were dashed to the floor. Mr. Kennedy was in the seventh coach of the westbound special. "I went outside to investigate," said Mr. Kennedy, "but for fully five minutes we could not distinguish anything because of escaping steam. Subsequent sights accompanied by groans of the injured" were simply horrible. Many of the bodies were fearfully mangled, some of them being crushed flat."

#### TWO SISTERS' EXPERIENCES.

Two sisters, Miss Annie Wiltch and Miss Jean Veitch of Winterbourne, who were travelling together to Medicine Hat, were so unmoved from the effects of the accident that they decided to return home.

"Did you see anything of the wreck afterwards?" the young ladies were asked.

"No," replied Miss Annie, with a shudder. "I saw two little girls lying dead just outside our car. That sight was enough; we hadn't nerve enough to go out and see anything more."

#### HOW IT OCCURRED.

"I was standing in one of the tourist cars when the collision occurred, but the shock did not knock me off my feet," said Mr. A. McKellar, a farmer from Hildert township, Perth county, in giving a most practical description of the wreck. Mr. McKellar was returning from the west on the Imperial Limited with his wife and Mrs. A. E. Hodgert of Exeter, Ont.

"I distinctly felt the brakes grip the wheels shortly after we had passed the western entrance to the switch at Azilda. Rain was falling, and perhaps the braking was hindered by slippery rails. The collision occurred about 100 feet east of the eastern entrance to the siding. In other words the harvesters' special never entered the siding where it was intended the two trains should pass. I cannot tell the reason."

"What did the wreck look like?"

"The engines of both trains were smashed somewhat. The fish car on one train was in splinters, while a baggage car was damaged. On the harvesters' special a box car containing baggage next the engine was turned on end. A heavy baggage car had risen on top of the passenger coach following, where all the people were killed. This baggage car almost went through the coach, pinning the inmates down so that they could not move."

#### PINNED BENEATH THE DEBRIS.

"I saw men jerking at the trunks and hauling them off, but I didn't know what was wrong until I looked under the car and saw a mass of splintered wood—it was the first colonist car half buried under the luggage, while the other end was thrown up and lying skew-gee across the track. The baggage car had telescoped the other."

Mr. McKellar started in at the pile of luggage nearest the engine and worked until after 12 o'clock without a break.

"Five or six people, they said, were pinned under it. It took us over two hours to get the trunks off, and then the thick floor of the baggage car was between us and those underneath. We got axes and split a hole in it but that wouldn't work, and we

#### A Pitiful Drowning Accident at Port Felix, Nova Scotia.

A despatch from Halifax, N.S., says: One of the most pitiful drowning accidents in the history of the Province occurred on Thursday at Port Felix. By it five young people lost their lives. Minnie, aged 15; John, aged 11, and Maggie, aged 9, children of Mr. Frank Fougere, postmaster and mail driver of East Port Felix, accompanied by their three cousins, Clara, aged 18; Maggie, aged 14, and Martin, aged 12, children of Mr. Joseph King, Port Felix, left their homes on Thursday morning to pick blueberries. About six miles back of Port Felix they attempted to cross the lake in an old leaky flat kept there for the purposes of berry-pickers.

They succeeded in reaching a small island in the lake by going two at a time in the boat, but on returning the six got in, and when about two-thirds of the way across the boat filled and turned bottom up. Maggie Fougere and Maggie King got on top of the boat, but it turned back again, throwing them in the water. Minnie Fougere then caught the boat and managed to paddle ashore with it. After reaching the shore Minnie says she saw the two boys locked in each others arms. The two younger girls also had hold of each other, and the larger girl was sinking. Johnnie Fougere called to his sister to tell his mother he was trying to swim ashore.

The girl hastened to her home, where she arrived in about two hours. She still heard those in the water screaming for help after she left the lake. A searching party left for the scene, but when they reached the lake there was nothing to be seen, and, owing to the lateness of the hour, the search for the bodies had to be abandoned till morning.

#### RUN OVER AND KILLED.

##### Oliver Halestone, an English Boy, Meets Death Near Erin Village.

A despatch from Guelph says: Oliver Halestone, a young Englishman not long in this country, came to an untimely death on Saturday on the farm of his employer, Mr. Henry Austin, a short distance from Erin village. He was engaged teaming out manure when the front end of the waggon gave way, throwing him out head first. The wheels passed over his chest, crushing him terribly. Several of the ribs were torn from the spine, and the hemorrhage resulting was sufficient to cause death by suffocation. The deceased lad was only about sixteen years old and had been working for Mr. Austin about four months.

#### DARING ROBBERY IN WEST.

##### Jewelry Worth \$3,300 Stolen at Portage la Prairie.

A despatch from Portage la Prairie, Man., says:—The most daring and successful robbery yet recorded in Portage took place on Wednesday morning, when unknown thieves entered the jewelry store belonging to Shitriy and Vickers, on Saskatchewan Avenue, and stole goods to the value of \$3,300. The job was swiftly done, and the thief did not awake either of the owners, who were asleep in a rear room. The lock on the front door was opened by a duplicate key, and the thief made little or no noise in his operations. The robbery took place about 3 o'clock, but it was not discovered until 8.

#### HAMILTON MEMBER DEAD.

##### II Carscallen, M. P. P., Succumbs to Bright's Disease.

A despatch from Hamilton says: After weeks of suffering death came to the release of Henry Carscallen, M. P. P., on Sunday evening at 5.30. It was thought at the early part of last week that he had a chance to get better. He had been able to get out, and had taken several drives, but on Tuesday he had a relapse, and his condition became gradually worse. Several weeks ago he took a trip to Atlantic City, but the change did him no good, and he returned in a few days. Bright's disease was the cause of death.

#### TO STAMP OUT POLYGAMY.

##### Mounted Police Keeping Strict Watch on Mormons in Alberta.

A despatch from Cardston, Alta., says: There are many who know that polygamy is still practiced in this province, and proof of the same has just been unearthed by the North-West Mounted Police. A Utah Mormon came here with one of his wives, leaving another well provided for in the United States. He came with wife No. 2, and No. 1 followed. The child of No. 1 fell sick, and he visited his other household. The police forbade this custom, but agreed to take no action provided he would live with No. 1 only. This he refused to do, and matters were this week referred to Ottawa. Other instances have been ferreted out by the North-West Mounted Police. Several Mormons have left the country in a hurry. The Village of Taylorville, Alta., is named after J. I. Taylor, a chief of the Mormon Church in Canada, and an apostle in Utah until recently. He was deposed a short time ago, it being known that he had five wives.

mixed, \$9 to \$9.50. Provisions—Barrels, short cut mess, \$22 to \$24; half-barrels, \$11.75 to \$12.50; clear fat backs, \$23.50; long cut heavy mess, \$20.50; half-barrels do. \$10.75; dry salted long clear bacon, 12½ to 12½¢; barrels plate beef, \$12 to \$13; half-barrels do., \$6.50 to \$7; barrels heavy mess beef, \$11; half-barrels do. \$6; compound lard, 8 to 9½¢; pure lard, 11½ to 12¢; kettle rendered, 12½ to 13¢; hams, 14½ to 16¢, according to size; breakfast bacon, 15½ to 16½¢; Windsor bacon, 16½¢; fresh killed abattoir dressed hogs, \$9.75; alive, \$5.75 to \$6.90 per 100 lbs.

#### UNITED STATES MARKETS.

Duluth, Sept. 18.—Wheat—No. 1 Northern, 71½¢; No. 2 Northern, 70½¢; Sept., 70½¢; Oct., 70½¢; Dec., 70½¢; May, 75½¢.

Minneapolis, Sept. 18.—Wheat—No. 1 Northern, 74 to 75½¢; No. 2 Northern, 71 to 73¢; Dec., 72¢ asked. Rye—No. 1, 57½ to 58¢. Barley—No. 2, 55 to 56¢; sample, 38 to 54¢. Corn—Cash, 47 to 47½¢; Dec., 42½ to 43½¢ bid.

St. Louis, Sept. 18.—Wheat—Cash, 70¢; Sept., 68¢; Dec., 70½¢; May, 71½¢.

Minneapolis, Sept. 18.—Wheat—Sept., 69½ to 69½¢; Dec., 70½¢; May, 71½ to 71½¢; No. 1 hard, 73½¢; No. 1 Northern, 72½¢; No. 2 Northern, 70½¢; No. 3 Northern, 67½ to 68¢. Flour—First patents, \$4 to \$4.10; second patents, \$3.85 to \$3.95; first clears, \$3.25 to \$3.45, second clears, \$2.40 to \$2.60.

#### LIVE STOCK MARKET.

Toronto, Sept. 18.—Trade at the Western Cattle Market to-day was somewhat featureless.

Exporters were quoted nominally at most at \$4.50 to \$4.90 per cwt.

Choice butchers' cattle were quoted at \$4.25 to \$4.50 per cwt. There were poor cows selling at \$2.25 to \$2.90, while for good cows \$3.50 was paid. Fair to good butchers' were at \$3.90 to \$4.40 while canners were quoted at \$1.50 per cwt. and upwards.

Stockers, \$2.75 to \$3.50; feeders, \$2.

#### ONE YEAR'S TOLL OF THE SE.

Statistics prepared by the Bureau Ve itas, of Paris, show that during the y  
ves

60 to \$4; shortkeeps, \$4.10 to \$4.00 per cwt.

A lively trade was reported in milch cows, with quotations ruling at \$30 to \$60 for milch cows and springers of medium to good quality.

Export ewes sold at \$4 to \$4.40, export bucks at \$3 to \$3.50, and Spring lambs at \$5.50 to \$6.75 per cwt.

Calves were steady at \$3.50 to \$6 per cwt.

Hogs were quoted at \$6.40 for selects and \$6.15 for lights and fats.

#### CHEAP BRIDAL TROUSSEAU.

Small Outlay of the Richest Woman in Germany.

A despatch from Berlin says: Frau Krupp, widow of the great gunmaker of Essen, and her daughters, Bertha and Barbara, have just been here, the object of their visit to buy the daughters' trousseau. Each outfit will not cost more than \$250; this simplicity being in accord with the modest manner in which the girls were brought up. Some of the newspapers criticize the small outlay, contending that great wealth imposes greater outlays.

Fraulein Bertha Krupp is the richest woman in Germany, she being the principal heir under her father's will. She is engaged to marry Gustav von Boden Und Halbach, Under Secretary of the Prussian Legation to the Vatican. Barbara Krupp, although not nearly so rich, as her sister, is worth \$12,500,000. Her fiancé is Baron Telo von Willowski, son of the Governor of Prussian Saxony. Both bridegrooms-elect are poor young men.

#### RAMIFICATIONS OF C. P. R.

General Manager of Company Speaks of New Lines in Ontario.

A Toronto despatch says: Mr. J. W. Leonard, assistant General Manager of the Canadian Pacific Railway, made a statement yesterday as to the company's intentions regarding its proposed line from Montreal to Toronto. He said it would leave the present line at or near Kemplville Junction for Brockville, from where it would skirt along the St. Lawrence River and the north shore of Lake Ontario, touching all the towns en route. It is expected the grade will not exceed a maximum of 3-10 per cent. It will be some time before surveys are completed.

Regarding the company's new line from Victoria Harbor, he said it would probably pass a few miles north of Peterboro' and connect with the main line between the town and Havelock. The reason of this decision not to go through Peterboro' was because an easier grade and shorter line is obtainable through territory north. A grade of 3-10 per cent. would be found. The construction of the road, including terminals and elevators, would cost about \$5,000,000.

#### TREATED TO GUN SHOT.

Western Bridegroom Gave Charivari Party Warm Reception.

A despatch from Snowflake, Man., says: Wm. Wallace, of Purvis, was married on Saturday, and a number of young men paid him a visit on Tuesday night, forming a charivari party. Mr. Wallace, not liking the noise, fired shots from a shotgun, wounding three of the company. Charles Phipps was shot below the knee, and is under the doctor's care. Thirty grains of shot were extracted from his body. Percy Dixon was shot in the thigh and another young man received a few grains in the shoulder. They will all recover.

#### FIRE WIPES OUT VILLAGE.

Shawville, in Pontiac County, Visited by \$100,000 Holocaust.

A despatch from Ottawa says: The

# LEADER TAKEN BY POLICE

## He Begged His Captors to Kill Him at Once.

#### IMPORTANT ARREST.

A despatch from Moscow says: Vladimir Mazury, the leader of the Moscow section of the "Flying Group," and his principal lieutenant, have been captured after a running fight with agents of the secret police, in the course of which Mazury was wounded. Mazury is a mere youth, and when he was caught he begged the officers to kill him immediately, recognizing that he would undoubtedly be executed. He was the directing spirit in the bank robbery committed here last March by Relentoff, and he is accused of the murder of Col. von Leshinikoff, of the secret service, during the revolt of last December. He is considered to be one of the most important leaders of the entire Terrorist group.

#### CONDITIONS UNBEARABLE.

A despatch from Krasnoyarsk, Western Siberia, says: Conditions here are becoming unbearable. There is terrible corruption and depravity among those in authority which make the people an easy prey of the agitators. The peasants are an ignorant lot, easily amenable to good or bad influences, but all the advice which they get now is in the direction of lawlessness and crime. Murders and robbery in the country and in the cities are daily, almost hourly occurrences. The streets in Krasnoyarsk are unsafe after dark. Meetings are held daily in the woods surrounding the city. The principal agitators are Jews, but they are too clever to be caught. The railroad employees are revolutionary to a man, but remembering the awful repressions of General Meller-Zakomelsky, who cleared up the Siberian strike last fall with a ruthlessness that is almost incredible, they are afraid of the initiative.

In Siberia the agrarian question is not pressing as there is no such land hunger as exists in Russia proper. The plague of Siberia is the official highwayman, who in every station from the lowest to the highest, is a corrupt and dishonest petty tyrant to his subordinates, and the people generally. The Siberian peasants are not against the Emperor. They make a distinction between the Emperor and the Government. The former, they consider their saviour, the latter their curse. The dissolution of the Duma through the reports dinned into the peasantry by the clergy and police, which made it appear that the assembly refused to co-operate with the Emperor, created little sorrow among the Mujiks.

#### THE SIEDLCE MASSACRE.

A despatch from Warsaw says: De-

vastation at Siedlce by cannon and rifle fire lasted 50 hours, and was followed by pillage on an extensive scale. It is estimated that two hundred shops were stripped bare. Seventy houses were burnt down. Dead number several hundreds. Number of wounded very great. General exodus from town in progress. Doctors have been sent from here, as there are not enough at Siedlce to cope with disaster. Food scarce. It was found impossible to deal adequately with fires owing to the failure of water supply.

#### STONY-HEARTED GOVERNOR.

The London Times' correspondent cables from St. Petersburg as follows: Unofficial versions of the Siedlce massacre agree that the acting military Governor on three consecutive days ordered the troops to fire because the Jews failed to surrender the authors of the outrages which are understood to be he did so in spite of the fact that a rabbi and delegation from the towns people solemnly assured him that they did not know the culprits, and had no son to believe they were agents provocateurs.

#### CZAR SAILS ON CRUISE.

A despatch from St. Petersburg says: The Czar, the Czarina, and their children sailed on the imperial yacht Standart on Thursday afternoon for a cruise along the coast of Finland.

#### GEN. TREPOFF DEAD.

A despatch from St. Petersburg says: Gen. Dmitri Trepoff died of heart disease at the Peterhoff Palace at 1 o'clock on Saturday evening. His last effort, made against the doctor's advice was to see the imperial family depart on a cruise to Finland on Thursday.

#### TEN EXECUTIONS A DAY.

A St. Petersburg despatch to the Exchange Telegraph Company says it is estimated that ten men a day have been put to death since the institution of summary court-martial by ukase of the Czar ten days ago.

#### ATTEMPT TO KILL COUNT WITTE.

A despatch from Berlin says: The papers here print a report of an attempt to murder Count Witte, the former Russian Premier, who is staying at Soden a health resort in the Taunus Mountains. The man who made the attempt at assassination is said to be a Russian Jew named Rosenberg. He was arrested just as he was about to carry out his purpose.

Fashion Hints.

\*\*\*\*\*

#### HINTS OF THE FALL STYLES.

Probably never before have we had a season open with so little fixed and absolute in fashions. It would seem as if the French designers had drawn on

we have used so much. Net dresses both plain and figured, will enjoy much favor during the fall and winter, a fact which the economical will welcome. Even the simplest of these nets lend themselves readily to stunning trimming effects in the application of ribbon velvets and mercerized braids. It is worth while to note this use of braid on net dresses for evening wear. Graduated widths, treated the same as are the graduated widths of ribbon velvet are liked. A white net dinner gown shows rows of braid in the pastel tints blue, pink, green, maize and lavender the braids about a quarter of an inch wide, the whole giving the effect of a faint rainbow.

## FIRE WIPES OUT VILLAGE.

Shawville, in Pontiac County, Visited by \$100,000 Holocaust.

A despatch from Ottawa says: The Village of Shawville, in Pontiac County, had a \$100,000 fire on Wednesday afternoon. It started at a bakery near the Methodist Church, cleared out the church, bakery and planing mill, and 22 dwelling-houses. It was Civic Holiday in the village and half the population was at the Ottawa Fair. There were no proper fire appliances and the supply of water was very scarce. Many of the buildings destroyed are insured. The Guardian and Royal Companies are hardest hit.

## ARE DRASTIC PROPOSALS.

Great Interest Created in Land Legislation in New Zealand.

A despatch from London says: The New Zealand Government land proposals are the most drastic in the history of colonial legislation, and are creating intense interest throughout New Zealand, especially the clauses compelling all owners to sell within ten years the excess of land held beyond £50,000 unimproved value, and the provisions preventing the present owners of one thousand acres of first-class land or five thousand acres of second-class land from adding to their estates either by freehold or leasehold. The proposals will be stoutly combated.

## RECORD CUSTOMS PAYMENT.

G. T. P. Pays Duty of \$382,722.31 on 54,874 Tons of Steel Rails.

A despatch from Portage la Prairie, Manitoba, says: Probably the largest entry by all odds that has ever been put through in the West was passed through the Customs office here on Friday, when 54,874 tons of steel rails for the Grand Trunk Pacific Railway, valued at \$1,500,000, were entered. The duty paid was \$382,722.31, which is regarded as a record Customs payment.

wife, W. J. Southall, formerly of London, Ont., committed suicide at Detroit, on Saturday.

Three workmen were killed at Rushville, Indiana, on Wednesday, by coming in contact with a barbed wire fence that had been charged with electricity from the plant of the Indianapolis & Cincinnati Traction Company.

General H. H. Norman, Adjutant-General of Tennessee under Governor Buchanan, died suddenly at Wodbury, Cannon county, Tenn., on Wednesday. General Norman had just concluded an address at a re-union of Confederate soldiers, expiring while in the act of resuming his seat.

Announcement was made at New Orleans, on Thursday, that Miss Florence Elston was married on a tugboat at sea last Saturday to Eugene Durabb. In marrying Mr. Durabb Miss Elston defied her grandmother's will cutting her off from inheriting one of the finest orange groves in Louisiana if she married Mr. Durabb.

## BONES OF JOHN ROBERTSON.

Lost Near Broadway, Assa., Twenty-four Years Ago.

A Moosomin despatch says: Investigation of human bones found by Corporal Bossing of the Northwest Mounted Police on August 20 last, south of here, disclosed the fact that they are the remains of John Robertson, aged 65 years, who disappeared November 19, 1882, from the home of Mr. Evans, who lived sixteen miles south of Broadway. Robertson had gone for mails and became lost. After careful search his wife returned to her former home in Ontario. Robertson also left an adopted son. The police are anxious to hear from friends or relatives.

## HINTS OF THE FALL STYLES.

Probably never before have we had a season open with so little fixed and absolute in fashions. It would seem as if the French designers had drawn on every period and age for their ideas. Only a few doughty spirits like Paquin stand firm for a special style. This maker of feminine fripperies is still loyal to his empire idea. It is, however, the empire idea modified and adapted so that it will meet with little objection on the score of its being extreme and unbecoming. The empire influence promulgated by Paquin is noticeable in the models of almost all other French houses, and it will be noticeable in the best fashions in America this season.

Paquin stands for long sweeping skirt lines, the skirt adjusted with some fullness toward the front, an idea exactly contrary to our American one of lifting the skirt absolutely flat through the front. The waist line is raised slightly in the front and somewhat more so at the back, the fullness lifted to perhaps three or four inches above the normal waistline at that point.

## THE PAQUIN COATS

are long and close, though never tight fitting. These coats have the waistline slightly lifted in the back and under the arms, and clever but simple collars do much to accomplish an empire tendency which can not be termed a decided empire style. The sleeves turn the elbow in the coats, and end above in formal indoor costumes. The bodices are simple and elegant, easy fitting, and almost invariably of the shield type, cut out sharply about the arms and in the neck to disclose a shield and sleeve of lace.

The waists are short, but not the extreme empire, rather forming what we have known heretofore as the baby waist. The general lines of the figure are maintained much as were indicated in the best spring modes; the hips held narrow and the bust high.

Short skirts will again hold the field for general wear. Even Paris, which has stood out against them, has accepted them now for certain purposes, although the Parisian will never give them general adoption. She has good reason to avoid them, since the average French figure is unsuited to the short skirt. The French woman is long waisted. By far the majority average five feet two inches, and their longer waistline would appear sadly distorted in our favorite short skirt. Moreover, the French woman rarely walks, so voluminous skirts cause her no worry.

Short sleeves are an accepted thing on the other side; not three quarters or seven eighth lengths, but short elbow lengths. It must be admitted that these are unsuited to the rigorous winters of this country, and so we may look to see longer sleeves for service suits where the climate so demands. But for dressy wear, the short elbow length sleeves will hold their own all winter, not only in costumes, but in suits as well.

## THE PRINCESS GOWN

or simple lines is noticeably absent from fall fashions. There is a modified form, with some form of a jacket or draped effect to the bodice portion, which entirely does away with the distinct princess idea. This will be welcome news to the average woman and to the dressmakers who have struggled with the difficult princess and more difficult empire effects.

The corselet skirt of unpleasant memory has apparently sunk into the oblivion it deserves. It was fashionable, of course, but could hardly claim the merit of becomingness even in its most carefully tailored appearances. It had a knack of throwing the figure into distorted lines above the waist and about the hips that was trying to even the best proportioned woman.

For evening gowns and dinner costumes, what one might call half weight fabrics are well liked, these and net taking the place to a great extent of the chiffons and crepes de chine that

are liked. A white net dinner gown shows rows of braid in the pastel tints, blue, pink, green, maize and lavender, the braids about a quarter of an inch wide, the whole giving the effect of a faint rainbow.

## FRUIT BASKETS SCARCE.

And the Growers Are Anxious Over the Prospect.

A despatch from St. Catharines says: A serious situation has developed in the fruit industry in the Niagara Peninsula, owing to the shortage of fruit baskets. Growers declared on Friday that there was danger that many of the Crawford peaches which are now ready to pick together with other fruits, will be wasted, as there are no baskets to put them in. This would mean the loss of some thousands of dollars. The Williams Basket factory at Thorold closed down this season, and that was the main cause of the shortage as that concern alone turned out something like eight hundred thousand baskets every year. The fruit growers have sent men to the United States to try and buy up some baskets, but they do not expect to get many, as the factories estimate the necessary demand for the fruit ahead of time and only make about the number required.

## POPULATION OF THE WEST.

Census Shows That It Has Almost Doubled in Five Years.

A despatch from Ottawa says: The census-taking of the past summer in the three Prairie Provinces shows that Canada now possesses a population west of Lake Superior of something over a million souls. Manitoba, Saskatchewan, and Alberta together represent a population of about 805,000, which is almost double the census showing of five years ago.

The returns from Manitoba are not quite complete, but will show something over 360,000, as compared with 255,211 in 1901, and 152,506 in 1891.

Saskatchewan and Alberta both show more rapid gain. The former contains a population of about 260,000, and the latter of 180,000. Five years ago the census of the same district, portions of what were then the North-West Territories, gave a population of 165,551. In 1891 this same region was found to have a population of 66,790.

## UNEARTHED INDIAN RELICS.

Mound on Ontario Farm Contained Skeletons of Numerous Redmen.

A Port Colborne, Ont., despatch says: A valuable find was made on Wednesday in a mound on the property of Mr. James P. Koch, of Belle Alliance, vice-president of the Humber Stone Club. Some years ago while erecting a flagstaff some Indian relics were discovered. Since then no further excavations have been made until Wednesday, when Mr. Phillips, assistant curator of the Provincial Museum, started the work of excavating, and found some valuable pottery in a perfect state of preservation, also some clay pipes, beads and numerous bodies, the skulls of which are in perfect condition.

## CREATED VEGETABLE LIFE.

Claim of a Professor at the Medical School at Nantes.

A despatch from Paris says: Prof. Lidue, of the Medical School at Nantes, claims to have created vegetable life. He has been experimenting for ten years. He eventually discovered that with what he describes as osmotic pressure, which animates inorganic matter when dissolved in liquid, it is possible to produce a substance identical with living tissue. He gradually created artificial cells, which lived and reproduced, and from these he claims he produced growing plants three and four inches long.

## A—OVER A THOUSAND WRECKS.

Near 1905 there were 1,038 ships lost by shipwreck, 389 steamers, 649 sailing ships.

## "Little Curly"

He was nicknamed Curly by the stockmen because of the cluster of long, brown curls which floated in the wind when he galloped on his little white pony about his father's cattle station.

From Andy Day, the stern-faced boundary rider, down to Toiga, the slack cook, every one of the rough men loved him, and worshipped him like an idol. Six years ago, when he was a wee nite a few months old, his mother had died, and since then the station hands had taken him under their care. They fought for the privilege of nursing him, and laughed like children when his baby lips first began to prattle their names in quaint syllables.

Then from the depths of the bush they brought him pets to play with—quaint little rock-wallabies that would run to him and cuddle into his breast, and opossums that were soft and furry to stroke. Curly's father, grim old Squatter Desmond, could not bring a woman on to that lonely far-away station to nurse him, and was glad that the child should make playmates with the men. He knew that they all loved him too well to let any harm come to him, and he wanted his boy to grow up manly and self-reliant.

And so, every night, when the day's work was done, and the men had gathered round the fire to smoke and sing the old bush songs, the little mite would come toddling out of the rambling old station house and take his place in the group. His baby fingers were taught to plait a whipstock, and his tiny hands to throw a lasso. Therefore, at six, he had become initiated into most of the mysteries of the bushman's art.

Among the songs they taught him round the camp-fire was one, the refrain of which ran:

"So we caught Roving Dan,  
And his cattle-duffing clan.  
And we swung 'em to an old gum-tree."

This was a great favorite, for Roving Dan was an object of hatred to every man on the station. He was a notorious outlaw, and had a long list of crimes to his name.

All his escapades had been marked by a hardened callousness which placed him among the worst of his class. Most of the other bushrangers had some of the more romantic virtues, which partly redeemed their character, but the general verdict about Roving Dan was that "there warn't enough good in his natur' t' save the soul of a mosquito!"

Between Roving Dan and the bush-ranger there existed a bitter feud, for Squatter Desmond had been one of the most untiring of the latter's pursuers, and the outlaw made it known, for his part, that it was his ambition to stick-up and set fire to the station.

One day Curly was left at home by himself. All the men had gone to a muster many miles away. The day was hot, and the pet wallabies and the opossum did not feel in the humor to play. They had hopped off to the shade of the tank, and there had gone to sleep on the cool grass.

Curly, however, did not feel at all inclined for sleep, so he brought his fat white pony up from the paddock and saddled it. He had been given a little new gun a few days before, and he knew a nice white gum-tree in the ranges, a mile or two away, that would make a splendid target, so he trotted off through the slip rails.

Arriving at his journey's end, he slipped off his pony and tied it to a tree. Then he took out his pocket-knife and carved the outline of a man in the bole of a spotted-gum further up the gully. Casting his wee fat figure on the grass

a little later rode away to a certain camp far off in the ranges, those baby kisses were tingling strangely in his blood, making him feel as if some new sweet influence had entered his life.

But when on Saturday afternoon Curly went to the trysting-place in the gully, his new friend was not there. All through the lonely hours the boy waited sad and dejected.

He had kept his secret faithfully, too. During the week he had been just bursting to tell his daddy about the strange man he had met who could hit a mark without aiming. It was hard to keep the story to himself, but he had managed it like a man, and this was all his reward.

But when he got home he was astonished to see three strange horses in the yard. A policeman was grooming another close by, and giving it a feed of corn.

Something was evidently the matter, and he hurried to the barn to unsaddle his pony. The door was locked, which was quite an unusual thing. Standing on tip-toes, he peeped through one of the chinks, and there a sight met his gaze which made his blue eyes roll with wonder. Lying on the straw was the strange man he had met in the gully, and his feet and hands were tied up with the heavy iron things that he had seen the policemen carry strapped to their saddles.

He was about to call out, but the latter, noticing him, raised his manacled hands and pressed a finger to his lips. He knew well that that meant silence, so he crept away to the kitchen, his little brain reeling with wonder.

There three big, fat troopers were joking and laughing over a bottle of wine, and waiting outside, he listened to their talk. He soon gathered from their conversation that his friend was in danger. Instantly he became attentive and alert.

"He's a mighty game 'un is Roving Dan," said one, "to make for a station like this single-handed to stick it up. I didn't think he had the pluck!"

"Anyway, it's the last station he'll ever have the chance to tackle."

"You're right there, mate," said the first man. "He'll be swung up, sure as death, and there won't be a soul in wide Australia that'll drop a tear for him."

But the trooper did not know that just outside the door a little boy was sobbing his heart out because he knew that Roving Dan wasn't always a wicked villain, but just a big, kind mate who could shoot wonderfully well with a pea-rifle, and because this big, kind mate had been caught in trying to keep a promise.

That night when all the house was asleep, a wee white figure in night-clothes crept out along the verandah. Silently he stole to the kitchen where a bunch of jangling keys was hanging on the wall, and climbing cautiously up on the table, reached them down from the peg. He was breathing heavily now, in little half-sobs of excitement, but he managed to get to the barn without making a noise.

Standing up on his bare toes he reached the lock, fitting one key after another till the door clicked open. Then he crept over the warm straw to the recumbent figure in the darkness.

"Stwanger," he whispered, laying a soft little hand on his face, "are you 'wake?"

Roving Dan, half roused from his slumbers, growled angrily:

"Who is it?"

"It's only me—Curly," panted forth the childish voice.

The outlaw gave a start of surprise. "What in the name of all that's holy brought you here, sonny?" he said, tenderly.

"I've brought the keys so that you can take those nasty chain things off."

Already he was working at the heavy manacles with his baby fingers, and soon they unlocked. Curly could feel the strange man tremble with emotion as he fondled his little brown head with his free hand.

## PEAT TURNED INTO COAL

ELECTRICITY ENTIRELY CHANGES ITS TEXTURE.

Machine That May Make Ireland Prosperous—Mineral Looks Like Coal.

For many years past scientists have unanimously maintained that the prosperity of Ireland is inseparably associated with the general utilization of the deposits of millions of tons of peat for fuel purposes, says the London Mail.

In its virgin state the vegetable is highly impregnable with water, which, in order to enable the substance to burn readily and easily must be eliminated, while at the same time its spongy nature must be quite metamorphosed, and a fuel similar in nature to coal produced.

The general practice is to extract the water by passing the peat between heavy rollers, and then to submit the resultant semi-dry product to enormous pressure and prolonged drying.

### MYRIAD CELLS.

Owing to the peculiar construction of the moss, however, which is built up of myriads of minute cells—there are several hundred thousand to a cubic inch—such treatment has only served to eliminate in a partial degree the water with which it is saturated and to compress the tiny cells.

Directly the pressure is relieved the cells commence to expand again to their original proportions, and the sponge-like nature of the moss serves to absorb all the moisture in the atmosphere. It is entirely due to this circumstance that the present manufacturing processes can only be carried out during the dry summer months.

### PEAT BECOMES HARD.

A few months ago, however, a well-known engineer successfully evolved a process by means of which the water can be entirely driven off.

The efforts of previous inventors to accomplish this desideratum by subjecting the peat to enormous pressure under heavy rollers and presses convinced him that such a system was inoperative, owing to the elastic nature of the material of which the cells were composed. Furthermore, each of these minute cells contained a chemical which must be released, and which, upon combining with the other chemicals in the substance, sets up a contracting and changing action, which finally results in the peat becoming a hard, close-grained product.

### EXPERIMENTS MADE.

The only possible means by which these cells could be disrupted was by passing through the peat an electric current, since electricity is the only known medium capable of passing through the most minute particles and completely bursting them in its passage. An experimental plant was accordingly laid down, and the inventor conclusively demonstrated that the problem which had completely baffled previous experimenters was overcome by the requisition of the electric current.

The Bessey process possesses several salient features which are of vital importance to a commercial application—the necessary plant is inexpensive to instal, and the manufacture of the fuel is so cheap, the consumption of electricity being almost insignificant. It is therefore decided to erect extensive works at the bog of Allen, one of the largest bogs in Ireland and to carry out the production of the new fuel upon a practical basis.

### POWERFUL EXCAVATOR.

The peat is torn from the bog by means of a powerful excavator, the grab of which is capable of removing one ton of the moss at a time. The peat is dumped into small cars of an electric tramway and rapidly whirled

## A FORGOTTEN VILLAGE

MAMAINSE HAS BEEN LOST FOR TWO DECADES.

Copper Camp Above Soo Stands Forlorn in Decay on Suprior's North Shore.

Hidden away behind the precipitous rocky bluffs of Point Mamainse, on the north shore of Lake Superior, and surrounded by a dense forest, there lies the deserted village of Mamainse. It is unmarked on the map, and, except for an occasional venturesome hunter or land-looter it has been forgotten more than twenty years.

The town is composed of some fifty substantial frame buildings most of which are constructed of the finest clear white pine, lathed and plastered and set on solid stone foundations.

Much of the timber used in these dwellings would cost \$100 a thousand to-day and there is not one house among them that could be duplicated for less than \$1,000 to \$1,200. In size and shape most of them are alike, nearly two full storeys in height and each containing from five to seven rooms.

Besides these there are several larger and more pretentious buildings, including a big boarding house of forty rooms capable of lodging 200 men, and a shaft house, stamp mill and reduction works on the site of an old and abandoned copper mine. The latter fact, of course, explains the building and final desertion of a village in such an out-of-the-way place; and yet the explanation is only a partial one.

### PERMANENT STRUCTURES.

Ordinarily when men go into the wilderness, in search of such mineral, timber or agricultural wealth as they may find, their places of habitation are merely temporary structures to be occupied until such time as they may have proven the existence of such wealth and the possibility of its development.

But at Point Mamainse the promoters of the then new copper mine waited for nothing. They built their own town and big stamp mill at the same time they were at work sinking the shaft to the supposed valuable copper lode below the surface. More than a million dollars were expended in the development and the building of the town which was to be a permanent place of residence of hundreds of people. In fact, at one time, the company had more than 200 men on its pay rolls.

### WAS AN ENGLISH COMPANY.

According to the stories told, the company that commenced the development of the mine was known as the Quebec, Lake Superior Copper Mining Company. Most, if not all of the money furnished for the promotion of the project was raised, as such things are accomplished now-a-days, by the sale of mining stock. That all of this money came from England is likely, and that there were many sore hearts and blasted hopes in that country when the mine failed to be a producer is a natural conclusion.

The mine was opened in the early seventies when the excitement incident to the discovery and development of valuable copper deposits on the opposite shores of Lake Superior near Calumet and Houghton was at its height.

The company was reputed to have untold millions behind it. And it must have had a goodly sum, too, for the men who came from England to start the mine and built the town lived high and spent their money lavishly.

### MINERS NEVER CAME BACK.

With the exception of a large store building about 40 by 80 feet in size and two storeys in height, and half a dozen of the cottages, which have since burned to the ground, all the houses remain standing, denuded of doors and win-

Arriving at his journey's end, he slipped off his pony and tied it to a tree. Then he took out his pocket-knife and carved the outline of a man in the bole of a spotted-gum further up the gully. Casting his wee fat figure on the grass twenty yards away, he began to shoot. But, strange to say, he missed every time, and he looked at his tiny weapon with tears of vexation rolling down his cheeks.

Suddenly he became aware of a pair of eyes peering at him from behind a clump of wattleshubs. He hurried over, and found a man awkwardly trying to conceal himself in the leafy undergrowth.

"Hallo, stwanger!" he said, unabashed, crossing his plump little legs, and leaning on his gun.

The man appeared ill at ease. "Hallo, youngster!" he said, gruffly, trying to hide his confusion.

He was a tall dark giant of six-feet-three, with a grin, unpleasant face and a heavy black moustache.

"Can you shoot, stwanger?" queried the child.

The man gave a chuckle. "I just about reckon I can, sonny," he answered.

"Something's wrong with my gun, and it won't shoot straight. Daddy could fix it, but he's not here."

He handed the weapon to the man, who took it shyly, and aimed it at the mark, but his shot too went wide.

Curly clapped his hands with delight. "I knowed it wasn't my fault!" he cried.

"No; I guess there's something wrong with this piece of shooting-iron."

He ran a practised eye along the barrel, and moved the sight a fraction of an inch with his finger. Then he whipped it to his shoulder, and scarcely pausing to aim, sent the ball plumb into the centre of the target.

Curly gasped in admiration.

"You can fire as straight as daddy," he said.

"And who is daddy?" asked the man abruptly.

"Why, Squatter Desmond, of course; I'm Curly. I thought everyone knew that?"

The man laughed grimly.

"And who is the man you're shooting at, Curly?"

"Oh, that's Roving Dan, the horriest, wickedest man on earth. You must have heard of him?"

The stranger colored slightly, and said he had.

"I'm learning to shoot at him, too, when I'm a man like daddy I want to go after him an' catch him."

And, tossing back his curls, he sang in a childish treble:

"So we caught Roving Dan,  
An' his cattle-duffing clan,  
An' we swung 'em to an' of gum-trees."

The stranger looked at the little mile admiringly.

"Well, I reckon you're just the man to catch him, Curly; but it's likely he'll be swangin' high while you're still in knickers. Anyway, we'll see about the shooting part of it."

And throwing himself down beside the boy, he showed him how to grasp the gun firmly and keep it steady. Thus all the summer afternoon was spent by the oddly-assorted pair in that quiet gully in the ranges. Curly growing proficient under the guidance of his instructor. The latter seemed strangely moved as the boy prattled away about his wallabies and his daddy and Andy Day, the boundary rider, but when the sun went down over the gum-tree tops he rose quickly and said he must go.

"Pwomise you'll come again to-morrow, stwanger," said Curly, eagerly.

The man said he had an engagement on the morrow.

"Well, on Saturday," pleaded the boy.

His companion hesitated uncertainly.

"If you keep it secret, sonny, I'll be here on Saturday," he said at length.

Curly promised joyfully to say no word to anyone, and threw his chubby arms round his friend's neck, imprinting kisses on his cheek. When the latter

Already he was working at the heavy manacles with his baby fingers, and soon they unlocked. Curly could feel the strange man tremble with emotion as he fondled his little brown head with his free hand.

"I'm sure I wasn't worth a tenth of that trouble, sonny," he said, feelingly.

Then they stole silently from the barn.

"Pwomise, stwanger," said the little mile, when they had gained the open—"pwomise that you won't ever 'noy my daddy again."

There were strange chokings in the bushranger's voice as he promised.

"And, Roving Dan, I'm sorry that I shot at you on the tree."

For answer the latter picked up the wee warm figure in his arms, and cuddled it passionately to his breast.

For a moment all the barriers of his hardness and stoicism were broken down utterly and unreservedly. Then he set the child down lovingly and made his way to the horse paddock.

But when he had gone Curly found that the shoulder of his little white "nightie," where the outlaw's head had rested, was wet and clammy with tears.

## FRAGMENT OF GOSPEL.

### Excavation in Southern Egypt Reveals Portion of Lost Gospel.

A singularly rich harvest has been yielded by the excavations which for years past have been carried on at Oxyrhynchus in southern Egypt under the direction of Dr. Grenfell and Dr. Hunt, of Oxford. Portions of hitherto unknown poems by Pindar and Euripides, a portion of a history of Greece written with great detail, and of critical commentary on the second book of Thucydides are among the most valuable items recently brought to light. The manuscripts are the work of the first, second and third centuries of our era, and are written on papyrus and on parchment. These fragments of the literature of classical antiquity will, without doubt, excite the interest and occupy the attention of scholars all over the world; but another item in the recent find will appeal powerfully to a far wider public. This is a fragment of a lost gospel written in very small but perfectly legible characters on a sheet of vellum and containing about 300 words arranged in 15 lines.

Dr. Grenfell described its contents as follows: "The subject dealt with is a visit of Jesus and his disciples to the temple at Jerusalem and their meeting with a Pharisee, who reproaches them with their failure to perform the necessary ceremonial of purification before entering the holy place. After a question and answer, in which the pharisee describes in some detail the formalities which he had himself observed, Jesus makes an eloquent and crushing reply, contrasting outward with inward purity. The whole incident, the account of which is practically complete, is very striking, and is quite different from anything recorded in the canonical gospels. Among the most remarkable features of the fragment are its cultivated literary style, the vigor and picturesqueness of the phraseology, and the display of a familiarity with the topography of the temple, and with Jewish ceremonies of purification."

A correspondent writes to a Vienna newspaper: "The gospel fragment recently discovered among the ruins of Oxyrhynchus is the object of much attention and speculation in German theological circles. It is supposed by many to be likely to prove of equal value and importance with 'The Words of Christ,' brought to light on the same site some years ago. It includes a more complete and detailed description of the Jewish ceremony of purification as performed in the time of Christ than we had hitherto possessed, and we learn from it some details previously unknown respecting the temple at Jerusalem."

A word to the wise is said to be sufficient. Did you ever notice how many words people use in giving you advice?

The peat is torn from the bog by means of a powerful excavator, the grab of which is capable of removing one ton of the moss at a time. The peat is dumped into small cars of an electric tramway and rapidly whirled away to the factory. It is here shot upon the floor and caught up by an endless conveyor and discharged into the first machine, where the superfluous water is driven off. Here the saturated crude material is churned and compressed in a kind of gigantic sieve, the water escaping through the meshes.

The semi-dried material is now carried away to the appliance in which it is electrically treated. It is discharged into a huge hopper. When full the electrodes are inserted into the contents and the current switched on. This is the sole electrifying process to which the peat is subjected, the operation being of twenty minutes' duration, and the cost amounting to three pence per ton for electric current.

The electro-peat, as it is called, falls into a second water eliminator, where it is again whirled about and churned as in the preliminary operation.

## KNEADING MACHINE.

This done, it passes into the kneading machine, where it undergoes severe continuous pulping and is pounded beneath huge, heavy rollers, each weighing a ton, revolving in a pan. In a few minutes the peat becomes a dough like substance, perfectly homogeneous, and can now be moulded into any desired shape for briquettes, in which condition it is placed on the market. The plastic product passes from the kneader into a large inverted cone, through the apex of which it falls into the moulder, the plungers of which strike into the mass and force it through the shapes, delivering the briquettes upon an endless conveyor, which carries them away for removal to the storage sheds. Here the blocks are deposited upon miles of shelves and left for several days. The drying is carried out exclusively in a natural manner, there being no necessity to resort to artificial means of drying, no matter what the state of the weather. It is during this stage that the most remarkable change occurs in the nature of the peat. In drying, owing to the chemical action that is taking place, the substance contracts and hardens, and what is of far greater importance, changes its texture, becoming practically a hard mineral very closely resembling coal.

Owing to the fact that handling is reduced to the minimum during the various stages of production, and the limitless supplies of the virgin material at the doors of the factory, the cost of preparation ranges from three to four shillings per ton, which gives a distinct advantage to this product as compared with the cost of obtaining coal which is about thirty per cent. higher.

## ELEPHANTS THEIR LOOT.

### Siamese Do Their Stealing Upon a Colossal Scale.

The limit of deliberate theft has been reached in a wild place called Chiang-mai, on the Burmese border of Siam. The Siamese who live there conceive their plans on a colossal scale, and when they steal they take nothing less than an elephant.

The British Consul at Chiang-mai reports that elephant stealing has greatly increased lately. One of the British firms there reports that it had twelve elephants stolen last year, and its contractors lost the same number. Another firm lost nine elephants, only three of which were recovered.

These elephants are generally worth from \$1,000 to \$1,500 each. It can thus be seen that elephant-burglary is a highly lucrative occupation, and that the Siamese thief who manages to appropriate half a dozen or so can retire on a comfortable pittance such as his English rival whose ideas do not soar above hen roosts can never aspire to.

With the exception of a large store building about 40 by 80 feet in size and two storeys in height, and half a dozen of the cottages, which have since burned to the ground, all the houses remain standing, denuded of doors and windows and open to snows and rain of a cold and uncertain climate. It is said that when the last group of disappointed Englishmen left Point Maimaise for their country it was with the expectation that within a few months they would return to prosecute their search for the mineral and to resume their residence in the little town they had built in the forest.

In this hope, too, they were disappointed. Whether English capitalists, who had been furnishing the money, came to the conclusion that they were being made the victims of a gang of sharpers or whether their funds were depleted, does not appear, but certain it is that the miners never returned, and the deserted village remains to excite the curiosity of the occasional visitor.

## THEN VANDALS CAME.

As a proof that the miners and villagers intended some time to return to Point Maimaise, it is said that upon their departure they left their houses furnished, and the big company store stocked with goods. For a time watchmen were employed to protect the property against thieves, but finally, they too, were recalled, and the houses and all their contents were left to the mercy of the wind, weather and vandal alike.

## BUILDING UP HER NAVY.

### Germany Has Under Way Twelve Torpedo Boats.

Feverish and protracted activity is evinced at the German imperial yard at Kiel. It has been noticed that a distinct departure is being made in the placing of armor plates.

Formerly the plating of battleships consisted of an armor-belt at the water-line throughout the vessel's length. In the future the substructures of all machinery connected with the turrets will be heavily protected. The bottoms will also receive heavy plating.

The two divisions of torpedo boats which are to be turned out by the yard during the present year will consist of vessels with a displacement of 87 tons and 6,000 horse-power engines, which will give a speed of 28½ knots.

Still greater will be the displacement of the two new divisions of torpedo-boats, twelve boats, which have been ordered from the Schichau Yard, for the displacement is to be 525 tons and the engines are to be of 9,000 horse-power, so that these bigger torpedo-boats are to have a speed of thirty knots. Their coal bunkers are to hold 150 tons, and their armament will consist of one 8.8 centim. and of two 5.2 centim. quick-firing guns.

Toward the end of next year these Schichau-built boats will join the German navy, and they will be among the most powerful sea-going torpedo-boats possessed by any Power.

It may be added that in 1902 the German navy, on a peace footing, will consist of 2,520 officers and 6,838 petty officers and seamen.

## WANTED TO TEST HER.

The weary tramp with the red beak halted in front of the wayside cottage. "I called, mum," he announced, "because I found dis sample package of dyspepsia tablets down the road."

"Dyspepsia tablets?" snapped the woman with the broom. "What have I to do with dyspepsia tablets?"

"Why, er—I thought maybe you might give me something to eat dat would gib me de dyspepsia so I could test dem."

## IMPROVING.

Old Lady—Little boy, aren't you ashamed to swear that way?

Little Boy—Yes, ma'am. But I am just learnin'. You orter to hear dad.

## SHIPS STOPPED BY STARS

STEAMERS ARE SOMETIMES  
STRANGELY DELAYED.

"Earthquake Wave" in Mid Ocean —  
Engines Stopped by Rock Hurled  
From the Skies.

"The liner — arrived at Liverpool twenty-four hours late, having met with severe weather in the Atlantic." This is the sort of paragraph which one so often notices in the daily papers that, if a vessel be delayed, a storm is always the responsible cause. While this is true in a majority of instances, it is not by any means the invariable reason.

For instance, in September last, the Red Star Liner *Vaderland*, having sailed from Antwerp for New York with 1,200 passengers, experienced a very strange mishap. She called at Dover, intending to make a stay of only a couple of hours, but while manoeuvring at the Prince of Wales's Pier, a huge steel hawser caught round her propeller, and in a moment was twisted round the whirling screw as a playful kitten tangles a ball of worsted.

### AN ANCHOR CAUGHT IN AN ANCHOR

Divers went to work at once, and found the hawser jammed in a solid mass between the propeller and the boss of the shaft so as to utterly disable the liner. It took eighteen hours' continuous and severe labor before the propeller could be cleared, and it was not until the following evening at eight o'clock, after twenty-one hours' delay, that she was able to proceed on her voyage.

A very curious experience was that of the schooner *Jean Anderson*, which one day in July two years ago had to anchor in Aldeburgh Bay on account of a contrary wind. When the wind changed and her crew tried to weigh their anchor, they found that it was immovable. The windlass was double manned, they toiled and strained until with a crash the windlass itself broke down and left them completely helpless.

A tug had to be wired for to extricate the vessel, and then it was found that their own anchor was foul in another and much heavier anchor and chain which had been dropped by some ship unknown, perhaps many years before. They were literally anchored to an anchor.

### MISTAKEN FOR A WHALE.

After an adventurous voyage of three months and nine days, the life-boat *Mraad*, which is shaped like an egg, and was built to compete for the prize offered at the St. Louis Exhibition for the best life-boat, reached New York from Salesund, Norway. She had had many extraordinary experiences on the way, having been at various times nearly sunk by an ocean liner, fouled by an iceflo, and dismantled by a blizzard, which left her drifting helpless for five weeks.

But the strangest incident of all which befell her was that, while in this helpless condition, a Norwegian whaler mistook her for a whale, and actually fired at her with a whale bomb cannon. Naturally, the unlucky crew were afraid to go on deck, and remained below until the whaler, evidently perceiving her mistake, sheered off and left her alone to make repairs.

Mention of whales brings to mind the fact that these monsters of the deep have on several occasions been responsible for delays, or worse, to vessels. Not long ago the steamship *Sierra*, arriving at San Francisco from Australia, reported that, while off the coast and steaming at sixteen knots, she had struck a huge whale, breaking its back and cutting into it so deeply that the enormous carcass stuck upon her keel.

### RUNNING THROUGH A "ROCK."

The crew, under the impression that

# SUNLIGHT SOAP

\$5,000 REWARD will be paid to any person who proves that Sunlight Soap contains any injurious chemicals or any form of adulteration.

is equally good with hard or soft water.

If you use Sunlight Soap in the Sunlight way (follow directions) you need not boil nor rub your clothes, and yet you will get better results than with boiling and hard rubbing in the old-fashioned way.

As Sunlight Soap contains no injurious chemicals and is perfectly pure, the most delicate fabrics and dainty silks and laces may be washed without the slightest injury.

Lever Brothers Limited, Toronto

**Your money refunded**  
by the dealer from whom you buy Sunlight Soap if you find any cause for complaint.

## FROM BONNIE SCOTLAND CANADA'S RAIN AND SNOW IN MERRY OLD ENGLAND

### NOTES OF INTEREST FROM HIGHLAND BANKS AND BRAES.

#### What Is Going On In the Highlands and Lowlands of Auld Scotia.

The Duke of Buccleuch has been elected president of the Highland and Agricultural Society.

Lieut. Henry W. C. Wicks has been promoted to be captain in the Seaforth Highlanders.

Mr. Charles Roberts, who for the past 12 years has been a preventive officer at Leith, has retired after 31 years' service with the Customs.

Robt. Laird, moulder's laborer, Ayr, was sent to prison for 40 days for ill-treating his five children by neglecting to provide food and clothing for them.

A new public school, which has been erected at a cost of £29,000, to meet the educational requirements of Patrick, was formally declared open by Mr. James Caldwell, M. P.

Mr. J. G. Farquharson, head office of the National Bank of Scotland, Edinburgh, has been appointed assistant agent of the principal branch in Perth.

At Hamilton, John Black Strathaven, was convicted of travelling on the Caledonian Railway between Cambuslang and Meikle Earnock without having paid his fare. He was fined 3s.

At Glasgow, while a gang of men were erecting a gas producer at the Parkhead forge, the huge shears, 50 feet high, collapsed. Patrick Goffey, 19 was killed, and Alex McCurdy, 46, was seriously hurt.

Aluminum individual communion cups together with unfermented wine were introduced for the first time at the recent half-yearly communion of the Moat Park United Free church, Biggar.

A new pleasure ground has been opened for the village of Birkhill, Forfarshire, the opening ceremony being performed by ex-Lord Provost McCurdy, Dundee, in the presence of a large crowd of spectators.

The death has taken place of John Macleod, shoemaker, Uir, Skye better known as "Gladstone." He belonged to Caithness and settled there some 30 years ago. He became famous at the time of the Crofter agitation.

An interesting ceremony took place in Blantyre old village school when Major John Ness, V.D., who has just celebrated his jubilee as a schoolmaster, was entertained and presented with his portrait and a purse of sovereigns.

Edinburgh corporation had a surplus of £13,146 last year.

The amount subscribed for the gold chain of office for the provost of Hawick is now over £200.

### UNIQUE COMPILATION BY MR. HUGH V. PAYNE.

#### Shows the Annual Precipitation in the Several Provinces of the Dominion.

Hugh V. Payne, climatologist of the Dominion Observatory, has compiled a work on the Rain and Snow Fall of Canada, the first of its kind ever published in the Dominion. Mr. Payne has been connected with the department for 31 years and has been for about four years engaged upon the work just issued by the Department of Marine under the direction of Chief Stupart. The work is a mass of figures and a faithful daily record of over 60 years. The following is a brief statement as to the distribution of precipitation over the Dominion.

#### BRITISH COLUMBIA.

British Columbia is a territory with very pronounced geographic features, several lofty chains of mountains paralleling the coast from the extreme north to the most southerly boundary. Along the exposed western coast the precipitation is somewhere between 110 and 136 inches, and eastward over Vancouver Island and the mainland the western slopes of the various ranges each claim a much larger percentage of moisture from the Pacific winds than do the valleys and interior plateaus. Near the more eastern shores of Vancouver Island, the annual precipitation ranges between 35 and 50 inches, while across the Straits of Georgia in the valley of the lower Fraser, it is very generally over 60 and less than 80 inches. Eastward of the coast ranges the climate of Yale, Kamloops and Okanagan District is decidedly drier and an annual precipitation ranging from about seven to eighteen inches, according to orographic situation, is an approximate valuation. Approaching the Selkirk range the precipitation increases, and at the higher altitudes is very great, chiefly owing to a heavy snowfall between October and April.

A feature of very pronounced importance in connection with precipitation over the northwest provinces of Canada, is that in Manitoba 50 per cent., and further west more than 62 per cent. of the total for the year falls between May and August, and June is the month of heaviest rainfall, just the very period when moisture is required for the growing crops.

In Manitoba the rainfall is greater than in the Northwest Provinces. The normal annual precipitation over the province is approximately 22 inches,

### NEWS BY MAIL ABOUT JOHN BULL AND HIS PEOPLE.

#### Occurrences in the Land That Rejoices Supreme in the Commercial World.

The death is announced of Sir David Dale, a great captain of industry in the north of England.

Winchester is the oldest of the great public schools. Eton comes second, and St. Paul's third.

Insurances against the result of earthquakes in various parts of the world are being inquired for.

London insurance men estimate British fire insurance companies' liabilities in San Francisco at \$65,000,000. All legally proven claims will be paid.

The National Temperance League holds that for the first time in history the House of Commons contains a large majority absolutely in favor of temperance reform.

A number of young fellows in Dover have formed a "pipe league." They agree to smoke pipes only, and any member of the league found cigarette-smoking is to be fined.

After being twenty years in the service of a family at Saffron Walden, England, as housekeeper, a woman died, and it was found that no one knew her surname.

Some remarkably good prices were paid at a London sale of old newspapers belonging to a gentleman resident in Scotland. A number of volumes of the Oxford Gazette and the London Gazette, 1865-75, fetched £27.

Lady Tate, as a memorial to her late husband, Sir Henry Tate, has purchased premises on Tulse Hill, London, at a cost of £10,000, and given them to the Brixton Nursing Association to serve as their headquarters.

Sir Charles Metcalfe, the consulting engineer to the Rhodesian railways, claims the world's record for rapid construction on the railroad above Victoria Falls. Five and three-quarter miles of track were laid in twelve hours.

The Duchess of Argyll is taking great interest in the new rose gardens at Windsor. This is the outcome of her intense love of flowers, and she often makes valuable suggestions as to the grouping of the different sorts.

The value of the horses, ponies, asses, sheep and pigs in Britain is estimated at £443,000,000. Besides this there is poultry to the value of £5,000,000; dogs £1,470,000; goats, £500,000, and calves, rabbits and so forth, £500,000.

The monthly report of the A. I. A. M. Society of Engineers states that the membership is now 100,000. The

A well-known judge dined at a restaurant where the man who takes care of the hats is celebrated for his memories about the ownership of headgear. "How do you know that this is my hat?" the judge asked, as his silk hat was presented to him. "I don't know it," said the man. "Then, why do you give it to me, sir?" replied the bewildered judge. "Because you gave it to me, sir," replied the man, without moving a muscle of his face.

## PROGRESS BRAND CLOTHING

One of the Best Brands of  
Clothing made.

We sell it.

# J. L. BOYES.

## THE BEST FLOUR.

### DAFOE'S NONESUCH DAFOE'S MANITOBA PATENT

By numerous tests by the best Bakers the above mentioned grades have been proven to be the best Flours in the market.

When buying Flour ask for Dafoe's, and patronize your home mill, thereby producing Bran and Shorts that you can purchase cheaper than the product of the Western mills, which has to be transported thousands of miles at great expense, and usually, when it reaches you, of inferior quality.

The grocer complains if the farmer or the mechanic sends to Toronto or to outside points for an article he can get at the home store just as good, but he does not hesitate to buy Flour from mills hundreds of miles away, and sell you an inferior Flour for more money than you can purchase the home product for, every bag of which is guaranteed.

**CHOICE CORN MEAL and BUCK WHEAT FLOUR** always on hand.  
**FEED GRINDING** a specialty, with the best feed mills known to the trade.

A full stock of the best **ANTHRACITE COAL**. Also in the market for the purchase of all kinds of Grain.

Ask for prices at the big Mill before purchasing your Flour, Feed or Coal.

Eggs may be had in Winter at Summer

## PERSONALS

Mr. and Mrs. Benjamin Denick, of Cressy, are spending a few days the guests of Miss Shaape, Robert street.

Prof. Ferguson and family returned this week to Kingston after a very pleasant summer in Napanee.

Miss Gladys Grange, of Napanee, left for Victoria College, Toronto, last Saturday.

Mr. Warner Eakins, son of Mrs. Dr. Eakins, of our town, arrived in Napanee Monday morning after a very pleasant trip of three months in Italy, Germany, France, and England, and left for Toronto Wednesday.

Miss Pearl Perry, of Napanee, returned home from Ottawa Monday, and brought Miss Caverhill of that city home with her to visit friends.

Mrs. J. A. Fraser, Westport, spent a few days this week in town with his family.

Miss Weightmeyer, of Belleville, is the guest of Miss Flossie Briggs.

Mrs. Saunders, of Kingston, spent the week the guest of Sheriff and Mrs. Hawley.

Hiram Keech, Esq., Kingston, was a visitor to the fair on Wednesday.

Miss Stephaine Jarvis is visiting friends in Cornwall.

Judge Deroche and family have given up their cottage at Thousand Island Park for this season and are spending a week with his uncles, H. M. and W. P. Deroche, in town, after which they propose taking up their residence in Belleville.

Mrs. Costigan, of Deseronto, spent Monday at her father's, H. M. Deroche, K. C.

Mr. R. J. Delong, spent a few days this week in Prince Edward.

Dr. M. P. Symington, who has been spending the summer in Scotland is expected home about Oct. 1.

Mr. and Mrs. R. McCullough, Kingston, are visiting friends at Odessa.

Mr. and Mrs. Geo. Woodstock, spent last week guests of Mr. and Mrs. Robt. McMillan.

Mrs. J. S. Ham, Piety Hill, is visiting friends in Kingston.

Mr. W. K. Pruyn returned from the west on Sunday.

Mrs. Z. A. Vanhuen is visiting friends at Detroit, Mich.

Mr. Horace Tibbs, of Toronto, is the guest of Mr. and Mrs. Dr. Leonard.

Mr. A. E. Paul, ill of Typhoid fever, is improving nicely.

Mr. Frank Rikley was in Toronto taking in the I. O. O. F. proceedings.

Miss Nellie Mathewson spent last week with friends in Arnprior and Ottawa.

Mr. E. T. R. Allen, of Aylmer, has joined the staff of the Crown Bank here, making a staff of five now employed.

Mr. T. S. Price, of Oakland, Cal., is the guest of his sister, Miss Price, after an absence of thirty-nine years. His brother, Dr. Price, of Oakland, Cal., is expected home shortly.

Mr. Z. A. Grooms and Master Harry Grooms, were in Toronto a few days this week.

Mrs. Webster and Mrs. Chas Knight left on Thursday for Chicago to visit friends.

Miss Lona Walters secured first prize at Toronto Industrial Exhibition for a Battenburgh five o'clock tea cloth, exhibited by her at that Fair.

Mrs. T. V. Anderson, Sharpe's Corners, is spending the fall months with friends at Edmonton.

Miss Myrtle Stevens left this week to resume her studies at college in Toronto.

Mrs. Stewart Bowen, Deseronto, and Mrs. Sid Scott are guests of Mrs. De Witt, Durand, Mich.

Mr. Wilkie Madden of the Merchants' Bank staff has been transferred to

## MADOLE & WILSON.

Mr. R. H. McGuinness took first prize on his carriage team, at Belleville Harrowsmith, Centreville and Napanee fairs.

Eggs may be had in Winter at Summer prices. Water Glass Egg Preserver, does it Easy to use and keeps them fresh indefinitely. Sold at Wallace's Red Cross Drug Store.

The Annual Meeting for the election of the officers of the W. C. T. U., will be held in the parlors of the Western Methodist Church on Tuesday afternoon Sept. 25th at three o'clock.

The exhibit of Ladies' work at the Fair was said by the Judge, who is an expert in those matters, to be the best she had ever seen at a County fair and she has had a great deal of experience.

Will put on sale Saturday morning August 4th, two cases containing six hundred pieces of China, all useful articles for household use in endless variety direct from the manufactories in Europe, and at prices never heard of here before for such goods. See show window.

## THE COXALL CO.

Two gypsies, a man and a woman named Boyd, and hailing from Toronto inhabited too freely of intoxicants, on Monday and at midnight became unruly at the Market hotel. They spent the night under the care of Mr. E. B. Perry and will now spend thirty days with turnkey Clark at the County goal.

The Frontenac Business College, Kingston, has just closed the most successful term in its history—not only as regards numbers enrolled but from the success of our graduates in carrying off the best positions available. The fall term opens Sept. 4th and promises to bring together a larger number than ever to prepare for the ever increasing demands of the Business world. No time in the past was there such opportunities offered to young men and women who had acquired a thorough knowledge of business methods and their essential subjects. Are you at present drawing a good salary? If not write us for particulars. T. N. STOCKDALE, Principal.

Through getting drunk on Saturday and being arrested, the theft of a shawl was brought home to Norman Babcock, an old man who trades on the road, and has his headquarters at Odessa. Liquor is thus pointed to as being a valuable aid in the detection of crime. Last Thursday, Emmanuel Orser, of Kepler, missed his wife's shawl from his wagon in which he had placed it, when putting up at the Windsor hotel yard. Babcock was suspected, and when, on Saturday afternoon, Police Constable Arnel saw him driving down Brock street, Kingston, in an intoxicated condition, and unable to direct a horse which required clapping and a long rest at the seaside, he placed him under arrest. By chance, in a search of the wagon, a shawl was brought forth, and when Mr. and Mrs. Orser came to town the next morning they identified it as theirs.

Fred R. Wren is with us again, the Fred of Uncle Tom's Cabin fame, he who carried the largest pack of bloodhounds; the best company of actors and the finest colored brass band ever visited Canada. Fred also had the distinction, according to the Toronto World, of playing to the largest number of people ever assembled to Witness Uncle Tom's Cabin in any city in the world; this at the Horticultural Gardens in Toronto. Mr. Wren now returns to us with his own company of comedians, backed by artists of ability known all over. New scenery and effects, and, best of all, producing good English and American comedies—not sensational trash. Everything, including the singing and dancing, up-to-date; not a dull moment in the entire entertainment. Fred's motto is, "Laugh and the world laughs with you." Mr. Wren will be remembered as the jolly Colonel Bell, late with the "Arrival of Kitty" Company. See his company of comedians and jolly Fred himself at Opera House Sept. 26 and 27th.

## New Evaporator.

Messrs. Collier Bros. have about completed the building of their evaporator in the old soap works, near the Reindeer dock purchased by them last year, and are now ready to purchase all kinds of apples fit for evaporating. They have a first-class building for the purpose and are getting all the necessary machinery for the handling of a large quantity of apples.

## Camden East.

Thanksgiving Day has been fixed by the government for Thursday, October 18th. The congregation of St. Luke's Church, Camden East, will (D. V.) observe it by attending two services in their handsome parish church, at 11 a.m. and 7.30 p.m., when the Rev. G. Ross Beamish, M. A., rector of St. Thomas' church, Belleville, and Rural Dean, of Hastings, will be the special preacher for the happy occasion.

## Guy Bros' Minstrels.

The Guy Bros. appear in the Brisco Opera House, Monday night, Sept. 24th. Guy Bros. have been identified with the minstrel business for over 35 years, and they have the reputation of giving a first class entertainment. Guy Bros. come this season with an entire new show from start to finish, this is the best singing show on the road. The Press and Public say it is the best they ever had. Don't miss seeing them, you will get your money's worth.

## BEAUTIFULLY LIGHTED.

The New Electric Light lights the streets beautifully. Pratt's Astral Oil (the highest grade American oil) will light your house beautifully. Buy it at Wallace's Red Cross Drug Store.

## A Dangerous Gang Rounded up.

Several complaints were made to Chief of Police Graham, on Wednesday that pick-pockets were operating among the fair day crowd, a number of persons having had their pockets picked. Before night Chief Graham assisted by Messrs. Greer and Blair had rounded up a bunch giving their names as John Jenkins, John Brown, Jas. Wilson and David Anderson. Brown was caught by Mr. Fred Blair in the act of robbing Mr. R. J. Carson, of Kingston, of seventy-five dollars. They appeared before the Magistrate and were remanded for eight days, so that further inquiries may be made concerning them.

## Yacht Races.

The Napanee Yacht Club held the first of a series of races for the silver cups on the river course last Friday afternoon. The Gladys was awarded the race in the yacht class on a foul, and the "Quinte" won as she pleased in the skiff class. Vice Commodore, Ed Roy was on hand with his steam launch and acted on the race committee with Capt M. B. Mills.

The Race between the Gladys and Hyku was a very pretty one only seconds separated them at the outer buoy, but as the breeze freshened the Hyku increased her speed and passed the Gladys and crossed the line 3/4 min in the lead but lost the race for having fouled the Gladys in passing. The next race takes place on Friday the 21st at 2 p. m.

E. LOYST has large stock of flour, Royal Household and all other grades, all kinds of feed, large quantities at the lowest prices. He wishes to sell out in the next month. Salt, Coal Oil Groceries. Highest price for eggs cash or trade. A call solicited.

On Tuesday morning a stranger named Thomas Myers hired a horse and rig at the livery of Robert Wilson Princess street, Kingston, to drive to Odessa. He said he was a telephone foreman, and had to drive out there to meet a gang of linemen. In the afternoon, Chief Graham arrested Myers in Napanee for being drunk. The stranger had been trying to sell the horse and rig. Chief Graham telephoned to Kingston, and in the evening Mr. Wilson came to Napanee and identified the rig as being his. A charge of theft has been laid against Myers, who, it is thought, may be an ex-convict.

To resume her studies at college in Toronto.

Mrs. Stewart Bowen, Deseronto, and Mrs. Sid Scott are guests of Mrs. De Witt, Durand, Mich.

Mr. Wilkie Madden of the Merchants' Bank staff has been transferred to Athens, Ont.

Mrs. L. F. Moore, of Elm Brook, Prince Edward County, was the guest of Mr. and Mrs. Dr. Ming, on Wednesday.

Miss Jessie Joyce, North Fredericksburgh, is attending Albert College.

Mr. Frank Thomas, Montreal, spent Sunday the guest of his parents, Mr. and Mrs. W. Thomas.

Mr. G. McCullough, Marysville, left for Victoria B. C., on Tuesday.

Mr. and Mrs. H. Reid, Blessington, East Hastings, were in town Wednesday attending the fair and gave us a call.

Mrs. S. D. Lewis, Oswego, N. Y. is the guest of Mrs. W. A. Masters.

Messrs Robt Solmes and Jas Douglas and Ham Loucks, were in Toronto this week attending Sovereign Grand Lodge I.O. O. F.

Mrs. Vanlunen, of Kingston, is spending a few days in town the guest of Mrs. A. Wolfe.

Mr. and Mrs. Nicholas VanAlstine, spent a few days last week in Brockville, visiting their son, Ezra.

Mr. R. N. Lapun, Wilton, spent last week in Syracuse.

Mr. and Mrs. C. A. Anderson took in the Centreville Fair on Saturday last.

Mr. Jas. Taylor spent last week in Woodstock, the guest of his son, Mr. W. J. Taylor.

Mrs. Jas. Graham, of Bath, was in town on Tuesday.

## MARRIAGES.

WEATHERSELL-SAGAR—By Rev. G. S. White, at Napanee, Sept 13th, 1906, Mark Harold Weathersell, of Toronto, to Mrs. Rachael Sagar, of Napanee.

BARAGE-KNIGHT—By Rev. G. S. White, at Napanee, Sept. 19th, 1906, Thomas Edward Barage, to Miss Edith Sophia Knight, both of Bath.

RUSSELL-LANE—At the residence of the bride's mother, Mrs. Henry Lane, Regina, of Calgary, Alberta, to Miss Jessie Lane, of Napanee.

## RUBBER GOODS.

Don't buy a Hot Water Bottle until you see "The Beaver Water Bottle." The best and most serviceable Bottle offered. Sole Agency at Wallace's Red Cross Drug Store.

#### Bad for the Eyes.

The long nights and consequently the increased amount of reading done, cannot but tax the visionary powers to the utmost. If the sight is at all impaired the strain on the eye is destruction. Impaired vision scientifically corrected and satisfaction guaranteed at The Medical Hall—Eyes Tested Free.

FRED L. HOOPER.

Edward Caton, a fakir, appeared before Police Magistrate Rankin, on Thursday morning and was assessed three dollars and costs.

Fred Curry announces the arrival of the long-looked for Dolly Varden and Foot-rite shoes for which he was fortunate enough to secure the exclusive agency. He is clearing out all his odd lines to make room for the reception of these two splendid shoes for men and women, the only shoes made in America and sold at the same price in Canada and the United States.

Dolly Varden booklets and Foot-rite books may be had from Mr. Curry for the asking. He particularly wishes people to come just to see the shoes. They will never be importuned to buy.

The superintendent of a shoe factory one of the best factories in America, conceived the idea of making a man's shoe which would embody in one shoe all the accepted ideals and advantages claimed by the many individual shoe manufacturers. Between a score or more of factories some possessed one or two distinctive characteristics. The practical shoe manufacturer determined to combine every admitted improvement into one shoe.

For years the superintendent worked on the idea, keeping always in view the production of a perfect shoe. There was a general rejoicing when the first shoe made was found to contain twenty improvements, many of them being advantages possessed by no other shoe made, but all of the distinctive known improvements being clearly apparent. After various trips to Boston and Montreal the shoe man found the capital, and the name of the shoe was registered in the tersely descriptive word "Foot-rite," a gentleman's shoe to be made by the Foot-rite Shoe Company. Offices were opened in Canada and the United States so that the Foot-rite shoe might be sold in both countries at the same price—\$4.00 and \$5.00.

Foot-rite shoe stores are to be opened in every city in America. "The shoe with twenty improvements" will be a household word in every town and city.

"We can only sell this shoe in Canada at \$4.00 and \$5.00 by having the control of our factory. If we had to

# THE \$10,000 SACRIFICE SALE! is still Running in Full Blast

#### TOWN COUNCIL.

Council Chamber

Sept 17th, 1906.

Council met in regular session on Monday evening, Mayor Lowry in the chair.

Councillors present—Simpson, Williams, Graham, Kimmerly, Meng.

The minutes of the last regular session were read and confirmed.

#### COMMUNICATIONS

From W. S. Herrington, treasurer Public Library Board, asking the council for the usual donation of \$250 to the Public Library. Laid on the table until later in the evening.

From Mr. R. Mill, tendering his resignation as town treasurer. Laid on the table until later in the evening.

From E. McLaughlin, asking for the position of town treasurer, at a salary of \$200 per annum, town to furnish.

with twenty improvements" will be a household word in every town and city.

"We can only sell this shoe in Canada at \$1.00 and \$5.00 by having the control of our factory. If we had to pay the duty of bringing them from the United States we would be compelled to make the buyer pay the dollar duty, and you know that shoes made in Canada are of better and more honest make than the average American shoe," said the inventive Superintendent. "The real honestly made American shoe cannot pay the duty and sell at any kind of a fair price."

The president of the Foot-rite Shoe Company says that they are very particular in their choice of an agent. They are giving an exclusive franchise in each town or city. When only one store can have the Foot-rite shoe it is important that the dealer selected should be worthy. "And we are going to wait always until we get the right man in the right place," he said.

One gallon of Prism Brand Paint will cover 360 sq. ft., two coats. Every can guaranteed. The Medical Hall.—Fred L. Hooper, sole agent for Napanee.

From Mr. R. Mill, tendering his resignation as town treasurer. Laid on the table until later in the evening.  
From E. McLaughlin, asking for the position of town treasurer, at a salary of \$300 per annum, town to furnish necessary securities. Laid on the table.  
From E. S. Lapum, asking for the position of town treasurer. He would be pleased to meet the Finance Committee, or council as a whole and arrange as to salary etc. Laid on table.  
From Wm Rankin, applying for position of tax collector for 1906. Laid on table.

From G. H. Perry, asking to be appointed tax collector for 1906, at a salary of \$200. Laid on table.

From F. H. Perry, applying for position of tax collector for 1906. Laid on table.

From F. C. Bogart asking to be appointed tax collector at a salary of \$200. Laid on table.

Mr. Jas Fitzpatrick and others petitioned the council for a granolithic walk on east side of Adelphi street, between Thomas and Bridge streets. Laid on table.

The Fire Water and Light Committee reported that they had secured the service of Mr. Tompkins, of Strathcona, as firemen at the electric light plant, at a salary of \$7 per week.

Moved by Coun Kimmerly, seconded by Coun Meng, that incandescent lights be placed in front of fire hall and town hall and that the Fire, Water and Light Committee have power to act in the matter. Carried.

Moved by Couns. Meng and Kimmerly, that two incandescent lights be placed at the west end of Water street and two at approach to suspension bridge. Lost.

Moved by Coun Simpson, seconded by Coun Meng, that the resignation of Mr. Robert Mill, as town treasurer, be accepted, and that the clerk write Mr. Mill, on behalf of the council, expressing their appreciation of his long and efficient services, and express a hope that he may be long spared to enjoy a well-earned rest. The said resignation to take effect as soon as a new treasurer is appointed. Carried.

On motion of Couns. Williams and Meng, the petition of Jas Fitzpatrick and others for a granolithic walk, was granted, under the usual conditions.

Mr. E. McLaughlin and others petitioned for a granolithic walk on the west side of John street, north from the E. M. Church. Granted.

Mr. N. Deans and others asking the council to have granolithic crossings put in at the corner of Robert and Thomas streets. Referred to Street Committee to report.

Moved by Couns. Williams and Graham, that the communication from the Public Library, re grant be left on the table until next meeting of council. Carried.

Call at our show rooms and inspect our Furniture. You will not be disappointed in our goods. We have everything in Furniture.

# The Gibbard Furniture Co.,

  
of Napanee, Limited.

Moved by Couns. Simpson, and Kimmerly that the applications for the position of treasurer be left on the table until next meeting of council. Carried.

Mr. J. P. Hanley and Mr. P. Gleeson appeared before the council and asked for information as to the council intentions in reference to the extension of the canning factory sewer.

A good deal of discussion took place, and a motion and an amendment were introduced but the vote stood tie, and thus the question stood as before.

Mr. Wm Rankin was appointed tax collector for 1906, at a salary of \$200, \$800 is the amount of bonds furnished by the tax collector.

Mr. J. F. Chalmers addressed the council in reference to insurance for the boilers at the electric powerhouse. Referred to Fire, Water and Light Committee to report.

### SPECIAL SESSION.

Council met in special session on Monday evening.

On motion the motion of the previous session granting a granolithic walk to Mr. E. McLaughlin and others to be laid inside the trees was rescinded.

On motion of Coun. Meng, seconded by Coun. Normile, the prayer of the petition of E. McLaughlin and others was granted for a granolithic walk five feet wide, to be placed on the outside of the trees. Also that that portion of cement walk to be built on John street, opposite the Eastern Church, be placed outside the trees, that portion to be eight feet wide.

On motion of Couns. Simpson and Meng, the town solicitor was instructed to appear before the Ontario Railway and Municipal Board in reference to the town's application to have useless poles removed from the streets, also that Mr. Chas. Walters appear before said board and give evidence. Council adjourned.

### Work the Post Office.

If you cannot get what you want at home, it is not necessary to wait until you can come by train or drive to town. We keep everything usually kept in a first-class drug store. Our mailing department will give you the same service as though you came yourself, and the post office is in our employ. The Medical Hall—FRED L. HOOPER.

### DESERONTO ROAD.

A very pleasant event took place at the home of Mr. and Mrs. Wm. Joyce, on Wednesday evening Sept. 12th, it being the marriage of their daughter Ethel to Mr. Harry Oliver youngest son of Allen Oliver, Esq ex-Reeve of Richmond, Rev. Strike, of Deseronto, officiating. The happy couple left the same evening for Mr. Oliver's home.

Mr. Gilbert McGreer has been engaged putting a new roof on his house now occupied by Mr. Hawley.

Mr. John Girvin has been busily engaged for the past three weeks threshing on this road. He is now making the farmers happy on the slash road.

The Trustees of S. S. No 1, have added greatly to the appearance of the school house by giving the roof a new coat of paint, more improvements to follow.

Mr. William J. Bowen near the west boundary, is engaged this week building a large silo at the south end of his barn.

## OUR STOCK OF DRESS GOODS

### PROVES IT'S OWN SUPREMACY.

It is generally agreed that the coming season will break all records in the demand for good Dress Goods; certainly this Department has made unprecedented preparations for it. But we regard the magnificent stock collected as half sold already, because it was so well bought. It has shown itself to be a true reflection of the Fabric-Styles now clearly indicated for the coming season. The verdict of every woman who visits the Department is that no display hereabouts compares with it—in the matter of quality, range or prices. Get our quotations on such fashionable novelties. We hesitate not in saying that our stock is the (Creme) from the most fashionable and style predominating centres.

Prices from 8c to 20c yard.

Time to buy Euro Fall Stock Complete

## TAMWORTH FAIR

The fall show at Tamworth on Friday and Saturday last, was a success in every particular, notwithstanding the fact that the morning of Saturday was ushered in amidst a heavy down pour of rain, which no doubt kept a great many from attending the fair. On the afternoon of Friday, besides the horse races, a baseball match was played, Marlbank and Tamworth being the contesting teams. Tamworth won by a score of 18-16. The following are the results of the races :

# MADILL BROS.

### Gettin' Wisdom

is a comparatively easy task if you start it while you are young. Don't allow your children's eyes to be ruined for all time because "they look too 'ded' with glasses on."

We'll tell you the truth as to whether they need glasses or not, and charge you nothing for the telling.

Headaches in children are suspicious. We are also the best people to guarantee the quality of our frames, it being part of our jewelry business to acquire that ability and knowledge.

# THE EXPRESS.

**Wampole's Fruit Drops.**  
Orange, Lemon, Lime Fruit,  
Butter Scotch, Mixed Fruit,  
Paregoric, Menthol, White Pine  
Black Cough, Linseed, Licorice,  
and Chlorodyne.  
**LAWRASON & CO.**

**FRIDAY, SEPTEMBER 28th, 1906**

**\$1 per Year in advance: \$1.50 if not so paid.**

## YARKER.

The wheel factory is having a new coat of paint and smoke stack, which greatly adds to the appearance of it. We have to record the birth of a son at John Woodhouse's.

Henry Gordon had the misfortune to break his collar bone.

Clarence Weagant left for Montreal having finished his vacation.

Mrs. G. Joyner has gone to California, U. S.

Lizzie Finley, Strathcona, spent a few days with S. Winter.

Mrs. (Prof.) Bell and Ida Wartman, of Washington, D. C. are at the home of Mrs. B. Gness.

William Hope who taught school here fifteen years ago, and left for California, gave us a call last week.

Mrs. Bruin and Alfred Connolly are on the sick list.

Miss Adeline Wilde, H. Shultz, E. Green and wife, and Mrs. Kelly, Watertown, N. Y. were the guests of Mrs. Stanley Shultz.

E. W. Benjamin is having a new furnace in his residence.

The Methodist church here will also have a new furnace.

Miss Violet Ewart has opened out here in the millinery.

## A Stove Talk.

The stove season is nearly here again and you are beginning to plan for that new up-to-date Range and thinking of the comforts, which it will bring to you. We wish to announce to you that we find ourselves in a much better position than formerly to accommodate this growing trade. Increased floor space and light enables us to make a much larger exhibit of this class of goods. Imperial Oxford Ranges still lead, but we have several other good and up-to-date lines. Sizes and prices to suit everyone. Be sure and inspect our stock before you purchase. It will be a pleasure for us to show you the goods.

**MADOLE & WILSON**

## LAPUM.

A large number from here attended the Napanee fair.

George Joyner is spending two weeks with friends in Sydenham.

Mr. and Mrs. B. Rose and Edwin Bell attended on Monday, at Sunnyside, the funeral of James Powley, brother-in-law of Mr. Rose.

Mrs. Levi Brown is spending two weeks in Chicago.

Miss Lilly Wallace has returned to her home in Harrowsmith, after a visit here with her friend, Miss Florence Joyner.

Baker Allen, Yarker, has been unable, owing to the large demand of bread to supply his customers at Lapum the last two weeks.

Mrs. Adkin Snider, Odessa, and Mrs. Almond Brown, Wilton, were callers on Sunday of Miss Carrie Brown.

Rev. R. A. Whattam will preach here in the meeting house on Wednesday evening. He purposes holding a series of prayer.

Frederick Gates and family, Westbrook, were on Sunday guest of Mr. and Mrs. B. Rose.

Miss Florence Joyner has returned home from visiting friends at

**FINE FARM FOR SALE**—John M. Hawley offers for sale, his farm of 200 acres, situated at Hawley, 2nd concession, South Fredericksburgh. This is one of the very best farms in the county, well drained and fenced, and free from foul seed. 160 acres under good cultivation, 10 acres woodland, 30 acres new land ready to stump. Good orchard, 4 splendid wells. Fine brick residence, lawn and shade trees. 2 large barns, tenant house, new poultry house, hog house, etc. Very convenient to church, school, post office and blacksmith shop. 8 miles from Napanee, 4 miles from Bath, and 3 miles from station. For further particulars enquire of  
30-1m **JOHN M. HAWLEY.**

## FOR SALE.

That desirable farm known as the Blanchard Farm, situated about one mile south of Napanee containing 210 acres more or less. Will be sold

every evening. He purposes holding a week of prayer.

Frederick Gates and family, Westbrook, were on Sunday guest of Mr. and Mrs. B. Rose.

Miss Florence Joyner has returned home from visiting friends at Harrowsmith.

Mr. and Mrs. Jediah Irish, Yarker, at Jamieson's on Sunday.

G. C. Davey is putting some repairs on his building. Cyrus Sutton, Colebrook, is doing the work.

Walter Bush is spending this week with his brother, Cyrus Bush, Thompsonville.

F. E. Brown is building a cement walk in front of his residence.

John Simpkins has purchased the Ira Smith farm near Odessa.

The "Stove Exhibit" will be at Boyle & Sons' Store. This year we can show more new features in our first class stoves, which surpass any that have yet been shown. Go and see Good Stoves at BOYLE & SON.

#### STRAITHCONA.

J. R. Macgillivray and wife, Glenora, attended the county exhibition at Napanee, staying with Mrs. Macgillivray's brother, Byron Rose.

Several from this place attended the fair; the day was fine and the exhibit also. All seemed to enjoy themselves.

Mrs. Robert Sheller has been quite ill.

Little Viva Cooper was seriously ill for a few days.

The railroad company is improving its property about the station, building new tracks and switches, laying concrete walks, and otherwise improving things.

J. Granger, superintendent of St. Jude's Sunday school, gave the pupils their annual outing by holding a picnic in McAvoy's Grove. Mr. Granger and D. Aseltine hired a large bandwagon to drive the children, also the parents, with the refreshments, to the grounds. After dinner games were indulged in; races, jumping and swinging and a tug-o-war. The rector, Mr. Dowdell, was present, and did all he could to amuse and entertain the little folk. All enjoyed themselves very much.

Last week W. A. Dean, Newark, N. Y., arrived here, after an absence of eighteen years. His father was overseer of the paper mill here. He found the place greatly changed, but few of the people he left are here now. He stopped, while here, with the Madden and Lott families. He had a fine business at Newark. All who knew Mr. Dean when a little boy knew him for a gentleman. He has not changed in that respect. The same good natured, free-hearted Willie, as his playmates called him. His friends were pleased to see him and learn he was doing so well.

James Hillman made a trip to Ottawa, last week.

R. Rook has returned, after an absence of several weeks at Smithfield.

D. A. Nesbit, B. A. occupied the pulpit of the Methodist church on Sunday last.

Charles Carter has given up the farm he has rented for the past two years, and taken Mr. Cook's in the third concession of Camden.

The money stolen from the Bank of Commerce at Kinistino, Sask., was found under the stairs in the bank building.

## CASTORIA

For Infants and Children.

The Kind You Have Always Bought

Bears the  
Signature of

and a quantity of farm implements and household goods and furniture. Terms of sale for chattel property.—Cash.

HERRINGTON, WARNER & GRANGE,  
Napanee, Ontario.  
43c Vendors Solicitors.

#### HINCH

Every one has been well pleased with the fine weather we have had for our fall fairs.

Mr. L. S. Price, California, is spending this week with his brother, Mr. E. G. Price.

Mr. Chas Walker is still following his usual business, threshing.

We are all glad we have one good running house left us. Congratulations "Old Bill"

Mr. Thomas Whelan had a husking Saturday night.

Miss Gertie McNeil who has been very ill is now convalescent.

Mr and Mrs John Reid were guests at E. G. Price's on Sunday last.

Miss Pearl Coburn is spending this week in Napanee.

#### Rapid Travelling

One of the rays of light emitted from Radium is said to travel 40,000 times faster than a bullet. You get the greatest amount of light and the least smoke from our special grade of American Coal Oil. Try one gallon. The Medical Hall, FRED L. HOOPER.

#### LAPUMS WEST.

J. A. Simpkins spent Sunday visiting friends in Watertown.

Mrs. L. Brown, left on Saturday for a few weeks stay, visiting friends in Chicago.

Mr. Jas Henderson, of Watertown, has been visiting relatives in this district the past week.

Mr. and Mrs. B. Rose were attending the funeral, of the late Mr. Morley, at Westbrook, on Monday.

Mr. and Mrs. F. Gates were visiting at Benjamin Rose's, on Sunday.

Potato digging is in order here this week. The crop is good.

Mrs. Frank Wallace, of Colebrook, was visiting at her parents, Mr. Chas. Joiner, on Monday, his sister Florence accompanied her home.

#### The Best Window Glass.

There is a great difference in window glass. Pilkington's English is free from flaws, uniform thickness and clear color. Sold at The Medical Hall.—FRED L. HOOPER.

In its third report the Hydro-electric Power Commission recommends the Government to retain all water powers not yet leased.

## DIAMOND DYES

Made Especially for Easy and Successful Home Dyeing

DIAMOND DYES are the only package dyes made especially for easy and successful home dyeing. They re-color faded feathers, plumes, scarfs, ties, blouses, jackets, silk sashes, dresses, skirts, stockings and other articles of wearing apparel.

It is as easy to dye a faded garment—small or large—with DIAMOND DYES as it is to wash it with soap, and the colors are forever fast in washing or sunlight. Bright and economical women save many dollars each year by the use of Diamond Dyes, which make old things look as good as new.

Users of package dyes will please bear in mind that vile and worthless imitations of Diamond Dyes are sold by some dealers. Every time you purchased dyes be sure you ask for the "DIAMOND." Refuse all other makes if you would avoid trouble and loss of money. Write to Wells & Richardson Co., Limited, Montreal, P. Q., for New Direction Book, Diamond Dye Cook Book and Illustrated Booklet, entitled "Diamond Dye Longjohns' Winter and Summer Sports; sent free to any address.

## Business College and School of Finance

#### HIGH CLASS INSTITUTION.

17 ex-Public School Teachers and 22 Graduates of other Colleges, helped to compose our class.

# TOO SOON THE END WILL COME

## Promise of Broader Life in the Death of Summer

How great is the goodness which Thou hast stored for those that reverence Thee.—Psalms xxxi. 19.

This morning I chanced to hear a few bars of "The Lost Chord." The theme is one that touches every heart, for every heart has lost some sweet harmony.

Autumn's more sober colors are replacing the radiance of spring and the strength of summer. The leaves are changing hue. The evenings draw in; the breezes murmur the first whispers which tell us that nature's life is waning. But too soon the end will come. That end we call death—nature's death. Year after year the same story is retold. Springtide's tender leaves of hope, summer blossoms, autumn harvests, these spell beauty, joy, prosperity. Winter blasts and shrouds and fetters spell—what? The reverse of beauty and joy and prosperity. No—emphatically no.

All is beautiful in God's creation. The echo of the winter blast is the rustling of the golden grain in

### THE COMING SEASON.

From under this shroud of snow will spring the growths which mean man's joy. And the fetters of ice are but prophetic of harvests which build prosperity.

What holds good in nature around us holds good in our own human lives. The springtide of life, with its tender leaves of hope, its buds of promise, its dreams and happiness and beauty, its visions of success and prosperity, passes away.

Then in the summertime of our existence we begin to realize that things are not what they seem, but the disappoint-

ments, the defeats, the tangles, the strains and the stress shall be found to mean the strengthening of our own character, the development of our own possibilities for better things, leading to the harvesting in life's autumn of all that is worth harvesting—the wisdom, the experiences, the growths and fragrances of tried love and the blossoms and fruits of tested friendship.

Let the autumn come, even though the beauty is so different from the vigorous and glowing and promising beauty of earlier days. When at last we will behold the great goodness which God has stored for us we will have learned to have faith in God's workings. We will have discovered gratitude for God's blessings. We will have made amends for our shortcomings and we will be calmed by our hope

### FOR GOD'S SALVATION.

These are notes of the perfect chord—to most of us on earth a lost chord. We hear its far-off sounds more plainly; its melody is restored to our memories when our ripened years remind us that death, God's ingathering, is at hand. That divine ingathering will mean that He will, with His hand and with His power, with His wisdom and with His alchemy, gather in, weave, merge and transmute all the sorrows and tangles, all the lost hopes, faded visions, foiled efforts, all the bereavements and pains and trials of life, into something new and beautiful and wonderful, even as He transmutes the desolation of winter, its blasts, its snow shrouds and its icy fetters, into the beauty of spring, the radiance of summer, the harvests of the autumn.

of challenging to combat. The term thus "describes the spirit of defiance which animated rival parties amid the heated atmosphere of religious controversy."

7. God is not mocked—God's judgment is unerring and sure, for whatsoever a man soweth, that shall he also reap.

8. The crowning fruit of the guidance of the Holy Spirit is the inheritance of eternal life.

## RESURRECTION FLOWER

SAID TO HAVE BEEN DISCOVERED BY RUSSIAN BOTANIST.

Comes to Life Again Though Apparently Dead When Moistened With Water.

That mysterious blossom of which only one specimen has ever been found, and that which that great naturalist, Humboldt, obliged to own that he knew nothing like it in nature, named "the flower of the Resurrection," it will be remembered by those of us old enough to recall 1848, writes a correspondent of the London Globe, was brought to Europe by Dr. Beck, who had gone to Nubia on a shooting expedition. He bequeathed it to his friend Lannion, who bestowed on Humboldt one of the two flowers on the plant which Dr. Beck brought back.

This flower possessed the remarkable power of coming to life again though apparently dead when moistened with a little water, blossoming afresh as if just at its apogee of beauty. This was not a variation of the Indian man-

## THE BRITISH OFFICER

HIS MENTAL, PROFESSIONAL AND BUSINESS CAPACITY.

Many Things He Should Know But Falls In Usually in Time of Need.

In view of the recent report of the South African War Stores Commission, with its severe strictures on the mental, professional and business capacity of the British officer, it may be of general interest to review briefly a few of the miscellaneous accomplishments in which the average subaltern is expected to excel, says the London Daily Graphic.

Apart from the study entailed by the particular branch of the service to which the subaltern belongs there are numerous courses of instruction about which the long suffering taxpayer knows little or nothing. Many of these courses are compulsory, and together with the voluntary ones they occupy the greater portion of the initial stages of a subaltern's career.

After a few months' service he proceeds to Hythe, where he learns the theory and practice of musketry, the history of firearms and the mechanism of the rifles and machine guns of all nations. Later, at Aldershot, he is taught signalling with flag, lamp, heliograph and semaphore, and afterward, at the veterinary school, he learns the structure and diseases of the horse, the care of the animal in health and its treatment when sick, how to forge its shoes and nail them on, how to fit saddlery and harness, and the construction of stables and management of animals both

### ON LAND AND SHIPBOARD.

He then qualifies as a transport officer, receiving instruction in the details of manufacture and care of all army vehicles from the water cart to the gun carriage. A knowledge of motor cars and traction engines has recently been added to the curriculum. Afterward he is taught how to judge the quality of forage, and he often has to compete with the farmer and professional buyer in the purchase of hay and straw by the rick from the meadow, or oats by the shipload from Mark Lane.

In order that the soldiers' food shall be the best obtainable (at a price), the officer has to be instructed in the quality of flour and meat (dead and alive), and he also has to be conversant with the arts of breadmaking and butchery. Likewise the signs of age, health or disease in cattle and sheep and the quality of groceries, as well as beer, wines, spirits and milk, must be learned if he wishes to gain a "supply certificate."

At Chatham he is taught to make trenches, temporary bridges and military obstacles, and to draw maps, write reports and "observe" the stars. There, too, he is shown how to survey an enemy's country from the giddy heights of a balloon, or to approach his fortresses by means of underground tunnels; and he may, if he be so inclined, be trained at the local gymnasium as a boxer, a fencer, a gymnast, or an exponent of jiu-jitsu; and—having achieved all these qualifications—he can crown his ambition by graduating as a chef at the Aldershot school of cookery.

Advantage is taken of his linguistic abilities to send him to Japan for two years to study Japanese, and he is likewise encouraged to qualify as an interpreter in as many languages as he has a fancy for, from Chinese to German and from Hindustani to Cape Dutch.

Every British officer is now supposed to know how to render

### "FIRST AID TO THE WOUNDED"

and how to bandage, splint and prescribe for minor ailments, and he is even expected to be a master of phonetics and an essayist on subjects varying from the report of a cricket match to the

## HOME.

### SOME DAINTY RECIPES.

Stale Cake, with the addition of thin custard, makes an excellent boiled pudding. Serve sweet sauce with this.

Fried Vegetable Marrow.—Stew a vegetable marrow in weak stock, then drain thoroughly and stamp into neat rounds; drain quite dry. Dip into seasoned egg and breadcrumbs and fry a golden-brown color. Serve piled on a d'oyley with grated cheese scattered.

Sweet Croutons.—Cut some neat little rounds of bread about one inch and a half thick and scoop out a part of the centre. Soak for a few minutes in sweetened and flavored milk, drain slightly, and fry in batter to a golden color. Fill the hole in each with preserve, sift caster sugar over, and serve.

A lamb chop to be in perfection should be cut one inch and a half thick and be cooked well, for underdone lamb, like veal, is unwholesome and unpalatable. The correct cut for a lamb chop is from the loin, and most of the fat should be removed before cooking. Just as you serve the chop, put on it a lump of butter which has chopped parsley and mint worked into it.

Cheese Salad.—Salads are always popular, and any novelty in serving them is appreciated. Arrange this salad in a bowl, using lettuce, watercress, etc., and then make a good mayonnaise sauce. Take some cream cheese and pound it in a mortar, moistening it by degrees with the mayonnaise. When thoroughly amalgamated pour over the salad, garnish with tomatoes or radishes, and serve.

Oporto Rice.—Swell some well washed and dried rice in plenty of milk, then add sugar to taste and let all cook gently till the milk is all but absorbed; add two ounces of blanched and roughly chopped almonds. Place the rice in a deep china dish, shaking it till the rice lies level, sprinkle it with cinnamon and serve with thick cream on the top. Do not hurry the cooking of the rice if you wish the dish to be at its best.

Chocolate Icing.—Place in a saucepan a quarter of a pound of icing or caster sugar, one ounce of grated chocolate and a tablespoonful of water, or a little more if necessary. Stir all over a moderate fire until the icing becomes as thick as cream. Lay this evenly on a cake with a knife, which should be dipped occasionally into boiling water. When finished place in a cool oven for a few minutes.

An Inexpensive Veal Dish.—Dredge a knuckle of veal thickly with flour, dissolve two ounces of best dripping in a stewpan, add the veal and cook till brown, turning constantly. Nearly cover the meat with stock, season with a blade of mace, and onion stuck with cloves, and the juice and rind of half a lemon. Cover the stewpan and simmer its contents for two and a half hours. Strain the gravy, thicken it with browned flour and pour over the meat.

Roast Ham.—This must first be boiled, and longer time must be allowed than if it might remain in its liquor to cool. When tender take off the rind and trim the ham neatly. Place it in a baking tin with sufficient liquor to come halfway up the ham, cover it with a piece of greased paper, let it get very hot in the oven for about half an hour, then send into table nicely glazed or covered with brown crumbs and garnished with vegetables. Broad beans, peas, spinach, and brussels-sprouts are particularly suitable for handing with this dish.

Dutch Rabbits.—Take a nice fresh young rabbit, soak it in salted water for an hour, drain dry; wipe it in a clean cloth and lard with strips of sliced bacon on the back. Truss the rabbit into a neat shape and put in a baking pan, pour over a cupful of water,

## THE SUNDAY SCHOOL

### INTERNATIONAL LESSON,

SEP. 30.

### Lesson XIV. Temperance Lesson.

Golden Text: Prov. 20. 1.

### THE LESSON WORD STUDIES.

Note.—The text of the Revised Version is used as a basis for these Word Studies.

The Epistle to the Galatians.—The Pauline authorship of the epistle to the Galatians has never been doubted, although the time and place of its writing cannot be determined with absolute certainty. The probability is that it is to be counted among the earliest of the Pauline writings, and that its author addressed it to the Galatian churches from Ephesus, probably about A.D. 57-58. The churches to which it was sent were composed largely of Gentile members. They had been founded by Paul himself. The purpose and content of the epistle has been briefly and well stated by Frederic Rendall in the Expositor's Greek Testament, as follows: "The Galatian epistle was evoked by an insidious attack on the Christian freedom of Greek churches, and its tone is thoroughly controversial. It insists on the futility of seeking justification by obedience to the law, it judges that Jewish Christians have all confessed themselves guilty sinners, and owe to Christ their redemption from the curses of the law; it establishes the provisional character of the Sinaitic dispensation, and reduces it to a mere preparatory discipline, destined for an age of spiritual

obedience to the law, it judges that Jewish Christians have all confessed themselves guilty sinners, and owe to Christ their redemption from the curses of the law; it establishes the provisional character of the Sinaitic dispensation, and reduces it to a mere preparatory discipline designed for an age of spiritual childhood and wholly unfit for Christians, seeing they have attained to spiritual manhood; it dwells on the bondage of Israel after the flesh, and identifies unbelieving Jews with Ishmael in their present temper and future destiny." Chapters 1 to 4 inclusive are devoted to this controversial doctrinal teaching, discussing and illustrating the principle of justification by faith. In chapters 5 and 6 the apostle gives some practical exhortations based on this preceding doctrinal teaching, and exhorts the Galatians to stand fast in the higher liberty which they have attained through faith. He further points out that this liberty must not be abused, since it is not an exemption from law, but a fulfilling of the law in love to one's neighbor. At this point in the exhortation of the apostle our lesson begins.

Verse 15. Bite and devour—Strong figurative expressions of partisan hatred and strife.

Consumed one of another—The inevitable result of discord in a Christian community, if long continued, is the dissolution of the community itself. "A house divided against itself cannot stand."

16. Walk—Order your conduct. By the Spirit—Guided by same. A higher life principle than carnal desires is to control the conduct of a Christian.

17. Flesh . . . Spirit—Under one of these two categories Paul places all the various motives which operate on the mind and will, and determine action. In 1 Cor. 2, 14, a similar line of division is drawn.

These are contrary . . . that ye may not do—Antagonistic by divine appointment, this antagonism being intended to exercise a controlling influence over the human will.

18. Not under the law—Those whose conduct is directed by the guiding influences of the Holy Spirit are thereby raised to higher motives and aspirations to the level of the author of the law, of whose will that law is but an expression.

19-21. The fact that all the works of the flesh here enumerated are evil is not to be taken to mean that everything pertaining to the flesh or its action is totally wicked. The apostle has just shown that the flesh also has an appointed function, and that it is essential to the control of the human will. The evil works here enumerated are rather typical of the evil effects wrought by an excessive indulgence of the natural appetites when no due control is exercised over them by the higher spiritual powers.

Lasciviousness—A term which in classical Greek signified insolent contempt for public opinion. But which in the New Testament is used only in the sense of shameless outrages on public decency.

Parties—Or, Heresies. Forewarn you—Tell you plainly.

22. The fruit of the Spirit—The natural result of its control in the life of an individual. The enumeration of virtues which follows, includes only such as affect man's relation to his neighbor, the object of the passage being to point out the harmony between the restraining influence of the law and the result of the guidance of the Spirit.

23. Self-control—This word gives us the essence of Paul's conception of temperance which is that of complete mastery over all appetites, tempers, and passions, and over every evil tendency.

25. If we live by the Spirit—If we have spiritual life we should permit that life to be the controlling influence in our daily conduct.

26. Provoking—Or challenging. In the original Greek there is no sense of wanton provocation, but, rather the thought

Deck brought back.

This flower possessed the remarkable power of coming to life again though apparently dead when moistened with a little water, blossoming afresh as if just at its apogee of beauty. This was not a variation of the Indian mango tree trick, for not only did Dr. Deck frequently make the flower obey his awakening touch, but Humboldt constantly performed the experiment before the German Academy. It is this flower, eagerly sought for, but lost to knowledge since the days of the Egyptians, which a Russian botanist, Serge Lostoukoff, claims to have discovered growing in an isolated corner of Arabia. The news is greatly interesting the botanic world, and further information is

#### ANXIOUSLY LOOKED FOR.

The manner of its originally reaching the hands of Dr. Deck is not without a certain interest and is more than tinged with romance. The sportsman found himself through an accident unable to continue the hunting expedition, and wandered into Upper Egypt with the intention of looking for that Aladdin's palace, the emerald mines of the ancients. He fell in with an old Arab, whom he carefully nursed and cured of a terrible illness. The Arab was poor and unable to pay in coin; he offered his savior, however, a gift, which he said no emperor or king could bestow, a magic flower that would bloom at command.

He drew forth a few dried stems with some closed, withered buds, so dried with age that the plant cracked. The Arab explained that he had found it in an old tomb in the desert, where it lay on the bosom of a young girl's mummy, the human flower as browned and withered as its sister plant. Squalling in the sun, the old Arab gave Dr. Deck who was listening incredulously, a highly colored eulogium of the miraculous plant. Gravely and reverently he poured a few drops of water over the withered stems, when as if called back to life by a charm, they began to tremble, to move, to contract and expand. Presently the buds lifted themselves as their stems strengthened and slowly inclosed one diaphanous petal after another until they encircled a central part.

The flower thus formed somewhat resembled a daisy, but with a grace and beauty all its own. Within its core lay

#### SEEDS OF PROMISE.

but the darkness and the airlessness of the tomb had extinguished forever the life germs within. While Dr. Deck watched with fascinated gaze he saw the blossoms gradually fade, wither and droop, and the process reversed. In a few minutes the plant had again taken the aspect of complete death. The stem had lost its fresh color and was brown and dry, the buds drooped on limp stalks like dry balls.

Dr. Deck brought back this wonderful flower to Europe, where it excited great interest. Many efforts have been made since to obtain other specimens; botanists have eagerly sought all over Egypt for its living prototype, and tombs have been ransacked, but in vain. The news of its discovery growing in Arabia is extremely interesting, and is only another proof of the circle in which we are perpetually travelling.

Though probably cultivated by the ancients, already in the Middle Ages it was considered more or less a myth, for though both the Rose of Sharon and the Rose of the Crusades—the form of which may be studied on the tombs of these ancient heroes whose story is told by their crossed legs—somewhat resemble it, neither is that which we may hope to see for ourselves, the real "flower of the Resurrection."

#### NEST BUILDING ANTS.

The green ants of Australia make nests by bending leaves together and uniting them with a kind of natural glue, hundreds having been seen on one leaf drawing it to the ground, while an equal number waited to receive, hold and fasten it.

To know how to remember

#### "FIRST AID TO THE WOUNDED"

and how to bandage, splint and prescribe for minor ailments, and he is even expected to be a master of phonetics and an essayist on subjects varying from the report of a cricket match to the strategy of Moltke or the tactics of Napoleon.

If he has any pride in the appearance of his men he must possess the attributes of tailor, bootmaker and leather seller in order to supervise and inspect the fittings of their garments and the quality of their boots, saddlery and accoutrements, and to look further after their comfort he must be able to pit himself against the retail dealer, so as to watch over the soldiers' interests in their canteens and grocery bars.

On court-martial he plays the part both of judge and jury, and when appearing as prosecutor has often to meet the astute lawyer on his own ground.

As janitor he superintends the various military prisons and detention barracks in England and the Colonies, and as parson he conducts divine service, and in isolated garrisons even buries the dead.

So much, then, for the actual needs of his profession. If, however, he desires to become a social as well as a regimental success he should be a cricketer, a footballer and a polo player; neither must he despise golf, tennis, racquets, aquatics nor bridge. If he can add to these the acquirements of an orator, an actor and a gentleman jockey so much the better, and he can then retire to his bed feeling fully satisfied that he has indeed earned his five shillings and threepence a day.

#### THE "A'S" HAVE IT.

Adolf, an Austrian artisan, adored Anna, an aristocrat.

Anna adored Adolf.

Another aristocrat, Alfred, an ambassador, adored Anna.

Anna abhorred Alfred.

Alfred addressed Anna, admitting admiration.

Anna assumed amazement.

Alfred adored Anna.

Anna admonished Alfred.

Alfred adopted aggressiveness.

Alfred's audacity alarmed Anna.

Alfred attempted abducting Anna.

Anna, afraid and agitated, acquainted Adolf.

Adolf accused Alfred.

Alfred, angered, abused Adolf awfully.

Adolf answered Alfred.

Alfred attacked Adolf.

Anna, aghast, aided Adolf.

Adolf and Anna almost annihilated Alfred.

Alfred abdicated absolutely.

Anna accepted Adolf.

Adolf and Anna abruptly absconded, abandoned Austria altogether, arrived at Antwerp, and always abided abroad afterward.

#### A GENTLE REMONSTRANCE.

An old farmer, who had a perfect hatred of taxes and tax-gatherers, was once called upon by a collector a second time for taxes already paid, but the receipt for which he had mislaid, and as he narrated the story to a friend, he remarked: "Would you believe it, the fellow actually began to abuse me!"

"What did you say?" asked the friend.

"Say? Why I remonstrated with him."

"How did that affect him?"

"Well, I don't know how it affected him, but the poker was bent!"

Love may be blind, but it knows when the gas is on too high.

"Jones, do you know anyone who has a horse for sale?" inquired Brown. "I have reasons for believing that Green has," replied Jones. "Why do you think so?" "Because I sold him one yesterday."

Dutch Rabbits. — Take a nice fresh young rabbit, soak it in salted water for an hour, drain dry; wipe it in a clean cloth and lard with strips of sliced bacon on the back. Truss the rabbit into a neat shape and put in a baking pan, pour over a cupful of water, cover with another pan, and steam until the rabbit is tender. Remove the pan and baste the rabbit with this mixture: A gill of good vinegar, a dessertspoonful of red currant jelly, the same quantity of made mustard, and one ounce of fresh butter. Baste constantly till the rabbit is browned. Set on a hot dish, butter the rabbit liberally, and serve with a good brown gravy.

#### DRIED SWEET CORN.

One farmer's wife, in whose blood runs a genius for invention, has constructed several clever household helps, one of the simplest, albeit most helpful, being a clever device for drying corn. A frame to fit the oven is made of laths placed so that it will be deep rather than wide. After the laths are nailed together, stretch across the frame thin cheese cloth, fastening it firmly. You can have a frame both in the top and bottom of the oven as large or as small as is handy. Fancy the advantage—no heavy plates to lift and burn one's hands on, to say nothing of the damage done the plates! And, because of the rack, one can dry more at a time.

To those who have never before dried sweet corn the following directions may prove useful: In the first place do not boil or cook the corn; it cannot help but lose some of its delicious flavor by the process. Cut from the cob fresh, young sweet corn, being careful not to get any of the cob. If you cut into a thin vessel be sure that it is bright, and even then do not allow it to stand long. Place the corn on the rack in a hot oven. Allow it to heat and steam for about 15 minutes, after which open the oven door and let the remainder of the drying be done while there is little fire, taking care not to scorch the corn. If the oven is not too hot you can leave it in while preparing meals, always keeping the oven door open. When the corn crackles against a plate it is dried: Place in paper bags and tie up securely to keep away insects.

Cooking.—When you wish to prepare corn for a meal, place over a slow fire and let cook for two or three hours as you would beans; one doesn't mind that when there is constant fire. When cooked serve with a gravy made of cream, or better still, try the old southern way: When the corn is swelled and tender turn into a skillet into which has been placed a generous amount of smoked meat drippings and fry for a short time, just long enough to give it the smoky flavor. Cooked either way it is equal to canned corn and then—one need not worry about salicylic acid.

#### SUGGESTIONS FOR THE HOUSEWIFE

Line the garbage cans with newspapers and the garbage can be handled much easier.

To fill glass jars stand jar on a steel knife blade, and it may be filled with safety and ease. Set on cloth wet in hot water.

If furniture is infested with moths remove the lining beneath the seat and interline with tar paper. This will also effectually prevent the coming of the pest.

Rubber overshoes can be patched with a strip of surgeon's adhesive plaster, if the hole is not too large. If leather "lifts" are fitted into the heels of rubbers the overshoes will wear longer than without them.

Peroxide of hydrogen is a valuable antiseptic to have in the house. It makes a pleasant mouth wash and throat gargle when diluted and will remove blood stains very satisfactorily if used before the stain is dry.

A glove that is a comparatively new invention is made of cotton threads and filled with a powder that is a god polish. As the glove is used the powder sifts between the threads, so that the article

that is being rubbed is cleaned as well as polished.

To clean diamond panes in lattice windows stir a little kerosene in tepid water. Rub pieces of newspaper soft and soak in this, squeeze them almost dry and then rub the "diamond." Wipe at once with old linen. With other newspaper rubbed between the hands, but not wet, polish the glass.

### TAUGHT BROWN A LESSON.

**His Wife Called on Him at His Office and Told of Her Household Troubles.**

There is a hidden meaning in this story, which he who chooses may discover for himself.

"I'm so glad to find you in," said Mrs. Brown, as she entered her husband's office; "I was afraid you might be out, and I have so much to tell you, dear."

"Something very important?" replied Mr. Brown, interrogatively, and in a tone which plainly said, "Couldn't you have waited until this evening? You see I'm awfully busy."

"Well, no, perhaps not so very important," said Mrs. Brown, paying no attention to her husband's discouragement; "but then it is so nice and cosy here, and you know we don't often have a chance for a quiet talk together."

"Am I not at home?"

"Oh, yes, Henry; you are at home every evening—I'll say that to your credit. But it is so nice to come here and see you."

"But, then, I'm pretty busy this morning."

"I know; but I must tell you what that girl of ours has done. After breakfast this morning she hadn't a drop of hot water to wash the dishes in, and her work was delayed a good half-hour in consequence."

"But, my dear—"

"I know what you are going to say. You think I ought to give her a good talking to. And so I did. But what does it amount to? Only last week I told her to open her dampers so that the oven would heat, and when I went into the kitchen they were shut, and the fire was almost out, and the oven was as cold as a stone. And, by the way, did I tell you that another of those Wedgwood cups was broken? It's the third within a month. Really I believe I shall get distracted. And that reminds me that we didn't get the clothes dry on Monday, and—"

"But, my dear," broke in Brown. "I've got work to do. Of course, I sympathize with you, but why don't you tell me about these things when I'm at home?"

"Why, Henry?" exclaimed Mrs. B. "The idea! Don't you have so many other things to talk about when you are at home? How can I interrupt you to talk about my domestic affairs when you have so much to tell me about the way the office-boy plagues you, and about the distracting manner in which your partner refuses to do things as you want them done, and what a nuisance that Mr. Robinson is who never knows when to go, and—why, Henry, aren't my evenings sacred to your business affairs? But I must be going. I'll try to come in again in an hour or so."

Mrs. Brown did not come in again that day. But it is a curious circumstance that from and after that visit Brown never talked "shop" at home.

### QUEER WAYS OF THE UPOTOS.

**Can't Look at Their Mother-in-Law and Women Eat Special Fish.**

The Upotos live on the northern bank of the Congo between Ikonmango and Dobbo, or between the twentieth and twenty-second degrees of east longitude, and seem to have long resided in the region. They show a marked disinclination to quit it. They live chiefly by fishing, and one of the first things to strike a visitor is that certain fish are

## ON THE FARM

### THE BEST TYPES OF ROOFING.

The ideal roof for the farm structure, barn, poultry house, tool and implement shed, corn crib, etc., is perhaps first of all one which is water tight and has lasting qualities. Initial cost figures in this, yet the lowest price does not necessarily mean the cheapest in the long run. When lumber is cheap the shingle roof, of course has many advocates. But with permanently advancing prices here, farmers look to something equally good or better in the way of prepared roofing. Several kinds are on the market and all of them have good points. Exactly which is best for the individual farmer each must decide for himself; but first of all thoroughly post yourself through general reading, and then through a study of the why and wherefore as put out in the printed descriptions of the various manufacturers.

Slate roofs were long regarded highly and are to some extent still in favor. But an objection other than that of great weight on the structure and initial cost is the fact that a slate roof is a ready conductor of heat. A roofing material should be selected which is a good non-conductor of both heat and cold, keeping the building warm in winter and cool in summer. It should be one that will not rust, that is not unfavorably affected by gases or moisture, can be laid by anyone and is easily repaired.

Some excellent roofings along this line are manufactured, requiring no special skill to lay, and adapted to roofs of any slant. Among the best of these tar is rigidly excluded, and various compounds used instead, usually a combination with various layers of felt. This makes a pliable roofing, impervious to moisture, relatively light in weight, lasting, and easy to handle.

Another type of roof, popular for its attractive qualities, is the asphalt roof. This, like most things of the kind, is the product of an evolution. All remember the old coal tar roof, which on hot summer days dripped from the eaves. The trouble with the tar roof was that the pitch from which it was made had been robbed of most of its valuable qualities, leaving a hard, coke-like substance. To make this pliable, dead oils are added, which gave temporary elasticity, but when the oil evaporated, it left the pitch hard, brittle, and in prime condition for cracking and disintegration.

The legitimate successor of the tar roof and one that has none of its disadvantages is the roofing made of natural asphalt and various binder materials. Of course, the asphalt roof varies, but a fair example of the best type consists of a layer of natural asphalt, then a layer of wool felt, another layer of asphalt, a sheet of burlap, still more asphalt, and the whole surmounted by a top dressing of finely crushed quartz. Where a lighter roofing would answer all purposes, two or three of these layers are eliminated, the thinnest having only two layers of asphalt with felt between them. In properly made roofing the burlap or felt or both are thoroughly saturated with the asphalt, and every fibre is sealed in this waterproof sheathing.

### THE FARM WORKSHOP.

The first consideration should be the building. This may be some shed or outbuilding already standing on the farm, or a lean-to may be built to the barn, smokehouse or buggy house, for a few dollars. In case it should be necessary all the tools except the forge could be kept in the barn, and this could be covered with a few boards far enough from the barn to insure safety from fire, writes Mr. H. T. Grunstead. If a new building is to be constructed or

an extraordinary cow once in a great while, but the man who expects to build up a herd of superior merit must necessarily raise his own stock.

A clean manger is greatly to be advocated in feeding horses. It should be remembered that the horse's stomach is small, and that it empties itself every 4½ hours. This will be a guide to the period of time which should elapse between meals. Regular hours are of great importance. It is unwise to overfeed a horse, and just as imprudent to let him get ravenously hungry. When a weekly mash is given, this should be done on Saturday. It is wise, too, to reduce the feed on Sunday, say by a third.

Do not forget to clean out the entire interior, floors included, of your poultry-houses forthwith. Dig out an inch or two of the earth floor and spread it over the farm. Allow the interior and the floor of the house a week or two to become thoroughly dry. Before the rainy season sets in, put from three to six inches—the more the better—of dry soil on the floor of the poultry-houses. Pack it down a little, so as to be ready for winter. Before winter sets in, go over it with a coarse rake to loosen up the top of the soil, and put not less than twelve to fourteen inches of good dry litter of some kind all over the floor. There must be from twelve to fourteen inches of good dry litter all over the floor on top of the dry earth for them to scratch in. This gives healthful exercise. Do not be afraid of having too much litter on the floor.

### FARM NOTES.

Watch all the bolts on the plows and harrows. Take a wrench with you wherever you go to work. A moment now and then may save two or three hours of time looking up a new bolt or nut.

For general crop purposes, a fertilizer containing about three per cent. nitrogen, eight per cent. phosphoric acid and seven per cent. potash would ordinarily be useful, and this is about the grade of fertilizer that can be made by the purchase of nitrogen in the form of nitrate of soda and dried blood, phosphoric acid in dissolved rock, and potash in nitrate of potash. A very good formula to follow in mixing these goods is to use 1,200 pounds dissolved rock, 200 pounds nitrate of soda, 300 pounds dried blood and 300 pounds muriate of potash for one ton of the mixture.

Probably the best way in which to control wireworms is by late fall or early winter plowing, repeated for two or three years. This destroys the wireworms by bringing them up to the surface of the ground, where, exposed to the freezing and thawing of the winter, many will perish or be devoured. Breaking the cells above described appears to cause the death of the insects which occupy them, and thus fall plowing is useful for the destruction of this stage as well. Rotation of crops is unfavorable to the increase of wireworms, and should be practised for this reason if for no other.

## FROM ERIN'S GREEN ISLE

**NEWS BY MAIL FROM IRELAND'S SHORES.**

**Happenings in the Emerald Isle of Interest to Irish-Canadians.**

Lawrence Berry and John Ward, Belfast husbands, were sent to jail recently for brutally beating their wives.

The demand of the Belfast members of the Boilermakers' and Iron Shipwrights' Society for an increase of wages has again been refused.

The King has been pleased to appoint Lord Castletown to be chancellor of the University of Ireland in room of the

## ALCOHOL IN CORN COBS

**POSSIBILITIES JUSTIFY ESTABLISHMENT OF DISTILLERY.**

**Fifteen Gallons of Spirits to a Ton of Them—Profit Seen Now in Culled Ears.**

Investigations now being carried on by the United States Agricultural Department at Hoopston, Ill., have brought to light another important commercial factor in the form of a waste product which can be successfully and at small cost manufactured into a staple commodity. The experiments now being prosecuted have proved beyond doubt that the large quantities of corn cobs which are hauled out on farm lands each season by corn-canning factories can be converted into alcohol in sufficient quantities to justify establishing a distillery plant in connection with the cannery.

Acting upon the suggestion of the officers of the Illinois Canning Company to provide all necessary equipment for carrying on the experiment, the Agricultural Department of Washington sent two expert chemists to Hoopston, who have been engaged in making deductions. Simple methods of fermentation have been employed and the yield in alcohol shows a strong eleven gallons to the ton of green cobs. The same methods employed in handling the cobs have been applied to the juice extracted from the cornstalk and show there are

### SIX GALLONS TO THE TON.

These experiments, while not exactly in harmony with previous experiments carried on by the department at Washington, are sufficiently near to denote the possibilities of converting a waste product into a marketable commodity. At different times during the last 25 years the department has conducted experiments along the same line, but with common field corn. These tests show that there are 240 pounds of fermentable substance in a ton of green field cornstalks, which will yield about half their weight in absolute alcohol. In round numbers a ton of stalks will produce 100 pounds of alcohol or 200 pounds of proof spirits. As a gallon of alcohol weighs nearly seven pounds, there should be fifteen gallons of alcohol in a ton of stalks.

It is the generally accepted theory that sweet cornstalks contain a larger percentage of alcohol than the common field corn, although the experiments at the cannery did not prove this to be the case. However, there are other features in connection with a cannery establishment which makes possible the quantity expected by the department.

Not only are the cobs a waste product, but the irregular and spoiled ears as well. Hand labor is yet employed in husking, and all ears are put in, as the wage scale is based upon a measure. These measures are emptied upon a conveyor and the ears unfit for canning are

### CULLED AS THEY GO BY.

These culled ears are also waste. The expense of bringing them to the point where they are culled and cast aside is quite as great as the perfect ears. The addition of the corn on the cob adds further to the possibilities as to the amount of alcohol obtainable from a ton of cobs and will have its influence in bringing the quantity to a greater figure.

The discovery is a very important one, which tends further to increase the list of agricultural products from which alcohol may be obtained.

What the cost of attaching a distilling plant to the packing plant would be has not been determined. The actual expense of distilling the cobs should not be greater than three cents per gallon. Inasmuch as they are a waste which now requires an outlay to dis-

of the Congo between the twentieth and twenty-second degrees of east longitude, and seem to have long resided in the region. They show a marked disinclination to quit it. They live chiefly by fishing, and one of the first things to strike a visitor is that certain fish are reserved for the men, others for the women, and yet a third kind for the slaves. These slaves are chiefly slaves by birth or men sold for their debts. They are well treated, and opposite Iringui is an island in which all slaves who are incapable of working are allowed to reside by themselves. One form of semi-servitude is called lisokko. This is when a man, not having money to buy a wife, sells himself to a chief to obtain one. The offspring of such a marriage becomes the property of the chief.

One very curious custom is that a man may never look at his mother-in-law. If he does, he has to pay her a fine of 30 to 50 mitakkos, which are brass rods equal to a half penny. Neither must the mother-in-law look at her daughter's husband. Children are treated with great kindness, and in fact spoilt. Their mothers do not chastise them, even if the children strike them. Among the duties of the women is that of shaving their husbands. The chief amusements are singing, dancing and wrestling matches between villages. The victors are painted red; so also are corpses before burial; but in the case of women it is not the bodies, but the coverings in which they are wrapped, that are so colored.

The Upotos believe in life after death and in spirits. They think their dead relatives and friends are always watching them, although they cannot be seen. Their god is named Libanza. Their account of the origin of the white and black races is curious. Libanza sent his son Tserenga on earth to see what the races of mankind were doing. Among Europeans he was well received, so he gave them a white skin and much knowledge, but among the Africans he was badly received, so he left them black and stupid. One of the myths entertained by this people is that the Congo and its many tributaries were created by the tears of the tribes weeping for a favorite chief long ago. The moon is supposed to be an immense ship engaged in conveying the souls of the dead to Libanza, and the stars are the eyes of the dead, who sleep during the day.

Sometimes it happens that a married man has a great deal to say, but his wife won't let him say it.

a few dollars. In case it should be necessary all the tools except the forge could be kept in the barn, and this could be covered with a few boards far enough from the barn to insure safety from fire, writes Mr. H. T. Grunstead. If a new building is to be constructed or an old one remodeled, I should say a room 12x14 feet with dirt or cement floor double doors in one end, a window of two sashes placed horizontally in one side, and a regular perpendicular window in the opposite side, would constitute a convenient and well-lighted workshop. This will prove every way ample. A work bench 2x10 feet made of 2x12-inch lumber for the top and 1x12 front board with 2x6 legs, should be set under the horizontal window. The bench should be equipped with a good steel-jawed vise, attached near one end. A bench drill should be screwed on near the other end. I like to have drawers and shelves under a part of the bench, to the right when facing it. Four drawers 18 inches wide and 6 inches deep, one above the other, and a set of shelves two feet and a foot apart next to the drawers would make safe and convenient receptacles for tools and material. Some of the drawers should be divided into compartments to accommodate small tools, bolts, screws, etc. The shelves could be used for rods, heavy bolts and scraps. Convenient receptacles for chisels are leather loops tacked to the wall above the bench. The saw, square, drawshave, etc., may be hung on nails.

If only a few tools can be procured they should be of good quality. I would begin with a 26-inch No 8 hand saw, steel-faced claw hammer, steel square, set of bits and ratchet brace, three chisels from 1½-inch down, and a draw-shave. One could get along fairly well with these which would not cost more than \$5. The tools that could be added to this list and are really necessary to do a good job of woodwork are, a set of planes—Jack plane, smoothing plane and block plane—spirit level, spoke shave, oilstone and grindstone. This will run the cost up to about \$10. This could be added to as means would permit of circumstance demand.

#### LIVE STOCK NOTES.

Six pounds of cornmeal with four pounds of wheat bran and 1½ pounds of oilmeal with eight pounds of timothy hay, is a good ration for work horses. The future herd of a farmer depends entirely upon his ability to raise good calves. We put it in this light because as a general rule it is impracticable to buy good milk producers on the market. It is possible, of course, to pick up

for brutally beating their wives. The demand of the Belfast members of the Boilermakers' and Iron Shipwrights' Society for an increase of wages has again been refused.

The King has been pleased to appoint Lord Castletown to be chancellor of the University of Ireland, in room of the Earl of Meath, resigned.

Arrangements have been completed and agreements signed for the purchase by the tenants of their holdings on the Earl of Erne's Knockballymore estate, near Clones, County Fermanagh.

A promising and useful career has been brought to a close by the death of Mr. John Beck, of the firm of Messrs. O'Neill, Young & Beck, general produce merchants, 31-33 Oxford street, Belfast.

A fire occurred on the premises of Mr. Abram Combe, Donaconey, on the 14th ult., and destroyed Donaconey Castle, one of the finest residential buildings in the north of Ireland.

Mr. Thomas Robertson, C.V.O., formerly general manager of the Great Northern Railway of Ireland and chairman of the Irish Board of Works, died at Clieff on the 17th ult.

Information reached Tipperary that the deer park of Mr. Thomas Butler, D.L., of Ballycaron House, cousin of Sir William Butler, was raided during a recent Sunday night and at least eight deer killed and carried off.

While cycling at Caher Conlish, county Limerick, Sergeant Seahan, Royal Irish Constabulary, lost control of the machine in descending a hill near that village and ran into a wall. He died from his injuries. Deceased had 26 years' service in the force and leaves a widow and large family.

Some indignation was felt in Dro-more when the inhabitants woke up one morning recently to find the walls liberally covered with seditious posters of a scurrilous nature. It is expected that the South Down Militia, on their intended march, will encamp at Dro-more in a few days. The people of the neighborhood are indignant at the outrage. The police are making diligent inquiry into the matter.

Miss Kate Doyle, who was found guilty at Dublin of assaulting and doing grievous bodily harm to her servant Kate Managan, was sentenced to four years' imprisonment. The girl died last December from septic pneumonia. Her body was in a terrible condition, covered with wounds and bruises. The prisoner had been seen beating the girl with a strap.

As Parkranger Dodds was patrolling the Botanic Gardens, Belfast, he was horrified to find the body of a man suspended from the branches of a tree beside the bushes at the back gate of the park. It is stated that his name is George Morrow, and that he lodged at 39 Roden street. He came to Belfast about seven weeks ago from Plymouth, where his wife and family reside.

#### SHADOWED.

A man was going home to his wife and family. It was growing dark. His road from the station was a lonely one, and he was getting along as fast as he could, when he suddenly suspected that a man behind was following him purposely. The faster he went, the faster the man went, until they came to a churchyard.

"Now," he said to himself, "I'll find out if he's after me," and he entered the churchyard.

The man followed him. Vague visions of revolvers and garroters grew upon him. He made a detour of a splendid mausoleum. Still the man was after him, round and round.

At last he turned and faced the fellow, and asked: "What the dickens do you want? What are you following me for?"

"Well, sir, do you always go home like this? I am going up to Mr. Subbub's house with a parcel, and the porter at the station told me that if I'd follow you I should find the place, as you lived next door. Are you going home at all to-night?"

What the cost of attaching a distilling plant to the packing plant would be has not been determined. The actual expense of distilling the cobs should not be greater than three cents per gallon. Inasmuch as they are a waste which now requires an outlay to dispose of them, their value is small. The annexation of a distilling plant under these circumstances would cost less than an individual plant. A molasses plant with a daily capacity of 10,000 gallons is estimated at \$40,000, but a plant with a less capacity would in most cases prove better for the canner.

The problem of how to preserve the alcohol in the stalks until such time as they can be handled without interfering with the rush incident to the packing season could be solved by the

#### CONSTRUCTION OF SILOS.

where the juices could be preserved, or some method of drying, looking to the subsequent utilization of the product.

The fact that there are now over 100 articles of manufacture into which the use of alcohol enters makes it all the more important that these waste products of the farm and factory should be converted into a marketable commodity. Already the manufacturer of gasoline engines has made his investigations and experiments looking to the near conversion of the small gasoline engine into one employing alcohol, with as few changes as are possible. The portable engines so much in use on the farm for pumping water, cleaning grain, chopping wood and doing various other farm work, can be made to do the work by a few slight changes. And the farmer will find no objection upon the part of the insurance company to his keeping in his barn a can of alcohol, where a can of gasoline would mean the cancelling of his policy.

#### CHINESE CARPENTERS.

They Are Remarkably Adept In Use of Small Axe.

Naturally preeminent among the skilled craftsmen of China, the carpenter still maintains the leadership. Though almost invariably wedded to the use of the tools of his ancestors and to their methods, judged by results he is more efficient in his line than are the average of the foreign trained fitters and machinists in theirs, though a constant diminution of the difference is in progress.

In judging the performance of the native workmen it is almost impossible to avoid the popular bias that addition to their own methods and tools invariably bespeaks fatuous conservatism. Though this is in many cases true, it will often be found on careful observation that what has passed for a stubborn blindness to the virtue of innovation is in reality a keener perception of comparative merits than the judge himself was aware of.

This is particularly true of Chinese carpenters. While most of their commonest tools differ in some radical way from our own, it is never safe to assume the superiority of the Western product. Their small axe, for example, is a beautifully balanced tool, and they are remarkably adept in the use of it, being able to work as true a surface therewith as can be obtained with an adze in the hands of the white man.

On heavy work it is customary for two to hew together on opposite sides, striking alternative blows. Both hands are used and the recover is over the shoulder, alternate right and left. There is a freedom of swing with an accuracy of delivery that is a treat to watch and the rapidity of blows is almost bewildering.

#### JUST SO.

Mary: "What's that cow got a bell round its neck for, Willie?"

Willie: "Oh, that's what she rings when she wants to tell the calf that dinner's ready."

#### CURE, DEATH.

Weary Willie—Lady, do you value dat dog uv yours?

Mrs. Farmer—I do!

"Very well, den! If you don't call him off in five minutes I'll let him bite me!"

# GREAT BRITAIN'S POLICE

## HOW THEY WATCH FOREIGN SPIES AND ANARCHISTS.

International Crime Experts — Their Training and Duties — Under stand Heliograph.

About twenty years ago, when the more desperate section of the Irish Fenians was almost baffling the English and Irish police by dynamite and other outrages, it was decided to organize a distinct detective machinery, known as the "Special Branch" of the Criminal Investigation Department, for the purpose of locating and dissecting the various murder and dynamite plots, identifying the men connected therewith, and keeping them under observation; also of course for protecting public men whose lives were in danger—notably Arthur Balfour, when he was the Chief Secretary for Ireland.

The work of organizing this branch, writes a correspondent of the London Chronicle, was entrusted to Chief Inspector Littlechild, who retired on a pension some eleven years ago. The machinery and methods of the Special Branch were found to be equally well adapted to the ultra earnest Russian patriot or the fanatical bomb thrower from France, Italy or Spain.

The Criminal Investigation Department Special Branch is, although composed almost entirely of C. I. D. men, more directly under the control of the Home Office than the rest of the Metropolitan police. Its duties consist in what is described politely as "political work," including the supervision of

### ANARCHISTS AND NIHILISTS

and other persons who may be a source of personal danger to the King or Queen or to members of our royal family, or to foreign potentates visiting our country, or our own Ministers of State. The branch is sometimes kept busy in trying to trace the source of anonymous letters written to any of the above; it also undertakes the necessary inquiries in the case of applications for letters of naturalization, or on behalf of the Foreign Office, for passports. Persons suspected of being foreign spies also receive attention from the S. B., generally at the instigation either of the Admiralty or the War Office.

The present staff consists of Supt. Quinn—an admirable appointment—one chief inspector, three inspectors and fifty-two other detectives, in the case of two or three of whom the old established rule that every detective must have started as an ordinary constable has been waived. These exceptions are linguists and men of very peculiar experience among the most undesirable aliens in this and other countries.

Some thirty of this number are divided up among six foreign and seven British ports—which shall be nameless—to keep observation on outgoing and incoming passenger boats, a few of them occasionally going abroad on special duty connected with royal visits to Continental countries or otherwise.

One member of the branch speaks and writes seven languages, another three, one has resided in five different countries and speaks four languages, and most of them know French. Heliographing is understood by some of them.

Our detectives do not, as is often supposed, permanently safeguard the interests of other countries as regards foreign "political" suspects in this country. At least three European governments are represented in England by their own

### SECRET SERVICE AGENTS,

who are attached to the embassies, and act independently of us. A foreign detective sent here for special purpose, however, as a rule places himself in communication with the S. B.

of the various physical characteristics of the subject, are being carried in the pockets of some dozen or more S. B. sleuth hounds.

While the principal officers of this branch receive salaries ranging from £180 to £500 per annum, the rank and file, who have to hunt down men with funds at their disposal, draw from £2 to £2 15s a week, no extra allowance being made for languages.

### ON PAYING THE PIPER.

After Doing Too Much Smoking Mr. Gliggblitter Propounds an Idea.

"Too much smoking will keep one awake nights, for one thing," said Mr. Gliggblitter. "I like to smoke, and I am inclined to indulge myself too much in that luxury after dinner.

"At that comfortable time I sit and smoke and read and read and smoke until it's time to go to bed. And then, after such an indulgence in smoking, I am likely to find myself lying awake for an hour or two to pay for it.

"It is my experience in life that you can't get something for nothing, and likewise it is my experience that if one indulge himself too freely in any pleasure he must pay for it later. Young men, with the resiliency of youth, can't be made to realize this; but nature charges all these overindulgences to their account, which, in due course, they are inevitably called upon to settle.

"So young men are careless of their resources; but it must be confessed that there are older men, too, who never learn wisdom, that if they dance they must pay the piper; and sometimes, I will admit, I myself smoke too much nights, and then I can't sleep. I am a weak brother, given to the enjoyment of the moment. But I can sleep well if I have the strength of mind to cut out that last pipe, and I can rise in the morning refreshed and vigorous as a recompense for that slight sacrifice.

"Philosophers say that the only actual possession that man can have is his will, his power to control himself, which is something inseparable from him except by his own surrender of it. Lands, houses, money, everything else, can be taken from us, but not our power over ourselves, our will, if we choose to use and exercise it, which we may do with innumerable resulting benefits, including even the restoration of lands, houses and moneys lost, as aforesaid.

"But if, as we are more likely to do, we have clung with tenacity to our tangible possessions and are suffering only personally by indolent indulgence, why, that we can correct, and we can vastly heighten our enjoyment of life, by the exercise of the will, as, for instance, we can give ourselves the sweet boon of refreshing sleep by cutting out that last pipe; and to bring this simple fact to the minds of some to whom it may not have occurred is really all that I set out to say.

"True, there are other causes of sleeplessness besides overindulgence in tobacco, but that is one of them; and if the thoughtless smoker will deny himself to-night for an hour before he goes to bed and so give his nerves a chance to recover their natural tranquility he will sleep happily and rise refreshed and find a far keener enjoyment of his pipe in the morning."

### "HERE BE DIAMONDS."

Description of Diamond Mining as Carried On In South Africa.

This inscription appeared as long ago as 1750 on a map of South Africa. It was not until 1867, however, that they were actually discovered. In 1889 the famous De Beers Consolidated Mines Company possessed the richest diamond fields in the world.

Diamonds are found in the large deposits of lava or "blue ground" that has been forced up from the depths in past ages. Each mine consists of a large,

# FROM BONNIE SCOTLAND

## NOTES OF INTEREST FROM HER BANKS AND BRAES.

What Is Going On In the Highlands and Lowlands of Auld Scotia.

A bed of coal of considerable depth and good quality has been discovered in Skye.

Aberdeen Town Council have decided to widen Union Bridge at a cost of £9,500.

The death has taken place of Mr. James Arnot, Clerk of the School Board of Edinburgh. He was born at Balgonie sixty-five years ago.

Mr. James Milne, after seventeen years' service, retires from the position of superintendent of the Assembly Rooms and Music Hall, Edinburgh.

The Chief Inspector of Factories has appointed Dr. A. B. Spence to be certifying surgeon under the Factory and Workshop Act, for the Kinghorn district of the county of Fife.

Mrs. Crawford, a widow, residing at Courthill street, Dairy, Ayrshire, was accidentally killed at Glasgow South-western Station by stepping off the train before it stopped.

The complete failure of the crab and lobster fishing on the Haddington coast has been the means of causing many of the fishermen to abandon this branch of their calling altogether.

The Chief Inspector of Factories has appointed Dr. F. I. Mackintosh to be certifying surgeon under the Factory and Workshop Act for the Strathmiglo district of the county of Fife.

Capt. J. D. Clink, a shipowner, one of the best-known men in Clyde shipping circles, has died at Greenock, in his 83rd year. On retiring he became a member of the Clyde Pilot Board.

The election of the Rev. Martin Jansen, Roman Catholic clergyman, to Cardross School Board, has been decided to be null and void on the ground that he is not a British subject.

Glasgow Corporation has received a cheque for £17,000 from Dr. Andrew Carnegie, being the fourth instalment of his gift of £100,000 towards the establishment of district libraries in Glasgow.

Sir James King has been appointed chairman of the Caledonian Railway Company, in place of the late Sir James Thompson, and Sir Charles Pine Renshaw was appointed deputy chairman.

Mr. Guy Speir, who was private secretary to the Secretary for Scotland under the late Government, has been appointed chief Conservative agent for Scotland, in succession to Colonel Haig.

At Eglinton station, Glasgow, John McCrum of Govan was crossing the line with his son when he was run down by an approaching train and killed. The son saw his father struck by the engine's buffer.

The city and county of Perth Royal Infirmary, the Fechny Industrial school, Perth, and the Wellshill Girls' School of Industry, Perth, are to benefit largely by bequests by the late Mrs. Keill, Kinnoull, Perth.

Alexander Ferrier, a fitter in the employ of Messrs. A. Ballantine & Sons, New Orange Foundry, Boness, was at work when the emery wheel measuring fourteen inches in diameter burst into bits, killing Ferrier.

The death has occurred of Mr. Thos. Robertson, C. V. O., of Cairnleith, Criff, formerly superintendent of the Highland Line, general manager of the Great Northern Railway of Ireland, and chairman of the Irish Board of Works.

An interesting ceremony took place in the postmen's room of Elgin Post Office, when in the presence of a large gathering of officials and postmen, Mr. Alexander Riddoch, ex-rural postman, Orton to Fochabers, was presented with the Imperial Service Medal.

# HOW BRITAIN GETS MEAT

## GLIMPSE AT LIFE ON A CATTLE-BOAT AT SEA.

The Poor Cattle Suffer Terribly if the Vessel Encounters a Storm.

Every day in the year the United Kingdom consumes nearly 3,000 cattle which have been imported from abroad. In the same space of time we eat 6,500 foreign sheep and more than 1,000 foreign pigs, to say nothing of other meat, such as rabbits, of which animals we take over 16,000 tons yearly from Australia. Last year over \$4,000,000 worth of frozen Bunny came to our ports from New South Wales alone and the trade is an increasing one, says London Answers.

Nearly all this foreign meat is brought to us from foreign countries—the United States, the Argentine Republic, Canada, and Australasia. Some is alive, some dead and frozen, some in tins. Of live meat, we annually import over half a million oxen and about the same number of sheep and lambs.

The most interesting part of this huge import trade is without doubt the carriage of live stock. Some years ago the writer crossed from New York to London in the depths of winter on a huge cargo vessel, which carried 600 cattle, about 300 sheep, and a large quantity of pigs. These were penned on the lower decks, and as the weather, though cold, was fortunately fairly fine, the losses were small.

### BELLOWING, BLEEDING HEAPS.

Yet even so, almost every morning three or four unfortunate cattle which had been injured and consequently slaughtered, were slung by the horns and flung overboard. In bad weather the losses among live-stock on the Atlantic passage are sometimes very heavy indeed.

Cattle ships roll fearfully. This is no doubt largely owing to the great weight so near the top of the ship, but it is an odd fact that cattle have the power of making a vessel roll even in calm water. Cattle on board ship are confined in pens. In the modern first-class cattle carrier these pens are of stout material, but on some tramp steamers the timber is much too frail. Consequently, when a gale comes and the heavy beasts are flung against the rails, they give way, and the unhappy creatures, perhaps horribly wounded by the sharp splintered ends, are thrown in bellowing, bleeding heaps. Then if a wave breaks over the vessel, comes confusion worse confounded. The poor brutes with horns and legs smashed are swept from side to side of the streaming, slippery deck. It is as much as a man's life is worth to venture among the frenzied, helpless creatures yet the cattle man is here, there, and everywhere, and is often nobly backed up by the "stiffs," as those men are called who are allowed to work their passages by attending to the needs of the floating farmyard.

### CATTLE SMELL THE LAND.

It is too dreadful a subject to dwell upon, but that this is no fancy picture can be proved by actual statistics. One vessel bound from the Argentine to Liverpool lost 103 cattle out of 140, another 59 cattle out of 109, and nearly 400 sheep out of 600. A third vessel landed less than 100 sheep out of more than 700.

Such cases as these are happily the exception, and not the rule. The Royal Society for the Prevention of Cruelty to Animals has done a great deal, and now-a-days, unless the weather be exceptionally bad, the public may rest assured that cattle suffer very little indeed on the sea passage. Most of them feed very well, and drinking

who are attached to the embassies, and act independently of us. A foreign detective sent here for special purpose, however, as a rule places himself in communication with "the Yard." At present there is no combined international movement against this class of crime.

The results of the special branch organization cannot be judged by what is read in the newspapers as regards the suppression of anarchists—there have been only two prosecutions in the last two years, but a vast amount of quiet work has been achieved. Suspected persons are located, observed, and often frightened out of the country unknown to the police.

The relations between the detective and the anarchist are peculiar. One sees a member of the S. B. enter one of three shops suspected of providing informal meeting places for anarchists not far from Shaftesbury avenue, ostensibly to make a trifling purchase. The owner of the shop and the one customer, an Italian suspect, each greet him, but in two different languages; both know his business almost as well as he does. But there is no animosity between the hunted and the hunter.

On another occasion a crowd of more or less undesirable aliens in one of the dangerous foreign quarters is looking on at a struggle between a couple of constables and some roughs, one of the former having just sounded the shrill signal for help. The onlookers are revealing the police in several languages and some of them are inclined to join in (it is thirty to one against the uniforms), when an Englishman, of no remarkable physique, pushing his way through the outskirts of the crowd, is keenly scrutinizing faces—one in particular, that of a man who is exhorting others to violence. The Englishman is recognized, and the foreigner who interests him steals away, whispering something to acquaintances as he passes them. They and others follow suit, and the S. B. man has achieved more than three constables could have done; moreover, he has located a man who has been lost sight of lately.

The force is apt to have its zeal severely tried by false scents and even hoaxes. Less than a month ago what appeared to any one but an electrical expert to be a

#### POSSIBLE INFERNAL MACHINE

was discovered on the day of the arrival in London of two threatened members of the royal family and at a spot whence an outrage might have been effected. It was in the ordinary course of precautionary measures—the S. B. never despises any suspicious sign, however slight—taken to an isolated spot in St. James's Park and examined by the Home Office Inspector of Explosives and pronounced to be nothing worse than a discarded dry cell battery. At another time not far distant the branch had to shadow some men who were suspected of being foreign spies taking observations near an important military position, and the "spies" proved to be as harmless as the "bomb."

At the present moment, in view of the recent outrage in Madrid and the visit of the King and Queen of Spain to England, the S. B. is particularly busy, and an interesting story could be made out of the various men and movements to which the S. B. activity is directed; but the writer of this article, who has been in touch with the branch since its foundation, has no intention, while satisfying the curiosity of the public on a most absorbing subject, of providing the miscreant with valuable information.

Suffice it to say that, among other precautionary measures, three newspapers published in London, two in Yiddish and one in German, and one published in Berlin (where the police are supposed to exercise a strong press censorship) and circulated in London, are being carefully read and translated into English, and that several very interesting "ectrices" of the proverbial order are burying their heads in the sand and imagining that consequently their whereabouts and actions are a profound secret; whereas their photos, each one bearing a description

Company possessed the richest diamond fields in the world.

Diamonds are found in the large deposits of lava or "blue ground" that has been forced up from the depths in past ages. Each mine consists of a large, basin-like crater gradually tapering to a great depth. Within a radius of three and a half miles, five of the world's leading diamond mines are located. Here the Kaffir boys work in gangs of twenty-five to forty, drilling and blasting the hard blue rock. The walls are worked until they break through into another chamber.

When it reaches the surface the precious earth is automatically conveyed to the dumping grounds. Here it is spread to a depth not exceeding ten inches and allowed to remain from three to six months, according to the rapidity with which it disintegrates. When finally sent to the washing machines it is mixed with water and passed through revolving screens filled with holes.

This method of handling is being superseded by mechanical sorters which consist of several inclined perforated shelves, loaded with grease. The diamonds stick to the grease, while all other material passes from one shelf to another.

Great precautions are taken against theft. All employees are engaged for three months, during which time they are kept under close guard. While they are not at work they are confined in a large compound surrounded by high fences. A central store is located in this enclosure. The men enter and depart by long, subterranean passages which lead from the compound to the mines. Towers are located from which powerful searchlights are operated at night. The employees are also searched every evening.

In spite of all this care ten to fifteen per cent. of the diamonds mined are stolen. In order to discourage the buying of stolen gems, a penalty of from five to fifteen years is enforced against the buyers.

The De Beers Company operates seven mines and employs fourteen hundred white workmen and seventy-two hundred blacks. The annual output is from six to eight million carats, or from one to one and a half tons a year.

It is eight months from the time the rock is drilled until the extracted diamond is ready for the assayer's examination.

#### ALCOHOL FROM CORN COBS.

Eleven Gallons Were Distilled From One Ton.

In the manufacture of alcohol from corn cobs and corn stalks, at small cost the United States Department of Agriculture is developing a new industry that is likely to be of large commercial value. Investigations which the department is making at Hoopes-ton, Ill., have proved that the large quantities of corn cobs which every year heretofore have gone to waste can be converted into alcohol in sufficient quantities so as to justify the erection of a distilling plant in connection with a corn cannery.

The Department of Agriculture sent two chemists to Hoopes-ton to make experiments at a large cannery there. They have succeeded by simple methods of fermentation in getting a yield of eleven gallons of alcohol from a ton of green cobs, and six gallons of alcohol from a ton of green corn stalks.

#### MEASURING PAIN.

A new branch of science heralds its appearance in Paris. It is named Dolormetry, and its function is the "measurement" of the dynamics of pain by material means. The dolometer shows that the dynamic force of a sharp cut with an ordinary carter's whip is equal to about 285lb., but that a vigorous jerk at the reins puts a pressure of about 305lb. on the horse's head.

"Let go the anchor!" yelled the captain. "I ain't touching it," said the new deck hand.

Office, when in the presence of a large gathering of officials and postmen, Mr. Alexander Riddoch, ex-rural postman, Orton to Fochabers, was presented with the Imperial Service Medal.

#### MURDER CLIMAX TO SECRET PACT.

Lad of Eighteen Slays an Old Couple for Funds.

A lad named Brown, of Sydney, Australia, only 18 years of age, who is about to be tried for the murder of an old man and his wife, named O'Keefe and their servant, Gillick, tells an extraordinary story as to his motive for the crime.

He says he had no grudge against the O'Keefes, who had been most kind to him. But he was a member of a secret society, whose objects were to start a revolution in favor of a "White Australia." The oaths binding the members were, he declares, so stringent that he would hang before he gave the names of his associates.

The society was short of funds, and it was decided that O'Keefe's bank books must be stolen. He was deputed for this work, and set out on a Sunday, armed with a bayonet and a sandbag. He had, he states, no intention of murder, but meant merely to stun the old couple by means of the sandbag.

He found Mrs. O'Keefe seated by the fire, and struck her on the head with the sandbag. The bag burst, and the old lady struck Brown on the neck with a bottle. Mr. O'Keefe ran to his wife's help with a gun, and then Brown stabbed both of them. Gillick appeared at the end of the struggle and flung himself on Brown, who stabbed him as well.

Brown cannot be induced to express the slightest regret for his crime or to divulge even the name of the secret society at whose orders he attempted the theft.

#### TORTURED BY FIERCE ZULUS.

Terrible Acts Which Prompted Troops to Cry "No Surrender!"

Henry Tully, who has been nearly thirty years in South Africa, writes from Pietermaritzburg to his brother, Capt. R. Tully, of South Shields, England, defending the troops operating in Natal against the charges of barbarity brought by Keir Hardie and some other M.P.'s.

He states that the very opposite was the case. The women and children were taken care of, and only the natives who were found in arms against us were killed.

With regard to the other side of the picture, the writer says: "Brooks and Brown, of my old corps, the Natal Mounted Police, were most terribly mutilated. In the case of Veal, a non-combatant, he must have suffered awful torture. A native witness has confessed to us that the poor fellow was held down while the soles of his feet were cut off. He fainted, and when he came to he was made to walk a distance, carrying a heavy load on his head.

"His right hand was cut off, and he had to salute himself with his dead hand. After that his eyes were gouged out, and he was dismembered while still living. Can you wonder that the men of McKenzie's column, when they found his mutilated body, should cry out, 'Take on surrender, sir?'"

Of course it's all right to be born a leader, but the man in the rear has a better opportunity to get away.

The surgeon of a large hospital was paying a visit to the patients when he came to a cot whereon lay an Irishman, who was not bearing his pain very bravely, for he was groaning loudly. "Oh, come, my poor fellow," remonstrated the surgeon, "try and bear your pain like a man. It's no use kicking against fate." "Shure, you're roight, sorr," groaned the Irishman, who had been severely kicked by a mule. "Specially whin they're the fate of a mule!"

Cruelty to Animals has been a great deal, and now-a-days, unless the weather be exceptionally bad, the public may rest assured that cattle suffer very little indeed on the sea passage. Most of them feed very well, and drinking water is always plentiful. The modern cattle boat is so large—some of them are over 10,000 tons—that rolling is largely eliminated, and, indeed, the beasts have more to fear from the heat of summer than from the storms of winter.

Two curious facts about the carriage of live cattle are worth mentioning. One is that they have a peculiar power of discoloring white paint all over the ship, and the other that they are able to "smell" land long before it is in sight.

To turn to the importation of dead meat. As most readers are aware, it is frozen before being shipped, is carried in a refrigerator hold, and on arrival in this country is at once transferred by insulated lighters to cold storage.

Most of our frozen meat—mutton especially—comes from New Zealand and the Argentine. The freezing is done in great chambers which each hold 60,000 carcasses, and three great refrigerating engines produce the appalling cold of 30 degrees below zero. Each carcass, after being frozen as hard as stone, is wrapped in a cotton cloth, weighed and ticketed, and transferred to the ship, where they are stored in the cold-air chamber, the temperature of which is kept at about twenty degrees, or twelve degrees of frost. Remember, these ships have to pass through the tropics. It is odd, when gasping on the deck in the Red Sea, in a temperature of perhaps 105 degrees in the shade, to think that one might go snowballing in the hold just below.

#### THREE DAYS TO THAW.

London's cold storage warehouses will hold over two million frozen carcasses. Nelson's Wharf at Lambeth is one of the largest. It is six storeys high and if you want to enter, you have to do so by a door on the top floor. There are no doors below, for if there were, every time one was opened warm air would get in, and, of course, rise to the upper floors. Here the meat is stored until it is needed, and then very carefully "unfrozen." The latter process is a most important one. It usually takes three whole days. If it is done too rapidly, the meat is soggy, wet and nasty, and quite spoilt. On the other hand, if slowly and carefully carried out, the thawed meat is left dry and firm, exactly resembling that newly killed.

The enormous proportions of the frozen meat industry are really almost miraculous when one considers that the first cargo of frozen mutton came to England only twenty-six years ago. It was in 1880 that the Strathleven brought the first cargo of 400 carcasses from Melbourne to London.

#### ROYALTY AND THE TELEGRAPH.

No European ruler uses the telegraph so much as the Emperor of Russia. He has a secret code both for his private and his official messages, and expends \$25,000 a year in this kind of correspondence. The German Emperor spends \$15,000 a year in the same way, and he uses a code which he has invented himself, and which he finds very useful whenever he desires to communicate with the Cabinet Ministers or other prominent officials. The telegraph is not used to any extent either by the King of Italy, the Emperor of Austria, or the King of Greece; but, on the other hand, King Edward and Queen Alexandra use it constantly. King Edward signs his private despatches "Albert Edward" or "Bertie," and the Queen, who always signs hers "Alexandra," writes quite as many in German as in English.

Frequently a would-be optimist degenerates into a pessimist because of his inability to diagnose a bad case of biliousness.

# STAMPING OUT MUTINY PRICE OF GREAT POWER IN MERRY OLD ENGLAND

## CZAR DEGRADED A REGIMENT WITH HIS OWN HAND.

### A British Battalion Blew Itself to Pieces at Malta to Avoid Punishment.

Seldom has a sterner punishment been meted out to an insubordinate regiment than that which has recently been inflicted by the Czar upon the Preobrazhensky Guards.

This is emphatically the corps d'élite of the Russian army. In it his Majesty served his "time" with the colors, a duty incumbent upon every Russian, from the Emperor down to the lowest peasant.

Of it, after his accession to the throne, he became Honorary Colonel. Its officers are all nobles, the best and bluest blood in Russia. Even the privates and picked men belong, most of them, to good families.

When, therefore, the Czar found that disaffection was rife even in its ranks, his anger knew no bounds. He had the whole of the officers and men paraded before him, and after addressing to them a few scathing words, he publicly, with his own hands, tore up the uniform he was wont to wear upon occasion of his honorary commander. Then the corps was relegated by the Imperial Ukase to the status of an ordinary line battalion, and banished from St. Petersburg to a remote and dull provincial town.

### WHOLE REGIMENTS WIPED OUT.

And now, on top of all this, comes the news that Colonel Gadon, the officer in command of the offending regiment, has been cashiered; as has also Prince Wassilitchikov, Aide-de-Camp-General to the Czar and Commander of the Brigade of Guards, and General Ozerov, commanding the First Division of the Guards.

Severe measures indeed! Yet, from the point of view of military discipline, fully justified. Mutiny is an ugly thing, and in no army in the world are these guilty of it shown any mercy whatever.

In India, in 1857, whole regiments, known to be disaffected, were simply wiped out of existence, after having been surrounded by loyal troops. Chaka, the Napoleon of Zululand, if he had the slightest suspicion of an impi's loyalty, or if one had shown cowardice in battle, used to send other impi against it to "eat it up."

In 1807 a British composite battalion, forming part of the Maltese garrison, mutinied, and shut themselves up in the strong Fort Ricasoli, overlooking the Grand Harbor.

### WHEN THE GRENADIERS MUTINIED.

From this vantage point they attempted to parley with the Governor, demanding better and more liberal rations, the abolition of corporal punishment, and a higher rate of pay. But the Governor declined even to listen to their demands, much less to reply to them.

Instead, he surrounded the fort with troops and cannons, swearing that "not one mutinous dog amongst them all should escape hanging." As a matter of fact they did, though; for after sustaining an eight days' siege, they fired the magazine, blowing into the air the fort, themselves, and some hundreds of their besiegers.

Other times, other methods. When the Grenadier Guards mutinied at Wellington Barracks, on July 7th, 1890, the regiment was merely banished to Bermuda. This kind of punishment, by the way, appears to be a favorite one with our military authorities. At all events it is the one most often employed.

Thus, when the Royal Irish Rifles broke into revolt at Gibraltar, in 1887, they were bundled off to Egypt at twenty-four hours' notice, and sent up the Nile to roast at Assuan.

## THE REAL SUFFERINGS OF THE PEOPLE YOU ENVY.

### Many Celebrated People Have Acted Their Part While Suffering Agony.

The humble individual passing his life in obscurity, and often tempted to envy those who occupy a big position "in the public eye," has frequently little conception of the physical pains and penalties that attach to popularity. The man or woman condemned to figure in public has often to wear a brave presence and to smile under hidden, unsuspected torture. They are "on the rack."

Modern political life is the life of the galley-slave, and demands a constitution of iron. Addressing a huge meeting and making a speech of an hour is a physical feat which some men could never perform, and which often leaves even the professional speaker in a state of collapse. Gladstone was, after one such occasion, found by a friend almost speechless and senseless. But no one suspects the physical torture of the apparently triumphant and jubilant politician.

What can be more delightful than to ravish a crowded opera-house by the wonderful beauty of one's voice? Madame Melba sung some time back with two physicians waiting anxiously behind the scenes and trembling as to the results. The spectators never dreamt of what was passing. Lord Beaconsfield once surprised the House of Lords by rising most unexpectedly to make a speech while another member was on his feet. No one knew the reason, till afterwards, of

### HIS ABRUPT INTERRUPTION.

He had taken a strong tonic to brace him up, and finding the effect was quickly passing off, he rose in alarm lest if he waited longer he would not be able to speak at all.

Nobody suspected that Irving's last performance of "Becket" was the effort of a dying man. Mr. Beerbohm Tree has often acted without betraying by a tremor all the time he was upon the stage that he was racked with pain.

One of the most celebrated barristers of the day battled for his clients in an important appeal case some weeks ago in the most vigorous and acute fashion. When he sat down, however, at an interval in the case and found he could not rise again, it became necessary for him to explain to the judges that for days past he had been suffering the most intense agony from the internal complaint. No one would imagine, while listening to Mr. Plowden, the witty and wise London magistrate, that he was hardly ever free from headache.

Royalty has often to "put a brave face" on. The King has frequently defied his physicians and insisted on performing his public engagements when complete rest has been prescribed him. A Sovereign is often "on the rack."

"I AM SO WORNO OUT"—wrote Queen Victoria to one of her Ministers, at a time of great anxiety—"that I hardly know whether you will be able to read this letter."

Audiences at places of amusement have little sense of the hidden anguish that may rack a performer. The idea that that person who seems to be always so full of gaiety, and who makes them laugh so prodigiously, can be suffering in any way seems absurd. But the strain is often enormous, and physicians could tell tales if they would of pitiful appeals to them for "something just to take me through this engagement," sometimes for something to carry them through the night's performance.

"People often ignore the amount of physical strain involved in the performance of some of the occupations they most envy," declared Sir Andrew Clark once. "I wonder how many persons have even pondered the fact that a

## NEWS BY MAIL ABOUT JOHN BULL AND HIS PEOPLE.

### Occurrences in the Land That Reigns Supreme in the Commercial World.

The Queen possesses a fishing rod mounted in gold, and worth £40.

It is estimated that a penny changes hands 125,000 times in its life.

Out of every hundred lives insured in England, only five are those of women.

In memory of the Dogger Bank outrage a statute is to be unveiled at Hull shortly.

At Scarborough the old Blue Bell Inn will shortly be opened as a mission house.

Messrs. Merryweather have just forwarded to Spain the first petrol motor-fireboat ever built.

Mr. J. Pierpont Morgan has contributed £1,000 to Guy's Hospital for the promotion of medical education.

An order has just been given by the London County Council for the supply of cockle shells for paths.

100,000,000 picture-postcards is the estimated number sent through the post during the holiday season.

The Prison Commissioners have asked the Y. M. C. A. to arrange for the systematic visitation of prisoners.

England contributed during the past financial year £82,364,500 to Imperial purposes, Scotland £10,238,500, and Ireland £1,811,500.

During the forty years' service, Mr. Benjamin Gouldstone, an Epping postman, who has just retired, has walked nearly 150,000 miles.

Mr. George Meredith, the novelist, has returned to his chalet on the Surrey hills, at Dorking, and has now quite recovered from his broken leg.

To maintain smartness in the appearance of the staff, the Great Northern Railway order that all their staff shall wear white collars.

In the Carnarvon district a quaint funeral custom, which dates back for generations, was observed recently, when some bread, salt, and a coin were buried with the body.

An inquest was held at Whitechapel on the infant child of a tailor, who was killed by swallowing a hot cinder which "popped" out of the fire into its mouth.

A child who has recently come under the care of the Mutford and Lotheringland (Suffolk) Guardians rejoices in the name of Aurora Veronica Tonita Agatha Wilson.

St. Anne's-on-Sea is becoming known as the "Widow's Retreat." In one street half a dozen widows are living next to each other while in another there are twenty widows.

Under the new London County Council by-law people who throw down wastepaper, fruit, or vegetable refuse, broken glass, or nails in the streets will be liable to a penalty of forty shillings.

When a steamer was entering the Mersey the other day one of the parrots on board escaped and flew seawards. The flight of the "poor Poll," however, was short, a number of gulls swooping down and pecking the stranger to death.

The other day a little girl was asked roughly to describe the human body, with the following result: "We have a head, which contains the brains, if any; also a body which contains the heart, part of the liver, and the tummy. The tummy contains the vowels, A, E, I, O, and U, and sometimes Y and Z."

London's net debt, according to a report just issued, is £44,620,266. The receipts of the London County Council during the year amounted to £15,216,749, and the expenditure to £15,771,397, education costing £4,586,398.

Mr. William Baker, Dr. Barnado's successor, has gone on a tour through France, Spain, Italy, Germany, Belgium, and Switzerland for the purpose

**\$5,000 REWARD** will be paid to any person who proves that Sunlight Soap contains any injurious chemicals or any form of adulteration.

## Sunlight Soap

is a perfect cleaner and will not injure anything.

Best for all household purposes, Sunlight Soap's superiority is most conspicuous in the washing of clothes.

Common soaps destroy the painted or varnished surfaces of woodwork and take the color out of clothes.

Even the daintiest linen or lace, or the most delicate colors may be safely washed with Sunlight Soap in the Sunlight way (follow directions).

Equally good with hard or soft water.

Your money refunded by the dealer from whom you buy Sunlight Soap if you find any cause for complaint.

Lever Brothers Limited, Toronto

### FOR A BAD MEMORY.

Here is a good memory exercise. Glance into a shop window for one second only, and then try to name all the things displayed in it. At first you will recall only two or three, but this number will rise to thirty with practice. Another good plan is to sit down at the end of the day's work and think of all you have done since morning—where you have been, whom you have met, what you have spent, and so on. In time you will be able to recall exactly what you said and did at a certain hour, and the advantage of possessing this faculty is obvious. Incidentally, it will keep you from wasting your time, for it is not pleasant to remember that you did nothing at all. If you weakness lies in forgetting from such

Thus, when the Royal Irish Rifles broke into revolt at Gibraltar, in 1887, they were bundled off to Egypt at twenty-four hours' notice, and sent up the Nile to roast at Assouan.

#### WIPING OUT THE STIGMA.

A similar policy was pursued in regard to the mutiny of the Hussars at the Curragh Camp, in September, 1887. Of course, in such cases as these, more or less lengthy terms of imprisonment are also inflicted upon the ringleaders, in addition to the wholesale punishment meted out to the disaffected battalions.

Occasionally an offending regiment is exposed to ridicule, a punishment which usually turns out to be extremely effectual. For instance, some time back it was decreed that a crack Austrian corps, which had shown signs of insubordination, were to be deprived of their badges and facings; at the same time, too, their buttons were removed from their tunics, and replaced by hooks and eyes.

This so mortified the men, that during the next campaign they sought to wipe out the stigma by so magnificently heroic a charge that very few escaped alive. Whereupon the Emperor was pleased to decorate the survivors, and to restore to the regiment its ancient insignia.

Ivan the Terrible, again, was once faced by a serious mutiny of no fewer than seven of his line battalions, who refused point-blank to march against Kazan. The Czar rode out alone to meet them, slew with his own hand the ringleader of the mutineers, and then ordered the others, in a voice hoarse with passion, to throw down their arms. Taken by surprise they obeyed. "Now strip," was the next command. Wonderingly, they again complied. "March," shouted the Czar, and mechanically the serried ranks put themselves in motion.

It was a bitterly cold day, but Ivan marched the nude mutineers twenty miles, along roads lined by jeering crowds, and through villages where shame-faced women pointed at them the finger of scorn.

By nightfall, such as survived the ordeal arrived by a circuitous route to the place where they had left their garments and their arms, and were graciously permitted to don the former and repossess themselves of the latter. Next day they set out on the Kazan Expedition with the rest of the army, and throughout that arduous campaign none fought better, or bore hardships more uncomplainingly, than did "Ivan's naked ones," as they were henceforth called.

#### SUPPRESSION OF THE JANIZARIES.

Probably they were thankful, upon reflection, that their punishment had been no more than it was. For, in those days, and even in times much later, Eastern autocrats showed scant mercy to mutineers.

Take, for instance, the case of the "suppression" of the Janizaries by the Sultan Mahmood II. in 1826, than which no more appalling tragedy is recorded in history. These were picked men, the Sultan's own body-guard, and this, of course, made their disloyalty the blacker. They were, too, the spoiled pets of the Turkish army. They had actually deposed one Sultan, and had habitually dictated, throughout a long reign, to another. But when they tackled Mahmood, they tackled the wrong man.

They broke out into mutiny at eight o'clock on the evening of June 15th. At four o'clock in the morning, on June 16th, the Sultan personally unfurled the sacred green banner of Islam, and by six some twenty thousand of them had been cut to pieces in the narrow streets of Constantinople, by troops and populace. The remnant was disbanded the same afternoon, and sold into slavery. —Pearson's Weekly.

Teacher—"Johnny, can you tell me what a hypocrite is?" Johnny—"Yes, ma'am. It's a boy what comes to school smiling."

through the night's performance.

"People often ignore the amount of physical strain involved in the performance of some of the occupations they most envy," declared Sir Andrew Clark once. "I wonder how many persons have even pondered the fact that a judge is supposed to eat his midday meal and come back to court in the pink of condition at the end of half an hour? Or that an actor or actress is condemned to make the heartiest meal of the day at one or two o'clock in the morning?"

During 1905 there were wrecked, burned, and foundered at sea 297 steam vessels of a net aggregate tonnage of 253,611, and 296 sailing vessels of 214,600 tons, says Lloyd's.

ceipts of the London County Council during the year amounted to £15,216,749, and the expenditure to £15,771,397, education costing £4,586,398.

Mr. William Baker, Dr. Barnardo's successor, has gone on a tour through France, Spain, Italy, Germany, Belgium, and Switzerland, for the purpose of studying the charitable institutions.

An egg laid by a Buff Orpington hen belonging to Mr. Woodhead of Thundersley, Essex, was eight and a half inches in circumference, and when broken, it was found to contain another perfectly formed egg.

Summoned at Macclesfield for furiously driving a mare, a farmer pleaded that the animal was an "old trooper," and the foot of a motor-car, mistaken for the bugle-call, aroused her military instincts so that he could not hold her.

exactly what you said and did at a certain hour, and the advantage of possessing this faculty is obvious. Incidentally, it will keep you from wasting your time, for it is not pleasant to remember that you did nothing at all. If your weakness lies in forgetting faces, make a mental note of such details as the color of the hair, the straightness of the nose, and the curves of the mouth.

"Now, Tommy," said the boy's mother, giving him final instructions, "you must remember how to behave at the party. If you're asked to have something and you want it, you must say 'Yes, thank you,' and if you don't want it you must say—'" "You needn't bother about that part of it, ma," interrupted Tommy.

In Use For Over 30 Years.

THE CASTORIA COMPANY, 77 MURRAY STREET, NEW YORK CITY

## Nature's Way Is Best.

The function strengthening and tissue building plan of treating chronic, lingering and obstinate cases of disease as pursued by Dr. Pierce, is following after Nature's plan of restoring health.

He uses natural remedies, that is extracts from native medicinal roots, prepared by processes wrought out by the expenditure of much time and money, without the use of alcohol, and by skillful combination in just the right proportions.

Used as ingredients of Dr. Pierce's Golden Medical Discovery, Black Cherry-bark, Queen's root, Golden Seal root, Bloodroot and Stone root, specially exert their influence in cases of lung, bronchial and throat troubles, and this "Discovery" is, therefore, a sovereign remedy for bronchitis, laryngitis, chronic coughs, catarrh and kindred ailments.

The above native roots also have the strongest possible endorsement from the leading medical writers, of all the several schools of practice, for the cure not only of the diseases named above but also for indigestion, torpor of liver, or biliousness, obstinate constipation, kidney and bladder troubles and catarrh, no matter where located.

You don't have to take Dr. Pierce's say-so alone as to this; what he claims for his "Discovery" is backed up by the writings of the most eminent men in the medical profession. A request by postal card or letter, addressed to Dr. R. V. Pierce, Buffalo, N. Y., for a little book of extracts from eminent medical authorities endorsing the ingredients of his medicines, will bring a little book free that is worthy of your attention if needing a good, safe, reliable remedy of known composition for the cure of almost any old chronic, or lingering malady.

Dr. Pierce's Pleasant Pellets cure constipation. One little "Pellet" is a gentle laxative, and two a mild cathartic.

The most valuable book for both men and women is Dr. Pierce's

### An Arab Fishing Yarn.

A fishing yarn from Algiers: "Some Arabs were fishing from a boat with lines off the coast when a dolphin seventeen feet long, eleven feet in circumference and weighing four tons swallowed one of the baited hooks and dashed off at a tremendous speed. The fishermen paid out as much line as possible and then made it fast. This brought the dolphin up sharply, but the strain snapped the line. The monster then attacked the boat and capsize it, flinging the fishermen into the water. Other Arabs ashore waited till the dolphin was clear of the men and then killed it with rifles."

### The Logical Question.

A little Philadelphia boy was taken by his father for his first visit to the zoo. Stopping before an inclosure, he asked, "Papa, what animal is that?" Reading the sign tacked up to one side, his father responded, "That, my son, is a prong horned antelope." "Kin he blow his horns?" was the question that promptly followed.

## Throat Coughs

A tickling in the throat; hoarseness at times; a deep breath irritates it—these are features of a throat cough. They're very deceptive and a cough mixture won't cure them. You want something that will heal the inflamed membranes, enrich the blood and tone up the system . . .

## Scott's Emulsion

is just such a remedy. It has wonderful healing and nourishing power. Removes the cause of the cough and the whole system is given new strength and vigor . . .

### SINFUL HABITS IN YOUTH

MAKE NERVOUS, WEAK, DISEASED MEN.

THE RESULT of ignorance and folly in youth, overexertion of mind and body induced by lust and exposure are constantly wrecking the lives and future happiness of thousands of promising young men. Some fade and wither at an early age, at the blossom of manhood, while others are forced to drag out a weary, fruitless and melancholy existence. Others reach maturity, but find no solace or comfort there. The victims are found in all stations of life—the farm, the office, the workshop, the pulpit, the trades and the professions. Nervous Debility and Seminal Weakness are guaranteed cured by our New Method Treatment or No Pay. You run no risk 25 years in Detroit. Bank security. CURED WHEN ALL ELSE FAILED. No names used without written consent.

"I am 33 years of age and married. When young I led a gay life. Early indiscretions and later excesses made trouble for me. I became weak and nervous. My kidneys became affected and I feared Bright's Disease. Married Life was unsatisfactory and my home unhappy. I tried everything—all failed till I took treatment from Drs. Kennedy & Kergan. Their New Method built me up mentally, physically and sexually. I feel and act like a man in every respect. They treated me six years ago. They are honest, skilful and responsible financially, so why condemn Quacks and Fakirs when you can be cured by reliable doctors."—W. A. Beiton.

CURES GUARANTEED OR NO PAY. Consultation Free—Books Free—Question Blank Free for Home Treatment.

# Removed the Growth.

DOUGLAS & CO., NAPANEE, ONT.

DEAR SIRs,—During year 1890-91 I was troubled with large lump growing on the right side of my neck near the ear. Had consulted several physicians and used everything I could hear of, all to no use. Was told to use

### Douglas' Egyptian Liniment.

I did, and before I had used half a twenty-five cent bottle was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. No man has any idea of its value until he has used it; would not be without it under any circumstance

Respectfully yours,

NATHANIEL W. REID.

Enterprise P. O.]]

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.  
 Address: F. J. CHENEY & CO., Toledo, Ohio.  
 Sold by Druggists, 75c.  
 Take Hall's Family Pills for constipation.

## A Nice Distinction.

A well known Atlantan has a wife with a sharp tongue. Jones had come home about 2 in the morning rather the worse off for a few highballs. As soon as he opened the door his wife, who was waiting for him in the accustomed place at the top of the stairs, where she could watch his uncertain ascent, started upbraiding him for his conduct. Jones went to bed and when he was almost asleep could hear her still scolding him unmercifully. He dropped off to sleep and awoke after a couple of hours, only to hear his wife remark, "I hope all the women don't have to put up with such conduct as this." "Annie," said Jones, "are you talking again or yet?"

## Clams' Eggs.

The clam's eggs are carried by the mother on her gills. When there are fish in the water with them the mother clams discharge the eggs which soon hatch, but if there are no fish they carry the eggs until they decay. The reason of this strange behavior is this: When the eggs are set free in the water they soon hatch and the little ones swim about until they find some fish to which to attach themselves. They live for a time on the mucus of the fish and then drop off, sink to the bottom and form burrows for themselves. This curious semiparasitic life is no doubt a reversion to the habit of some ancient ancestor.

## This Was In 1824.

English opinion of the United States in 1824, from the standpoint of the fashionable London set, is shown in the extract from the correspondent of John Whishaw:  
 "You must have read some time since in the papers of a few young 'fashionables,' Mr. Stanley (Lord Derby's grandson), Messrs. Wortley and Denison, ministerial members, and La-bouchere, a nephew of Mr. Baring, having sailed for New York with the intention of making a tour of the United States. The scheme was thought very wild and much disapproved of by the west end of the town, and disappointment and disgust were universally predicted."

## A Funny Incident.

When Senator Wolcott first went to Colorado he and his brother opened a law office at Idaho Springs under the firm name of "Ed Wolcott & Bro." Later the partnership was dissolved. The future senator packed his few assets, including the sign that had hung outside of his office, upon a burro and started for Georgetown, a mining town farther up in the hills. Upon his arrival he was greeted by a crowd of miners who critically surveyed him and his outfit. One of them looking first at the sign that hung over the pack, then at Wolcott and finally at the donkey ventured, "Say, stranger, which of you is Ed?"

## No Guarantee.

A sporting paper recommends a certain way of avoiding the bites of a dog, however savage. All one has to do is to stand perfectly still and hold one's hand out. The dog, says the writer, will take the hand in his mouth, but will not bite it. But what guarantee have we that the dog knows this?—London Globe.

## He Might Be Needed.

It is best to be courteous to all, even to the man that you dislike. You may want to borrow money from him some day.—Boston Globe.

## The Optimist.

Small Boy—Pa, what is an optimist? Pa—An optimist, my son, is a man who doesn't care a blank what happens, so that it doesn't happen to him.—Life.

The wages of sin have not materially changed in some thousands of years.—St. Louis Globe-Democrat.

## POINTED PARAGRAPHS.

A man should have sense and woman taste.  
 The smartest bass finally runs across a bait that fools him.  
 Every man thinks he could trot some pace if he wasn't hobbled.  
 People are compelled to smother resentments at least a dozen times a day.  
 A man who has a falling out with more than two of his neighbors ought to look himself over.  
 A clever mimic would be good company were it not for the feeling that he is also a clever mimic behind your back.  
 When a man catches a big string of fish, how he loves to carry it along the main street of the town in which he lives! All of us like to display our big catches in other lines.

# An Absolute Cure For DYSPEPSIA

Dyspepsia, Indigestion, Belching of gas after eating, mean weakness.

By means of its muscles, the stomach should churn the food—changing solids into liquids—mixing in the gastric juice to start digestion.

If the stomach is weak—then food is not properly churned and mixed with enough gastric juice. Then you have indigestion and then dyspepsia.

## Fruit-A-Tives

OR "FRUIT LIVER TABLETS"

strengthen the stomach—just as juicy beef and eggs and milk strengthen the wasted frame of a patient getting over Typhoid.

FRUIT-A-TIVES contain the elements that give new—vigor new energy—to the muscles lining the stomach—stimulate the digestive glands and assure a copious flow of gastric juice for each meal.

More than that, FRUIT-A-TIVES correct the Constipation which usually attends stomach trouble—and by acting directly on kidneys and liver, put the whole system in healthy condition.

FRUIT-A-TIVES are a peculiar combination of fruit juices and tonics that are known all over Canada for their wonderful cures in all stomach, liver and kidney troubles.

50c. a box or 6 boxes for \$2.50. Sent on receipt of price if your druggist does not handle them.

FRUIT-A-TIVES LIMITED, OTTAWA.

**Knew From Experience.**  
"I say," said a friend the other day, "you are an old hand at it. I have only just got married, and don't understand much about the business, but has a married man any rights left when he once assumes the hymeneal responsibilities?"

"Rights? Yes, lots! He's a right to pay all the bills, to—"

"Stop. I mean this. Let me give you an instance. Every box and drawer and portmanteau and, in fact, every available receptacle of every description is stuffed full of my wife's property and when I want to put away a few cuffs and collars—"

"Hold hard! I know what you mean. Listen, young man. If your bedroom were 200 yards long and lined from the floor to the ceiling with drawers and you wanted a place to stow away a couple of collars, you couldn't find a nook that wasn't full of hairpins, tufts of frizzes, pads, scent boxes, old gloves, powder puffs, rings and things. So just accept the inevitable. Wrap your personal property in an old newspaper or some brown paper and hide the parcel under the bed."

The inquirer smiled loudly and ironically and passed on a wiser if not a better man.

### Eskimo Throwing Sticks.

A "throwing stick," "throwing board" or "spear thrower," as it is sometimes called, is a contrivance for casting a javelin or harpoon, which is employed by various savage races, such as the Australians, some South American tribes and especially by the Eskimos, among whom its use is almost universal. Roughly speaking, it is a narrow grooved board a foot or so long, with one end cut into a handle and the other provided with a stud or

bending back his hand till the spear lies horizontal, he aims at the mark and propels the weapon by a quick forward jerk of the stick. In this way I have seen Eskimo boys casting their forked javelins at wounded waterfowl.

### When Buchanan Was King.

George Buchanan was a scholar, historian, controversialist and the best Latin poet of his age. Buchanan was tutor to Mary, queen of Scots, and to her son James, afterward James I. of England. One day he caused himself to be made king of Scotland, and this was the way of it: Having observed in James a tendency to too ready acquiescence, he drew up a paper for the royal pupil to sign. James did so at once without having read it. The document happened to be a transfer of the royal authority to Buchanan for fifteen days, and no sooner had the poet got it into his possession than he began to play the monarch, even before the king himself. James thought the man a lunatic until the instrument was produced by which he had signed away his sovereignty. This incident was used by the worthy preceptor to illustrate the day's lesson on the responsibilities of monarchs.

### Turkey's Way of Raising Revenue.

The land in all Turkey and her dependencies belongs to the reigning sultan and is only occupied at his will. It is divided among those who wish to cultivate it at a nominal rental of one-fifth of the produce, which goes directly to the crown. Three-fifths more are taken from the lessee on other pretexts, all for the maintenance of the government, the pasha in each district having the authority to lease the ground and collect the taxes, which may be in kind or money. If crops are short, they take four-fifths of all the man has in animals and even in household utensils, sometimes all his possessions, to make up the deficiency which Providence has withheld. Everything that can produce, be it a tree, beast, fowl, worm or the labor of a man and his family, is subject to the four-fifths tax. Those who toil at any labor or trade other than agriculture are taxed also pro rata according to their wages and must pay or go to prison.

### How to Remove a Corn; Try It.

Expose the corn and pass the finger tips of your right hand over it slowly and caressingly, at the same time sending a vibration from the brain to the corn. If it is a soft corn 4-13 vibrations per second will suffice; if a hard corn, put on a forced draft. Repeat slowly, "I am now sending a current of thought force into my corn and so separating, deducing, disintegrating, rendering, splitting, sundering, splintering, snipping, dwelling, whittling, dispersing, dislocating, eliding, divorcing, pulverizing, slashing, slicing and dissecting it that presently it will pass away. Repeat it three times; then, with rising inflection, "Avant, avant, avant!" Finish by repeating the password: "The universe is mine. I am it." The corn will at first look extremely surprised, then wilt and fade beautifully from sight.—New Thought.

# BY-LAW NUMBER

OF THE MUNICIPAL CORPORATION OF THE TOWNSHIP OF RICHMOND.

A By-Law to provide for the completing and repairing of certain drainage work provided for by By-Law No. 201 of the said Municipal Corporation in pursuance of the report of the Engineer, as embodied in the said By-Law.

Provisionally adopted the Sixth day of August, A. D. 1906.

WHEREAS pursuant to By-Law No. 201 of the Municipal Corporation of the Township of Richmond constructed that certain drain known as Otter Creek Drain for the benefit of the land therein described.

AND WHEREAS by mandamus issued out of the High Court of Justice the said Municipal Corporation have been directed to repair and maintain the said drain.

AND WHEREAS, thereupon under the terms of the said By-Law Number 201, the said Council has procured an examination to be made by Frederick Fraser Miller, Civil Engineer, being a person competent for such purpose, of the said area proposed to be drained and the means suggested for the drainage thereof, and of other lands and roads liable to assessment under the Municipal Drainage Act, and has also procured specifications and estimates of the drainage work to be made by the said Frederick Fraser Miller and an assessment to be made by him of the lands and roads to be benefited by such drainage work, and of other lands and roads liable for contribution thereto, stating as nearly as he can the proportion of benefit, outlet liability and injuring liability, which, in his opinion will be derived or incurred in consequence of such drainage work by every road and lot or portion of lot, the said assessment so made being the assessment hereinafter by this By-Law enacted to be assessed and levied upon the roads and lots, or parts of lots hereinafter in that behalf specially set forth and described; and the report of the said Frederick Fraser Miller in respect thereof, and of the said drainage work being as follows:

To the Reeve and Council of the Township of Richmond.

Gentlemen:—Re. Otter Creek Drainage Works. I have the honor to report to you that I have examined the Creek and ditches and that the following work will have to be done to make the work conform to the original report, known as By-Law No. 201 of the Township of Richmond.

1. The Creek will have to be thoroughly cleaned out to remove the obstructions to the free flow of the water. These obstructions consist of sand bars, stones, poles, etc. also remains of McLaughlin bridge abutments and a couple of bridges which are not high enough and have not spun enough and will therefore have to be changed so as to give a clear twenty feet of water.

2. Considerable work will have to be done along the road allowance between the 7th and 8th Concessions consisting of about 74 rods of new ditch, a couple of culverts and about 40 rods of old ditch will have to be cleaned out.

3. The ditches along the south and east sides of the swamp from the above named Concession road north easterly and on the north side of the swamp from the spring north easterly will all have to be deepened and widened to become operative.

4. I estimate that the cost of the above work will be \$630.00 or at the rate of \$1.75 per acre of land benefited as per original By-Law No. 201 in respect to said drainage work and the whole assessment is for benefit liability.

5. I have, in the Schedule hereunder written, assessed the benefit liability of the said drainage works against the several parcels of land liable therefor.

DATED at Napanee this 24th. day of July A. D. 1906.

E. F. MILLER, Engineer.

The following Schedule covers description of land, number of acres benefited and total cost assessed upon each.

| ACRES  | TOTAL ASSES- | MENT OF | BENEFIT LIABILITY |
|--------|--------------|---------|-------------------|
| 1.00   | 1.75         |         |                   |
| 2.00   | 3.50         |         |                   |
| 3.00   | 5.25         |         |                   |
| 4.00   | 7.00         |         |                   |
| 5.00   | 8.75         |         |                   |
| 6.00   | 10.50        |         |                   |
| 7.00   | 12.25        |         |                   |
| 8.00   | 14.00        |         |                   |
| 9.00   | 15.75        |         |                   |
| 10.00  | 17.50        |         |                   |
| 11.00  | 19.25        |         |                   |
| 12.00  | 21.00        |         |                   |
| 13.00  | 22.75        |         |                   |

| 100.00 | 175.00       |         |                   |

said Municipality of their intention to make application for such purpose to the High Court of Justice during the six weeks next ensuing the final passing of the said By-Law.

AND NOTICE is hereby further given that a Court of Revision required by the Municipal Drainage Act Section 21 Chapter 226, Revised Statutes of Ontario 1897, will be held for the purpose of the said Act by the Council of the said Corporation of the Township of Richmond on the 24th day of September, A. D. 1906, at the hour of ten o'clock in the forenoon at the Town Hall in the Village of Selby for the trial of complaints, which may have been made by owners or persons interested in any property assessed in and by said By-Law in respect of the said Assessments under the said Municipal Drainage Act.

DATED at Selby the Sixth day of August A. D. 1906.

(Sgd.) ABRAM WINTERS, Clerk.

First publication August 31st, 1906.

### Refrigerators and Hammocks.

There is a lot of warm weather yet before us and it will pay you to improve this offer.

MADOLE & WILSON

### THE REAL LINCOLN.

He Was Not Homely, and He Was Not Slovenly in Dress.

For many years it has been the fashion to call Mr. Lincoln homely. He was very tall and very thin. His eyes were deep sunken, his skin of a sallow pallor, his hair coarse, black and unruly. Yet he was neither ungraceful nor awkward nor ugly. His large features fitted his large frame, and his large hands and feet were but right on a body that measured six feet four inches. His was a sad and thoughtful face, and from boyhood he had carried a load of care. It is small wonder that when alone or absorbed in thought the face should take on deep lines, the eyes appear as if seeing something beyond the vision of other men and the shoulders stoop as though they, too, were bearing a weight. But in a moment all would be changed. The deep eyes could flash or twinkle merrily with humor or look out from under overhanging brows as they did upon the Five Points children in kindest gentleness. So, too, in public speaking, when his tall body rose to its full height, with head thrown back and his face transfigured with the fire and earnestness of his thought, he would answer Douglas in the high, clear tenor that came to him in the heat of debate, carrying his ideas so far out over listening crowds. And later, during the years of war, when he pronounced with noble gravity the words of his famous addresses, not one in the throngs that heard him could truly say that he was other than a handsome man.

It has been the fashion, too, to say that he was slovenly and careless in his dress. This also is a mistake. His clothes could not fit smoothly on his gaunt and bony frame. He was no tailor's figure of a man, but from the first he clothed himself as well as his means allowed and in the fashion of the time and place.

In reading the grotesque stories of his boyhood, of the tall strapping whose trousers left exposed a length of shin, it must be remembered not only how poor he was, but that he lived on the frontier, where other boys, less poor, were scarcely better clad. In Vandalla the blue jeans he wore were the dress of his companions as well, and later, from Springfield days on, clear through his presidency, his costume was the usual suit of black broadcloth, carefully made and scrupulously neat. He cared nothing for style. It did not matter to him whether the man with whom he talked wore a coat of the latest cut or owned no coat at all. It

# STOP, WOMEN!

AND CONSIDER THE  
ALL-IMPORTANT  
FACT

That in addressing Mrs. Pinkham you are confiding your private ills to a woman—a woman whose experience with women's diseases covers twenty-five years. The present Mrs. Pinkham is the daughter-in-law of Lydia E. Pinkham, and for many years under her direction, and since her decease, her advice has been freely given to sick women.

Many women suffer in silence and drift along from bad to worse, knowing full well that they ought to have immediate assistance, but a natural modesty impels them to shrink from exposing themselves to the questions and probably examinations of even their family physician. It is unnecessary. Without money or price you can consult a woman whose knowledge from actual experience is great.

## Mrs. Pinkham's Standing Invitation:

Women suffering from any form of female weakness are invited to promptly communicate with Mrs. Pinkham at Lynn, Mass. All letters are received, opened, read and answered by women only. A woman can freely talk of her private illness to a woman; thus has been established the eternal confidence between Mrs. Pinkham and the women of America which has never been broken. Out of the vast volume of experience which she has to draw from, it is more than possible that she has gained the very knowledge that will help your case. She asks nothing in return except your good-will, and her advice has relieved thousands. Surely any woman, rich or poor, is very foolish if she does not take advantage of this generous offer of assistance.—Lydia E. Pinkham Medicine Co., Lynn, Mass.

Following we publish two letters from a woman who accepted this invitation. Note the result.

### First letter.

Dear Mrs. Pinkham:—  
"For eight years I have suffered something terrible every month. The pains are excruciating and I can hardly stand them. My doctor says I have a severe female trouble, and I must go through an operation if I want to get well. I do not want to submit to it if I can possibly help it. Please tell me what to do. I hope you can relieve me."—Mrs. Mary Dimmick, 59th and E. Capitol Sts., Washington, D. C.

### Second letter

Dear Mrs. Pinkham:—  
"After following carefully your advice, and taking Lydia E. Pinkham's Vegetable Compound, I am very anxious to send you

my testimonial, that others may know their value and what you have done for me.

"As you know, I wrote you that my doctor said I must have an operation or I could not live. I then wrote you, telling you my ailments. I followed your advice and am entirely well. I can walk miles without an ache or a pain, and I owe my life to you and to Lydia E. Pinkham's Vegetable Compound. I wish every suffering woman would read this testimonial and realize the value of writing to you and your remedy."—Mrs. Mary Dimmick, 59th and E. Capitol Streets, Washington, D. C.

When a medicine has been successful in restoring to health so many women whose testimony is so unquestionable, you cannot well say, without trying it, "I do not believe it will help me." If you are ill, don't hesitate to get a bottle of Lydia E. Pinkham's Vegetable Compound at once, and write Mrs. Pinkham, Lynn, Mass., for special advice—it is free and always helpful.

## The Bartered Bridegroom.

There are held here many "confidential weddings," as they are called when the ceremony is kept unusually quiet. But sometimes they are too confidential to please the relatives of the parties. The coercion of prospective brides under such circumstances is a proceeding well authenticated in fact and fiction. A kidnaped bridegroom, however, is unusual, though he happened at St. George's not long ago. He was a gentleman of position, and he wished to marry a lady who had nursed him through an illness. There was no cause or just impediment save social rank. The gentleman was determined, and the lady seconded his plans admirably. But the day and the details leaked out, and before the time fixed the bridegroom's male relatives deployed strategically through Mad-

## THINK OF IT!

This Pretty Matron Had Headache and Backache—Her Condition Was Serious.

RELIEF IN PE-RU-NA.

MRS. M. BRICKNER.

99 Eleventh street, Milwaukee, Wis.

Peruna Drug M'fg. Co.,

Dear Sirs:—A short time ago I found my condition very serious. I had headache, pains in the back, and frequent dizzy spells which grew worse every month. I tried two remedies before Peruna, and was discouraged when I took the first dose, but my courage soon returned. In less than two months my health was restored."

—Mrs. M. Brickner.

The reason for so many failures to cure cases similar to the above is the fact that diseases peculiar to the pelvic organs are not commonly recognized as being caused by catarrh.

Catarrh of one organ is exactly the same as catarrh of any other organ. What will relieve catarrh of the head will also relieve catarrh of the pelvic organs. Peruna relieves these cases simply because it relieves catarrh.

**PELVIC DISEASE

### A Story of Ole Bull.

A curious tale of Ole Bull is told in a book on violins and violinists. It seems that in 1831, being then twenty-one years of age, the famous violinist

plans admirably. But the day and the details leaked out, and before the time fixed the bridegroom's male relatives deployed strategically through Maddox street and surrounded the church. He drove up in a hansom cab. With his eyes fixed on the expectant bride, he prepared to alight. An athletic uncle and a brother sprang forward, thrust him back, with a "Glad to meet you, old fellow" manner that deceived the cabman, who obeyed the quick direction he heard and drove the three away. The lady, with tears in her eyes, went into the vestry. "There will be no wedding," she said. "They've run away with him." And that was the last St. George's heard of them.

#### Forests' Unnatural Death.

The life of nearly all forests is cut short by fire or by the hand of the lumberman. When a spruce forest is entirely destroyed by fire young spruces do not at once spring up and cover the burned area. The seed bearing cones have been burned, and the spores and seeds of other plants which are readily carried by the wind find their way in first. The task of preparing for the forest is begun again, but this time it is to be a shorter one. The first year after the fire mosses and often tiny flowering plants appear. These are replaced by the fireweed and other flowers whose seeds are provided with hairs so that they reach such places quickly. These are soon joined by raspberries, roses and other bushes. Among these the young seedlings of aspens appear in a very few years. The latter grow rapidly and in a score of years form a low sunny forest. An aspen forest makes a brilliant contrast with the dark green forests of spruce.—St. Nicholas.

#### Origin of Ascot Races.

When did Ascot races begin? They are mentioned in the first "Racing Calendar," published in 1727, and the usual statement is that they were founded by the Duke of Cumberland, uncle of George III. But an entry in the accounts of the master of the horse in 1712 suggests that they were founded by Queen Anne on Aug. 6, 1711. The truth, no doubt, is that Ascot races, like many other august institutions, gradually developed from a germ, so that it is difficult to say when they really began. At any rate, they were quite the sort of thing that enthusiast of the turf, Queen Anne, would have founded. She was a thorough Stuart in this passion. It was her great-grandfather, James I., who encouraged, if he did not establish, horse racing in Scotland and popularized it in England.—London Chronicle.

#### Keen Sense of Humor.

"There is nothing like a sense of humor," said a naval officer, according to the Philadelphia Bulletin. "In a woman, in a soldier, in a sailor, in a clerk, a sense of humor is a help and a blessing through life. At the same time even a sense of humor may exist in excess. I, for my part, shouldn't care to have so great a sense of humor as a British soldier I once heard about. This soldier was ordered to be flogged. During the flogging he laughed continually. The lash was laid on all the harder, but under the rain of blows the soldier laughed.

"What are you laughing at?" the sergeant finally asked.  
"Why," the soldier chuckled, "I'm the wrong man."

#### A Story of Ole Bull.

A curious tale of Ole Bull is told in a book on violins and violinists. It seems that in 1831, being then twenty-one years of age, the famous violinist wandered to Paris. The cholera was raging and Malibran singing. He went to hear her, and his landlord decamped with his possessions, including his violin. He was speedily reduced to extremity. During the last dinner that he was able to pay for he made the acquaintance of a remarkable man. To this stranger Ole Bull confided his miseries. At the conclusion the stranger said abruptly, "Well, I will do something for you if you have courage and 5 francs." "I have both," said Bull. "Then go to Frascati's tonight at 10 o'clock, pass through the first room, go into the second, where they play, rouge et noir, and when a new tallie begins put your 5 francs on rouge and leave it there." Bull did as directed, and when his 5 francs had become 400 he took them up after an episode with a woman who attempted to take them. Red continued to win, and had he left his money longer he would have won an independent sum. The stranger, who was present as his elbow, was Vidocq, the French detective, already a European celebrity.

## FEMININE FOOT COPIES No. 1.

"ONE OF THE 14"

FOOT

MOULD

CAST

LAST

Dolly Varden Lasts are exact copies of Perfect Feminine Feet.

How did we copy them?

We scoured Europe and North America for Perfect Feminine Feet. Where permitted, we took plaster of Paris moulds, from which gutta percha casts were made. The casts were then carved into wood lasts. Thus we procured exact copies.

How did we classify them and decide on a certain number of basic foot types?

With the assistance of notable orthopedic surgeons we studied with infinite pains the lines and shapes of all the thousands of lasts we had made, and found that in groups the lasts were almost alike, so we determined that they could be divided into a number of classes.

Example: We found what we call the New England class, where the lasts were

all long, slim, low instep, flat arch; the Western North American class, where the shapes were short, wide and thick, medium instep and arch; the Southern class, where the forms were short, slim, high instep, high arch, high heel and so on.

We then made one composite last from the last of each class. These composites we call the Dolly Varden "Feminine Foot Types."

Our agent in your city has a complete stock of Dolly Varden types, and will gladly fit you with the type best suited to the shape of your foot. Purchasers or investigators equally welcome. In the States and Canada at same price—\$3.50 and \$4.00. Every pair Goodyear Welted. (To be continued.)

### GOOD WHEAT CROP IN BRITAIN.

The World's Yield to Be the Largest on Record.

Two of Britain's crops this year have failed. In Ireland so much of the potato harvest has been devastated by blight

# KAI WANG;

## A TALE OF SOUTHERN CHINA.

### CHAPTER XXXVI.

For a brief interval there was a dead silence in that weird place.

Lord Rackett still gripped the ancient lantern, and he raised it so that the light would fall fully upon the party before them.

Eye looked into eye, and the eagerness manifested was but an index to the soul.

No one seemed to breathe; Avis was like a figure turned to stone.

The inmate of the dungeon was ragged and unkempt; his beard had not been trimmed or combed these many weeks, and the absence of light and nourishing food had given him a gaunt, haggard look, decidedly at variance with the natty attire and well-groomed appearance of a gentleman like Dr. Evans.

Larry was lost in doubt and fear—Larry, who had believed it would never be possible to deceive him with regard to this comrade in whose genial company he had spent so many years of his eventful life, and who was dearer to him than a brother.

Not so the wife.

Trust eyes of love to see through the disguise of prison life and neglect. No sooner had she beheld the gaunt figure than she knew him, and that she failed to immediately cry out was due more to her emotion than any lingering doubt.

All these dreadful weeks she had believed herself bereft of this kind and valiant husband, and had almost learned to consider herself what she seemed—Dr. Jack's widow. And now, to suddenly see him in the flesh, this man who was her king, her lover, her all in all; whose equal, in her mind at least, the world had never known—to meet him thus with hardly a word of warning caused a fearful shock.

Dr. Jack was staring at them in deep perplexity. So well had Kai Wang managed their disguise that it was impossible for him to discover their identity.

Had he once turned his attention to that worthy, he might have known him; but something about the smallest figure had caught his attention, and he stood as though riveted to the spot, watching the brightest eyes, watching a pair of almost nerveless arms reaching up toward him, while lips parted, and from between them came a cry, almost a sob of joy:

"Jack! Oh, my husband!"

Then it was that a great light flashed over his soul. There was an awakening that electrified him, body and mind. Heart spoke to heart, amid the glad paeon of rejoicing over the lost that was found.

"Avis, my darling girl! Avis here to rescue her poor Jack!" he exclaimed.

It was an affecting scene when she flew to him and wrapped her loving arms around his neck, while he pressed her to his heart.

Even Lord Rackett had to wink violently to disperse the briny tears that began to gather.

Jack was but a shadow of his former stalwart self. Weeks of rigid prison fare had robbed him of flesh and strength, but the old determination and courage glowed in his eyes and was expressed in his every stroke looking toward escape.

Some men rise above circumstances and environment, and seem at home everywhere.

Dr. Jack possessed this peculiarly enviable quality to the highest degree.

Still, however pleasant, this was not business, and there were serious questions awaiting their attention; questions upon the answer of which hung their destinies, their lives.

It was a grand and glorious thing that they had been thus enabled to find Dr. Jack, and all honor must be given to Kai Wang for the wonderful manner in which he had led them on to success; but the end was not yet in sight.

They were still in the dungeon under the great Imperial palace of Peking, and safely could only be found somewhere beyond the walls of the Forbidden City.

To accomplish this flight without delay was the subject that now engrossed Kai Wang's intelligent attention.

They saw him turn and glide toward the door, and Larry decided that he had suddenly remembered the ponderous key in the lock.

Why he should utter such a shrill scream and dart forward so suddenly, just as a cat pounces on a nimble-footed rat, might have been a mystery to them, only that Larry caught a fleeting glimpse of a mocking yellow face beyond the opening, which was almost immediately shut out as the ponderous door crashed shut.

They saw Kai Wang reach it, and, clutching the clumsy knob, pull with the energy of a madman; pull until the veins stood out upon his yellow brow like blue whipcords, and the sinews in his arms seemed almost ready to snap.

But, alas, the ungenerous door refused to respond to his wooing, and remained fast. Evidently that treacherous key, turned by another hand on the outside, had gotten in its deadly work, and they were trapped.

### CHAPTER XXXVII.

It had been a revelation to Larry to witness this excess of physical energy on the part of the Chinese statesman and friend of the viceroy, Li Hung Chang.

He had usually been so sphinxlike and impassive, even under the most aggravating circumstances, that when he thus cast aside his mask to attack the resisting door with so much zeal, Larry almost felt like throwing aloft the Chinese winter hat which adorned his head, and giving a lusty "huzza."

It was an inspiring sight to him.

Kai Wang was evidently nearer the point of being "rattled" than ever before in his long and eventful career.

Perhaps he had had his nerves shaken by the sight of that sleeping prisoner of the other dungeon, and was hardly himself.

Avis had witnessed this odd break on the part of their guide with no little wonder, mixed with consternation.

She had grown so accustomed to placing unlimited faith in Kai Wang that his sudden and unexpected repulse sent a chill over her system.

Involuntarily a low cry of alarm burst from her lips as the horror of the situation made itself felt. Her nerves had been wrought up to a desperate pitch, and this disaster capped the climax.

Even bold Lord Rackett felt a thrill of actual dismay when he grasped the

might be required for such an undertaking; but the chances of a fall were always present, and even the remote prospect of such a catastrophe was quite enough to awaken a feeling of alarm in the little man's breast.

He had forgotten, however, with whom he had to deal.

The magician had not deserted them. Something came down from above, something that uncoiled like a great snake, and struck at Larry's feet.

"A rope!" he piped, with intense delight permeating his raspy voice.

And a rope it was, sure enough. Where Kai Wang had secured it was a blank mystery to one and all.

He might have discovered it providentially in the apartment above, or, as seemed more probable, have unwound it from his own person, where it had been securely hidden under his flowing robe. At any rate, there it was, apparently as good a hempen rope as the whole province of Chili could boast, and in their eyes the finest in the world.

Dr. Jack clutched it with an exclamation of delight.

It was as though his prayer was answered.

"Larry, do you go up, and then our friend, Lord Rackett. Avis shall try while you hold the line above, in case of accident."

They grasped his meaning, and leaving him in the act of securing the noose about his wife, started to climb the ladder which Jack had rudely cut in the wall.

Larry came near losing his nerve near the top, when his foot slipped, and he could not see an inch beyond his nose; a tumble at this time would have been doubly unfortunate, since Plympton must have shared in the disaster, being just below.

Ere anything serious resulted from the slip, an arm shot down from the blackness above, and a set of long fingers hooked upon the little man's garments just back of his neck.

Pressure being brought to bear from above, Larry was safely landed, and Lord Rackett quickly joined him.

The latter had been shrewd enough to rely to some extent upon the rope, believing Kai Wang must have made it fast above.

Avis gave them less trouble than they had expected, though her husband below did not breathe easy until the Chinese-clad figure had quite vanished from view, and he heard the welcome signal from Larry that all was well.

There remained only himself.

It was high time he was going, for a confusion of noises out in the corridor portended the speedy arrival of a detachment of soldiers, probably aroused by the stunning report of the escaped guard.

Coolly, Jack knotted the lantern to the rope, and sent it aloft.

He needed no assistance in traversing the route he had fashioned with his own hands, since every minute portion of it was as familiar to his touch as his own features.

The clamor was now at the door.

Jack was near the top and proceeding as calmly as though merely passing up to continue his labors above.

A glance upward had assured him that the others knew enough to extinguish the light, having evidently heard the shouts below.

And as he climbed, a voice came stealing down to him from the void aloft, a voice so filled with anxiety and devotion that it thrilled him through and through, even though it only uttered his name:

"Jack! oh, Jack!"

The door of the dungeon was burst open and a heterogeneous mass of men pushed in, who bore flaming flambeaux—men who were armed with nondescript weapons, after the manner of the Chinese Imperial Guard, and who seemed burning with a mad desire for an opportunity to slay, according to the tenets of their religion.

That spectacle, as seen by those above, was one never to be forgotten.

Again Kai Wang lowered his strong arm, so that Dr. Jack might take no

## The World's Yield To Be The Largest on Record.

Two of Britain's crops this year have failed. In Ireland so much of the potato harvest has been devastated by blight that it is feared that the Government will again have to come to the aid of the people, if absolute destitution is not to prevail; and in the hop-producing counties of England the shortage of the crop owing to the blight amounts to 22,750 tons.

Not only has the blight been responsible for the destruction of Ireland's potato harvest, but the recent torrential rain has caused disease to become prevalent throughout the western districts. The other crops have suffered in a similar degree from storms, and the late hay crop is lying almost rotten in the fields.

In North Wales—notably in Anglesey and Carnarvonshire—scores of acres of potatoes have been ruined by blight, and strenuous efforts are being made to check the ravages of the potato disease in Sussex. Blight, however, has been detected in new fields in the other potato-producing counties of the British Isles.

Wheat and barley appear in each division of Great Britain to be over average, while oats are slightly over average in all divisions with the exception of the North of England and the East of Scotland. Mangolds generally promise better than turnips. The hay crop is reported as beneficial in the Eastern, North-Eastern, South-Eastern, and East Midland counties, while the yield in the West Midland and South-Western counties will barely reach an average. In the North and North-Western counties, Wales and Scotland, the crop is distinctly over average.

It is estimated this year that the wheat yield of the world will be the largest on record, and it is expected that at least 360,000,000 quarters will be harvested.

### PROOF.

Wife: "Jack, I believe there are thieves in the house!"

Husband: "Let us go down and show them your new bonnet, dear, and they won't waste any time looking for money here."

"A good medicine requires little advertising. Dr. Thomas' Electric Oil gained the good name it now enjoys, not through elaborate advertising, but on its great merits as a remedy for bodily pains and ailments of the respiratory organs. It has carried its fame with it wherever it has gone, and it is prized at the apothecaries as well as at home. Dose small, effect sure."

"I saw a queer thing the other day," said the story-teller. "It was a duck swimming across a pond and a cat sitting on its tail." "Oh, nonsense," cried the audience, incredulously. "How could a duck swim across a pond and a cat on its tail?" "Nevertheless," said the story-teller, "it's perfectly true. I should explain, however, that the cat was sitting on its tail on a wall."

stalwart self. Weeks of rigid prison fare had robbed him of flesh and strength, but the old determination and courage glowed in his eyes and was expressed in his every stroke looking toward escape.

They could not have crushed that in a score of years. When it left him, life would go also.

How tenderly she passed her hand over his sunken and bearded cheeks, uttering little cries of dismay because he was so thin and showed such marks of acute physical suffering.

But his laugh was almost as hearty as of yore.

"A mere trifle, dearest, and which gives me no concern whatever. Once out of here, I'll soon recuperate. But who are these friends? Surely I should know that figure, despite the dress. It can be no other than Larry, faithful old Larry! God bless him! Give me your hand, my dear boy. How glad I am to see you in flesh Heaven only knows. Many times I have feared that you had perished on that fearful night; and I cursed myself for having led you into such a trap."

By this time Larry had found his voice. He was dancing about the other as though too full of electricity to remain still, clutching Jack's hand in both of his. Avis held the other—and shaking it repeatedly in a manner that came from the heart.

"They couldn't do it, Jack, dear boy! Takes more than a mob of Black Flags to down me, dye know. Yes, we got away with our lives, although, by Jove, I've been laid on the shelf for weeks ever since. And the papers went with us, by Jove. They're safe in the hands of the British Consul at Canton, safe from Petoskey and his crowd. Avis took them here herself."

"And I had the personal pleasure of locking them up," said Plympton, pushing forward.

Dr. Jack stared at him and shook his head.

"I've heard that voice before, but in such toggery I wouldn't know my brother, if I had one."

"And you have no reason to remember that voice with anything but scorn and hatred; but that was all in the past, Evans. I have been trying to wipe out the miserable recollection to the best of my ability. Your wife has forgiven me and placed her confidence in me, and I hope to receive your hand also."

Then Jack knew.

The past unrolled like a scroll.

He remembered how, urged on by a mad passion, this man had endeavored to balk his big game, and even steal his wife, away off to the other side of the world, in Chili. Still, bitter as were the thoughts thus stirred, he realized that Lord Rackett's repentance must be most sincere, else he would never have risked his life in the effort to save his old-time rival.

Besides, there was a bluff heartiness in his speech and manner that went far toward winning the doctor's heart.

"Ah! he has been a friend, indeed," said Avis, softly in his ear.

"The best of good fellows, with whose help I was enabled to save my fair cousin from the Russian's junk at Canton," babled Larry, quite unconscious of any conceit in his words.

This capped the climax with Jack.

"My wife's friends are mine, and I am right glad to shake hands with you, Plympton."

Perhaps he remembered that the last time they came together was after a railroad wreck, when Lord Rackett, finding him wounded, assisted him up the bank and to a place of safety.

Then came Kai Wang, gravely extending his long-nailed fingers, and bending over as though salaaming before a potentate, while his sallow features were convulsed in a broad grin, such as Larry had never before seen upon his countenance.

It was a reception, in fact, and Dr. Jack, ragged and gaunt and unkempt, did the honors with as much éclat as though dressed in a claw-hammer coat and with a diamond in his immaculate shirt-front.

Unvoluntarily a low cry of alarm burst from her lips as the horror of the situation made itself felt. Her nerves had been wrought up to a desperate pitch, and this disaster capped the climax.

Even bold Lord Rackett felt a thrill of actual dismay when he grasped the situation and realized what a fearful condition of affairs had arisen.

It must indeed be a peculiar nature that would not have experienced a sinking sensation after contemplating the disaster.

Here they had come to rescue Evans from durance vile, with the result that they now shared his prison.

Chinese vengeance is not a thing to be lightly defied, and woe to that soul so wretched and unfortunate as to fall beneath the displeasure of native forces, once they gain the upper hand, for no more vindictive or cruel tyranny exists.

Strange as it might appear, the one who would be expected least to grapple with the new and overwhelming problem that had so suddenly arisen was the first to gain the mastery over alarming fears.

Perhaps that cry from Avis pierced his loving heart, and stirred into action the sluggish life currents that had lain dormant so long.

At last Dr. Jack was himself again, a man born to command, whom no difficulties could daunt; fertile in resources, bold in their successful application.

These weeks of privation in the palace dungeon, laboring under an uncertainty as to his fate, had evidently not quelled this wonderful spirit in the least.

"It is bad enough," he said; "but it might be worse."

Larry breathed easier.

He had an inspiration that already Dr. Jack was in a fair way to grasp the situation. When circumstances were not to his liking, he had a way of controlling them, just as Benjamin Franklin harnessed the lightning, or Morse adapted electricity to mercantile needs.

There was so much of calm confidence in his manner that Larry's sinking spirits were instantly buoyed up.

He waited eagerly to hear more.

Kai Wang, once more cold and impassive outwardly, however the fires of human passion raged within, at once approached Dr. Jack.

He was perhaps the only one who intuitively guessed what the latter meant by his confident remark that the case was not so bad as it might appear.

"You made hole up yonder, excellent comrade. When will it be done, so we, too, may take our departure from this ill-conditioned place?" he asked, in his pleasant Chinese fashion.

"I am happy to say it is already completed, and I meant to use it this night, but was deterred from doing so by the unusual tramping of many feet in the apartments above."

Again Larry felt a mad desire to leap up and crack his heels together with sheer joy.

How the clouds were dispersed when a genius took charge of affairs.

No doubt the little man had an exalted idea of Jack's powers, since he looked upon the doctor as a wizard, whose touch could transform baser metals into gold, and accomplish miracles; but experience had led him to lean upon such a companion in time of trouble with full confidence as to the result.

Then the prisoner of the dungeon set to work to show what he had accomplished in the time of his incarceration.

The magnitude of his work astonished them all, and Kai Wang, seizing hold of the interstices in the wall, ran aloft with the agility of a native juggler.

He vanished from their eyes above.

Jack, meanwhile, seemed to be wrestling with some knotty problem, and from the serious manner in which his eyes rested upon his devoted wife, it was evident that Avis must be the main cause of his concern.

The fact struck Larry suddenly, and he felt actually weak under it. How were they to get Avis out of the dungeon? Possibly she might climb as well as the best of them, for he had known her to possess more nerve than

burning with a mad desire for an opportunity to slay, according to the tenets of their religion.

That spectacle, as seen by those above, was one never to be forgotten.

Again Kai Wang lowered his strong arm, so that Dr. Jack might take no chances.

Meanwhile, those below were running around the dungeon, peering into every corner, overturning the humble pallet, even smashing the crockery water-bowls, as though in fear lest the objects of their search should have taken refuge therein.

Men who make diabolical noises to scare away the unseen demons of the air, and who burn mock paper money by tons in order to conciliate the Fung Shuy, or spirits of the dead, would not be apt to prove themselves above such a belief.

From their cries of chagrin, however, it became evident that they had met with a grievous disappointment in finding the place devoid of human occupancy.

As luck would have it, some smart Aleck chanced to discover the ladder cut in the wall, and, raising his eyes, was just in time to see a pair of human legs dangling in the air, as Dr. Jack made his hurried exit.

His discovery was quickly communicated to his fellows, and then ensued a council of war.

Truth to tell, none of these braye warriors had a very determined itching to climb up that odd ladder, fearful lest the resourceful American might be lying in wait at the top ready to lap them on the head as fast as they came within reach of his arm.

Perhaps this lull in matters offensive might be of considerable importance to the fugitives, since a minute of time is often worth a fortune in cash.

(To be continued.)

## FROM ERIN'S GREEN ISLE

### NEWS BY MAIL FROM IRELAND'S SHORES.

#### Happenings in the Emerald Isle of Interest to Irish-Canadians.

Six young men went out for a sail on the River Shannon, near Limerick, on Sunday, the 15th ult. When three miles west of the city the boat was struck by a squall and capsized, with the result that five of the occupants were drowned.

The cemetery adjoining St. Patrick's Memorial church, Dublin, has been much beautified by a magnificent cross of Celtic design, erected by the family of the late Mr. Hugh Crickard, Downpatrick.

In the removal by death of the Rev. Thomas Cromie, of Bessbrook, the Irish Presbyterian church loses one of its oldest and ablest men in the ministerial rank. A year ago he resigned from the active work of the ministry after fifty years' faithful service.

Replying to a deputation from the Irish Forestry Society, headed by Lord Castletown, the Chief Secretary for Ireland said that Ireland suffered more from want of trees than any other country he was familiar with. There seemed to be good reason for something being done with regard to forests in Ireland, and he thought the Government would agree to some scheme. What was wanted, however was positive, definite and scientific information on the subject.

In a case before the King's Bench in Dublin, it was declared that it had been found impossible to serve writs on five tenants for non-payment of rent, and the process-server gave a vivid account of his experiences in the attempt. He was, he said, unable to serve the tenants personally, owing to the presence of a number of people who appeared to be hostile, and who followed and threat-

ened him with violence. When he came near the house of one of them about 300 men gathered on the hills adjoining. They began to beat drums and blow horns when he came in sight, and about twenty of them ran to meet him, and shouted that they would catch him and take his writs from him. He was at the time riding a good horse and galloped quickly away at about 15 miles an hour, the mob following him for the distance of about two miles and a half. He believed he would have lost his life but for that fact.

Mrs. Ellen McIverney has died near Tuilla, County Clare, at the age of 112 years.

A memorial statute to the late Marquis of Dufferin was unveiled at Belfast by the Marquis of Londonderry. The figures on either side of the pedestal represent India and Canada.

In the Nisi Prius Court, Dublin, an action was heard in which Miss Matilda McKinley sought to recover £300 damages from John Porterfield, farmer, of Croghan, Lifford. Plaintiff alleged that defendant assaulted and beat her, and violently attempted to kiss her. Defendant denied the charges. The alleged assault took place in a grocery establishment at Strabane, Porterfield, it is stated, walked into the shop and told plaintiff that he would kiss her. The jury found a verdict for the plaintiff, with £125 damages. A stay of execution was granted on the lodgment of £80.

Negotiations are proceeding between the tenants of the Marquis of Ely's Fermanagh estate and the landlord's agents for the purchase of their holdings. It is stated that about seven hundred tenants are willing to pay 23½ years' purchase, but it appears a hitch has occurred regarding the sporting rights which the tenants refuse to concede to the Marquis of Ely.

#### SUFFERING WOMEN.

#### Need Just the Rich, Red Blood Dr. Williams' Pink Pills Actually Make.

From girlhood to middle life the health and happiness of every woman depends upon her blood. If her blood is poor and watery she becomes weak, languid, pale and nervous. If her blood supply is irregular she suffers from headaches and backaches, and other unspeakable distress which only women know. At every stage of woman's life Dr. Williams' Pink Pills are her best friend, because they actually make the rich, red blood which gives help and strength and tone to every organ of the body. They help a woman just when nature makes the greatest demand upon her blood supply. Mrs. H. Gagnon, who for twenty years has been one of the best known residents of St. Rochs, Que., says: "Dr. Williams' Pink Pills have been a blessing to me. I was weak, worn out and scarcely able to drag myself about. I suffered from headaches and dizziness, my appetite was poor, and to attempt housework left me utterly worn out. I slept badly at night, and what sleep I got did not refresh me. For nearly three years I was in this condition, and was constantly taking medicine, but found no benefit from it. One of my neighbors, who had used Dr. Williams' Pink Pills with much benefit, advised me to try them. I did so, and the whole story is told in the words 'I am well again.' There are times yet when I take the pills for they seem to me a guarantee against the troubles from which so many women suffer."

Dr. Williams' Pink Pills don't act on the bowels. They contain just the elements that actually make new blood, and strengthen the nerves. That's why they cure anaemia, indigestion, neuralgia, rheumatism, lumbago, headaches, backaches and heart palpitation, and skin diseases like pimples and eczema. That is why they are the greatest help in the world for growing girls who need new blood and for women who are troubled with irregular health. Sold by all medicine dealers or by mail from The Dr. Williams' Medicine Co.

#### A SPLENDID TRIP.

The best way to begin a trip to the Old World is to take the White Star Line steamers from New York or Boston to the Mediterranean ports. For those who enjoy a sea voyage, this trip cannot be equalled in interest and variety and in the quality of the accommodation afforded by the magnificent boats of this line. The inexpensiveness of the trip when the above points are considered is not the least interesting feature to be considered in planning a European trip. The sum of six dollars a day will pay for every item on a fifteen day trip in the best first-cabin accommodations. The meals provided are the equal of those to be had in the finest hotels in the world, and the service in every particular is absolutely beyond criticism. There are a thousand and one little kindnesses for the passengers' comfort. A fine orchestra is on every steamer, and everything is done to cater to the best class of passenger trade. The steamers themselves are all large, comfortable boats, with unusual deck room for promenading and exercise, and are particularly well ventilated, and therefore suited to the warmer southern voyages.

Passengers are afforded an opportunity of spending a day at the Azores, at Gibraltar, and at Palermo, and Naples, where they may disembark or continue on to Genoa. Even in the heated months this trip is most enjoyable. The weather is particularly pleasant and the sea always smooth in July and August, and no better way can be found of spending a month's vacation than just the trip over and back in one of these floating palaces. In the winter there is no way the equal of this for reaching the heart of Europe or getting to Egypt or the Far East.

#### HIS POSITION IN THE MATTER.

"Gracious!" exclaimed the fond wife, coming in her husband's den and finding him smoking his pipe and reading. "This room is thick with smoke. I don't see how you can stand to sit in here." "You can't?" responded the brutal husband. "Well, I don't stand to sit in here; I sit to sit in here. Did you think you had married a freak?"

It is said that this was the first time in their married life that she slammed a door on leaving him.

No person should go from home without a bottle of Dr. J. D. Kellogg's Dysentery Cordial in their possession, as change of water, cooking, climate, etc., frequently brings on summer complaint and there is nothing like being ready with a sure remedy at hand, which oftentimes saves great suffering and frequently valuable lives. This Cordial has gained for itself a widespread reputation for affording prompt relief from all summer complaints.

If your children are troubled with worms, give them Mother Graves' Worm Exterminator; safe, sure and effective. Try it, and mark the improvement in your child.

"Tommy," said a father to his son, "have you been at those six peaches I put in the cupboard?" Father, said Tommy, looking into his eyes, "I have not touched one." "Then how is it your mother found five peach stones in your bedroom, and there is only one left on the plate?" "That," said Tommy, as he dashed wildly for the door, "is the one I didn't touch."

#### THEY MEAN IT.

No one should suffer a moment longer with Piles, for Dr. Leonhardt's Hem-Roid will cure any case.

No matter what kind you have, Blind, Bleeding, Internal, External, Itching or Suppurating, Dr. Leonhardt's Hem-Roid will cure you.

This statement is supported by a thousand testimonials from those who have been permanently cured.

If you are not cured you get your money back. \$1.00. All dealers, or The Wilson-Fyle Co., Limited, Niagara Falls, Ont.

## AN INGENIOUS TRICK.

**Clever Woman Swindler With a Taste for Diamonds Secures Some.**

A story of an amazingly audacious swindle comes from Madrid, Spain. The heroine is a handsome, elegantly-dressed woman, who, the other day, visited a specialist in mental diseases on behalf of her husband, who, she said, was a sufferer from religious mania. Having explained the case it was arranged that she should return in about an hour with the afflicted husband. The next scene of action was a jeweller's shop in another part of the city, where she selected diamonds to the value of \$5,000 on the understanding that she would buy them if her husband approved. Would someone accompany her home in a cab, and the money would be paid immediately?

A trusted clerk was sent, and with him the lady drove back to the doctor's home. In an ante-room she took the stones "just to show them to her husband," then, entering with sublime assurance the doctor's study, she informed the specialist that her husband was now in the ante-room and ready to be examined. Leaving a visiting card, the lady took her departure, and the doctor, bidding the supposed patient enter, proceeded at his leisure to ask professional questions.

The jeweller's man was puzzled at first, but soon he realized that he had been made the victim of a clever fraud. The doctor, however, interpreted his agitation as caused by his complaint, and when after two hours matters were finally explained the lady impostor had vanished with her spoils without leaving any trace.

## CARELESS CORRESPONDENTS.

**Valuable Packets Go Through British P. O. Without Addresses.**

Some remarkable facts in connection with the carelessness of the public in the despatch of letters are disclosed in the fifty-second annual report of the British Postmaster-General of the post-office for the year ended March 31.

The number of undelivered packets handled during the year was 27,099,174. The number of registered letters and letters containing property sent through the post with insufficient addresses was 320,041. These letters contained £16,887 in cash and notes, and £656,845 in bills, cheques, money orders, etc., and stamps. The number of letters with valuable contents posted with no address at all was 4,599. The contents including £2,000 in cash and bank notes, £9,766 in various forms of remittance. One unaddressed letter contained cheques to the value of £2,500.

The number of insufficiently-addressed letters with valuable contents shows an increase of 4,000 on the previous year, and the value of the property thus entrusted to the mercy of the post-office by a careless public has increased by no less than £33,000.

## We like best to call SCOTT'S EMULSION

a food because it stands so emphatically for perfect nutrition. And yet in the matter of restoring appetite, of giving new strength to the tissues, especially to the nerves, its action is that of a medicine.

"Do you know," remarked the mother of the new baby, thoughtfully, "I believe he has his father's hair." "I wouldn't be surprised," replied the candid friend; "his father certainly hasn't got it now."

**Sunlight Soap is better than other soaps, but is best when used in the Sunlight way. Buy Sunlight Soap and follow directions.**

"Yes, marriage is indeed a lottery," remarked Mr. Brown. "One gets a prize, another gets a blank." "Very true, dear," remarked Mrs. Brown; "you got me and I got you."

Ill fitting boots and shoes cause corns. Holloway's Corn Cure is the article to use. Get a bottle at once and cure your corns.

He (who has just become engaged to his typewriter): "And now that we are engaged, dear, I suppose I must look out for another typewriter?" She: "Oh, don't let that worry you, darling. I'll select her for you myself."

**Regain Your Strength by taking 'Ferrovin.'** It's the best tonic ever compounded. It nourishes and strengthens the whole system.

"My wife was rather worried when I left her this morning." "What was the matter?" "Well, she had been worrying about something or other yesterday evening, and this morning she couldn't remember what it was."

A Recognized Regulator.—To bring the digestive organs into symmetrical working is the aim of physicians when they find a patient suffering from stomachic irregularities, and for this purpose they can prescribe nothing better than Parmelee's Vegetable Pills, which will be found a pleasant medicine of surprising virtue in bringing the refractory organs into subjection and restoring them to normal action, in which condition only can they perform their duties properly.

## MUCH APPENDICITIS.

**Increase is Attributed in Part to Bore-acid Acid.**

Since the year 1891 the number of deaths from appendicitis in the London Hospital has steadily increased. In the former year there were two deaths, in 1894 twelve, in 1897 seventeen, in 1899 twenty-seven, in 1902 thirty-nine, in 1903 forty-nine, in 1904 sixty-three, and last year fifty-six.

In the course of the report on the subject Dr. D. L. Thomas, medical officer of health of Stepney, London, enlarges upon the detrimental effect of boric acid, which is extensively added to food. This, he says, may predispose to appendicitis from invasion of the testinal wall by the bacillus coli communis. The evil effects of drastic purgatives are also referred to.

## CROSS-QUESTIONS.

Reggie: "Supposing now, Miss Hawkins, that you were a man and I was a girl, would you try to kiss me?"

Miss Hawkins: "I don't know, I'm sure. What would you do?"

## TOO BAD.

"Is it really true that Mr. Roxley's dead?" asked the young doctor's wife. "Yes," he said.

"Oh, isn't it awful?" "It is so. I thought he'd be good for at least a dozen more visits."

Binks: "Oh, yes, she carries herself like an empress, and orders me about all she likes now; but wait until we are married, and then see how she'll cringe." Winks: "To you?" Binks: "No; to the servant."

No 305—Winston Type, 6 Volts, 70 A.H.

Long Distance Telephone Main 5072.

## NOT HIS STYLE.

"Did you ever indulge in piscatorial excursions, Mr. Oldbody?"

"No, I don't take to them new fashioned sports. A fishing party is good enough for me."

"You say, Mr. Timmid," said the girl, in a low, thoughtful, this-is-a-serious-matter sort of tone, "that you have loved me for five years, and have never dared to tell me so until to-night?" "Yes," he replied. "Well, I cannot be your wife. A man who has no more courage than that would feign to be asleep while a burglar stole his baby's shoes."

Mother (horrified): "Oh, Bobby, what will your father say when he sees that you have smashed his shaving mug and broken the front gate?" Bobby: "Well, mamma, I don't think I would like to repeat it before you."

Put out the fire in a hot, itching, unhealthy skin with Vewer's Cerate. Use it for eczema, nettle rash, tetter and salt rheum.

Orator: "On the surface things are often right, but it is when we explore the depths of things that we see the deceptions of our fellow-creatures." One of the Crowd: "Guv'nor, you've just been buyin' a barrel of apples, haven't you?"

Good Digestion Should Wait on Appetite.—To have the stomach well is to have the nervous system well. Very delicate are the digestive organs. In some so sensitive are they that atmospheric changes affect them. When they become disarranged no better regulator is procurable than Parmelee's Vegetable Pills. They will assist the digestion so that the hearty eater will suffer no inconvenience and will derive all the benefits of his food.

First Young Doctor (to second ditto): "Hallo, old man, what's the matter? You're looking very glum." "No wonder," was the reply. "I'm attending that wealthy Mr. Golding, you know, and I've sent him the wrong medicine." "Indeed! Is it a serious blunder?" "Very serious. The medicine I've sent him will cure him in two days."

## For Family Colds

A reliable cough and cold cure should be always in the house ready for use the moment the first symptoms appear.

It is always easier, cheaper and better to check a cold in the very beginning.

It is safer, too. Shiloh's Consumption Cure, the Lung Tonic, has been tested for thirty-three years, and tens of thousands of homes in Canada and the United States to-day are never without it.

A dealer writes: "Shiloh's Consumption Cure is without doubt the best remedy for Coughs and Colds on the market. Once used, my customers will buy no other."—L. Elnery, Nainburg, Ont.

If it were anything but the best would this be so? Try it in your own family. If it does not cure, you get back all it cost you. We take all the chances. Neither you nor your dealer can lose. Isn't that fair? 25c. is the price. All dealers in medicine sell.

**SHILOH**

## HIS LITTLE JOKE.

On a Western railroad there is a brakeman who has lost the forefinger of his right hand. The wonderful works of nature along the road keep the brakeman busy, answering the passengers' questions.

One day, after the brakeman had been pointing out the window and explaining the scenery, one of the passengers whispered to the conductor, "Conductor, can you tell me how that brakeman lost his finger? He seems to be a very nice fellow. It seems a pity he should be crippled."

"That's just it, ma'am. He is a good fellow. He is so obliging that he just wore his finger off pointing out the scenery along the line."

**TWENTY THOUSAND ACRES IMPROVED** and unimproved lands, in the Peubold fall wheat district; from eight to twenty dollars per acre; correspondence solicited. A. J. STRONG, Peubold, Alberta.

**FOR SALE**—Muskegon district, Stevenson, 200 acres, lots 21, 22; good soil, 95 cleared, balance bush; half mile from school, church, P.O., Utterson station, 4 miles; Huntville, 8; good water, buildings fair. James Inob, Allansville, Ont.

## Fruit Growers, Attention

Having no commission to pay, and selling for cash, The Eastern Townships Nurseries are thus able to offer you Standard Apple Trees 4 to 6 feet high, grown here, hardy and thrifty stock for Fall and Spring delivery, for \$14.00 per hundred. LOUIS GERVAS, Prop., Laurencville, Que.

**\$25.00 MEN AND WOMEN** wanted at once to address letters and postcards only at their own homes; no canvassing; send fifty cents (no stamps) and stamped addressed envelope to-day for full instructions, and begin work at once at above salary. Address E. Van Allan, 50 Russell St., Toronto, Canada.

**DRUG BUSINESS FOR SALE**—CENTRAL—good location; prosperous condition. Apply N. W. Emerson, London, Ont. Good reasons for selling.

**WANTED—RELIABLE PARTIES** to do machine knitting for us at home; \$7 to \$10 per week easily earned; wool, etc., furnished free; distance no hindrance. For full particulars address the Dominion Knitting Co., Dept. M., Orillia, Ont.

Special bargains on the new G.T.P. Ry. in the greatest wheat country in the world.

**WAUGH & BEATTIE,**  
12 Merchants Bank Building,  
Winnipeg, Man.

# CZAR'S SERVANTS IN PLOT

## Bombs Conveyed Into the Palace at Peterhoff.

The St. Petersburg correspondent of the London Express says that half a dozen employees of the Imperial household were involved in a plot to kill the Czar, including two former servants of the ex-Czarina and an officer of the late Gen. Treppoff's staff. Gen. Treppoff's precautions at the palace baffled the repeated attempts of the Terrorists until six weeks ago, when they gained over a servant. Rapid progress was made when the precautions were relaxed after the Czar's departure, and bombs were conveyed to the palace, ready for use after his Majesty returned by the officer above referred to, who has since committed suicide. He was an unpopular member of the household, and fearing dismissal after Gen. Treppoff's death he accepted a large bribe from the Terrorists. The latter ordered their agents to carry out the execution of the Czar and Ministers at Gen. Treppoff's funeral. Those who have been arrested doubtless will be summarily executed after a secret trial by court-martial.

### SHOT WRONG GENERAL.

A despatch from Warsaw says: Gen. Nicolaieff, of the artillery, was assassinated here on Wednesday. He was walking on Wielka Street when he was surrounded by five revolutionists and shot dead. The murderers escaped. Gen. Nicolaieff was erroneously thought to be a member of the field court-martial.

### THE ONLY REMEDY.

A despatch from Paris says: The Temps publishes an interview with Count Tolstoi, who said that the real cause of the trouble in Russia was the absence of authority, but that of the Government, supported by armed force, and of free obedience of the citizens to the law. The only remedy was a moral union. He scoffed at the attempts of the revolutionary politicians, saying: "Let us have no foreign constitutions. What suits England, where only 10 per cent. of the population are peasants, will not suit Russia, where the peasants number 90 per cent. of the entire population. Let us cut out revolution to our own measurements and leave the chatterboxes of the Duma to discuss learnedly constitutions made in England, France, and Germany."

### TERRORIST MANIFESTO.

A despatch from St. Petersburg says: A violent Terrorist manifesto has been issued, decreeing the removal of the Czar and all the cowardly numerous autocracy. It declares that these are the enemies of the people and must be mercilessly annihilated. The manifesto was called forth by the execution of

Zenaide Konopliankova, the girl who assassinated Gen. Mien.

The manifesto follows:

"The die has been cast. One thing remains—annihilate mercilessly all enemies of the people. There must be life for life, death for death, cent for cent. With the illuminating memory of Konopliankovo to guide them, all true Russians must strike terror to the hearts of the executioners."

### TERRORIST EXECUTED.

A despatch from Odessa says: The first field court-martial was held here on Thursday, and a terrorist Jew named Tarle was sentenced to death and executed for the killing of a policeman. The court consisted of six officers of the army, whose names are kept secret. Tarle was in a pitiful condition when brought before the court from loss of blood from five wounds received before he was arrested. After being sentenced he was carried to the prison yard and tied to a post. His last words were curses and expressions of contempt for his captors. "You assassins," he cried, "you believe that with your organized attacks and field courts you can shoot down the whole of 'Young Russia.' But be assured that there are bombs and revolvers enough to deliver this unfortunate country from your blood-stained hands. Now fire." Three volleys were fired and Tarle fell dead.

### NUMEROUS ARRESTS.

A despatch from St. Petersburg says: Arrests in connection with the plot against the Czar continue. The number of persons imprisoned is large, and others are being sought. The Bourse Gazette says that searchlights have been installed at Peterhoff, and are being used seaward and landward after dark to prevent surprises.

The suburb of St. Petersburg adjoining the Narva gate was shaken on Friday by the explosion of a powerful bomb, which was thrown by one of three well dressed men, and which tore an enormous hole in the ground and broke all the windows in the vicinity. There was no loss of life. The bomb throwers disappeared before the arrival of the police. As the bomb was thrown in an open space from which the throwers had previously warned away all passers by and cab drivers, the event is explainable only on the supposition that the bomb had been intended for use in connection with the Terrorist plot which was discovered at Peterhoff at the time of Gen. Treppoff's funeral, and that the conspirators, finding that the police were hot upon their trail, decided to be rid of incriminating evidence.

promote the general health, to increase the deposits of fat in the skin tissues of the face, will help to obliterate lines and wrinkles, and restore firmness and beauty to the skin.

### TREATMENT OF VARICOSE VEINS.

People suffering from them should avoid much standing, should rest the legs frequently by lying down, and, when sitting, should, if possible, raise the feet; but moderate walking exercise should not be given up, as the muscular action of the leg in walking is useful in preventing the tendency to enlarged veins. When the veins are

# LEADING MARKETS

## BREADSTUFFS.

Toronto, Sept. 25.—Flour—Ontario—Firm, \$2.75 asked for 90 per cent. patents, in buyers' bags, outside, for export. Manitoba—First patents \$4.40, second patents \$3.90, and bakers' \$3.80. Millfeed—Bran—Firm, \$14 to \$14.50, and shorts \$18 to \$18.50, in bulk, outside.

Wheat—Ontario—No. 2 white offered at 72½¢ outside, 71½¢ bid, red 72½¢ asked outside, mixed 72c asked outside.

Wheat—Manitoba—No. 1 northern 78½¢ asked at lake ports.

Barley—No. 2, 48c bid outside, No. 3 extra 48c asked, 47c bid, No. 3 44½¢ asked, 44c bid.

Oats—No. 2 white 32½¢ bid east, mixed 31½¢ bid, east.

Rye—62c bid outside.

Buckwheat—47c bid outside.

## COUNTRY PRODUCE.

Butter—Quotations are unchanged. Creamery . . . . . 23c to 25c do solids . . . . . 22c to 23c dairy prints . . . . . 21c to 22c do pails . . . . . 18c to 20c do tubs . . . . . 18c to 20c Inferior . . . . . 17c to 18c Cheese—13½¢ for large and 14c for twins.

Eggs—18c to 18½¢ per dozen. Potatoes—Prices are steady at 50c to 60c per bushel and 80c to 90c per bag.

Baled Hay—Prices are unchanged at \$9.50 to \$10 for No. 1 timothy and \$8 for No. 2, in car lots here.

Baled Straw—\$6 per ton for car lots on track here.

## MONTREAL MARKETS.

Montreal, Sept. 25.—Business was quiet on the local grain market this morning. The oat market continues with quotations unchanged. New crop No. 2 oats were offered on the local market this morning at 38c.

Oats—No. 2 white, 38½¢ to 39c; No. 3 white, 37½¢ to 38c; No. 4, 36½¢ to 37c per bushel, ex-store.

Flour—Manitoba spring wheat, \$4.60 to \$4.70; strong bakers', \$3.90 to \$4.20; winter wheat patents, \$4.25 to \$4.35; straight rollers, \$3.90 to \$4.10; do., in bags, \$1.75 to \$1.85; extras, \$1.60 to \$1.70.

Millfeed—Manitoba bran in bags, \$18.50; shorts, \$23; Ontario bran in bags, \$18.50 to \$19; shorts, \$21.50 to \$22; milled mouille, \$21 to \$25; straight grain mouille \$28 to \$29 per ton.

Rolled Oats—Per bag, \$1.90 to \$1.95. Hay—No. 1, \$11 to \$11.50; No. 2, \$10.50 to \$11; clover mixed, \$9.50 to \$10; pure clover, \$7.50 per ton in car lots.

Provisions—Barrels short cut mess, \$22 to \$24; half-barrels, \$11.75 to \$12.50; clear fat back, \$23.50; long cut heavy mess, \$20.50; half-barrels do., \$10.75; dry salt long clear bacon, 12½¢ to 12¾¢; barrels plate beef, \$12 to \$13; half-barrels do., \$6.50 to \$7; barrels heavy mess beef, \$11; half-barrels do., \$6, compound lard 8c to 9½¢; pure lard, 11½¢ to 12c; kettle rendered, 12½¢ to 13c; hams, 14½¢ to 16c, according to size; breakfast bacon, 15½¢ to 16½¢; Windsor bacon, 16½¢; fresh killed abattoir dressed hogs, \$9.75; alive, \$6.75 to \$6.90 per 100 pounds.

Eggs—Selects are firm at 22½¢. No. 1 candled at 18c, straight receipts 18c to 19c. Quality shows no improvement.

## BUFFALO MARKET.

Buffalo, Sept. 25.—Flour—Strong. Wheat—Spring, offerings light; Winter firm; No. 2 white, 76½¢. Corn—Fairly active and firm; No. 2 yellow, 53½¢; No. 2 corn, 52 to 52½¢. Oats—Strong; No. 2 white, 37½¢; No. 2 mixed, 36c. Barley—Strong at 46 to 56c c.i.f. Rye—Firm; No. 1, 63c. Canal freights—Steady.

## NEW YORK WHEAT MARKET.

New York, Sept. 25.—Wheat—Spot

## ALMONTE'S DISASTROUS FIRE.

The Principal Business Places Were Destroyed.

A despatch from Almonte says: The worst fire in Almonte's history broke out on Friday morning on the lower end of Mill Street, the main business street of the town. The fire started about 3.30 a.m., and was under control by 5.30. There was no loss of life, but some miraculous escapes on the part of Mr. Scott and wife and some of the firemen from falling walls, are recorded. The total loss with insurance is estimated at about \$125,000. The principal losers are as follows: Belton & Co., general store, tenant of J. H. Wylie, stock total loss, insurance \$25,000, building almost totally destroyed; W. West, general store, tenant of Geo. Paterson, stock and building totally destroyed, insurance on stock \$15,000; M. R. McFarlane, druggist, tenant of Elizabeth Paterson, stock and building total loss; the Misses Cairns, fancy goods, tenants of L. W. Shipman, building and stock total loss, insurance on stock, \$1,500; Miss Clement, milliner, tenant of J. H. Wylie, stock total loss; W. E. Scott, furniture and undertaking business, tenant of L. W. Shipman, stock and building totally destroyed, insurance on stock, \$3,800; Fulton Timmins, gents' furnishings, tenant of T. R. White, stock and store totally destroyed; insurance on stock \$5,000, no insurance on building; H. H. Cole, general store, building and stock totally destroyed, insurance on stock \$6,000; besides the stores, all the warehouses and outbuildings were burned, together with four frame houses on Farm Street. The household property in these was all saved, but buildings were totally destroyed. These were owned by Mr. T. R. White, and were not insured.

## FATAL COLLISION NEAR NAPANEE.

Eastbound G. T. R. Express Runs Into Freight Train.

A despatch from Napanee says: Devotion to duty on the part of Engineer Frank Blaine, which cost him his life, in all probability saved the lives of many passengers on the Montreal express, No. 2, which left the Toronto Union Station about 10.45 on Thursday night. The fast express collided head-on with a freight train about a mile west at this town on Friday morning. The passengers agree that had not the engineer of the express stayed at his post and applied the air brakes, at the sacrifice of his own life, the Waukegan and Azilda disasters would most likely have been repeated on the main line of the Grand Trunk Railway. Poor Blaine's hand was severed from his crushed and mangled body, and was found on the brake lever when the wrecking crew drew the powerful engines apart from their deadly embrace.

Although the passenger engine's tender mounted the baggage car and the baggage car telescoped the first day coach, with the exception of the engineer's death, the casualties were not serious. Fireman Edward Miron, of Belleville, who was on the passenger engine and jumped in time to save his life, had his knee-joint and back badly wrenched. Engineer Charles Orrill and Fireman David Young, both of Belleville, and both on the freight engine, were also painfully bruised in the legs and arms by jumping from their engine. Brakesman James Miller, of Montreal, was thrown through a car door when the crash came. His hand was badly cut.

## OPPORTUNITY FOR CANADA.

Asked to Participate in Novel Travel Exhibition in London.

A despatch from Ottawa says: The Government has been invited to participate in what will be known as a travel exhibition, to be held in Horticultural Hall London, Eng. opening

# HEALTH

The normal child is a slumberous animal by nature's design. If he does not sleep soundly the whole night through for eight to ten hours, he is not well and should be examined to determine the cause.

A wakeful and night-crying baby is, nine times out of ten, a badly fed baby.

keep soundly the whole night through for eight to ten hours, he is not well and should be examined to determine the cause.

A wakeful and night-crying baby is, nine times out of ten, a badly fed baby. His wakefulness and his crying are the calls for relief of a poorly digesting stomach and bowels. The food is given too often or in too great quantity, or it is of poor quality; and this may be the case when the baby is nourished in the natural way as well as when it is fed from a bottle.

In older children disturbed rest may be due to a variety of causes. Insomnia is very rare in children, but starting in the sleep, screaming, and crying with terror are not uncommon. A child who suffers from these night-terrors is not well.

It is sometimes very difficult to determine the cause, but there always is a cause, and it should be patiently hunted for until found. The search should not be limited to the child, for the fault may be that the bedclothes are too heavy, or not warm enough, or the room may be "stuffy," or sometimes it is simply too dark. The child wakes for a second, while turning over, perhaps, and finding himself surrounded by Egyptian darkness, is filled with terror and shrieks.

Indigestion may be a cause of disturbed sleep in the child as well as in the adult, and it should be remembered that this indigestion may reside in the intestine, while the stomach performs its functions with faithfulness and regularity.

One of the first signs of disease of the spine, the hip, or some other joint, is a night cry, and the possibility of some beginning trouble in the back or hip should be borne in mind.

The presence of "adenoids" interfering with a proper supply of air to the lungs may be a disturber of sleep, and it may be latent ear-disease, the night-cry of a decayed tooth, or even stone in the bladder.

Sometimes night-terrors are a purely nervous affection like epilepsy, and sometimes they persist like a bad habit. After the existing cause has been removed or has disappeared of itself, the child who cries out in the night should not be shaken and scolded, for if the cause is nervous, this will only make the trouble worse and if there is a physical cause for the trouble it should be sought for and remedied.

#### NECESSITY OF REST.

Why are so many girls of to-day aged and sallow, with disfiguring little lines about the eyes and mouth, and tired, discontented-looking faces, because they do not know how to rest, and they tax their powers of endurance to a breaking point. Girls and women who lead busy lives all the year round should make up their minds to rest for the first part of their holiday. Lie on the beach or in a hammock in the open air, and leave your reading and sewing for a few days. Judicious resting is often more beneficial than any medicine.

#### CARE OF THE SKIN.

Cleanliness is the greatest essential in the care of the skin. For the cleansing bath, water as hot as can be borne is best, and a good soap should be freely applied with a moderately stiff rubber. If the water is at all hard it is well to soften it by the addition of a little ammonia or borax. A quick sparging of the entire body with cold water should follow, in order to cause the pores, relaxed by the heat to contract; and the drying should be accomplished by brisk rubbing with a coarse towel.

#### PREMATURE WRINKLES.

These are more often caused by illness, care, or anxiety than by the contraction due to various expressions, and a general these wrinkles can be made to disappear, when the anxieties are expelled and health restored, by careful attention to diet, cleanliness and outdoor exercise. Whatever tends to

and, barley—strong at 46 to 56c c.i.f. Rye—Firm; No. 1, 63c. Canal freights—Steady.

NEW YORK WHEAT MARKET.

New York, Sept. 25.—Wheat—Spot firm; No. 2 red, 78c in elevator and 79½c f.o.b. afloat; No. 1 northern, Duluth, 84½c f.o.b. afloat; No. 1 hard winter, 81½c f.o.b. afloat.

#### INFLAMMATION OF THE EYES.

Wash some parsley well chop it, and with it fill two small bags made of soft muslin, each about the size of a crown piece, or rather larger, and saw them up. Have a soup-plate of cold water at hand. Lay the bags, after moistening in water, upon each eye the sufferer must be lying down. When the bag grows warm, soak it for a few minutes in the water, and apply again.

#### TEN MILLION IN GOLD.

Steamship Carmania Brings Big Consignment of Precious Metal.

A despatch from New York says: The Cunard steamer Carmania, which arrived in port on Wednesday, may well be called a golden ship. In the strong boxes of the steamer are shipments of gold aggregating \$10,000,000. This gold was imported by banks and bankers because of the recent money stringency here.

#### CUSTOMS DOCKS DESTROYED.

A Fire Loss of \$1,200,000 at Buenos Ayres.

A despatch from Buenos Ayres says: The Customs dock, which was destroyed by fire on Wednesday, contained 30,000 tons of merchandise, mainly of German origin. The losses are estimated at \$1,200,000. The origin of the conflagration is not known. Five clerks and seventy workmen have been arrested. Five firemen were injured. The dock and storehouse, erected by the Government at a cost of \$400,000, were completely destroyed.

#### ROBBED DEAD BODY.

Woman Arrested for Theft of \$5,000 in Diamonds.

A despatch from Los Angeles, Cal., says: Detective W. W. Freeman, on Tuesday, at Stockton, arrested Emma Howard, charging the theft of diamonds valued at more than \$5,000 from the dead body of the wife of Henry Briggs, of Pasadena. The robbery took place Aug. 20, and up to the time of the arrest it was kept secret. The Howard woman, it is said, had not succeeded in disposing of the jewels.

#### ONTARIO GRAIN CROP.

Railway Estimates Place it at 107,000,000 Bushels.

A despatch from Toronto says: The grain crop of Ontario this year is still retaining its high reputation as being the premier producing province of various classes of grain in the Dominion of Canada. The grain, which is chiefly exported to other countries, will aggregate this year, according to the estimates of the G. T. R. and C. P. R., about 107,000,000 bushels. This has been one of the heaviest years in Ontario's history.

#### A GOOD TIMES TROUBLE.

Difficult to Get Men For Militia at the Present.

A despatch from Ottawa says: Great difficulty is found in keeping up the strength of the garrison artillery at Esquimaux owing to the scarcity of recruits. The same trouble is found with the garrison artillery and infantry at Halifax. Times are so good that, even with the tempting Canadian rates of pay, men cannot be got to enlist.

and, barley—strong at 46 to 56c c.i.f. Rye—Firm; No. 1, 63c. Canal freights—Steady.

#### NEW YORK WHEAT MARKET.

New York, Sept. 25.—Wheat—Spot firm; No. 2 red, 78c in elevator and 79½c f.o.b. afloat; No. 1 northern, Duluth, 84½c f.o.b. afloat; No. 1 hard winter, 81½c f.o.b. afloat.

#### LIVE STOCK MARKET.

Toronto, Sept. 25.—Only a small proportion of the large deliveries of cattle rushed forward to-day were of good quality.

Trade in exporters' cattle was light. Quotations were nominal at \$4.25 to \$4.75 per cwt.

A few good loads of good butchers' cattle were offering. Prices were firm at \$4.50 to \$4.60 for picked lots. Medium to fair butchers' were quoted at \$3.80 to \$4; choice at \$4.30 to \$4.40; mixed lots and cows at \$1.75 to \$3.50; fat cows at \$3.30 to \$3.50; common cows at \$2 to \$2.25, and canners at \$1.50 up.

Feeders and stockers sold at steady prices. The quotations were:—Stockers, \$2.75 to \$3.50; feeders, \$3.75 to \$4.15; short-keepers, \$4.20 to \$4.60 per cwt.

With large offerings of sheep the market held up well. Quotations were:—Export ewes, \$4 to \$4.40; export bucks, \$3 to \$3.50; lambs, \$5.50 to \$6.25 per cwt. Calves were plentiful and slow of sale. Their values ranged from \$3.50 to \$6 per cwt.

Milk cows were steady to firm at \$25 to \$55 each.

Hogs were quoted at \$6.40 for select and \$6.15 for lights and fairs.

#### 1,000 LIVES LOST IN TYPHOON.

Chief Loss of Life Was Among Chinese Water Dwellers.

A despatch from Hong Kong says: The typhoon which swept this port on Tuesday, destroying a great number of vessels and causing much loss of life, was of a local nature. It came suddenly and without warning. The observatory had predicted moderate winds. Half an hour after the gun signal had been fired the storm was at its height. It lasted two hours. Most of the damage was wrought on the Kowloon Peninsula. Losses are estimated at several million dollars. Over one thousand sampans and junks are missing from Hong Kong alone. Wharves were swept away and houses collapsed. The military barracks are in ruins.

The harbor is strewn with wreckage thrown up on the shore. Hundreds of Chinese boatmen and their families were saved by the bravery of the police and civilians, but several thousand of the Chinese water-dwellers must have perished, many within short distances of the shore. The losses in lives and property among the Chinese were appalling. One launch that was capsized had 130 Chinese on board. They were all drowned.

Reports of fresh disasters are arriving every hour. Only a few Europeans are missing. No reports are on hand to show how the fishing fleets and the ships outside the harbor fared. Public opinion is incensed at the observatory for not reporting the approach of the typhoon. An enquiry has been demanded. For years past the observatory has been subjected to adverse comment, but on this occasion it is not believed to be blameable.

#### LATER.

A despatch from London says: Sir Matthew Nathan, Governor of Hong Kong, has sent the following cablegram to the Colonial Office:—"There is strong evidence that Bishop Hoare of Hong Kong was drowned. The loss of life among the Chinese will probably amount to about seven thousand."

The famine conditions in Russia are likely to prevail throughout the coming winter. Wheat was a good crop, but rye and oats were unsatisfactory.

#### Exhibition in London.

A despatch from Ottawa says: The Government has been invited to participate in what will be known as a travel exhibition, to be held in Horticultural Hall, London, Eng., opening on Empire Day, May 24 next, and continuing until June 8. The originators of the project are desirous that all the British colonies should be well represented. Canada is asked to make a showing of the resources of the country, its advantages for travelers and settlers, and the mode of travelling, etc., either by means of models or striking photographs; the advantages of Canada as a resort for tourists, either in search of health or pleasure, and the easy means of reaching various points in Canada; an exhibit of products showing the inducements for intending settlers; photos or engravings showing what Canada was like, say, 50 years ago, and to-day; if possible, by models or photos, showing the old time methods that visitors or tourists employed to reach their destination, and the up-to-date methods of to-day; striking examples of the advantages given to travelers, etc., visiting the colony, and, under these headings, Canada could make an exceedingly attractive exhibit.

#### DECREASE IN CHEESE OUTPUT.

Curtailed Milk Supply Caused by Drought Given as Reason.

A despatch from Ottawa says: Mr. J. A. Ruddick, Dominion Dairy Commissioner, estimates that by reason of the curtailed milk supply, caused by drought, the output of Canadian cheese will be considerably less this year than last, but enhanced price will more than make up the difference to the producer. The high prices ruling at the close of the season will, Mr. Ruddick believes, prove an incentive to greater activity next year in cheese making.

#### CAR OF DYNAMITE EXPLODED.

Eleven Lives Were Sacrificed and Many Injured.

A despatch from Jellico, Tenn., says: A terrific dynamite explosion on Friday caused the loss of at least eleven lives and more or less seriously injured not less than fifty persons. Property damage estimated at \$1,000,000 was done, and the town of Jellico, Ky., was practically destroyed. At least five hundred persons are homeless.

#### SWEDISH HANDICRAFTS.

Peasants do Much Good Hand Work—Result is Few Factories.

Sweden is the home of the handicrafts in addition to manual training taught in schools, the most exquisite hand weaving, lace making, brass work, even pottery, is done by the peasants. Each district has its own patterns, which the peasants make and wear, deeming it unpatriotic to have ought to do with patterns of other localities.

Because of the handicrafts Sweden has not many textile factories, although there are some where conditions of work are, for the most part, good. The people, however, are encouraged to continue hand weaving and to hold to their time honored industrial customs rather than to take the risk of a disturbed economic order due to a market glutted with shoddy trash. In all Sweden there are to-day only about ten thousand factories of all kinds, employing in all a little more than 265,000 workmen—not a great number out of a total population of more than 5,000,000.

#### SOMETHING WRONG.

Hotel Proprietor to his wife—"Maria, you haven't sent that man in No. 12 his bill yet."

Maria—"Oh, yes I have, my dear."

Hotel Proprietor—"That's odd. I can still hear him singing happily."

## YOUNG FOLKS

### THREE SHIPS.

Three ships there be a-sailing  
Betwixt the sea and sky,  
And one is Now, and one is Then,  
And one is by-and-By.

The first little ship is all for you—  
Its masts are gold, its sails are blue,  
And this is the cargo it brings:  
Joyful days with sunlight glowing,  
Nights when dreams like stars are growing.

Take them, sweet, or they be going,  
For they every one have wings.

The second ship is all for me—  
A-sailing on a misty sea  
And out across the twilight gray,  
What it brought of gift and blessing  
Would not stay for my caressing,  
Was too dear for my possessing.  
So it sails and sails away.

The last ship, riding fair and high  
Upon the sea, is By-and-By.  
O wind, be kind and gently blow!  
Not too swiftly hasten hither.  
When she turns, sweet, you'll go with her—  
Sailing, floating, hither, thither—  
Toward what port I may not know.

### THE BIRTHDAY PRESENT.

"There's a lot of 'em! Nineteen, twenty, twenty-one, twenty-two, twenty—" dropping the only nickel they had upon the little pile of pennies—"seven cents. My, what a lot!" And Tommy Thompson ran his hand under the coins and let them tinkle back to the table through his opening fingers.

"An awful lot," agreed little Benny, in a hushed voice, his eyes growing big and round at the immensity of it; "and we've been an awful long time saving it, since last Christmas. An' say, Tommy," with some perturbation in his voice at the audacity of his intention, "the next cent I get I ain't goin' to save. I'm goin' to buy candy."

"So'm I," approved Tommy, promptly; "I've been thinkin' so a long time. I'm just achin' for candy. But you know what this is for, Benny. To-morrow's ma's birthday, an' we 'greed to save every cent we got till the day before, an' then buy the nicest an' biggest present we could. We'll go down to the store this evenin', after supper. It's a lot more fun to buy by 'lectric light."

"Hi! hi! there, Tommy Thompson, and Benny! Hurry out there an' play!" came a shrill voice through the window; "we can't wait all day."

"It's sheepyard they're goin' to play," cried Benny, excitedly; "I forgot to tell you. I like sheepyard better'n any game goin'." Come!

Both sprang to their feet and hurriedly gathered up the coins, replacing them in a clumsily-made cloth bag which Tommy had cut out and sewed himself. This Tommy slipped into his pocket.

But as they rushed about the room in search of their caps and then sped downstairs, Tommy failed to notice that he had not put it back into the same pocket from which it had come, but into a hole at the side of the pocket.

After supper that night they stole quietly from the house and ran all the way to the store. And it was not until they had selected the present and Tommy felt in his pocket for the money to pay for it that the loss was discovered. Then they looked at each other blankly.

"Let me feel," suggested Benny, his lips quivering; "maybe it's deep down or off to the one side, an' you missed it."

But even a thorough examination by all four hands failed to discover the little bag, and the boys turned away chokingly.

"Maybe you'll find it somewhere," said the clerk, kindly. "Anyhow, I'll hold

## PARADE OF ODDFELLOWS

### MOST REMARKABLE SPECTACLE EVER SEEN IN TORONTO.

#### Uniformed Bodies Provided Gorgeous Display—Ten Thousand Men in Line.

History records such epoch-marking spectacles as Scipio's triumph and the military procession—in the rain—in honor of the Duke and Duchess of York, but, so far as Toronto is concerned, last Wednesday's I. O. O. F. parade ranks first in the arts of peace. Before a hundred thousand citizens or more, borne by an army ten thousand strong, passed the colors and insignia of the triple link. With fluttering banners, proclaiming each individual lodge or district, fraternal regimentals that did not despise the sword, artistic conceits in color and design, the pageant wended its way along the specified route. General M. A. Raney, at the head of the Patriarchs Militant, sat on his charger with a grace possessed by no accidental horseman. A gorgeous staff surrounded him. Each man could ride, and each man was dazzling in gold, waving plume, and martial air. Many bands poured forth stirring strains. Cheering crowds acclaimed the walking host. Then, lest such admiration should produce vanity, certain religious persons carried text cards tacked on boards hoisted aloft. These passages reminded mortals of the uncertainty of life and the certainty of death, a fact that the I. O. O. F. accentuates every day in the year, though in a different way. The placard method recalled the candid subject of old that was wont to wait on the King at his banquet and tell him he was but mortal.

### ALONG THE ROUTE.

The multitudes were early astir, but all citizens did not make a headlong rush. Many were prepared for a long afternoon. On King Street, just west of the King Edward Hotel, several were seated calmly at the curbstone on common-sense chairs. A stout lady nearby was obliged to stand, but she was not jostled. A brindle bulldog of determined mien squatted at her side, and even when the excitement was most intense the throng was careful to treat that live British symbol with proper respect. No label "What we have we'll hold" was needed.

On Adelaide east, near the Post-Office, a decidedly buxom woman had covered an expansive bosom with a huge collection of medals and Old Glory flaglets. An American Oddfellow, seeing the omission, threw a Union Jack over her shoulders. "Now you look more like John Bull's wife," he laughed.

Such were typical incidents of that tramp, tramp of an hour and a half. When it was all over but aching bones, a tall officer plodded painfully up Yonge Street, leading his horse on the reins. "Why don't you ride?" someone inquired. "The horse is tired," was the answer, but the joke was all in the words. The joker was too tired even to smile.

### IN THE PROCESSION.

The mounted police led the way, followed by Chief Marshall James Munro and his staff, the Royal Grenadiers Band, and General Raney, with retinue. Indiana was the first State, preceded by General Stearns and mounted escort. A pony carriage contained Colonel Landes and his three-year-old son and heir, another colonel, despite his youth. Some pretty manoeuvres were seen on Spadina and Yonge, the cantons vieing in excellence.

Canton Rochester was the first to introduce the Maltese cross figure. Then Cataract Canton, Niagara Falls, N.Y., did some clever work in wide formation. The Malden Ambulance Corps was accorded a pronounced ovation. Its equipment of white ambulance and staff was

## Fashion Hints.

### THE STREET SUIT.

For any woman who loves pretty clothes the shops are absorbingly interesting just now. Every day brings to light new things. Every shopping expedition is full of surprises.

One makes up her mind what she wants in her fall and winter outfit, only to unmake it, because new revelations in materials and designs open up new possibilities, and the woman who can afford to wait is wise to do so, for the choicest models and the rarest materials and trimmings are very likely to be late season offerings.

However, there is danger, too, that the very studs one likes best will not be obtainable later, save at the hands of fashionable dressmakers and tailors who pick them up as soon as they appear, and this is particularly true of laces, passementeries, etc., so the waiting policy should not be carried to excess.

The tailored street suit may very well be ordered early, and the materials suitable for such a costume are legion. At first glance plaids and check effects seem to have the best of this province, and these materials in soft blended lines of quiet tonings and in smooth broad-cloth surfaced cloths are finding very ready sale; yet we venture to predict that the one tone costumes will late in the season be more generally admired than the plaids.

The waistcoat is apparently to be an important feature of the street costume as it was last season, although this fall one finds it often taking the form of an inconspicuous detail in velvet matching the coat material rather than in contrasting color. Checked velvet, too, is chosen for the waistcoats of some severely tailored models in plain colored woolen stuff.

A jaunty little coat and skirt costume in broad navy blue serge obtained a surprising amount of individuality from the severest of double-breasted tailored waistcoats in black and white block check velvet, its only other trimming consisting of strapping and little dark blue velvet buttons. We have seen too, a particularly knowing model in mixed brown chevrot with tailored waist coat in block check velvet of green and brown.

The checked velvets are themselves being used for delightful street costumes of somewhat dressy character, of course, and these are especially good when subdued of hue and harmony, the check combining shades of one color not greatly differing in tone or two colors which harmonize dully and softly, instead of contrasting boldly. Checked velvets and velours in shades of green, shades of brown, shades of gray in orange green and bronze brown combined or in lead gray and black are excellent, and one delightful French frock is in checked velvet of a deep rich Jacquemine red and black with girdle cravat, etc., of soft black satin.

Importers are expecting a great velvet season and a great variety of velvet materials are displayed in the better shops. Silk chiffon velvet is, of course, the most exquisite, as it is the most costly of the group; but the cotton bat chiffon velvets retain their popularity and there are various materials of the velveteen or velour class which deserve cordial praise.

A Pekin velour, for example, should find an enthusiastic welcome in this season of stripped effects. It is a phenomenally fine and supple velveteen in one tone coloring, but with a line strip introduced in the weaving at intervals.

The effect is in no way like that of the silk corduroys, and the material is very light and soft and beautiful

## HORSES ARE SCARCE.

### British Remount Officers Got Less Than Two Hundred.

A despatch from Montreal says: It seems that 170 horses were the most that Col. Bridge and Captain Martin, remount officers, have been able to get in Canada for shipment to South Africa. These horses will be shipped next week on the Elder-Dempster steamship Canada Cape, and will be used for trooping and gun carriages. More than a hundred of them are bronchos that were selected at Calgary. Prices paid are said to range from \$175 to \$200, and, as he horses had to pass a rigid inspection, it is no wonder that more were not secured, especially as horses in Canada now are selling at unusually good prices. Two hundred dollars in the West is not an unusual price for even moderately good animals.

## SIGNED FALSE REPORTS.

### President of Bank of Yarmouth Found Guilty.

A despatch from Halifax, N. S., says: Hon. Senator Lovitt, president of the Bank of Yarmouth, who was charged with signing monthly bank statements, wilfully knowing them to be false, was found guilty in the Supreme Court on Wednesday. Mr. Pelton, K. C., moved that sentence be postponed, pending an appeal to the full bench on the grounds that the verdict was not in accordance with the evidence given. This motion was granted by Justice Longley.

## WILL INVITE TENDERS.

### National Transcontinental Commission to Build 200 Miles of Railway.

A despatch from Ottawa says: The National Transcontinental Railway Commission will shortly invite tenders for the construction of 200 miles of road running east and west from Lake Abitibi. The contract for this work will be let in time to permit of as large a part of the material as possible being brought in through the winter from the head of the Temiskaming and Northern Ontario Railway, which is within 40 miles of Lake Abitibi.

## THE ALL-CONQUERING.

### Six O'Clock Dinners Are Tabooed in Ottawa.

A despatch from Ottawa says: The servant girl problem is becoming acute in Ottawa. Several boarding-houses have discontinued 6 o'clock dinners on account of the objection raised by the domestics, who say they wish to get their evenings out and that evening dinners prevent them from realizing this object. Rather than lose their help the boarding-housekeepers have changed the dinner hour to noon.

## BUY LANDS FOR STATE.

### Victoria Government Will Purchase One Million Acres.

A despatch from Melbourne, Victoria, says: It is stated that the Government proposes to purchase 1,000,000 acres in the western district of Victoria for closer settlement. The House of Representatives on Wednesday passed a bill authorizing an amendment to the constitution for the payment of old age pensions from special Customs duties.

## DEATH AT THE FEAST.

### Cooked Meat on Copper and Nineteen Were Poisoned.

A despatch received from Tomaszow, Russian Poland, says that 50 persons there were poisoned at a confirmation festivity from eating meat which had been cooked in a copper kettle containing verdigris. Nineteen persons have already died.

it." But even a thorough examination by all four hands failed to discover the little bag, and the boys turned away chokingly.

"Maybe you'll find it somewhere," said the clerk, kindly. "Anyhow, I'll hold the ribbon until to-morrow night."

They were two very sober and slow-moving figures as they went back home and stole up to their room. Once inside they turned and faced each other hopelessly.

"Most six months' of savin'," groaned Tommy; "an' of course we'll never find it."

"An' all the candy we might 'a' had!" sighed Benny. Then, more hopefully, "Do you s'pose if we—we prayed for it, 'twould come? You know what the teacher said Sunday."

"Yes," drearily, "but 'tain't like this. Folks have got to work with the prayin'. But we might try. There ain't no other way."

"They dropped upon their knees, and Tommy whispered, "O Lord, please bring back ma's present!" and Benny repeated fervently, "O Lord, please bring back ma's present!" Then they arose and began to undress for bed. Then—they both saw it at the same time, lying right in the middle of the floor, where it had slipped through the hole! But Tommy and Benny always declared that the prayer went out and found it, and brought it back to them. Ten minutes later they were in the store paying the clerk for the ribbon.

## FLOODS IN NEW MEXICO.

### Fifty Persons Drowned and Five Hundred are Homeless.

A despatch from Guadalajara, New Mexico, on Wednesday, states that the correspondent of the Jalisco Times at Mezatlan wired his paper as follows:—"Fifty-one persons were drowned in the recent floods in Santiago, Inciuntla and adjacent districts, in the territory of Tepi. The bodies, it is stated, were taken from the river. During the flood many persons took refuge in trees, remaining there until boats were sent to their rescue. It is reported that 500 persons are homeless. Widespread damage has resulted from the inundation in Sinaloa. Several river towns have been partly destroyed, thousands of cattle drowned and crops in many sections destroyed."

## DIED WITH SONG ON LIPS.

### Pathetic Ending of a Little Girl Who Was Fatally Injured in Fall.

A despatch from Montreal says: Singing the song of the Breton poet, Brelot, "La Paimpolaise," the song of a fisherman who dies in sight of land and the outstretched arms of his joyous wife, little Fabiola Lajoie passed away on Wednesday. The little three-year-old girl was playing on Tuesday at home and fell 50 feet to the pavement, but an awning broke her fall, and the doctors found no external injuries. She lay in the cot in no apparent pain and sang the song to her brothers and sisters early Wednesday morning. Then came a sudden change, a few sharp cries of anguish, and it was all over.

## ROBBER MADE RICH HAIL.

### Secured \$3,700 From Branch of Bank of Commerce at Kinesto.

A despatch from Kinesto, Saskatchewan, says: At 8 o'clock on Tuesday evening the Bank of Commerce was robbed in the absence of the manager. The assistant, Mr. Hickman, thought he heard a noise and came quickly down stairs, making for the safe. Immediately he was fired upon by a man in the shadow. Hickman made a plunge to grab the assailant, but received another shot, just grazing his left temple. The robber then made his escape, securing about \$3,700.

Canton Rochester was the first to introduce the Maltese cross figure. Then Cataract Canton, Niagara Falls, N.Y., did some clever work in wide formation. The Malden Ambulance Corps was accorded a pronounced ovation. Its equipment of white ambulance and staff was certainly complete. The 8th Regulars' Band of Akron, Ohio, was in hussar uniform. St. Thomas Canton aroused unbounded enthusiasm. This Ontario drill team has a long list of victories to its credit. The Department of Ontario did not hesitate to show its colors—the Union Jack. The Stars and Stripes were seldom absent from the American delegation, though an occasional British flag was seen as well. Indeed, Editor E. O. Peels of Cuyahoga Lodge, Cleveland, not only waved a Jack with might and main, but thundered out the fact. His voice proved to be as long as his body. Bro. Peels and his following sang at the stops, and their choruses were pleasing to the ear.

## BUFFALONIANS LOOKED WELL.

International Lodge, Buffalo, wore the garb of the Eastern shepherd, and on the float sheep were being shorn. Marine Lodge of Buffalo followed in snowy sailor suits.

There were three bands of Kitties—18th, Galt, and Hamilton. Germania Lodge of Waterloo mustered well, and pink, blue, and white blouses divided the three sections from that town. The star distinguished the veteran, and many stars were seen. Toronto did itself proud, not only in numbers, but in variety of costume. Laurel Wreath Lodge wore a wreath at breast, while Floral Lodge was noticeable in silk hat and yellow duster, with a pickaninny in front driving a team of William goats. Broadway Lodge had its name on the red flag of the Union Jack. Prospect Lodge guarded a float, on which a nurse administered to a suffering brother. Controller Ward was a carriage pedestrian, and, before the round was made, hundreds wanted to be. The review on University Avenue was a fitting finale.

## JURY BLAMES AIR BRAKE.

### Azilda Wreck Due to no Carelessness of Crew.

A despatch from Sudbury says: Engineers John Morris, W. Boucher, and John Beattie have been examined before the coroner's jury, and their evidence corroborates Engineer Thurlow that there was plenty of time in which to stop the train at Azilda had the air brakes been working right. The jury's verdict is as follows:

"That Thomas Puddicombe and others came to their death near the east switch at Azilda station, on the C.P.R., by train No. 1 going west and train No. 2 going east colliding at that point; that the collision was due to a defective air brake service on No. 2 train, the defect being a closed angle-cock on the rear end of the mail car. We find that the train crew took the usual precautions in handling their train."

## THREE MEN KILLED.

### An Explosion of Dynamite Near Fort William.

A despatch from Fort William says: Another disastrous explosion of dynamite occurred on the G.T.P. right-of-way near Fingmark, on Thursday. Three Finlanders were blown to pieces and eight others injured, one of them fatally. Foreman C. H. Hilton had his arm blown off. The injured men were taken to the hospital at Kamistiquia and the bodies brought here for burial. At the time of the accident the men were engaged in tunneling work. They returned from cover too soon, as it is said one charge went off which was followed in a few minutes by another, and the men hearing the first report came from under cover and were caught by a second charge, which did not explode with the first. The dead are: Peter Vontilinen, Henry Parviance and Nestor Johnston.

monementally fine and supple velvet in one tone coloring, but with a line stripe introduced in the weaving at inch spaces.

The effect is in no way like that of the silk corduroys, and the material is very light and soft and beautiful in coloring. All of the popular greens, browns, wine reds, Jacqueminot reds and plum shades are represented in this velvet, and it is very good in black and in the fashionable lead and smoke grays.

## FAIL COLOR COMBINATIONS.

A new early fall combination is a silk skirt with cloth jacket, reversing the order of the spring. A gray silk with black line in it is topped off with a short loose jacket of gray cloth. In this is a vest of gray suede, and the whole is trimmed with silver buttons. Just a touch of the gray silk is added to the sleeves.

Of cuffs and collars to tailor coats there is much to say. Some little odd effect is worked into nearly every velvet collar. The velvet often is laid on in the shape of a strap with oval ends. A large fancy button is set on the end both of the cuff and collar, and sometimes a cloth piece in the same shape appears under it. This is a favorite device of the tailor just now, and another is a little shaped piece of broadcloth set in the edge of the collar to lie out on the shoulders an inch or two in a plaited frill. It is pressed flat, so that in spite of the seeming unfitness it really lies as smooth as the best fitting collar.

## EXPRESS PACKAGE STOLEN.

### Parcel Containing \$1,600 Disappears During Absence of Messenger.

A despatch from Toronto says: An express package containing \$1,600, consigned by the C. P. R. Company from Owen Sound to the Bank of Montreal at Montreal, disappeared in a mysterious manner from the safe in the express car on the C.P.R. at Cardwell Junction on Wednesday morning. The package was placed in the safe by the messenger at Owen Sound. At Cardwell Junction he had occasion to leave the car to speak to the messenger, on an upbound train. Mr. Kelly, produce dealer, of Parkdale, who was riding on the express car, had previously alighted from the train when it stopped. The messenger was not gone more than three or four minutes. Mr. Kelly reaching the car first. While the train was backing out on to the main line the messenger discovered that the package and money were gone. He signaled the train to stop, and reported the loss to the conductor, but no trace of the money has been discovered. Mr. Kelly, in view of all the circumstances, insisted on being searched.

## CANADA-MEXICO LINE.

### Bach Government Promises Subsidy of \$68,000 to Aid Venture.

A despatch from Ottawa says: Capt. Worsnop, representing the English firm with which the Mexican Government has signed a conditional contract for the direct steamship line to ply on the Pacific between Canadian and Mexican ports, has arrived in the city to obtain the signature of the Minister of Trade and Commerce to the same contract. The Government is already committed to the arrangement, so that there probably will be no delay in arranging for the immediate inauguration of the service. The terms of the contract are that the Governments of Canada and Mexico will each contribute an annual subsidy of \$68,000, in consideration of which the company will maintain a monthly service between the Canadian ports of Victoria and Vancouver and the Mexican ports of Manzanillo, Acapulco, and Salina Cruz. Meantime, the subsidized Canada-Mexico line on the Atlantic is doing an excellent freight business.

## Clothing Made to your Order

We began thinking about your fall tailoring long before you did.

First we selected the finest assortment of foreign and domestic fabrics that money could buy.

We employ one of the best cutters in this section, and our clothing is properly made.

If your suit is not satisfactory after it is finished we will not ask you to take it.

Don't you think that is a fair offer,

Order now and get  
the choice of patterns

## J. L. BOYES.

### THE BEST FLOUR. DAFOE'S NONESUCH DAFOE'S MANITOBA PATENT

By numerous tests by the best Bakers the above mentioned grades have been proven to be the best Flours in the market.

When buying Flour ask for Dafoe's, and patronize your home mill, thereby producing Bran and Shorts that you can purchase cheaper than the product of the Western mills, which has to be transported thousands of miles at great expense, and usually, when it reaches you, of inferior quality.

The grocer complains if the farmer or the mechanic sends to Toronto or to outside points for an article he can get at the home store just as good, but he does not hesitate to buy Flour from mills hundreds of miles away, and sell you an inferior Flour for more money than you can purchase the home product for, every bag of which is guaranteed.

CHOICE CORN MEAL and BUCK-WHEAT FLOUR always on hand.

FEED GRINDING a specialty, with the best feed mills known to the trade.

A full stock of the best ANTHRACITE COAL. Also in the market for the purchase of all kinds of Grain.

Ask for prices at the big Mill before purchasing your Flour, Feed or Coal.

ENAMEL FOR FLOORS.

Jamieson's Floor Enamel is far superior to Floor Paints of any kind—it dries as hard as rock with a varnish gloss—and will not mop off—it costs more, but it's worth the price. Sold only at Wallace's Red Cross Drug Store.

The Tax Collecting Case.

The Town treasurer and the Town of Napanee vs Mr. T. F. Ruttan, Collector of taxes, was held at the Division Court held in the Court House, before Judge Price on Wednesday. The town secured a verdict against Mr. Ruttan for \$57.20, being ten per cent on \$572.

Coal Facts.

Now is the time to get in your stock of Coal for the winter before your lawn gets soft. If you want the best grade of Anthracite, Steam or Cannel Coal you can get it by calling up VanLaven's Office, Phone 92. All coal kept under cover and well screened before delivering.

Coming.

Sbraccia and his peerless Italian band and concert company will appear here shortly in a programme of music so carefully selected that it cannot fail to please all. Prof. Sbraccia makes his first appearance in the Canadian Provinces this season. His band will give two grand concerts, matinee and evening, in Brisco's Opera House, on Tuesday, Oct. 2nd.

Missionary Meeting.

The Missionary Meeting at St. Alban's church, Odessa, on Monday evening, Oct. 1st, promises to be one of unusual interest.

## THE OPENINGS.

DOXSEE & CO

A wealth of beauty and elegance in millinery and superb fall goods generally marked the display of the Doxsee Co, at their fall millinery opening, which commenced Saturday Sept 22nd. The display was striking, and many innovations and changes in the fall styles for 1906. Noticeable in which is a predominance of light colors and smart effects making the styles for the autumn bright and attractive. Our attention was drawn to a very pretty hat the Gainsborough in Burgundy silk brim with velvet and plums in same shades. Another very handsome and dainty little suit hat, called the Rob-Roy in Tan felt trimmed around the brim with folds of brown velvet caught on left side with vulture feathers, one on the melvin shape which was very much admired, made in felt and trimmed with Luella and velvet in the taupe shade and finished with a pale blue feather.

The leading shades are Taupe, Burgundy, Sapphire Blue, Ruse, Tan and Pearl Grey. A few of the new and popular shapes are Rob-Roy, Helmet, Mushroom, Vesta Tilly, Victorine, Vesta, Regna, Scotch Turban and the jockey hat.

Feathers promise to be very popular trimming for winter hats, also breasts wings, cocks features, Osprey, last but not least, velvet roses and foliage combined with grapes.

MADILL BROS.

Many notable openings have been calendared, but the Fall Openings of Messrs. Madill Bros., which was held on Saturday evening last, stands out pre-eminent. This notable establishment was the scene of an imposing and dignified display, which set an authoritative and definitive seal on the season's modes. Filled with the richest and most exclusive importations the aristocratic store was the rendezvous of the fashionable elect. The Dress Goods and Silk Department was exquisitely arrayed with Fabrics of the most fashionable nature so carefully arranged, that each and every piece was appreciated by all. The Linen Department was one of elegance, the showing of the Real Irish Linens (Shamrock Brand) and Tenneriffe Drawn Work, the prestige accorded this department this season denotes the exhibit, and demand for the finest qualities of Linens known to be stocked by this reliable firm. The Ready-to-Wear Department, the department which is so prominent this season on account of the arrivals of the New York Garments—the Ladies' Coats, being very much in evidence, which are of the most fashionable nature, the Dress Skirts, the Silk and Lace Waists were also shown to good advantage. The Smallware Department as usual was a centre of attraction, with its extensive glass show counters arranged so that the many, many lines covered in this modern department could be seen to good advantage. The Carpet, Housefurnishing and Fur departments were very elaborate in their form of display. The Carpets, Rugs, and Curtains were arranged by a talented artist and shown to excellent advantage, the Furs as usual cause a commotion amongst the Lady Patrons on account of the High class nature of stock carried by this firm. Many more comments could be made in detail of the display but the choice quality and select character instinctively enthral those who are quick to recognize the cachet of exclusive elegance.

evening, in Brisco's Opera House, on Tuesday, Oct. 2nd.

**Missionary Meeting.**  
The Missionary Meeting at St. Alban's church, Odessa, on Monday evening, Oct. 1st, promises to be one of unusual interest. Archdeacon Lloyd, of Lloydminster, Sask., will be the speaker, and he has the reputation of being one of the best missionary speakers in Canada. All should hear him, who can. Collection for Missions in Northwest and New Ontario.

**Sacred Concert.**  
A grand Sacred Concert will be held in the Presbyterian church, on Tuesday evening, Oct. 9th. Mr. Arthur Craig, Baritone Soloist and Choir Leader, Miss Shaw, Organist, Miss Beatrice Tandy, Contralto Soloist, Miss Parker, Soprano soloist, of St. Andrew's Church, Kingston, and the little Misses Telgmann, phenomenal violin soloists, of Kingston, will take part. 43 b

**Paints Oil and Glass.**  
Our import order of glass is now here and we are ready for the fall trade. Do not overlook the fact that we are the largest dealers in these lines and are gratified to know that the quality of the goods we have been enabled to furnish the public within the past has brought to us this large and growing trade. Elephant Brand of white Lead and ready mixed paints are guaranteed for quality.

**MADOLE & WILSON**

**The Inquest.**  
The Jury called by Coroner Cowan, to inquire into the cause of the death of Frank Blaine, the engineer killed in the wreck on the G. T. Ry, on Friday morning last, met on Friday afternoon last, and after viewing the remains adjourned until Monday evening. The following comprised the Jury: E. S. Lapum, foreman, D. L. Hill, H. W. Kelly, M. T. VanSlyke, F. H. Carson, E. J. Pollard, John Hamblly, P. Gleeson, F. W. Vandusen, J. J. Minchinton, S. C. Denison, E. Pringle, J. O'Brien. A number of witnesses were examined on Monday evening, and the inquest was again adjourned until this evening.

**Take Care of the Eyes.**  
Don't read in a reclining position or in bed!  
Don't use the eyes when they are tired or weak from illness!  
Don't work longer than two hours without closing the eyes and resting them for five minutes!  
Don't have colored shades on the lamps. Use white or ground glass. If you must have a colored shade let it be green!  
Don't fail to consult an oculist if you find that your eyesight is growing dim or hesitate to wear glasses if you need them.

Impaired vision scientifically corrected at The Medical Hall—FRED L. HOOPER.

After two years and a half continuous work the eastbound and westbound shields in one of the 23-foot twin tubes which the Pennsylvania Railroad has been driving under the Hudson River to connect New York and New Jersey have met. Now men may walk through dry shod from one state to another. The second tube, a few feet to the south, is expected to join about the 7th of Oct. The meeting of the shields marks the beginning of the completion of one of the most astonishing engineering feats on record. Probably no feat of railway strategy in the history of the United States has attracted more attention throughout the world than this one. Its completion will mark a triumph over difficulties of tremendous magnitude, as this will be the longest tunnel ever bored entirely under water—Chas. J. Crowley, C. E., is engineer, and his tunnel is pronounced the finest and best in the world to-day. Mr. Crowley is a Canadian, and his wife was Miss Haydon, daughter of Mr. J. S. Haydon, one of the most successful and highly respected business men of Camden East.

**Sole Agency at Wallace's Red Cross Drug Store.**

**ROBERT DENISON.**  
One of Napanee's best known and most highly respected residents passed away on Saturday last in the person of Robert Denison, at the age of 84 years 11 months and 28 days. Deceased had been a resident of Napanee for thirty years, and during twenty-six years of that period, conducted a grocery and provision store. Previous to coming to Napanee, Mr. Denison conducted a farm, as a gentleman farmer, and a wood yard. He was also overseer for a number of years of the Selby road, when that road was owned by a private corporation. In politics, Mr. Denison was a staunch Liberal and during his political career was several times reeve of Richmond, and served a term as Warden of the County of Lennox and Addington. In religion he was a Methodist and a staunch supporter of the Western Methodist church, and a very liberal subscriber to that church. Deceased had been ailing for some time but was seriously ill but a few weeks. The funeral took place on Monday from the Western Methodist Church, the church being beautifully draped for the occasion.

**The Perverse Golf Ball.**  
A collector of evidence on the subject maintains learnedly that the golf ball is the most perverse of human institutions. Here is a list of strange lies noted by a follower of the ancient game: In another player's pocket, where it had dropped after traveling 200 yards; in a cow's mouth; on the roof of a clubhouse; behind the glass protecting a painting hanging on a cottage wall; in a clump of daisies, which it so resembled that it was not found for an hour. When it fell in the cow's mouth the frightened animal galloped 276 yards nearer the hole and then restored the ball to its owner. He promptly claimed to have driven it 397 yards and the right to play it from where it lay.

**An Ancient English Workhouse.**  
In the records of St. Thomas hospital, London, is an entry of the year 1570 to the effect that "in consideration of the hote tyme of the yere" the poor be allowed "every one a day three pynnts of Bere for two months," a quart at dinner and a pint at supper, and at the end of two months return to "there olde ordinary allowance, wyche is one quart." The food at this ancient workhouse was to be dealt with as liberally as the drink. The almoner and steward were to "bye no byffe but of the best, without bones and in speciall without the marybon, and none other to be bowght."

**Professional Dignity.**  
"What wages do you expect?" asked Mrs. Randolph of Aunt Phronie, who had come to hire as cook.  
"Well, Ah tell you. Ef Ah cooks an' waits on de table, too, Ah 'spects \$2 eberv week Ah lives, b-u-t ef yo' all has family reach at de table an' Ah jes' hab ter cook, den Ah charges er dollar an' fo' bits."

**This Is Different.**  
"Love makes the world go round." The world seems to go round, but love makes your head swim. That's the explanation.

**How to Be Beautiful.**  
"What do you do to keep so beautiful?" they asked the butterfly.  
"I? I do nothing," she replied.

Parish of Camden East.

The question has been asked by those contributing quarterly to the stipend of the Rector of St. Luke's church, Camden East, to whom is it to be paid. The answer is to Mr. William Gens, Rector's Warden or to Mr. T. R. Mowbray, People's Warden; who both live in Camden East. The quarterly payments fall due the first days of January, April, August and October, in each year, consequently the next quarterly payment is due October 1st, 1906. Service at St. Luke's church, Sunday, Sept. 30th, at 3 p. m. Offerings for W and O Fund.

YARKER.

The annual Harvest Thanksgiving service will be held (D. V.) at St. Anthony's church, Yarker, Sunday next, Sept. 30th, at 10.30 a. m. All the congregation will kindly take notice of the date. All are welcome! Offerings for Widows and Orphan's Fund.

NEWBURGH.

The annual Harvest Thanksgiving Service will be held (D. V.) at St. Luke's church, Sunday next, Sept. 30th, at 7 p. m. The church will be decorated. All the parishioners are requested to take notice of the date. Offerings for Widows and Orphan's Fund. All are welcome.

One gallon of Prism Brand Paint will cover 360 sq. ft., two coats. Every can guaranteed. The Medical Hall.--Fred L. Hooper, sole agent for Napanee.

## Furs that are Worthy of Careful Consideration

Every piece of Fur placed in Stock this season has received the careful discriminating attention of experts, from the selection of the skin to the finish of touches. Accordingly absolute confidence can be placed in the quality of the Furs, the desirability of the Styles, the character of the workmanship. See the actual garments and examine thoroughly. To get a fair idea of where we stand in regard to Women's and Men's Fur Garments, compare

prices and quality with those of any others. As we give best value in our regular business, so it follows that our special efforts are the more worthy of your consideration.

Ladies' Persian Lamb Jackets, 24 or 26 inches long made from choice selected skins, extra deep collar and facings, large new sleeve lined with best quality Broadcloth or Plain Satin, prices \$75.00, \$100.00, \$135.00 and \$175.00.

Men's Natural Coon Coats, first grade perfectly lined and finished, are extra special values as they were bought early, before the big advance in Furs prices \$50.00, 60.00, 65.00 and 75.00.

Ladies' fine Near and Baltic Seal Jackets, new Blouse style, Collar facings and cuffs of Natural Canadian Mink, lined with best grade satin, Silk girdle at waist, takes an expert to distinguish from genuine seal, prices \$40.00, 60.00 and 75.00

Alaska Sable Muffs, Round and Cor-  
onation styles, special \$10.00, 12.50,  
15.00 and 18.00.

German Mink Stoles, beautiful look-  
ing and wearing Furs, \$8.00, 9.00,  
12.50 and 18.00.

German Mink Muffs, \$4.00 and 5.00

Children's White Bear Skin Coats,  
pretty and stylish, ever so snug and  
warm, and a complete variety of styles  
to choose from, sizes 20, 22 and 24  
inches.

All sizes and styles are to be found in this complete stock. Ladies' Vests and Drawers from 25c each. Children's range in price according to size.

Ladies' Flannelette Wear, Gowns, Drawers, and Underskirts, all sizes, colors and prices.—Shawls, Toques, Clouds, Garters, Children's Sweaters, Ladies' Wrappers and Dressing Sacques.—Ladies' and Misses' Dress Skirts, Ladies' Underskirts, Ladies' and Children's Coats.

New Floor Coverings and Draperies.

## AMHERST ISLAND FAIR,

Amherst Island Fair was held at Stella, on Tuesday last, under ideal weather conditions. The display of stock was the best in years and the display of fruits, vegetables, Ladies' work etc, was well up to the average. The ladies of the Church of England on the island, gave a dinner in the Victoria Hall, which was much appreciated. To the untiring efforts of Mr. W. H. Montry, the secretary of the Agricultural Society, and his able Committee, the success of the fair, is largely due.

## New Floor Coverings and Draperies.

Doubt and hesitation are not factors in this business, already we've opened out many many new designs in Carpets, Linoleums and Oil Cloths; and every day brings something new. Floor coverings are here at any price you please, and surprising elegance and quality every time. We manage every Department as Merchants with experienced assistants. Stranded stocks mingle not here, as sound business is against them. We can do better for you with stocks selected exclusively for the best retail trade. The way we buy has everything to do with the way we sell. There's no economy in old goods at higher prices than we're asking for new.

New Carpets in a complete and varied range.

New Linoleums and Oil Cloths, 8/4, 12 1, and 16 1 widths.

New Draperies, Rope Portiers, Madras and Swiss Muslin, Etc.

## DRESS GOODS, VARIETY AND EXCLUSIVENESS.

So broadly comprehensive are the special displays of the various new Fabrics, that the woman who studies them at Madill's may glean all that is known or can be learned of the correct weaves and colors for this fall and winter season. This DRESS GOODS DISPLAY includes everything, Plain Suitings in all the approved weaves and the distinctively new shadings; A showing of Fancy Tweed Suitings unmatched in variety; The beautiful Plaids, the Black Suitings, the Tweed Coatings, plain and fancy Voiles and Eoliennes, Etc. You're invited to see this great collection before making your purchases.

Braids, Gimpes, Appliques, in a complete range to match Dress Fabrics.

Black Taffeta Silk, one yard wide (guaranteed) \$1 00 a yard.

Tucked and Featherstitched Allover Chiffons, Eyelet Allover Chiffons, Insertions and Laces to match.

## Ladies' and Children's Gloves in Great Variety.

Larger and better assortment than in all former showings of any season. That's a strong statement, to be sure, but even that doesn't do the New Autumn Stocks too much justice. Our Fall and Winter Gloves are to hand in the leading shades and cuts. Gloves for Ladies, Gloves for Misses, Gloves for Boys and Girls. Dressed and Undressed Kid, Swede, Lined Moko, Silk Lined Moko, English Driving Gloves, 20 button length, black and white; Dressed and Undressed Kid Gloves. Worthily of a special visit to the Glove Department, just to see the new shades. (Sole agents for Penny's Gloves in Napanee)

## HOUSEHOLD STAPLES

There is not a housekeeper in Napanee that will not appreciate this effort of ours to make it unusually profitable for them in the line of household necessities. This is the time of year when lots of people find out their need of such Household necessities as Sheetings, Pillow Cottons, Bed Spreads, Blankets, Flannellettes, Towels, Towellings, Table Linens and Napkins, or Gingham, Shirtings, Wrapperettes, Flannels. The stock at Madill's is one of newness. Let us give you quotations on these goods. They have been bought right and are being sold right.

# MADILL BROS.

### Gettin' Wisdom

is a comparatively easy task if you start it while you are young. Don't allow your child's eyes to be ruined for all time because they look too 'ded' with glasses on. We'll tell you the truth as to whether they need glasses or not, and charge you nothing for the telling. Headaches in children are suspicious. We are also the best people to guarantee the quality of our frames, it being part of our jewelry business to acquire that ability and knowledge.

Sizes and prices to suit everyone. Be sure and inspect our stock before you purchase. It will be a pleasure for us to show you the goods.

#### MADOLE & WILSON

#### TOWN COUNCIL.

Council Chamber  
Oct. 1st 1906.

Council met in regular session. Mayor Lowry in the chair.  
Councillors present: Normile, Meng Williams, Graham.  
The minutes of the last regular session were read and confirmed.

#### COMMUNICATIONS.

From R. T. Pringle Co., saying they had forwarded a new panel, to replace one broken in switch-board at power house, during installation. Filed.

From R. S. Kelsch, recommending payment of balance of account of The R. T. Pringle Co., as their contract had been satisfactorily completed. Laid on table until later in the evening.

#### PETITIONS.

From C. W. Guess, E. J. Pollard and Chas. Stevens, asking that a granolithic walk be built in front of their property on Bridge street, under usual conditions. Laid on table until later in the evening.

From J. T. Grange and others, asking that an electric light be placed at the corner of John and Isabella. Laid on the table until later in the evening.

Rev. O'Connor appeared at the bar of the council and spoke in reference to the necessity for the continuance of the Canning factory sewer. He was given an assurance that the matter would receive prompt attention.

The Street Committee reported as follows: re petition of N. Dean and others for cement crossings, no action, and that no more crossings or walks, other than those already started, be built this year, owing to lateness of season; re Covered Bridge, had examined same and found it in an unsafe condition, and would recommend that repairs be made to same. Report adopted.

The Fire, Water and Light Committee reported that a settlement between the parties concerned had been arrived at, re wires of old electric light plant, and that all legal proceedings had been withdrawn. Report adopted.

Councillor Simpson entered.

The Finance Committee reported that they had the report of the Provincial Auditor on the town books, and suggested that the report be read in open council as soon as convenient, and that the report be then filed in the treasurer's office for the inspection of any ratepayer. Report adopted.

The clerk washed the report and after reading about half of it the council adjourned until Thursday at 7.30 p.m.

Buy Polished Steel Pipes, they wear longer, look brighter, require no polishing and are cheap at 12c per length at BOYLE & SON.

H. Kirkpatrick of Centreville committed suicide by shooting himself through the heart.

Stratford's population, according to the assessment returns is 13,200. The assessment is \$6,023,700.

Near Cochrane, Alberta, two ranchers, Edward Cole and H. E. Hewitt, were stabbed to death by a gang of drunken Italians.

At Wallace's Red Cross Drug Store—Baby's Own Soap 25c Box; 3 packages Dyala or any other dye 25c; 3 tins Gillet's Lye 25c; 3 lbs Washing Soda 5c; 12 lbs Ordinary Sulphur 25c; 3 lbs Pure Linseed Oil 25c; all the oil 25c; Herbagerum 50c bag; 2 ozs. Bland's improved iron tonic pills 25c; Peruna 85c Bottle (advanced); 3 Bottles Medicamentum 25c. All Medicines advertised in the Express fresh and good at Wallace's.

Small Kinds and Furniture. Terms of Sale for chattel property.—Cash.

HERRINGTON, WARNER & GRANGE,  
Napanee, Ontario.  
43c Vendors Solicitors.

#### MORVEN

We had a very welcome rain on Saturday.

This section was visited with a heavy frost, Sunday night, which cut all the garden stuff.

Hay and grain are being taken into the station quite freely. The season's crop is about all threshed in this section.

The potatoes are about all dug, with a fair yield.

A little stranger has applied for board at the home of W. Wood. It is a girl and Mr. Wood wears the broadest smile of any man in town. A little girl has also arrived at the home of H. Peters.

#### Rapid Travelling

One of the rays of light emitted from Radium is said to travel 40,000 times faster than a bullet. You get the greatest amount of light and the least smoke from our special grade of American Coal Oil. Try one gallon. The Medical Hall, FRED L. HOOPER.

#### YARKER.

Mrs. Henry Ansley has disposed of her property here to C. Taylor, and will remove to Harrowsmith.

Arthur Baxter and wife, Mrs. J. V. Burn and Hermine Connolly have gone to New York city.

The Sunday school rally service here on Sunday night, was well attended by adults and children.

Miss Florence Weagant has returned from New York.

Mrs. John Woodhouse is on the sick list this week.

The family of A. W. Benjamin will return this week from Sydenham.

Stewart Connolly left for Toronto to resume his studies.

Maggie Miller has gone home for her vacation.

Mrs. T. Miller, Snow Road, is at Mrs. J. Irish's.

The wires are being shifted to the new poles on line of B. of Q. R.R.

J. A. Vandewater is painting his store and residence.

Two new residents have moved to Yarker, a Mr. Smith and Mr. Babcock.

Mr. Stark of the Merchants' bank her will be transferred to Carbery, Man.

Frank Vanluven, Murvale, was in town Sunday.

#### The Best Window Glass.

There is a great difference in window glass. Pilkington's English is free from flaws, uniform thickness and clear color. Sold at The Medical Hall—FRED L. HOOPER.

#### ENTERPRISE.

The roads are in excellent condition after the rains which settled the dust for awhile.

Our fine summer weather has turned more wintry.

Mrs. Jas. Scanlin is seriously ill with an attack of neuralgia.

Threshing is the order of the day. The yield is as good as could be expected.

Mr. Edward Kearns is still on the sick list with slight hopes of recovery.

Farmers are busy digging potatoes which are a good crop this season.

Quite a number from here attended the fair at Tamworth on Saturday last and were well pleased with the exhibition but where put to some inconvenience on account of the down pour of rain in the evening.

Mr. Thos. Breen, Sr., had a sale of all his farm stock and implements on the 27th inst. It was well attended.

## Business College and School of Finance

### ENOCH HAD THE ADVANTAGE.

A Man Who Received a Hot Welcome  
From His Mother-in-Law.

"My son," began the somewhat  
crumpled-looking man to a boy who  
ran against him under the grocer's awn-  
ing, "I suppose you have no objection  
to earning five cents this morning?"

"No, sir."

"It won't take you over three minutes  
to do so. Did you ever hear of Enoch  
Arden?"

"No, sir."

"Probably not, owing to your youth.  
Enoch left home and was gone for a  
number of years. When he returned it  
was to find his wife married to another  
man. I am not exactly an Enoch Arden.  
I left home only last night, and I don't  
anticipate that my wife has rushed  
matters. That's where I live—at the  
corner of the alley. I'd like you to walk  
down and look up at the sitting-room  
windows. You will come back and tell  
me whether she is smiling or weeping,  
whether she is red in the face or is pale  
and solemn. You understand?"

"Yes, sir."

"Owing to your youth I can't explain  
matters more fully. Whatever you re-  
port will be my cue as to how to act.  
You will know all about it after you  
grow up and get married. Run along,  
now."

In seven or eight minutes the lad re-  
turned and reported that a woman, who  
was very pale and had tears in her  
eyes, was looking from one of the side  
windows.

"That signifies that she has repented,  
wants me to forgive her, and that I'm  
all right," replied the man, as he handed  
over the five cents. "That'll do, my  
son. I'll go in by the front door and  
surprise her."

He settled his hat on his head, pro-  
duced his latch-key, and ascended the  
steps, while the boy waited to see how  
things would shape.

The key had scarcely entered the lock  
when the door was pulled open, and a  
woman about fifty years old, with her  
jaws hard set, and three feet of broom-  
handle in her right hand, sprang out.  
The man was so taken by surprise that  
he received four or five whacks before  
he could leap over the railing and make  
off, while the boy darted after him to  
escape a similar infliction. He caught  
up with the man about two streets away  
and said:

"Mr. Arden, that wasn't the pale-  
faced, tearful lady who sat at the win-  
dow?"

"No, my son, it was not," solemnly  
replied the man. "It was the pale-  
faced, tearful lady's maternal relative,  
and, hang me, if I hadn't clean forgot-  
ten that I had a mother-in-law to deal  
with! That's where Enoch had the ad-  
vantage of me, but perhaps I can figure  
it out somehow. That's all you can do  
for me now, sonny, and you may go  
home, while I wander about and think  
up some plan to get even with the  
game."

# KAI WANG;

## A TALE OF SOUTHERN CHINA.

### CHAPTER XXXVIII.

There were those in the little com-  
pany clustered in that upper chamber  
who knew immediate action was essen-  
tial.

When Dr. Jack had been assisted  
through the opening which his own in-  
demonstrable energy had made, Kai Wang  
proceeded to cover the hole with a lot  
of matting he had discovered. Some  
people have that rare faculty for find-  
ing just what is especially needed for  
the occasion, and such persons gener-  
ally prove very handy to have about.

Then he struck a match and calmly  
proceeded to bring the invaluable old  
lantern into play. To relate how Larry  
blessed it now, as much as he had  
cursed it under his breath at first when  
it persisted in banging against his  
shins, would betray the valiant little  
fellow's confidence, but the glances he  
bent upon it were full of deep veneration,  
and he was now ready to believe it  
their best friend.

All of them were greatly interested in  
a hurried survey of their position.

This was especially true of the maker  
of the heathen gods.

Kai Wang knew the intricacies of  
the imperial palace about as well as the  
next one, and it was a matter of con-  
siderable importance that he should be  
able to recognize his surroundings in  
order to plan the line of escape from  
under that dangerous and hostile roof.

The consultation below could not last  
long.

Presently it would give way to action  
on the part of the delegates. Some  
would speed through the passages to  
give the alarm, and in all too brief a  
time the palace would be in an uproar.

It was very unfortunate that discov-  
ery should have followed their arrival  
at Jack's quarters.

Knowing how the guards would be  
doubled and every precaution taken to  
prevent their escape from the royal  
building, Larry would have been most  
abominably dejected over the outcome  
only for one thing.

This was a supreme faith in their  
guide.

As the mariner pins his fortunes upon  
the compass and the barometer, so he  
was ready to believe Kai Wang could be  
a second Moses to lead them out of the  
wilderness.

It was as though his prayer was  
answered.

How it was to be done was a matter  
that did not enter into Larry's philo-  
sophy, nor did he concern himself very  
much about it; the mind that had  
brought them through other difficulties  
must surely be equal to this task; and,  
besides, there was Dr. Jack to suggest  
new ideas.

It is wonderful how such perfect con-  
fidence takes possession of a true be-  
liever at times, and gives his spirit  
balm, even in the face of the most ap-  
palling conditions.

And Kai Wang certainly proved be-  
yond all peradventure that he was  
worthy of such trust.

When he had swept one glance around  
him the Chinaman smiled.

It was only a faint flicker that ap-  
peared upon his yellow face, but Dr.  
Jack, whose eyes had been riveted in  
that quarter, caught it, and a great  
wave of satisfaction swept over him.

Kai Wang knew where they were, and

was best able to understand, it might be  
set down as certain that the shrewd fe-  
male diplomat of the Chinese empire  
would not retire yet a while; and if Kai  
Wang could, through his own private  
resources, secure an interview, he might  
be able to present his case in such a  
strong light that she would grant his  
favor.

At any rate the said Kai Wang  
seemed full of assurance, possibly rely-  
ing on certain facts that were known  
only to himself and the eminent states-  
man now exiled to a survey of the  
troublesome Yellow River, and which  
secrets must prove of considerable im-  
portance to the Dowager Empress.

As for Larry, when he grasped the  
situation, and realized what a dashing  
bid for fortune the keen-witted Celestial  
meant to make, he could hardly catch  
enough breath to faintly exclaim:

"Hear, hear!"

It was not Kai Wang's idea to lose any  
time, though, as a Chinaman, he found  
it a difficult thing to cut matters short.

Dr. Jack speedily understood that  
they were to remain in this spot, await-  
ing his return.

If he came not when half an hour  
went by, they might grow anxious, but  
should wait twice that time ere making  
a move.

Should he finally fail to appear, Dr.  
Jack was to undertake to guide the ex-  
pedition according to certain directions  
he left; and, though hope of escape was  
rather slender, still desperate cases  
cannot wait upon circumstances.

Then he left them, and started upon  
his dangerous mission with as much  
sang froid as might have marked a  
pleasure jaunt to Tien-Tsin.

Ah, Kai Wang was indeed a most re-  
markable fellow, and had few equals in  
the Flowery Kingdom, where gracious  
phrases drop like precious pearls from  
the lips of her saffron-hued children  
and where the diplomats of Europe may  
well journey to pick up a few new  
points in their line.

When their courier had departed, our  
friends made all necessary preparation  
for a stay that might be long or short  
according to the favor of fortune.

Dr. Jack had been armed, and much  
of his lost strength seemed to be return-  
ing to him under the happy condition  
prevailing.

With his beloved wife nestled close a  
side, he had good reason to summon  
all his reserve powers to the front.  
Danger to Avis was quite enough to  
arouse the lionlike qualities for which  
he had always been distinguished, and  
throw him upon his mettle as a son of  
Mars.

The lantern had been extinguished.

While they waited for a signal that  
would convey the glad intelligence of  
Kai Wang's happy return from his  
momentous interview with the great  
Dowager Empress, they had no need of  
any illuminating agency.

Besides, such a condition of affair  
only added to the dangers with which  
they were surrounded, without affording  
any compensating advantage.

So Jack had begged Larry to "dous  
the glim," and they remained there in  
the corridor, awaiting the turn of for-  
tune's wheel.

Dr. Jack would have been the happiest  
man in China if Avis were only at the  
legation of the American or British  
Minister.

# THEN THEY ROARED.

Snooks was one of those conceited, make-believe bold hunters, and was always spinning his yarns about his experiences in Africa, and he generally wound up by saying he never yet saw a lion he feared. One night, after he had finished yarning, he was a little taken aback by one of his audience, who said: "That's nothing. I have lain down and actually slept among lions in their wild, natural state."

"I don't believe that. I'm no fool," said the bold hunter.

"It's the truth, though."

"You slept among lions in their wild, natural state?"

"Yes. I certainly did."

"Can you prove it. Where they African?"

"Well, not exactly African lions. They were dandelions."

# A NEW AMERICAN NOVEL.

A novel by Arthur Goodrich, entitled "The Balance of Power," is announced for early publication. It is the story of the loves of two friends for the same girl, with a gripping, vital struggle of every-day American life as a background, a story of high ideals and courageous optimism. The publishers of this book, The Outing Publishing Company, say that it "grips you in the beginning and sweeps you off your feet in the end," and they boldly prophesy that it will be one of the best selling books of the year.

# EUPHEMISM.

First Friend (on deck of ocean steamer, to sea-sick companion): "Have you dined, old man?"

Second Friend (faintly): "On the contrary."

Nearly all infants are more or less subject to diarrhoea and such complaints while teething and as this period of their lives is the most critical, mothers should not be without a bottle of Dr. J. D. Kellogg's Dysentery Cordial. This medicine is a specific for such complaints and is highly spoken of by those who have used it. The proprietors claim it will cure any case of cholera or summer complaint.

# CURIOUS BEQUESTS.

By his will a rich landowner named Bielou, who has died in Loennewitz, Saxony, leaves a large property to the military authorities, which, in case of war, is to be sold and two-thirds of the money given to the soldier who captures the first standard from the enemy, and the third part to the first soldier who captures a gun.

# JACK AFLOAT.

## A Cabin Boy's Experience With the Signal Halyards.

The sailor, mast-high and swinging at ease with the roll of the ship, is a sight too common to excite wonder. Yet that very familiarity with lofty places, that sure head and steady poise, often include in their history of development times of great stress and misery. Mr. Bullen, in his "Log of a Sea Waif," gives a description of his sensations when the masthead was still a point of dread. The author was then a cabin-boy on a ship bound for Bombay, when, one rough day, he heard his name called, and running aft, was met by the second mate.

He put a coil of rope in my hands and told me to reeve the signal-halyards in the mizzen truck. We carried extra long royal poles or bare extensions of masts above the highest point of rigging. Ours were sixteen feet long and the top was not much bigger than a man's wrist. They were crowned with flat pieces of wood the size of a cheese-plate, on one side of which was the sheave for signal-halyards.

I started aloft boldly enough, but when I reached the base of the pole and saw to what height its bareness towered above, I faltered. My heart failed as the staggering ship lurched and the sea roared one hundred and twenty feet below me. My head swam, and all strength left me. I sat some time with my legs clutched about the pole, just clinging, without power to move. A voice from the deck called up:

"Hurry up, there, with the halyards!" Although I felt that I was going to certain death, yet my fear of the mate was so potent I made another attempt. Pulling myself up, I shut my eyes and said a prayer. Trembling, but fighting against the benumbing weakness, I actually struggled to the top. Even now, when I think of it, a cold sweat starts out all over me. Opening my eyes, I thrust at the opening of the sheave with the end of the line. It was knotted, and would not go through.

I had tried and failed, and with a last flash of energy, I grasped the pole with both arms and slid down to the eyes of the royal rigging. There I clung a few moments, violently ill; then, feeling the bitterness of death past, I descended, walked up to the mate, and said:

"I've tried, and can't do it, sir; not if you kill me!"

The mate stared at me a moment, then turned away and gave the order to some one else.

The incident may seem trivial, but though I have faced death many times, I never felt such terror.

# DURATION OF LIGHTNING FLASH.

We possess as yet only pretty vague data as to the average duration of flashes of lightning. Faraday thought he could fix it at a second. Dufor claimed that the flashes of lightning were instantaneous, and that their rapid succession gave the illusion of one flash of a certain duration. Herr Schmidt has just been devoting himself to a series of observations, employing a disk of ten centimetres diameter, bearing upon a black ground a white cross, the arms of which were two millimetres across, the disk being set in motion by clockwork with a speed of fifty to sixty revolutions a second. At certain flashes the cross appeared a single time, very distinct; the duration of lightning was, therefore, inferior to the time of revolution of the disk, which would represent about the fiftieth of a second. In more numerous cases the cross appeared two or three times, or even more, but with a decreasing luminous intensity; the lightning had therefore lasted during several revolutions of the disk.

It was only a faint flicker that appeared upon his yellow face, but Dr. Jack, whose eyes had been riveted in that quarter, caught it, and a great wave of satisfaction swept over him.

Kai Wang knew where they were, and would be able to take up the game intelligently.

Nor did he waste any time. Unlike most Chinamen, this remarkable individual seemed to possess the Yankee trait of unceasing "push," which was one reason his business had outgrown that of rival image-makers.

Gladly they followed in his wake. It would be a strange procession to pass through the intricate corridors and halls of the great Imperial palace.

Dr. Jack had one arm thrown about the form of his beloved wife. How eagerly she clung to him, gazing up from time to time into his face, as though hardly able to comprehend as yet the wonderful blessing that had been vouchsafed her.

Then came Larry, while the stalwart Britisher brought up the rear.

Lord Rackett was prepared for foes, not knowing how soon some of the native soldiers whom they had left in the recent prison of the American promoter might see fit to climb up the ladder, just as they had themselves done, and follow at their heels, intent upon business.

These fellows were picked for their fighting qualities. The old Empress knew the value of such stock near her sacred person during the many changes apt to take place in Chinese politics, the most intricate under heaven, and understood by few foreigners.

Lord Rackett knew full well that should they come in contact with these defenders of the palace, he would find them entirely different from the cowardly Cantonese coolies with whom had occurred the battle on board the Russian plotter's floating junk.

He quickly became aware of the fact that their guide was leading them along the most lonely and seldom-used passage in the building.

This caused Plympton to suspect that there might be secret corridors not known to the general frequenters of the castle. He would be surprised at nothing in connection with such a venerable building, the very appearance of which breathed an air of mystery and enchantment that was considerably heightened by surrounding conditions.

When this had gone on for some little time Kai Wang suddenly stopped.

His manner indicated that it was his desire to have a little consultation, or "pow-wow."

"Illustrious son of the morning," he said, addressing Dr. Jack, directly, and his manner was most impressive, "thus far have we come without discovery. It is impossible to proceed farther without passing through the doors where heavy guards have been placed."

"That is bad, my good friend. I fear we shall have to make a rush for it, and as I have one very precious with me to guard against evil, I regret such a contingency very much," returned Evans, taking in a long breath.

"Most excellent comrade and friend, permit me to say that a thought has come into this most unworthy brain of mine. I have reason to believe I may be able to secure a magic talisman that will make our most desperate enemies as harmless as babes. That wonderful thing is the order of Her Most Gracious Majesty the Dowager Empress, now domiciled beneath this sacred roof."

Dr. Jack was not at all deceived.

He knew that Kai Wang and the faction he represented were at loggerheads with the party of the old queen, and that of her own free will she would never give him this wished-for pass.

Evidently the sagacious Kai Wang, who knew almost everything worth knowing, was so thoroughly at home in the royal palace that he could find the secret passage leading to the royal apartments of Her Highness.

With such an excess of excitement pervading the palace from causes political, the exact nature of which she herself

the corridor, awaiting the turn of fortune's wheel.

Dr. Jack would have been the happiest man in China if Avis were only at the legation of the American or British Minister.

The fact that she shared his danger kept his already overburdened nerves under a constant tension that must be experienced to be understood.

More than once, when half-muffled shouts came to their eager ears, he would press the dear girl closer to his heart, as the memory of other scenes of danger which she had shared in his company flashed into his mind.

A kind Providence had carried them through these past perils unscathed, but that was no indication the pitcher might not go once too often to the well. For her sake he counted the minutes as he had seldom done in his past life.

The half hour was long since up, and Kai Wang had not appeared.

Perhaps he had failed; perhaps even now his headless body was being borne away by those merciless janizaries who guarded the Dowager Empress.

It was a fearful thought, considering what it meant for them—for his gentle and brave Avis.

Dr. Jack, believing the time had come to act, was on the point of conferring with Plympton, when a sudden rush of light burst upon them, while at the same time loud and angry voices announced the coming of the palace guard, following the secret passage from the dungeon that had so recently held Dr. Jack.

# CHAPTER XXXIX.

The fierce shouts that announced the coming of the palace guard rang like the knell of despair upon the hearing of Dr. Jack.

He had not experienced one-half this dismay at the time of his own capture, for now his mind was distracted at the bare possibility of one he loved far better than life itself falling into the hands of the cruel enemy.

Of what avail was his rescue when it only doubled the disaster?

To add to the agony of the occasion, he could see no means of avoiding the impending meeting, since escape through flight seemed utterly out of the question.

There was only one apparent outcome. They must meet the issue squarely, as became brave and desperate men, and, fighting to the last, defend their lives against the enemy.

When it comes to this resolution, hope has undoubtedly fled from the human breast and only grim despair remains.

Something of the same feeling must have taken possession of the others, for none of them could be ignorant of the serious conditions that confronted them; yet with Kai Wang absent they knew not how a remedy might be found.

Jack's first and natural thought was of Avis; how she might be sheltered in some way from the danger that menaced them.

Unfortunately there was no means of throwing together even the most flimsy of barricades, since nothing of which such a defense could be constructed lay handy to their reach.

All she could do would be to stoop or kneel, and trust to the God of Battles to spare her from the deadly weapons of the enemy.

# SUPPORT

SCOTT'S EMULSION serves as a bridge to carry the weakened and starved system along until it can find firm support in ordinary food.

SCOTT & BOWNE, Chemists, Toronto, Ont. See and \$1.00; all druggists.

**Does fit  
Doesn't  
shrink**

The guards were coming with blazing torches and flashing weapons.

As the red glare lighted up the motley crew, Dr. Jack saw that among them were many of those fierce fighters with whom he had once before measured swords—the merciless Black Flags.

This was, however, but another link added to the chain of misery by which they were encompassed.

If death was to be their portion, what mattered such minor details as this? There would be a dreadful rush, a roar of battle, heaps of slain, and then—they would sleep well.

Only Avis! How fervently that man prayed she would know little of pain—she for whom he had many times in the past risked life and limb, and to save whom he would even now have willingly stood the tortures of the Inquisition.

Truly, there can come to man no keener agony on earth than the knowledge that one he loves is in mortal danger.

The three determined men, feeling that this promised to be their last stand, made ready to receive their foe.

Weapons? Thank Heaven they were abundantly supplied, because of the wisdom displayed by those who had arranged the raid; and all of them knew well how to use them.

Lord Rackett had dropped on one knee.

So his grenadier forefathers had awaited the charge on many a bloody field, from Bannockburn down to Waterloo and the Crimea.

It may be affirmed without danger of dispute that this scion of the house of Plympton faced the foe with just as steady nerves as ever his ancestors had displayed on other fields of valor.

Larry was between—Larry, whose stature could never be taken as an index to his courage, for within that small frame dwelt a heart of oak that would have done credit to a giant.

And the mob of soldiers came on, shouting as only Chinese fighters know how, making every hideous noise possible, doubtless with the double purpose of frightening those whom they sought, and at the same time scaring away divers evil spirits that might be haunting these passages of the palace so seldom used.

Dr. Jack hated to open the fight. He would have sacrificed much for an opportunity to arbitrate the matter, and, to save Avis, would willingly have given up all his hopes for the great railway concession.

But such a proposition would have fallen upon deaf ears if advanced under the present conditions, even if it could be heard above the frightful clamor.

These men of war were after blood, and nothing less would satisfy them.

Then the old fighting spirit crept over Dr. Jack. He could feel it coming—that strange, hot, feverish sensation that made his nerves tingle and his fingers clutched weapons eagerly, while his teeth closed fiercely as his eyes emitted a furious gleam.

So Crockett and Travis stood at the never-to-be-forgotten Alamo, piling the

#### CHINESE STUDENTS IN JAPAN.

Chinese students are still going to Japan in ever increasing numbers, at the rate of 500 or 600 a month. The total number has already reached over 15,000. Several schools which have been recently started in Tokio are specially for these students. The strictest measures are now being adopted by the Chinese Minister at Tokio and the Japanese authorities to control these young men, the Minister having given instructions to all that they must record their home address and their ancestry unto the third generation as well as their Japanese address, so that he may at any time be able to deal with them individually if occasion arises; and the Japanese have them closely under police surveillance.

#### BABY NEARLY DEAD.

Mrs. John Cuddy, Killaloe Station, Ont., says:—"My baby was so nearly dead that I had to place my ear close to his breast to know that he was breathing. He was in this condition when I first gave him Baby's Own Tablets and I hardly dared hope that they would save him. But they helped him almost at once, and soon made him a well child. He is now two years old and weighs forty-five pounds and has never known a sick day since I first gave him the Tablets." Baby's Own Tablets cure constipation, indigestion, diarrhoea, teething troubles, break up colds, expel worms and give little ones natural healthy sleep. And the mother has a guarantee that this medicine contains no opiate or poisonous soothing stuff. Sold by all medicine dealers or sent by mail at 25c a box by writing The Dr. Williams' Medicine Co., Brockville, Ont.

#### AWFUL PREDICAMENT.

"Why were you so nervous when you were giving your evidence in the witness box?" asked Rose.  
"The man who was cross-examining me was one to whom I was once engaged and threw over. Oh, it was terrible! I was afraid he would ask me my age out of spite, and I had never been on oath before."

Mother Graves' Worm Exterminator has the largest sale of any similar preparation sold in Canada. It always gives satisfaction by restoring health to the little folks.

"Want," was the answer. "How was that, pray?" "Well, I wanted another man's watch. He wasn't willing I should have it, and the judge wants me to stay here five years."

**Sunlight Soap is better than other soaps, but is best when used in the Sunlight way. Buy Sunlight Soap and follow directions.**

"Do you think that man who had a needle in his body for eighty years could have enjoyed anything like good health?" "No, I imagine he would feel only sew-sew."

A Pill for Generous Eaters.—There are many persons of healthy appetite and poor digestion who, after a hearty meal, are subject to much suffering. The food of which they have partaken lies like lead in their stomachs. Headache, depression, a smothering feeling follow. One so afflicted is unfit for business or work of any kind. In this condition Permelee's Vegetable Pills will bring relief. They will assist the assimilation of the aliment, and used according to direction will restore healthy digestion.

"Did you hear there was a skeleton in Smith's family?" asked Jones. "You don't say so!" exclaimed his wife. "Where?" "Inside of Smith," replied Jones. And then he chuckled idiotically.

# 640 ACRES PRAIRIE WHEAT .....LAND..... FOR SALE

Near Neudorf, Saskatchewan. A great bargain. \$12 per acre. Close to two railroads. Branch line of Grand Trunk Pacific surveyed almost through the property.

BOX 21, 73 WEST ADELAIDE STREET, TORONTO.

### General Agent Wanted.

To take charge of your County. Apply to Imperial Company, Jay St., Galt, Ont.

**MEN—\$8.00 WILL TAKE YOU TO** Europe from New York; agent wanted in your city. Boston Shipping Co., 18 Norfolk street, New York City.

### FOR SALE.

320 acres in the Knee Hill Valley, near Innisfail, one of the best stock, grain and dairy farms in Central Alberta; about 125 acres under cultivation, 30 acres tame hay, first-class springs, good wells, buildings and fences; about 10 acres poplar grove; half mile from post-office, store and blacksmith shop; good school on land; government creamery wagon collects cream from farm; price \$15 per acre. H. W. HUNT, Calgary, Alberta.

**TWENTY THOUSAND ACRES IMPROVED** and unimproved lands, in the Penhold fall wheat district; from eight to twenty dollars per acre; correspondence solicited. A. J. STROUD, Penhold, Alberta.

**Fruit Growers, Attention**

It is only necessary to read the testimonials to be convinced that Holloway's Corn Cure is unequalled for the removal of corns, warts, etc. It is a

that strange, hot, feverish sensation that made his nerves tingle and his fingers clutch weapons eagerly, while his teeth closed fiercely as his eyes emitted a furious gleam.

So Crockett and Travis stood at the never-to-be-forgotten Alamo, piling the dead Mexican soldiers breast high around them; so brave Anglo-Saxon heroes have stood always, battling against overwhelming odds, faces to the foe, and dying as they lived, going down with colors flying.

(To be continued).

# WILL HAUL GRAIN NEXT SEASON.

**Rapid Progress Being Made in the Construction of G. T. P.**

"Canada will have a remarkable railway when the Grand Trunk Pacific is built," is the statement which was made recently by Mr. Collingwood Schreiber, chief consulting engineer to the Canadian Government.

"I have just come from the West, where I have been inspecting the portion of the line from Winnipeg to Edmonton. I drove the entire distance of the route from Portage la Prairie to Edmonton.

"The surveyors have found a splendid line. It is practically straight, and the maximum grade to the eastward is four-tenths of one per cent., and westward five-tenths.

"As the Grand Trunk Pacific people expect to do about as well through the mountains from Edmonton to the Pacific, and as the national transcontinental surveyors have practically secured these grades all the way from Winnipeg to the Atlantic, there is no doubt the line will be the best of all the transcontinental lines, and capable of the most economic administration and handling the greatest amount of traffic at a minimum cost.

"By autumn there will be over a hundred miles of the line west of Winnipeg railed, and there is little doubt the road will participate in the hauling of the crop next year. The settlers are going in with the road. Their shacks were seen dotting the prairie for the whole distance from Portage la Prairie to Edmonton.

"The company has sixteen surveying parties working to the west of Edmonton through the mountains. The contractors are encountering some difficulty in getting labor. However, there is no doubt the road will be built in a very short time."

# THE GREAT NORTH COUNTRY.

Nimrod was a mighty hunter, but had he hunted in the "Highlands of Ontario," he would have been a mightier one. Nimrod hunted for glory, but those who go into the several districts of Northern Ontario hunt for game. Those Indians who made the first canoe of birch bark long ago, were our greatest benefactors. The children of those Indians knew the canoe, and they know how to use it, and they know just where the moose and deer are to be found. They will be the best guides you ever had. The "The Muskoka Lakes," "Lake of Bays," "Maganetawan River," "French River," "Temagami," "Georgian Bay" and several other districts in this Great North Country abound with deer and moose. The best hunting on the American Continent is offered here. Write the undersigned for copy of "Haunts of Fish and Game," an illustrated publication issued by the Grand Trunk Railway System, giving all information, game laws, maps, etc., to G. T. Bell, General Passenger Agent, Montreal.

# THE DUCHESS' DOG.

The Duchess of Newcastle has some sixteen special canine pets, which roam about the house, and her particular favorite has a trick, when it fancies itself all neglected, of going up to an Indian drum which hangs in the hall, and busily drumming with its forefoot until it obtains the desired attention.

"Did you hear there was a skeleton in Smith's family?" asked Jones. "You don't say so!" exclaimed his wife. "Where?" "Inside of Smith," replied Jones. And then he chuckled idiotically.

The manufacturers number of the Winnipeg "Commercial" published by the Hugh C. MacLean Company Limited, of Winnipeg, Vancouver, Toronto and Montreal, is exceptionally brilliant and reflects great credit on its publishers. Every manufacturer in Canada should see this publication.

Youngster (triumphantly): "Father, I am not sitting on the lowest form now." Parent: "That's right! Here's ten cents for you. But tell me how you came to pass on to the higher form." Youngster: "The lowest form is being painted."

It is a Liver Pill.—Many of the ailments that man has to contend with have their origin in a disordered liver, which is a delicate organ, particularly susceptible to the disturbances that come from irregular habits or lack of care in eating and drinking. This accounts for the great many liver regulators now pressed on the attention of sufferers. Of these there is none superior to Parmelee's Vegetable Pills. Their operation though gentle is effective, and the most delicate can use them.

# THE KAFFIR TELEGRAPH.

**How Messages Are Sent From One Chief to Another in Zulu Land.**

Mention has been frequently made during the recent native troubles in South Africa of the "Kaffir telegraph," the strange system by which news of any importance is communicated from one extreme of the native territories to the other with almost incredible rapidity, and the working of which, it has been stated, is still a mystery to the white man.

This latter statement is scarcely correct. Numbers of up-country residents, traders, and the like are well acquainted with many of the ways in which communication passes from tribe to tribe.

When a chief receives a message he selects a fast runner, and gives him the words, and instructs this man to run in a given direction as fast as he can—horses are never used in this work—until he is exhausted. When he can run no longer he enters the nearest kraal, selects the chief man, gives him the words, and this man in his turn picks out his fastest runner, who at once starts off until he also is exhausted, when he acts in a similar way.

It is not an enviable task carrying a chief's message at night, for the native is always suspicious of cattle thieves. Assegais and guns are handy, and the man who dashes past a kraal in the dark may possibly come to a sudden stop with an assegai or a bullet through him; but, failing this extreme method he is liable, when near the borders, to be seized by the native police as a suspicious character. With relays of runners like this a hundred miles can be covered in twenty-four hours.

The system of "calling messages" is largely used by the natives in war time. The air in South Africa is so dry that sound carries a very long way. Native messengers are stationed at the tops of hills to call messages to each other. It is no exaggeration to say that they can make themselves heard and carry on conversation a quarter of a mile distant; but for obvious reasons they cannot be stationed so close together, so a system of signalling by smoke is carried on at night, but this means is not fol-

# EXIT CRUSOE'S ISLAND.

**The Famous Island Disappears From the Map.**

A telegram from Lima, Peru, states that the island of Juan Fernandez, off the Chilean coast, is reported to have disappeared in consequence of the heavy tidal wave which followed the earthquake. The news, which has not been confirmed, was brought to the mainland by the captain of a steamer.

The island of Juan Fernandez, known as "Robinson Crusoe's Island," is about 150 miles from the coast of Chili, and is thirteen miles long by four miles wide. A Chilean settlement of about forty huts existed for some years on one side of the island.

Robinson Crusoe thus describes his first impressions of the island:—

"... There was a hill not above a mile from me, which rose up very steep and high, and which seemed to overlook some other hills which lay as in a ridge from it northward. I travelled for discovery up to the top of that hill, where, after I had with great difficulty and labor got to the top, I saw my fate, to my great affliction—namely, that I was in an island, environed every way with the sea, no land to be seen, except some rocks which lay a great way off, and two small islands, less than this, which lay

about three leagues to the west.

"... I also found that the island... was barren, and as I saw good reason to believe, uninhabited, except by wild beasts, of which, however, I saw none."

The island was first discovered by Juan Fernandez, a Spanish pilot, in 1563. Alexander Selkirk, the son of a Scotch shoemaker, who ran away to sea at the age of nineteen was put ashore on the island in 1704, after quarrelling with the captain of his ship, the Cinque Ports. He remained there for nearly five years in what he described as "pleasant exile."

On returning to England, Selkirk was visited by Daniel Defoe, who journeyed from London to Bristol for the express purpose of seeing him. Selkirk placed all his papers in Defoe's hands, and the story of Robinson Crusoe was the result.

The island was frequently visited in late years, and in 1868 the officers of H.M.S. Topaz erected a tablet in memory of Selkirk near the summit of the hill where he watched for passing ships.

Nothing makes a man feel more important than his ability to answer the questions of a small boy.

"If a good face is a letter of recommendation, a good heart is a letter of credit."—Bulmer.

# Dear Mother

Your little ones are a constant care in Fall and Winter weather. They will catch cold. Do you know about Shiloh's Consumption Cure, the Lung Tonic, and what it has done for so many? It is said to be the only reliable remedy for all diseases of the air passages in children. It is absolutely harmless and pleasant to take. It is guaranteed to cure or your money is returned. The price is 25c. per bottle, and all dealers in medicine sell.

# SHILOH

This remedy should be in every household.

# DOOMED BY TERRORISTS

## List of Those Against Whom Death Sentences Have Been Passed.

A despatch from St. Petersburg says: Nearly every minister, courtier and army officer whose name was even indirectly connected with the repressions and punitive actions of the last year is now under sentence of death at the hands of the Terrorists.

After M. Stolypin, who heads the list and whose life is not worth an hour's purchase, the most important condemned man is General Alexis Ignatieff, the leader of the so-called "Camarilla" or "Star Chamber," which, though it has no official status, meets regularly and forces its counsels upon the Czar.

Ignatieff is a nephew of the Count Ignatieff, popularly known as "The Father of Lies," who negotiated the San Stefano treaty. Alexis Ignatieff is a ferocious reactionary and anti-Semite. His name immediately comes up whenever dictatorship is suggested.

Next in importance is M. Durnovo, late Minister of the Interior. He lived in Interlaken under the name of Miller, with the result that an innocent Frenchman named Muller was shot dead by a woman Terrorist. Durnovo is corrupt, uneducated and brutal. He is the inventor of "punitive expeditions" against disaffected centres of population.

Gen. Rennenkampf became known during the late war with Japan, where he commanded the Cossacks without the least success. His offence is that he led a punitive expedition along the Siberian Railway, shooting people without trial wholesale. He took innocent women and even school girls as hostages in his "armored train," and threatened to shoot them if any attempt was made against his safety. The armored train consisted of a saloon and four prison vans, which were packed full of men and women of all classes, from the curator of Tomsk University downward.

Gen. Meller-Zakomelsky has also received a death sentence for offences similar to Rennenkampf. At Khilka he shot eleven men and boys without trial or enquiry.

Governor Kurloff of Minsk, has been sentenced for organizing massacres of Jews.

### GIRL SHOT WARDERS.

Lukheria Trostoff, a girl of 18 years, escaped last week from Kazan City Prison, after killing three warders and wounding a fourth. Mile. Trostoff's associates outside the jail made a tunnel under the street over three feet in diameter, and finally worked their way to the floor of the girl's cell. When, at night, she attempted to escape, the roof of the tunnel fell in, leaving a gap in the roadway. Warned from outside, the warden on duty rushed into the cell, and not seeing the prisoner, fired all the shots of his revolver into the tunnel. When the six bullets were spent, Mile. Trostoff, covered with earth, emerged from the tunnel and shot the warden through the head. Two other prison officials who came in without lights she also shot dead, putting a bullet into the leg of a fourth, and escaped into the town.

### DISARMED THE POLICE.

Grave agrarian disorders have broken out in the province of Viatka, the centre of disturbances being the important district of Malbush, with a population of over 100,000, where the inhabitants of seventy villages are reported to have joined in the uprising, have disarmed and expelled the police, and are pillaging and destroying the residences of the land-owners, and devastating the

misunderstanding arose over the signals for passing, so the two steamers came together with sufficient force to cut a hole into the Maud several feet deep near the hatchway. Twenty-five passengers were aboard the Maud, but with the exception of Barrett all were safely transferred to the Ottawan. The cargo consisted of 8 horses, 30 cattle, 150 sheep and 200 chickens, all of which were lost. The river where the accident occurred widens out into what is called the Lake of Two Mountains. The Maud had been engaged in the Ottawa River trade for twenty-five years. She is valued at \$10,000, and will probably be a complete loss.

### SHOT A DETECTIVE.

#### A Desperate Burglar Captured in Montreal.

A despatch from Montreal says: In a desperate attempt to escape from a store that he was robbing on Sunday morning, Robert Walker, a ticket-of-leave man from St. Vincent de Paul Penitentiary, shot and seriously wounded Detective Le Huquet, and was himself knocked senseless by a blow from a pickaxe handle in the hands of Detective O'Keefe. His skull is fractured and he is not expected to recover. A companion who assisted him in the burglary escaped, and has not yet been captured. Both Detective and burglar had to be taken to the hospital in an ambulance. Walker and his companion had been seen loitering around the premises of the Starke Hardware Company near the waterfront, and as their purpose was suspected, a warning was sent to police headquarters. Detectives Le Huquet and O'Keefe were immediately sent out, and when they arrived at the Starke warehouse they found that a pane had been removed from a back window. Entering, they heard a conversation upstairs, and so waited below for the men to come down. Presently they came, and as they reached the bottom of the stairway Le Huquet stepped out, and, levelling a revolver, called on the burglars to hold up their hands. Walker replied with a shot. The first bullet struck Le Huquet's pistol arm at the elbow, disabling it. The second took effect in the right side of the neck, and the third in the left side. None of them is likely to prove fatal. O'Keefe was carrying a pick-axe handle, and he was a few paces away. Three shots were fired before he could strike a blow. His first stroke, however, sent Walker sprawling, and meantime the other burglar escaped. Walker is only nineteen years old. He has already served a considerable time in prison.

### TEN MILLION MARKETED.

#### Record Number of Bushels of Wheat Handled by C. P. R.

A despatch from Winnipeg says: The announcement was made on Thursday by the Canadian Pacific that this year there have been delivered to the elevators on the lines of the company and loaded direct on cars the large total of over ten million bushels of grain. Of this very large total about half a million bushels have been of grains other than wheat.

The total receipts have been considerably over ten million, however, the receipts of wheat alone being only 24-

## THE WORLD'S MARKETS

### REPORTS FROM THE LEADING TRADE CENTRES.

#### Prices of Cattle, Grain, Cheese and Other Dairy Produce at Home and Abroad.

Toronto, Oct. 2.—Flour—Ontario wheat 90 per cent. patents are quoted at \$1.75 in buyers' sacks outside for export. Manitoba first patents \$1.40; second patents, \$1.30, and strong bakers' \$1.80, Toronto.

Bran—The market is steady at \$14.50 in bulk outside. Shorts are quoted at \$18 to \$18.50 outside.

Wheat—No. 2 white offered at 72½¢ outside, with 71½¢ bid. No. 2 red Winter offered at 72½¢ outside, with 72¢ bid on main line. No. 2 mixed offered at 71½¢ outside, without bids. No. 1 Manitoba hard, 79½¢ bid, Point Edward with sellers at 80¢ track, Port Huron. No. 1 Northern offered at 79½¢ track, Port Huron, with 79¢ bid, Owen Sound.

Barley—No. 2 wanted at 48½¢ for 5,000 bushels on a 5c rate to Toronto. No. 2 extra offered at 48½¢ outside, with 46½¢ bid, while 47c was bid on a 5c rate to Toronto. No. 3 offered outside at 45½¢, with 45¢ bid.

Oats—Five cars of No. 2 white oats sold at 35c on a 5c rate to Toronto, and five cars at 35c October shipment on a 5c rate to Toronto; 34c bid on main line.

Corn—No. 3 yellow, American, offered at 55½¢ Toronto, without bids.

Rye—No. 2 wanted at 65c outside, without sellers.

Peas—No. 2 wanted at 75c outside, without sellers.

### COUNTRY PRODUCE.

Beans—Hand-picked selling at \$1.75; \$1.80; and primes at \$1.60 to \$1.70.

Honey—Strained honey quoted at 10 to 11c per lb. and combs at \$2 per dozen.

Hops—New quoted at 20c, and some sales of choice reported at higher figures.

Hay—Car lots of No. 1 timothy are quoted at \$9.50 to \$10 on track, Toronto, and No. 2 at \$8.

Straw—\$6 per ton.

Potatoes—They are quoted at 75 to 85c per bag in quantities.

Poultry—Turkeys, fresh killed, 12 to 14c; chickens, 9 to 11c per lb. alive, ducks, alive, 10 to 11c per lb.

### THE DAIRY MARKETS.

Butter—Pound rolls are quoted at 21 to 22c; tubs, 18 to 20c; large rolls, 18 to 20c. Creamery prints sold at 24 to 25c, and solids at 22½ to 26c.

Eggs—Good stock brings 19c per dozen, and splits 13c.

Cheese—They are quoted at 13½ to 14c, the latter for twins.

### HOG PRODUCTS.

Bacon—Long, clear, 12½c per lb. in case lots; mess pork, \$22 to \$22.50; short cut, \$24.50.

Hams—Light to medium, 16c; do heavy 15c; rolls, 12½c; shoulders, 11½ to 12c; backs, 17½ to 18c; breakfast bacon, 15 to 16c.

Lard—Tierces, 11½c; tubs, 11½c; pails 12c.

### BUSINESS AT MONTREAL.

Montreal, Oct. 2.—Grain—Holders of oats are loth to accept recent figures, and are demanding a further advance. Buyers are conceding 38c for No. 4 store, 39c for No. 3, and 40c for No. 2, and sellers are asking firm prices. Flour—Manitoba spring wheat, \$4.40 to \$4.50; strong bakers', \$3.90 to \$4; Winter wheat patents, \$4 to \$4.10; straight rollers, \$3.80 to \$3.90; do in bags, \$1.75 to \$1.80; extras, \$1.50 to \$1.60. Feed—The condition of the market for mill-feed is unchanged; demand continues at firm prices, but supplies are

## Fashion Hints.

### BLOUSES WITH YOKES.

There has been a definite change since last year in the position blouses occupy, brought about by the vogue of whole costumes in place of last year's stunning suits, relieved by the sheerest and most beautiful of blouses. No longer is the blouse the inevitable accompaniment of any and every costume, except the true "dress" affairs.

But the blouses that are left to us have been found plenty of use for. Most of them have yokes, introduced perhaps as the only part of the hand embroidery that is on ninety-nine out of a hundred of them. And the majority have the embroidery concentrated on the yoke, with sprays scattered upon the rest of the blouse, sleeves as well as both front and back.

The simplest treatment of all in making is to finish off the yoke with a small scallop—the same wee, simple kind that is in evidence upon nine out of ten pieces of lingerie that Paris sends over. The blouse itself is tucked a couple of inches below the edge, the tucks made so fine that in spite of their number the fullness is controlled. Deep cuffs may end at the upper edge in the same sort of a scallop, from which the puff of the sleeve spreads out in tucks like those just below the yoke.

Quite effective blouses are made with lace taking the place (or minimizing the work, at least) of hand embroidery. When the former is the case the lace wanders down the front in some novel fashion.

If just a touch of embroidery is desired, the blouse is usually quite elaborately trimmed with lace, the insertion disposed so that there is just a small space in front, high on the yoke, with, perhaps, two even smaller spaces upon the back, or upon the shoulders extending over onto the back. Upon these spaces is embroidered a delicate spray usually, although sometimes a heavy-headed rose, with a bit of exquisite lace for the centre, is used instead. Whatever the motif, it is invariably repeated upon the cuffs.

Such a sleeve seems more individual—more as though the whole scheme of the making were planned before even a stitch of the embroidery was taken. Just a small motif on a cuff savors too much of the patterns which come all ready for making up—some of them rich enough, but many of them as nearly alike in their general style as if they were machine-made and cut off the same piece.

The collarless blouse is no longer seen, although the collarless dress—or a gown cut so slightly low as to seem little more than collarless—is in high favor with the younger element, who don such gowns for a dozen occasions where in seasons past nothing but a high-necked gown was permissible.

And there is very little blousing in front, the idea being to get the effect of a loose blouse, while in reality every scrap of fullness is carefully considered and the blouse fitted with far more care than even those boasted that came out to wear with the tight-fitting tailor suit of a year ago.

Black gowns, most of them of spangled gauze, are much favored for evening wear.

### LONGER SKIRTS.

With the dressier sort of suits have come out some that are veritable costumes, the waist worn with them is definitely a part of the suit that the impression of unity is sharp and distinct

over 100,000, where the inhabitants of seventy villages are reported to have joined in the uprising, have disarmed and expelled the police, and are pillaging and destroying the residences of the land-owners and devastating the country. Details are difficult to obtain, but it is rumored at Viatka that the administrative police, chiefs in the Malnush district and eight of their subordinates have been killed. The excesses began September 20, with a riot over the enrollment of army reserves for their autumn services.

Disorders have also broken out in the adjoining district at Chistopol, in Kazan province.

#### POISON FOR POLICE.

A despatch from Moscow says: A man engaged a policeman in conversation on Tuesday, and gave him a pear. After eating it the policeman became dangerously ill, poison having been inserted in the fruit.

An unsuccessful attempt was made at Helsinki on Tuesday to blow up the police reserve barracks. One man was slightly injured. There is no clue to the criminals.

#### DISORDERS ARE RIFE.

A despatch from St. Petersburg says. Further disquieting information regarding the agrarian situation comes from the Provinces of Saratov and Tambov and the lower Volga region, where serious disorders are anticipated when the recruiting season opens in October. The populations of many communes have adopted formal resolutions discarding the authority of the police and clergy, the rural police are resigning in great numbers, land owners are disposing of their estates at any sacrifice and land values have dropped from \$80 to \$18 per acre. Details of the uprising at Malnush, Viatka Province, are difficult to obtain, but the peasantry of the Village of Knagorodsk have disarmed the police and proclaimed autonomy.

#### STOENSEL LEAVES ARMY.

Information was given on Thursday that Lieut. Gen. Stoensel, who commanded the Russian forces at Fort Arthur, on Thursday submitted his resignation from the army. It is understood that it will be accepted. The resignation is said to have been due to the initiative of Emperor Nicholas, who expressed his aversion to any further discussion of the subject in open court.

#### ANOTHER PLOT AT PETERHOFF.

A despatch to the London Times from St. Petersburg says that another plot has been discovered at Peterhoff against the life of the Czar. A mysterious lady was conveyed by a strong escort to the fortress of St. Peter and St. Paul on Wednesday night.

#### SUNK IN OTTAWA RIVER.

Three Persons were Drowned on the Steamer Maud.

A despatch from Montreal says: Three lives were lost by a collision between the steamers Maud and Ottawa opposite Hudson, on the Ottawa River, about 3.30 on Thursday morning. The dead are:—Maggie Benson of Oka, stewardess; B. Pawley of Lewis, engineer, and a passenger named Barrett of Montebello. The Maud was so badly damaged that she sank within a few minutes after the accident occurred. An idea may be formed of how quickly the water engulfed her from the fact that the engineer came up on deck to see what had happened, and then hurried back to get some personal effects. He was not seen again. Barrett also appeared on the deck, but he rushed below to loosen a horse, and was caught. The stewardess mistook her way in the darkness and fell into a hole caused by the wreckage, and met a terrible fate, going headlong into the midst of the livestock.

The Maud was owned by the Ottawa Navigation Company and the Ottawa by the Ottawa Forwarding Company. The former was coming down the river and the latter going up. Apparently a

very large total about half a million bushels have been of grains other than wheat.

The total receipts have been considerably over ten million, however, the receipts of wheat alone being only 24,000 bushels short of the ten-million mark. The exact figures for the season so far are: Wheat marketed, 9,976,000 bushels, other grains, 509,000 bushels.

The wheat movement, nevertheless is greatly restricted owing to a shortage in cars. All railroad companies in the Canadian West are completely taxed to handle ordinary freight, let alone grain traffic. The wheat is in the country, but owing to lack of transportation facilities it cannot be forwarded to the lake front. The companies confess that they are unable to adequately handle the present volume of grain traffic.

#### INCREASE IN IMMIGRATION.

Returns from July Indicate Considerable Advance.

A despatch from Ottawa says: Immigration into Canada for the month of July shows a considerable increase over the immigration for July, 1905. There arrived through ocean ports, 13,207, an increase of 4,096 over the arrivals for July, 1905; and from the United States, 4,569, an increase of 1,836. Thus the total arrivals were 18,176, as against 12,244 in July last year.

The total number of homestead entries during the month was 4,174, an increase of 423. Of the total number of homesteaders, 742 were Canadians from Ontario, 79 from Quebec, 97 Canadians returned from the United States, 1,212 Americans, 625 English, 128 Scotch, 55 Irish, and 210 Hollanders.

Of the 1,300 homesteaders from the United States, 303 were from North Dakota. There was a decrease of 320, 920 acres in the area patented during the month, as compared with July, 1905.

#### KING AT ABERDEEN.

Performs Ceremony of Opening College Amid Great Enthusiasm.

A despatch from London says: King Edward, accompanied by Queen Alexandra on Thursday opened the new college at Aberdeen. The city was magnificently decorated and visitors from foreign lands were unanimous in declaring that they had never seen anything to equal the appearance the city presented. Their Majesties were received by the Lord Provost and magistrates. The former, after presentation, handed the keys of the city to the King, and then presented Lord Strathcona, the chancellor, and other officials of the college. Their Majesties were enthusiastically received en route to the college, where the Chancellor and Lord Rector received them. The King said it gave him much pleasure to open the new buildings for the promotion of scientific and higher education. Lord Strathcona then presented a gold key to his Majesty, who declared the buildings open, amid intense enthusiasm.

#### NO LET-UP TO IMMIGRATION.

During Past Six Months 100,000 Have Entered Canada.

A despatch from Montreal says: Immigration towards Canada continues heavy. On Friday no less than 2,250 immigrants passed through Montreal on their way West. They crossed the ocean in the Empress of Ireland, the Canada, the Tunisian, and the Montrose. Many of them were accompanied by their wives and children. The fact that immigration towards the Dominion continues with such unabated vigor comes as a surprise to both the steamship and railway officials. Nothing like it has been known before. During the past six months it is computed that fully 100,000 Britons and Europeans have taken up their residence in the Dominion. Of this number 60,000 have been taken to Western Canada over the C.P.R. Thousands have found homes in Ontario, Quebec, and the Maritime Provinces.

wheat patents, \$4 to \$4.10; straight rollers, \$3.80 to \$3.90; do in bags, \$1.75 to \$1.80; extras, \$1.50 to \$1.60. Feed.—The condition of the market for mill-feed is unchanged; demand continues good at firm prices, but supplies are still scarce; Manitoba bran in bags, \$20; shorts \$23 per ton; Ontario bran in bags, \$19 to \$19.50; shorts \$22 to \$22.50; milled mouille, \$21 to \$25 per ton, and straight rollers, \$28 to \$29. Provisions.—Barrels short cut mess \$22 to \$24; half bbls., \$11.75 to \$12.50; clear fat backs, \$23.50; long cut heavy mess, \$30.50; half barrels, \$10.75; dry salt long clear bacon, 12½ to 12½c; barrels plate beef, \$1 to \$1½; half bbls do., \$6.50 to \$7; barrels heavy mess beef, \$11; half bbls. do., \$6; compound lard, 8 to 9½c; pure lard, 11½ to 12c; kettle rendered, 12½ to 13c; hams, 14½ to 16c; breakfast bacon, 15½ to 16½c; Windsor bacon, 16½c; fresh killed abattoir dressed hogs, \$9.75 alive, \$6.75 to \$6.90 per 100 lbs. Eggs.—About 21 to 21½c; No. 1 candied, 18 to 18½c. Butter.—Choicest creamery, salted and unsalted, 23½ to 24c; medium grades, 22½ to 23½c. Cheese—Ontario, 13 to 13½c; Quebec, 12½ to 13c.

#### UNITED STATES MARKETS.

Milwaukee, Oct. 2.—Wheat—No. 1 Northern, 79 to 81c; No. 2 Northern, 75 to 76c; Dec., 75c asked. Rye—No. 1, 6½ to 6¾c. Barley—No. 2, 55c; sample, 38 to 54c. Corn—No. 3, cash, 46½ to 46¾c; Dec., 43½c. St. Louis, Oct. 2.—Wheat—Cash, 73c; Sept., 70½c; Dec., 72½c; May, 77c.

#### LIVE STOCK MARKETS.

Toronto, Oct. 2.—Trade was active without any special features at the Western Market to-day.

Exporters were offered in limited numbers. Quotations ranged from \$4.30 to \$4.90, but cattle which would sell at the higher figure were hard to find.

Butchers' cattle were in fairly active demand. Choice picked butchers', \$4.35 to \$4.50; medium heavy butchers', \$3.65 to \$4.20; mixed lots and cows, \$1.75 to \$3.50; fat cows, \$3.30 to \$3.50; common, \$2 to \$3.10 per cwt.

Good stockers were quoted at \$2.75 to \$3.25; feeders, 1,000 to 1,200 lbs. at \$3.25 to \$3.50; short-keeps, \$4.15 to \$4.50; feeding bulls, 1,000 to 1,200 lbs. \$1.75 to \$2.50 per cwt.

Lambs sold at \$5.90 to \$6.10; ewes at \$4 to \$4.50; bucks at \$3 to \$3.50. Calves were steady to firmer, at \$3.50 to \$8 per cwt.

The market was steady to firm for milk cows, at \$25 to \$55 each.

Hogs were firmer and unchanged at \$6.50 for selects, and \$6.25 for lights and fats.

#### TO ERADICATE DISEASE.

New Regulations Regarding Cattle in Sections of New Provinces.

A despatch from Ottawa says: An order-in-Council has been passed establishing new regulations with a view to eradicating mange in cattle in the infected districts of Alberta and Saskatchewan. These provide that all cattle from the district consigned to Winnipeg or points east must be accompanied by an official certificate of health and be inspected in Winnipeg. The same must accompany cattle bound west or south unless shipped thither for immediate slaughter.

#### UNHAPPY PHYSICIANS.

Incomes of English Doctors Have Fallen Off 25 Per Cent. Since 1900.

A despatch from London says: According to The British Medical Journal, the incomes of English doctors have fallen off 25 per cent. since 1900. Among the causes named for the falling off is the gradual dying down of the epidemic of influenza, which caused 19,000 deaths. There has been a subsidence of 1,900 in other epidemic sicknesses, and the decrease of winter ailments is attributable it is thought, to the mildness of recent winters.

#### LONDER SKIRTS.

With the dressier sort of suits have come out some that are veritable costumes, the waist worn with them so definite a part of the suit that the impression of unity is sharp and distinct.

The skirts of suits are fitted smoothly about the hips, the circular skirt remaining the favorite this fall, as it did last, only this year's circular skirt shows the same down front and back, stitched and even welled to emphasize the fact that there is a seam.

Plenty of them—almost all of the dressier type, in fact—are long, so long that they must be held up in the street.

But you'll never find a woman resenting that! There is nothing in fashions so altogether womanly and graceful as a trailing skirt, and never a woman who wouldn't cheerfully carry a skirt for a mile or two for the exquisite pleasure of dragging that long sweep of material after her over softly carpeted floors.

Jackets have grown shorter, the longest reaching about midway between hip and knee—that length, by the way, was seen on only a few of last year's suits, the ones which were really a year ahead of fashions. But beware of that length if you are short and generally "dumpy"—almost any other figure can wear it, and a tall, slim woman is at her best in it.

Of course, walking suits have the short skirt, which in nine cases out of ten is circular, like the longer ones. But, after all, longer skirts are gaining in favor more and more every day.

Of course it is a little early to "count the chickens," but this seems to be the unanimous opinion at the present date, the question of hats, tailor things, furs and colors being about settled, though the "grande toilette" and evening dress revelations by Paquin, Doucet, Worth, Armand, Dutilleul, Perduou et Cie, are none the less eagerly awaited.

Hats will be larger, with wide, sweeping brims and a normal way of resting on the head. Though there is still a slight bandeau, with tuille arranged in the now time-honored way, its office is more to serve as a "cache-peigne" than to tilt the hat. What tilt there is forward, so that the thin, flat brim describes a beautiful circle above the brown.

As usual, the French idea of lightness comes first in constructing a hat. Because of their size, many of the best milliners fashion their brims merely of enough layers of tuille to make them opaque. These are stretched flatly over the wire frame.

As might be imagined from such a construction, little more than the edge of the brim is visible, the full tan of shanter crown of velvet or silk covering it on top, while beneath the puffed hair and fluffy tuille of the bandeau fulfill the same office.

The princess gown is still in high favor, though mostly with the fortunate possessors of faultless figures.

#### \$100,000 FIRE AT MONTREAL.

Wipes Out Fourteen Buildings in Suburb of the City.

A despatch from Montreal says: A fire which broke out early on Wednesday afternoon destroyed 14 buildings, either partly or wholly, in St. Louis de Mile End, a northern suburb of Montreal, and rendered some 30 families homeless. The loss is estimated at about \$100,000, partly covered by insurance. The fire started in a small house occupied by A. Madame Belanger. Some children were playing in the yard shortly before, and it is supposed they may have started the fire accidentally. The flames spread to some wooden sheds and to a stable in the vicinity, and by this time had made such headway that the local firemen were unable to cope with it, and the Montreal brigade responded to a call for assistance. Both brigades worked all afternoon before the fire was put under control. A woman 85 years of age was rescued from one of the burning houses.

Owing to high water this season's wild rice crop on Rice Lake is only about one-tenth normal yield. The Indians gather the crop by beating the rice with their paddle blades into the canoes.

### GREAT BRITAIN.

Chamberlain has cancelled his autumn engagements on account of gout.

Great Britain will receive £255,000 in succession duties from the estate of the Earl of Leven and Malville.

## HEALTH

### OPERATION WOUNDS.

By the term "operation wound" is meant a poisoned wound received accidentally by the surgeon while operating upon a patient suffering from blood poisoning; but it differs in no way from an accidentally poisoned wound which any one is likely to receive. It is simply the beginning of blood-poisoning.

This term "blood-poisoning" is employed to express a disease resulting from the entrance into the blood of the germs of putrefaction, or of pus formation, or the absorption of the poisons elaborated by these germs existing on the outside of the body. It is a much less common affection now than it was a third of a century ago, before the introduction of antiseptic surgery.

In those days hospital wards, even the cleanest, harbored millions of septic bacteria; the knives and other instruments used in operating, although carefully washed in soap and hot water, were in effect no different from the poisoned arrows of the savage Bowman. The lint used to pack the wounds, the bandages employed to keep the lint in place, the sponge with which the wound was washed at each dressing, were all impregnated with living germs of disease; and, finally, the very hands of the surgeon, scrupulously clean as they seemed to be, were coated with the microbes of supuration and putrefaction.

It is no wonder that certain operations now performed daily in every hospital in the country with perfect result were so uniformly followed by blood-poisoning that the surgeon who dared to perform them, except when death would otherwise be inevitable, would have been guilty of mal-practice.

To-day it is not the patient who is in danger of blood-poisoning, but the surgeon who may accidentally inoculate himself through a scratch or a hang-nail.

The first signs of this are a feeling of soreness in the arm, for a finger is usually the site of inoculation, and redness and a slight swelling at the point where the poison entered. This redness soon extends up the inner side of the arm in streaks which mark the lymphatic vessels. The bacteria are passing through them to gain entrance finally into the general circulation. The glands in the armpit, through which the lymphatics pass, also become hard and swollen.

Soon the patient begins to have fever, alternating, perhaps, with chills, and then the symptoms of general blood-poisoning appear.

The treatment if this infection is purely surgical. The wound should be freely cut open and disinfected so as to remove the source of the poison. If this is done in time and with sufficient thoroughness blood-poisoning may be averted.—Youth's Companion.

### SALVATION ARMY SETTLERS.

Officials Confer With Premier Regarding Immigration Work.

A despatch from Ottawa says: Col. Lamb, Commissioner Coombes and Brigadier Howell, of the Salvation Army, have arrived in Ottawa to confer with Sir Wilfrid Laurier and the Minister of the Interior in reference to the extension of the Army's emigration work in Great Britain. Col. Lamb, who is the chief of the emigration department of the Army, has just returned from the North-West and British Columbia, where he examined localities suitable for the settlement of emigrants whom the Army expect to send to this country during the coming year.

### EMBEZZLER BRICK CAUGHT.

## GULF COAST DEVASTATED

### Pensacola, Florida, Is a Mass of Wreckage.

A despatch from Louisville, Ky., says: The tropical hurricane which on Thursday churned the waters of the Gulf of Mexico, did much damage on the coast and far inland. Reports received do not indicate any loss of life, but the damage to property is enormous. All wire communication is seriously disarranged, and in some instances has resulted in cutting off cities completely. Numerous washouts have occurred, the interruption from this cause in one case extending thirty miles.

Pensacola, where the maximum velocity of the wind was probably felt, reports a property loss of \$3,000,000.

New Orleans furnished numerous wild rumors during the day, but later reports from there indicate that, while there was considerable damage to property, there has been no loss of life. Wires between New Orleans and the Gulf are down, and it may be several days before anything can be heard from the territory between that city and the Gulf or from the shipping which is riding out the storm in the open gulf.

### DAMAGE TO RAILWAYS HEAVY.

The damage to railroads is heavy. Reports to the officials of the Louisville and Nashville Road from the superintendent of the Mobile and Montgomery division indicated that the loss approximates \$1,000,000.

At Pensacola the Louisville and Nashville grain elevator has been destroyed and the trackage to Escambia Bay is ruined. The railroad wharf at Pensacola is reported a total loss. Further reports indicate that the road-bed between Minette, Ala., and Mobile, a distance of 30 miles, has been washed away.

The Louisville and Nashville also suffered several washouts near New Orleans. The New Orleans and Northeastern reports its tracks under water at several places near New Orleans.

### SHIPS LYING IN STREETS.

A despatch from Flomaton, Ala., says: A few refugees from Pensacola, Fla., fleeing from the fierce Gulf storm, which swept that city, have reached here. Among them is D. J. Ligon, a travelling man, of Atlanta, who tells graphically of the terrors endured by the Florida port. Ligon says: "I have just reached this point from Pensacola, Florida, where I spent a horrible night of torture, passing through the terrific hurricane, which lasted for hours, and, to add to the horror of the night, fire broke out, sending sparks at great speed over the hotel. At 3 o'clock all the guests were awakened and ordered down. Tin roofs were flying in all directions. The rain came in sheets. Part of the town is under water. Ships suffered greatly. All wires are down and cars are not running. Windows by the wholesale were smashed, and thousands of trees are down for miles out of town, some falling on the wires and breaking the same in hundreds of places. The entire city is a mass of wreckage. Not a residence or business house in the city has escaped damage. Roofs are blown off, telegraph, telephone, and electric wires are a tangled mass. The water front is strewn with wreckage for miles on either side of the city, and vessels are piled on the wharves, or where the wharves were, in utter ruin.

"When I was getting out of the city I saw great ships lying in the streets of Pensacola. The water front is gone. Every wharf has been destroyed. Just

dows of houses that were surrounded by water above the first floor. One can hardly describe the scenes in the principal streets. They are full of wreckage and locomotion is almost impossible."

### MOBILE IN RUINS.

A despatch from Mobile, Alabama, via Meridian, Miss., says: This city is practically in ruins as a result of the Gulf storm which swept it Thursday night. Some 6,000 or 7,000 houses have been damaged or destroyed, and the loss is estimated at from \$3,000,000 to \$5,000,000. There are no reliable figures to be had as to the loss of life. Three negroes are known to be dead, and there are rumors that fifty persons lost their lives, but as things are, these rumors cannot be verified. It is feared, however, that when all is known the loss of life will be heavy. The city has been placed under martial law and looters will be summarily dealt with.

Every church in the city has suffered, though Christ Church and St. Francis Street Baptist Church suffered more than the others. The damage to Christ Church is estimated at \$40,000. St. Francis Street Baptist Church at \$10,000.

Mobile's shipping suffered more than anything else. Many of her river boats are now beached or sunken, all complete wrecks. Her docks and those of private corporations are fearfully torn up. The revenue cutter Alert has gone down in Mobile River. She was rammed by some unknown vessel and sank immediately. Her crew is believed to have all escaped.

The depth of water in the wholesale district, which includes the entire section of the city from Royal Street to the river, was seven feet.

### AWFUL DEVASTATION.

During the hours between 6 p.m. Thursday and noon on Friday trees fell and roofs crashed by the hundreds through the streets, carried by the terrific wind. Thousands of pieces of slate, tin roofing, cornices, shingles, and, in fact, all kinds of blinds, were torn from their fastenings, and windows slashed as if tissue. Many people were seriously injured and cut by the flying slate and tin roofing.

### PROVISIONS ARE SCARCE.

In the city many people and much live stock were rescued after heroic efforts. Provisions are running low. Restaurants feed many, but have no supplies on hand. Ham and eggs constitute the food supply. These, too, will soon become exhausted. Wholesale houses lost many thousands of dollars from flood and willingly paid as high as \$1.50 an hour for common labor. Even at this figure few men, white or black, would accept work.

The wind of Thursday was of longer duration and more tornado-like, twisting everything in its path, and more destruction than former storms of like nature that have visited Mobile.

The fruit trees and fall vegetable crops all over Southern Alabama and Mississippi are ruined. So, also, is the cotton, sugar-cane and other crops. One large Mississippi planter made the assertion on Friday that he would willingly accept \$15 for his cotton crop and feel afterwards that he had gotten the best of the deal.

All along the lines of the Mobile and Ohio Railroad there were huge trees lying flat upon the ground with limbs torn off and twisted. The streams are all out of their banks, and for 25 miles north of Mobile, looking to the right of

caneos.

## GREAT BRITAIN.

Chamberlain has cancelled his autumn engagements on account of gout.

Great Britain will receive £255,000 in succession duties from the estate of the Earl of Leven and Malville.

## UNITED STATES.

Four thousand lynchings have taken place in the United States within twenty-five years.

Patrick Colbert, valet of the late Dr. F. J. Freel, of New York, has, after court proceedings, been declared entitled under the will to \$800,000.

## GENERAL.

Switzerland hotels are declining to accommodate Russian guests.

United States landed troops in Cuba last night. Formal intervention takes place to-day.

Secretary Taft has assumed the provisional Governorship of Cuba. The insurgents have promised to disarm.

Premier Deakin announced that Australia had concluded reciprocal arrangements with five South African Governments.

## GRANTS WILL BE INCREASED.

Horticultural Societies Will Receive Larger Government Aid.

A despatch from Toronto says: A statement has just been completed by Mr. H. B. Cowan, Provincial Superintendent of Horticultural Societies, showing how the various horticultural societies of the province are likely to be affected by the new Act governing horticultural societies, which was passed at the recent session of the Ontario Legislature and which will come into effect the first of next year. This statement shows that, owing to the fact that the grant to horticultural societies has been increased by \$1,500, most of the societies in the province will receive an increased grant. Only about ten societies will have their grants reduced to any considerable extent. These include the societies at Brantford, Cardinal, Stirling, Deseronto, Belleville, Nanapanee, Cobourg and Brampton. In each of these cases the society mentioned has been receiving larger grants in the past than most of the other societies in the province, which accounts for the decrease in their grants.

## ORE WORTH \$300,000 A TON.

Gold Strike at Wabigoon Surpasses All Previous Discoveries.

A despatch from Wabigoon, Ont., says: The gold strike in Blum's Laurentian Mine surpasses in richness all previous discoveries. The raise from the first level is now fifty feet up, and the ore continues all the way as rich as the ore on the first level, which astounded the world when the strike was made last December. A drift connecting the top of the raise with the main shaft is now being driven, in which massive gold was encountered, and which the machine drills could not penetrate. A single blast broke down over \$15,000 worth of gold. Three-fourths of the weight of the ore is native gold, valued at over \$300,000 per ton.

## LOWER RAILWAY RATES.

Minimum of 2½ Cents per Mile East of Illinois.

A despatch from Chicago says: The Central Passenger Association at a meeting on Tuesday decided to put in effect November 1, a two-and-a-half-cent rate in all its territory east of Illinois in which the State Legislature has not already made a maximum rate of two cents. This involves a lowering of all the inter-State passenger rates north of the Ohio River and west of Syracuse.

ment of the Army, has just returned from the North-West and British Columbia, where he examined localities suitable for the settlement of emigrants whom the Army expect to send to this country during the coming year.

## EMBEZZLER BRICK CAUGHT.

Reported Capture of Manager of Wampole Company in Japan.

A despatch from Ottawa says: H. W. Prick, defaulting manager of the W. K. Wampole Company of Perth, Ontario, who disappeared on July 1st last, has, according to report, been arrested in Japan. The arrest is said to have been made by a detective employed by the Toronto General Trusts Co. He will be brought back for trial.

## THE CHILDREN'S ALDERMAN.

He Is Elected Lord Mayor of London, England.

A despatch from London says: Sir William Treloar, Alderman of the City of London for the Ward of Farringdon Without since 1892, was on Saturday elected Lord Mayor of London, in succession to Walter Vaughan Morgan. Sir William has been known as the "Children's Alderman," because of his many benefactions to the children of the slums. He was largely instrumental in securing the opening of the British Museum on Sundays.

## SIXTY VICTIMS OF RAINS.

Torrential Downpour Occasions Immense Damage in Spain.

A despatch from Madrid says: Enormous damage has been done in the Provinces of Tarragona and Valladolid by torrential rains. At the Village of Santa Maria the bodies of sixty drowned persons have been recovered. The village is in ruins and the survivors, in a starving condition and panic stricken, have fled to Murica. The rice crop in the Valencia district is devastated.

## INSURE ALL FREIGHT.

Canadian Pacific Adopts a New Scheme—First Time on Record.

A despatch from Winnipeg says: The C.P.R. inaugurated on Wednesday a scheme by which every pound of freight or express on its lines is insured, claiming the distinction of the first move of the kind in the railroad world.

## GROWTH OF PHONE SYSTEMS.

Three Hundred Applications Filed With Commission.

A despatch from Ottawa says: As indicating the growth of the telephone service in Canada, Capt. Cartwright, secretary of the Railway Commission, states that since the Act of last session placing telephones under the jurisdiction of the commission there have been no fewer than 300 applications filed for new lines, extensions, crossings and the like.

## EARTHQUAKE IN INDIA.

Three Distinct Oscillations Felt at Simla.

A despatch from Simla says: A sharp shock of earthquake was felt here at 11.03 o'clock on Sunday morning. There were three distinct oscillations, lasting sixteen or seventeen seconds. No damage was done.

An order-in-Council has been passed at Ottawa prohibiting rafts of more than 50,000 logs to be towed through any Georgian Bay port under penalty of a fine of \$100 for each violation.

mass. The water front is strewn with wreckage for miles on either side of the city, and vessels are piled on the wharves, or where the wharves were, in utter ruin.

"When I was getting out of the city I saw great ships lying in the streets of Pensacola. The water front is gone. Every wharf has been destroyed. Just before I left there was a report that fully 50 lives had been lost in the storm in the navy yard district, but it was impossible to verify the report. I myself saw, however, many women and children taken from second-storey win-

## BOARD OF HEALTH REPORT.

Diseases and Deaths From Contagion in August.

A despatch from Toronto says: The returns from 745 division registrars of the province give 2,570 deaths from all causes, representing a population of 2,091,183, which makes a death-rate of 14.2 in 1,000, and for the same month last year 2,300 deaths were reported from a population of 100,000 less. The table of contagious diseases shows the number of cases, smallpox being the same in August of last year, while scarlet fever has been somewhat more prevalent. The deaths from diphtheria dropped from 21 to 8. Typhoid caused 29 more deaths.

## BANK CLERK MISSING.

Alleged Robbery of Twenty-five Thousand Dollars.

A despatch from Montreal says: A report has been sent to the police headquarters that a clerk of the head office of the Bank of British North America has not been at his post this week, and that his accounts show a shortage of \$25,000. Supreme efforts are being made to keep the affair from the public, and so far nothing official can be obtained, either from the bank or the police, except the bare admission of the defalcation. The absent clerk's name is naturally used in this connection. It is supposed that he left, fearing exposure by the annual inspection.

## BANK MANAGER WAS KILLED.

Cut Down by Express While Crossing Rails at Dutton.

A despatch from Dutton says: Mr. Harry Craig, manager of the Molson's Bank, Dutton, was instantly killed here on Friday evening at the Michigan Central Station while talking to Mr. Siston, a friend, who was waiting to board the "Wolverine" Express for St. Thomas. He was standing on the platform between the double tracks, and attempted to cross in front of the "Wolverine" as it came into the station. The engine struck him and threw him some distance. When picked up life was extinct.

## HOME ABROAD FOR CZAR.

Quarters are Being Prepared for Him at Biarritz.

A despatch to the Echo de Paris from Biarritz, on the Bay of Biscay, says that quarters are being prepared there for Emperor Nicholas and the Russian Imperial family, who will soon join the Grand Duke Alexander Michaelovitch and his family, who recently arrived at Biarritz. The report is not credited here.

## AGRICULTURAL SAMPLES.

Hon. Frank Cochrane Receives Specimens for Abitibi.

A despatch from Toronto says: Hon. Frank Cochrane, Minister of Lands, Forests and Mines, has received from Mr. Frank Moberley, of Abitibi, a number of samples of barley, wheat and native grass. The samples are very fine notwithstanding the fact that the season, according to the statements of the settlers, was the worst in years. In this district Hon. Nelson Monteith, Minister of Agriculture, has selected the site for the Government experimental station.

ingly accept \$15 for his cotton crop and feel afterwards that he had gotten the best of the deal.

All along the lines of the Mobile and Ohio Railroad there were huge trees lying flat upon the ground with limbs torn off and twisted. The streams are all out of their banks, and for 25 miles north of Mobile, looking to the right of the railroad, one can see nothing but a solid sheet of water running swiftly toward Mobile. Many farmhouses are situated in this inundated section, and many people may have lost their lives.

## DR. SAVIGNAC CAPTURED.

Tried to Seize His Revolvers When Officers Ran Him Down.

A despatch from Ottawa says: Dr. J. A. Savignac, who attempted to murder his wife and mother-in-law on Monday night of last week, was arrested on Saturday evening by Detectives Dicks and Ryan, at Melocheville, in Beauharnois County, and is now in the Ottawa jail. Since Monday Savignac has been gradually working his way towards the United States frontier. Hearing on Friday that he had been seen around Coteau, the detectives immediately posted off to that point, where they arrived Friday evening. Enquiries led them to conclude that their man had gone east, and before daybreak on Saturday they were on the road towards River Beaudette, which is at the foot of the Soulanges Canal. At this point they ascertained that the man they wanted had been ferried across the river to Melocheville by a man named Henry Lalonde. Lalonde was found, and for a consideration undertook to take the detectives across in the drenching rain. Lalonde did not know where Savignac had gone, but he directed the detectives to the house of a farmer named Arthur Hamault for information.

As soon as the kitchen door opened Dicks saw his man, quietly reading a newspaper. Dicks sprang at Savignac, and the latter tried to get at his revolvers, which were lying on the table. Fortunately he was too late, otherwise there might have been more blood-letting. There was a wild time in the kitchen, however, for five minutes as Savignac fought like a tiger to get away. The two detectives got a vehicle and drove with Savignac to Beauharnois, from which point a St. Lawrence and Adirondack train took them to Montreal. By 2 o'clock Sunday morning Savignac was behind the bars in Ottawa.

## FATHER SAW SON DEAD.

Boy Killed By Train on Which Parent Was a Passenger.

A despatch from Moncton, N.B., says: Within a few yards of Moncton station on Saturday night 13-year-old William Billiveau was run down and killed by a train on which his father was a passenger. The lad's father was the first to alight, and was horrified to find that the victim of the accident was his own son. The lad was driving to the station to meet his father, and did not see the approaching train.

## CANADA-MEXICO SERVICE.

Contract Signed by Minister—Two Vessels for Route.

A despatch from Ottawa says: The contract for a direct steamship service between Canada and Mexico on the Pacific coast was signed by the Minister of Trade and Commerce to-day. Under this contract, as has been explained, an English company, represented by Capt. Worsnop, will put two steamers of not less than 3,000 tons each on the route, thus giving a monthly service. Vancouver and Victoria will be the terminal ports in Canada, and Acapulco, Mazatlan and Salina Cruz the ports of call in Mexico. Canada and Mexico each contribute an annual subsidy of about \$85,000.

## Does Your Heart Beat

Yes, 100,000 times each day. Does it send out good blood or bad blood? You know, for good blood is good health; bad blood, bad health. And you know precisely what to take for bad blood—Ayer's Sarsaparilla. Doctors have endorsed it for 60 years.

One frequent cause of bad blood is a sluggish liver. This produces constipation. Poisonous substances are then absorbed into the blood. Keep the bowels open with Ayer's Pills.

LEAVE Prinyer's Cove at 5:30 a.m. for Napanee and all way places. Leave Pictou at a.m. Deseronto at 9:30, arriving in Napanee at 10:30, continuing with G.T.R. noon trains going East and West.

RETURNING—will leave Napanee at 1:30 p.m., connecting at Deseronto with Steamer Varuna for Belleville and Trenton. Leave Deseronto at 2:30 p.m., Pictou at 4:30 p.m. for own the bay.

## COW-TRUSTING ASSOCIATIONS.

Since January 1906 sixteen cow testing associations have been organized through the initiative of the Dairy Commissioner's Branch of the Dominion Department of Agriculture. Records are being kept of the production of 4,500 cows owned by the 350 members of these associations. The results will be tabulated and published as quickly as possible after the season is finished. This is only the beginning of what should be a great national movement for the improvement of the dairy industry in Canada. Sufficient data have been collected already to show that there is no line of work in the whole range of dairy effort which is calculated to increase the profits of dairy farming to the same extent, as is this matter of the improvement of dairy herds. In order to serve the purpose properly the work of record keeping must be persistent and continuous, and followed up by intelligent action on the part of the owners of the cows in the matter of breeding and selection.

Our records show that the average yield of milk in Ontario and Quebec is not much over 3,000 lbs. of milk per cow per annum, yet we find herds of 20 cows and over that average 5,000 lbs. In every instance the herds which show a high average of production have been built up by just such methods as the cow testing associations are intended to promote.

The members of the different associations have had an excellent opportunity of comparing the records from the different sections, and of finding herds in the various associations.

With a view of promoting correspondence between the various members of the associations, I am authorized by the Dairy Commissioner to announce that the name and post office address of the owner of any herd in the records will be given to any person who applies for it to the Dairy Commissioner, Ottawa. The idea is that members may learn from the owners of profitable herds as to the methods by which such satisfactory results have been reached. We think the correspondence idea might be very properly included as a feature of this work. We trust that owners of these first class herds will be good enough to answer such inquiries in a broad-minded and helpful manner.

It is to be hoped that the members of the associations will not become slack in keeping the records as the season advances, because it must be remembered that unless a full record for the whole milking period has been made, a portion of it will be of very little value.

Members of this association must not overlook the importance of the feeding question. This has been touched upon but very little so far in this work, but eventually we hope to see careful records kept of the amount of feed consumed by the cows.

We take this opportunity of again pointing out the desirability of the owners or managers of factories taking an interest in this work and making the cheese factory or creamery the centre for further organization for the purpose of keeping records and testing.

A large amount of correspondence has been received from individuals in localities where associations have not been organized, and many farmers are equipping themselves to do the testing on their own account. A copy of bulletin No. 9 entitled "Instruction for Testing Individual Cows" will be sent free to anyone who applies for it.

## A Wonderful Record.

As made up by improved and exact processes Dr. Pierce's Favorite Prescription is a most efficient remedy for regulating all the womanly functions, correcting displacements, as prolapsus, anteversion and retroversion, overcoming painful periods, toning up the nerves and bringing about a perfect state of health. It cures the backache, periodical headaches, the dragging-down distress in the pelvic region, the pain and tenderness over lower abdominal region, dries up the pelvic catarrhal drain, so disagreeable and weakening, and overcomes every form of weakness incident to the organs distinctly feminine.

"Favorite Prescription" is the only medicine for women, the makers of which are not afraid to print their formula on the bottle wrapper, thus taking their patrons into their full confidence. It is the only medicine for women, every ingredient of which has the strongest possible endorsement of the most eminent medical practitioners and writers of our day, recommending it for the diseases for which "Favorite Prescription" is used. It is the only put-up medicine for women, sold through druggists, which does not contain a large percentage of alcohol, so harmful in the long run, especially to delicate women. It has more genuine cures to its credit than all other medicines for women combined, having saved thousands of sufferers from the operating table and the surgeon's knife. It has restored delicate, weak women to strong and vigorous health, where there was barrenness before, thereby brightening and making happy many thousands of homes by the advent of little ones to strengthen the marital bonds and add sunshine where gloom and despondency had reigned before.

## Butler Wanted the Brief.

While E. C. Carrigan was in General B. F. Butler's law office a lady came in to ask some advice. As the general was not in, Mr. Carrigan questioned her and told her he would submit her case to the general, which he did.

The general was to leave the next day for Washington and told Mr. Carrigan to prepare a brief of the lady's case and show it to him the next day.

Mr. Carrigan sat up half of the night writing his brief. The next morning, about fifteen minutes before Butler was to take his carriage for the train, he told Mr. Carrigan he would look at his brief and give his opinion.

Mr. Carrigan began by saying: "General, I have made a most careful study of this case. I have the points all in my head and can state them to you in three minutes."

"Let me have the brief," again said the general, somewhat sharply.

"But, General Butler," said Mr. Carrigan, "I had a brief prepared and intended to show it to you, but I have left it at home on my table. However, as I said, I have all the points of the case in my head."

"Young man," said the general, "the next time you have a brief to prepare for me bring me the brief and leave your head at home on the table."—Boston Herald.

## Wanted to Know Too Much.

There was a series of burglaries committed in the fashionable section of Baltimore. So anxious were the police authorities to apprehend the culprits

**\$100 Reward \$100**

The readers of this paper will be pleased to learn that there is at least one dread-d disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address P. J. CHENEY & CO. Toledo, O.  
Sold by all Druggists, 75¢.  
Take Hall's Family Pills for constipation.

**He Obeys Orders.**

Sir Henry Roscoe tells this of the scientist Faraday and his assistant, Sergeant Anderson: "Anderson was the sole assistant to Faraday and of course was utterly uneducated in scientific matters, but he could obey orders, which is not always a characteristic of an educated man. One day Anderson was told by Faraday to keep stirring a pot containing some chemicals over a fire until he returned, Faraday being in the habit of going upstairs to tea in his rooms and coming down directly afterward to work in the laboratory during the evening. For some reason he was prevented from coming down again and forgot that he had told Anderson to watch the pot. On coming down the next morning he found Anderson still stirring the pot, having been at it the whole night and thus carrying out the order which was given him."

**The Circle County.**

The oddest shaped county among the thousands which go to make up the separate divisions of the various states is Warren county, Tenn. It lies almost exactly in the geographical center of the state and is about as near a perfect circle as any division of land could possibly be. The circle would be perfect but for the fact that there is a short stretch of the northern boundary line which follows a small stream for a short distance. It is bounded by Cannon, Dekalb, Coffee, Grundy, Van Buren and White counties.

**FOR BOTH**

One disease of thinness in children is scrofula; in adults, consumption. Both have poor blood; both need more fat. These diseases thrive on leanness. Fat is the best means of overcoming them; cod liver oil makes the best and healthiest fat and

**SCOTT'S EMULSION**

is the easiest and most effective form of cod liver oil. Here's a natural order of things that shows why Scott's Emulsion is of so much value in all cases of scrofula and consumption. More fat, more weight, more nourishment, that's why.

**How Bees Gather Honey.**

A bee gathers honey by the aid of its "trunk," "lower lip" or "tongue," which is used as an instrument for extracting the nectar from flowers. The "tongue" of a bee is not, as was once thought to be the case, a tube through which the juice is sucked, but is built more after the fashion of a fine broom. With this broom the bee brushes or laps the honey or honey material from the flowers, leaves, etc., and passes it down a groove in the upper surface of the tongue to the mouth proper. From that point the juice is conveyed through a minute orifice into the "first stomach," vulgarly called the "honey bag." The honey bag is a real chemical laboratory, where by some mysterious process which has not yet been explained by science the juices are converted into pure honey. When the chemical process of transforming the nectar into viscid honey has been completed the bee disgorges it into one of the cells made for the purpose of a receptacle. For years the microscopists and the entomologists have been studying the bee's laboratory, but its workings are at present among the unexplained mysteries.

**Horses and Grass.**

A famous veterinary surgeon declares that grass beats all the drugs in creation as a cure for sick horses and mules. Horses should have a few quarts of grass daily from spring until fall, he says. The prevalent notion that it is harmful is idiotic and cruel. Grass to horses is the same as fresh vegetables and fruit to us. Their craving for it proves their need of it. Yet ignorant, unfeeling drivers yank them away from it as if it was poison instead of the life giving medicine it is, designed by their Maker for them. When they gnaw the bark of trees or eat leaves it is because they crave grass and can't get it. Millions of bushels of grass go to waste yearly by the wayside which should be utilized for our noble, faithful, helpless, dumb colleague, the horse, thus making him healthy and happy. Summer visitors who hire horses should remember these facts and give the animals a chance to get at the grass by the roadside once in awhile.

mitted in the fashionable section of Baltimore. So anxious were the police authorities to apprehend the culprits that instructions were issued to the roundsmen to exercise extraordinary vigilance during their tours of inspection.

On one occasion just after midnight an officer saw emerging noiselessly from a house in Eutaw Place a young man, who hastily darted down the street. The officer made after him as rapidly as possible. When he had stopped the young man he said: "Didn't you come out of the corner house just now?"

The young fellow, though of quite a respectable air, seemed ill at ease. "I did," he answered, with some confusion.

"Do you live in that house?" sternly demanded the officer.

"That's an impertinent question," replied the young man in a tone of great indignation. "I don't see what business of yours it is so long as her father doesn't object."—Success Magazine.

**Clock Inscriptions.**

In former times it was the custom of clockmakers to inscribe on the dial plates of their clocks quaint verses, one of the most common being the following:

I serve thee here with all my might  
To tell the hours by day, by night.  
Therefore example take by me  
To serve thy God as I serve thee.

Another favorite inscription was "Tempus Fugit" or "Time Flies," and thereby hangs a tale. A well known English clockmaker who flourished toward the close of the last century, on being asked by a customer whether a certain clock was of home manufacture, replied: "Oh, certainly. I don't you see the name, sir—Thomas Fugit! I often have his clocks through my hands."

## TAKEN AT HER WORD

By JOANNA SINGLE

Copyright, 1906, by E. C. Parcells

John Mason did not slam the gate simply because he knew that this manifestation of rage would surely delight Rosalie. She was watching his departure from the window, and he was angrily conscious that she knew he would, as usual, return in a few days, although she had said she hoped she would be rid of him for awhile. She was so young and so beautiful—and so provoking!

At the entrance to the little park, already growing green in the April sun, he met her sister. He did not know Anne very well—he had been too busy with Rosalie. He wished now that he had made friends with her; her blue eyes were so like and still so unlike Rosalie's. Anne stepped in front of him and stopped him unceremoniously.

"Been trampled upon again?" she observed. "John Mason, for so clever a man generally you're sometimes a awful—fool!" She submitted this thoughtfully, in a voice too gentle to be insulting.

"Then you and Rosalie are agreed, and I suppose you are expert testimony. May I turn and walk with you?"

She nodded and then asked a matter of fact question. "How many times has she refused you?"

"I had not thought to keep count. Rosalie just now informed me that this was the last time. I didn't know I had been the same sort of a—fool so often. But don't you think she ought to give me credit for my persistence? Not every man proposes so many times—to the same girl."

Anne laughed dryly as he continued: "I would have given up long ago if I were not unexplainably sure that she does—care for me. In fact, she never has said directly that she does not. She simply says she won't marry me. What's the matter with me? Am I too rich? I can give away the stuff if she likes. Am I too successful? I might lose a case to please her. Should I be as ugly as Satan? Perhaps she would like a Beauty and the Beast effect! What does she want? I've said and done everything under heaven, and she walks on me—she trails me!"

"Precisely! That's why I called you—what I did. A girl likes to trail a man, but hates the man that will be trailed. Not logical, is it? To use her own words, you are always around

underfoot. You give her no time to want you or miss you or think about you. She's too sure of you. She knows just where you'll be. You never let her want anything bad enough to appreciate it when it comes. She has always had her own way. She needs to be a bit afraid of you. She needs to be bullied!"

He frowned. "I am not a brute. That is not my way."

"No? Well, what has your way accomplished?"

He tried to laugh. "Oh, I'll take your advice. I'll do anything you say. It can't be worse than it is now."

"Well, I hate the responsibility. If you get her you'll fight; if you don't, you'll both be miserable anyhow. You must get her—and then work out your own salvation. In the first place, you must give her a shock. Write her a note and accept your dismissal. Tell her you begin to see that she is right and that you wish to be friendly with her and the family. Then call sometimes—on the father or on me. Don't stay away. Absences of that sort are flattering; you must be quite unaffected by her presence."

"You know that is impossible. You know how the sight of her!"

"You've got to do it! And you must take another girl out occasionally. Being naturally modest, I dislike to suggest that you send me flowers sometimes and come for a walk with me. That will bring things home to her. A girl hates to have an admirer transfer himself bodily to any one, but especially to her sister."

When they had planned their campaign and he left Anne at the gate she had him laughing. Rosalie saw them and shrugged her shoulders. While removing her hat in the hall Anne remarked to her sister:

"Well, dear, John tells me that you have dismissed him for good. You know I never would have interfered if you had wanted him, but I am glad you do not. Now you may find time for your music. Your talent is too marked to be neglected. It will be a relief for you to have him out of the way awhile. You're too young to leave father and me, and, after all, I think you're right about his not being the right man for you."

Rosalie shrugged her shoulders.

The next day Rosalie, without comment, handed Anne this note:

Dear Miss Carleton—I want to thank you for your frankness of yesterday, and I assure you that I shall not annoy you again as I have in the past. Can you forgive me for having troubled you so much and so long? You are probably right in deciding that I could not make you happy, as I hoped to be able to do. May I hope to continue my present friendly relations with you and the rest of the family? If I may, I will not again trespass on your kindness. It will be, as you said, the last time you shall have the pain of refusing. Yours sincerely,

JOHN MASON.

"Well, I like a man to know when he's had enough," remarked Anne. Again Rosalie shrugged her shoulders and made a very little face.

For a week Rosalie was blithe and busy with her music. The second week Anne observed that the gaiety was a bit forced and that during the third she moped a little. John had somehow kept the other men of her set away from her, and flowers and drives and theaters were less frequent. She had no time to miss him.

In the fourth week he called, while she was out. Of course she could not know that Anne had phoned him to come. He was leaving just as Rosalie entered and shook hands with her cordially. He did not look broken hearted, and he seemed to be on very good terms with Anne, to whom next morning he sent some violets. Rosalie saw him get walking with Mary Egan. Then he took Anne driving. She began to

## BLOOD DISEASED MEN

If you ever contracted any blood disease you are never safe unless the virus or poison has been eradicated from the system. Have you any of the following symptoms? Sore throat, ulcers on the tongue or in the mouth, hair falling out, aching pains, itching of the skin, sores or blotches on the body eyes red and smart, dyspeptic stomach, sexual weakness—indications of the secondary stage. Don't ruin your system with the old foggy treatment—mercury and potash—which only suppresses the symptoms for a time only to break out again when happy in domestic life. Don't let quacks experiment on you. Our New Method Treatment is guaranteed to cure you. Our guarantees are backed by bank bonds, that the disease will never return. Thousands of patients have been already cured by our New Method Treatment for over 20 years. No names used without written consent.

Mr. E. A. C. writes: "Your remedies have done me more good than Hot Springs and all the doctors and medicines I had previously tried. I have not felt any of those pains or seen any ulcers or blotches for over seven years and the outward symptoms of the loathsome disease have entirely disappeared. My hair has grown in fully again and I am married and happy."

## Removed the Growth.

DOUGLAS & CO., NAPANEE, ONT.

DEAR SIRS,—During year 1890-91 I was troubled with a large lump growing on the right side of my neck near the ear. Had consulted several physicians and used everything I could hear of, all to no use. Was told to use

Douglas' Egyptian Liniment.

I did, and before I had used half a twenty-five cent bottle was permanently cured. Since then I have used it for everything where outward application is required; am yet to learn of anything in reason that I cannot cure with it. No man has any idea of its value until he has used it; would not be without it under any circumstance

Respectfully yours,

NATHANIEL W. REID.

Enterprise P. O.

## TAKING THE LEAD

### Sherring of Marathon

TELLS HOW ZAM-BUK HELPED HIM

Wm Sherring of Hamilton, the world-famed winner of the Marathon race, the proud son of Canada, who side by side with the Crown Prince Constantine (who ran the finishing portion with him), came first to the Stadium at Athens in the great race, has since his return told how Zam-Buk, the great herbal balm, helped him bring the honor to Canada. Speaking to a Hamilton Herald representative, he said:

"While training for my great Marathon race at Athens I used Zam-Buk, and it proved a great boon to me. I have used it both as an embrocation and as a salve for chafing sores,

...on rapid Athens I used Zam-Buk and it proved a great boon to me. I have used it both as an emollient and as a salve for chafing sores, injuries caused by stepping on to stones while running in light shoes, and other such, and have found it the best salve and ointment I have ever tried. Its healing powers are exceptional, and for general household use it should be a wonderfully fine curative. I have pleasure in expressing my appreciation of its value."

Sherring is undoubtedly right, for as a household balm Zam-Buk has no equal. Zam-Buk is to be regarded as much a skin food as a medicine. When skin disease, such as eczema, ulcers, abscesses, running sores, etc., occur, the skin needs increased vigor to overcome the evil. Zam-Buk provides it. When you sustain a cut, a burn or a bruise, the surrounding tissue has to do extra work to overcome the damage. Zam-Buk helps it. Ever since the dawn of creation vegetable essences and extracts have been the proper sources of human medicine, and in Zam-Buk is found a blending of the finest herbal extracts it is possible to obtain.

Sufferers from any of the above mentioned skin diseases should give Zam-Buk a thorough trial. This universal balm is also a cure for chapped hands, chilblains, sore nipples, eczema, crumptions, itching, scaling sores, etc. It cures the pain and the itching of piles, and stops the bleeding. For skin rashes, ringworm or scalp sores, in children it is an effective remedy, and for all purposes to which a household balm may be put is unequalled. All druggists sell it at 50¢ a box or post free from the Zam-Buk Company, Toronto on receipt of price (6 boxes for \$2.50). Write for free sample box sending one-cent stamp to pay return postage.

...and he seemed to be on very good terms with Anne, to whom next morning he sent some violets. Rosalie saw him get walking with Mary Ege. Then he took Anne driving. She began to realize that Anne was very pretty if she was a year or two older than John.

Rosalie's irritation reached its climax one morning at the breakfast table when her younger brother Ted remarked in a teasing drawl:

"John seems to be taking his medicine like a man, Rosy! He's all right, and I am glad Anne seems inclined to keep him in the family. He probably appreciates being treated like a human being after the way you always walked on him. The fellows say he's the best young lawyer in town. But I should think you'd hate to have him take his punishment so cheerfully, Rosy!"

By this time Rosalie had reached the limit of endurance. She sprang up and, before any one could interfere, had boxed Ted's ears soundly and fled to her room. No one made comment on the scene save that Mr. Carleton amusedly met the laughter in Anne's eyes and told Ted that he would have no more of his teasing. Rosalie's capricious treatment of John had long been disapproved of by her family, and, while they were all sorry for her, they thought it time she should come to her senses.

Time had been slow and torturing to John. He wanted to tell Rosalie that he loved her and her only. He wanted to send her flowers, to give her every desire of her heart, and he found it a misery to see her or not to see her. Meantime he was very attentive to Anne, who was becoming vastly bored with his raptures and sorrows and was longing for him to win his Rosalie and let her go back to her old peaceful ways.

At last one night Anne waked and heard Rosalie sobbing to herself. In the morning she pleaded headache and stayed in her room till nearly evening. Anne had a long conference by telephone with John and took pains to have her father and Ted spend the evening elsewhere.

After dinner she went to Rosalie's room and pleaded being tired. She coaxed Rosalie to arrange her pretty hair and don a pretty gown so she could go down if any one should come. While Rosalie was sulkily doing as her sister wished, Anne heard the bell and slipped down to answer it. She came back saying it was some one for her father and asked Rosalie if she would mind going to the library and bringing the book she had left on the table.

Rosalie, in her trailing blue dress, went downstairs and through the hall into the library. She had half crossed the room before she saw John sitting in a great chair in the dim firelight. She wanted to flee from him, but somehow her feet would not move, nor did she find a word to say. Then to her dismay she knew that a slow tear was falling down her cheek. John came quickly toward her. It seemed very comfortable to be leaning against him. After awhile he held her off and looked at her. She tried to smile.

"Well," he questioned, "how shall it be? You know you said you hoped you would never have to refuse me again. I hope you will not. Just for variety, suppose you—take me."

After the little minutes had cunningly slipped away and it was time that he should leave her, Rosalie exclaimed in dismay:

"Oh, Anne's book! She will be waiting for it."

"I hardly think so," John asserted dryly. "Your sister Anne is wise. She

The Family Herald from now till the End of the Year 40c.

THE NAPANEE EXPRESS from now till end of the Year 35c.

knew better than to expect you in a moment when she sent you down to me!"

"Sent me to you!" Rosalie echoed.

"Yes, my lady! Do you imagine your sister has been trailing me about for her pleasure? She is more glad to be rid of me than—ever you were!"

"Then—it was not—Anne—ever?"

John laughed and bade her good night.

"If you were not perfectly sure that it was 'not—Anne—ever,' you would never, never have asked me!" which both of them knew to be true.

And Anne went to bed and slept the sleep of one who has successfully performed an arduous duty.

### Separations.

Why do we grieve at separations? Why do everlasting farewells chill our hearts, and the fading away of lost joys fill us with bitterness?

"Be not the slave of words," says Carlyle. "Is not the distant, the dead, while I love it and long for it and mourn for it, here in the genuine sense, as truly as the floor I stand on?"

And are not all good experiences thus forever a part of our lives? Can we therefore regret or mourn any past joy, any lost friend? Nothing is lost or gone from us that we have the spirit and

capacity to appropriate and make our own forever. It is not the touch of body that makes presence. Have we not all known times when presence in the flesh brought no nearness, and again when the absent one seemed unspeakably near in spirit? So not to be within the actual physical sense, but to be able to appreciate and love the spirit of another, is the true association and communion. Hence our friends need never die, nor need we ever be parted from them.

Further, in order to realize them truly we need to be separated from them in the flesh at times. Else we shall grow to think them all body and forget that diviner, intangible, unnamable essence—the living spirit, the real self.—Exchange.

### Reserve Buds.

Every one has noticed how, when a large branch of a tree is cut off, small branches will shoot out around the stump. These branches are from the reserve buds, of which all trees have a great number at every portion of their surface. Under ordinary circumstances these never come to maturity, but when the tree is wounded or cut off or loses some of its branches the reserve buds at once come into play and renew the foliage.

# Fruit-a-tives

OR "FRUIT LIVER TABLETS"

Fruit-a-tives will cure the worst case of Chronic Constipation and Biliousness.

Because Fruit-a-tives are the true liver tonic. They strengthen and invigorate the liver—make the liver give up enough bile to move the bowels regularly. The bile is nature's laxative.

Fruit-a-tives are the finest Kidney and Bladder Remedy in the world.

Fruit-a-tives reduce inflammation and congestion—relieve the over-supply of blood—enable the kidneys to rid the system of waste—and thus prevent the formation of uric acid. Fruit-a-tives take away that pain in the back—and quickly cure irritated Bladder.

Fruit-a-tives completely cure Headaches and Rheumatism.

Headaches and Rheumatism both mean poisoned blood. Either the skin, kidneys or bowels are not ridding the system of waste matter. Fruit-a-tives invigorate and strengthen these organs—start up healthy, normal action—rid the system of poisons—and purify and enrich the blood. That means away with Headaches and Rheumatism.

Fruit-a-tives are the ideal tonic for everyone.

Fruit-a-tives build up, strengthen, invigorate. They sharpen the appetite—steady the nerves—enable one to sleep well—and keep the whole system in perfect health. They are fruit juices, concentrated and combined with tonics and internal antiseptics.

See a box or 6 boxes for \$2.50. Sent on receipt of price if your druggist does not handle them.

FRUIT-A-TIVES LIMITED OTTAWA.

## A FISHING CRAFT.

While it is rarely employed by Europeans as a method of travel, even in emergencies, the catamaran of the Madras fishermen of India is by all odds the most extraordinary of water vehicles. It consists simply of three logs lashed together and flush with the surface of the water. On these a fisherman (sometimes two or more fishermen) stands and with a single oar paddles himself far out to sea. A Madras fisherman will venture out when boatmen will not launch their craft, and even in weather when boats cannot be launched he will go through the surf and out to ships with letters, for the delivery of which he gets a few pence. In order to catch their ships a few belated travelers have been known to trust themselves on catamarans. They are united in the statement that the ride on the logs was the most nerve trying experience they had undergone in a land that holds a new thrill for the stranger at every turn. The sea and an occasional ducking have no terrors for these natives, not even the extremely young, and in reality the catamaran is not entirely to be scorned, for it is, after all, nonsinkable.

## Faithful to His Friend.

Toole and Irving were friends from the days when they were both struggling beginners. On one occasion Irving was to be presented to Queen Victoria and was delighted at the honor. An officious court functionary took it upon himself to tell the player "not to mention this matter outside" lest other actors, such as Mr. Toole, might think that they should be presented too. "Let me tell you, sir," said Irving, "that Mr. Toole is not only a thoroughly renowned comedian; he is also a truly Christian gentleman. Toole often

## Her Husband's Book.

"James, dear, will you bring me up a scuttle of coal from the cellar?" said a busy wife.

"That's just the way with you," said James, with a frown, as he put down his book and rose from the armchair.

"Just the way with me?"

"Yes!" he snapped. "As soon as you see me enjoying myself you have something or other for me to do. Didn't you see I was absorbed in my reading?"

"Well, dear, I will do it myself."

"Yes, and tell everybody, your mother especially, that you have to carry your own coal up from the cellar. No, I'll do it. Let me mark my place."

So he marked the place in the book at which he had ceased reading, and when he went down to the cellar, grumbling all the way, she picked up the volume and found it was a love story and that the passage he had been absorbed in was as follows:

"My darling, when you are my wife I will shield and protect you from every care. The winds of heavens shall not visit your face too roughly; those pretty hands shall never be soiled by menial tasks; your wish shall be my law; your happiness!"

Just then he reappeared and, dropping the scuttle upon the floor, said:

"There's your coal! Give me my book."—Tit-Bits.

## Man and His "Galluses."

The "gallus" marks the freeman and the man of genuine, unpretending culture and civilization. Your snob and your savage abhor it. In Mesopotamia the wild bashi bazar wears a belt; in Yucatan the Indian wears a girdle of shark's teeth; in Senegambia the shameless cannibal sports a gunny sack; in Atlantic City some rags but the dukes used to wear sashes. But find a man who when he throws off his coat to begin his daily toil lays bare a pair of heavy sky blue galluses—and you'll find a man who pays his way in the world, loves his wife, rears his children in the fear of the Lord and votes the straight ticket. The "gallus" is useful. It is graceful, and properly adorned with hand painted flowers and brass buckles it is beautiful. To be ashamed of it, to conceal it or to abandon it for a somber leather belt is to fail in an essential of true manhood and fly in the face of fate.—Baltimore Sun.

## The Unicorn.

The unicorn was one of the fabled monsters of antiquity. It was, according to a summary of the opinions of several of the old time writers, a beast about the size of a common horse, but with very short legs. The people of the middle ages believed in the existence of three kinds of unicorns—the magnificent white unicorn, which had a purple face and blue eyes and a single horn a yard in length; the eddisserion, which resembled a gigantic deer and had a very sharp horn growing from the middle of the forehead, and the monocoeros, or common unicorn. The white unicorn's horn was of three different colors—white at the lower part, black as ebony in the middle and red at the point. Certain writers were said to have had a unicorn of fifteen inches high, but they were so small that they could hardly lift an elephant.

# FITSCURED

# HIS WIFE'S LUNGS BOTH AFFECTED

But the Great Consumptive Preventative brought Health and Happiness to his Home

"Our doctor said there was no cure for my wife as both her lungs were affected," says Mr. L. H. Walter, of Pearl Street, Brockville, Ont. "It was a sad disappointment to us both, just starting out in life, only married a short time. But before she had finished the first bottle of Psychine the pain in her lungs quickly went away, and after taking six bottles Mrs. Walter was a new creature and perfectly well again."

That is just one of the many families into which Psychine has brought hope, health and happiness. It is a living proof that Psychine cures Consumption. But don't wait for Consumption. Cure your LaGrippe, your Cough, your Bronchitis, your Catarrh, or your Pneumonia with the remedy that never fails—

## NOVEL ADVERTISING.

How a Firm of Architects Got Its Name on a Building.

Close observation on the part of a newspaper man in Boston several years ago revealed a striking device employed by the firm of McKim, Mead & White, the noted New York architects, of which Stanford White, who was murdered by Harry K. Thaw in New York recently, was a member. The device, says the Pittsburg Gazette-Times, was an acrostic of names famous in history, literature and art by which the firm's name was to be engraved on the Boston Public Library. As may be observed, the arrangement defied literature, history and philosophy in arrangement, and this was the thing that attracted the newspaper man's attention. The names were conglomerated from all nations and ages into a seemingly neat ornamentation for the fine building. Beginning at the top of a space to be devoted to names famous in the world in various lines were the following:

Moses,  
Cicero,  
Kallidasa,  
Isocrates,  
Milton.

These names, through their initials, formed the first part of the acrostic, spelling plainly "McKim." A slight space appeared before the next list of names, which was:

Mozart,  
Euclid,  
Aeschylus,  
Bante.

The initials of these names brought out the second name of the firm, "Mead." Another slight space, and the following names appeared:

Wren,  
Herick,  
Irving,  
Titian,  
Erasmus.

Here was the name "White" also engraved, the whole device bringing out the firm name of "McKim, Mead & White" in connection with the world's famous men. It was in 1890, just before

## The Hyacinth.

The hyacinth has its name from Greek mythology. According to the story as told by Ovid, Hyacinthus, a beautiful boy, was the son of a Spartan king and the favorite of Apollo. Zephyrus, being envious of the attachment of Apollo and Hyacinthus, so turned the direction of a quail which Apollo had pitched while at play that it struck the head of Hyacinthus and slew him. The fable concludes by making Apollo transform the body of his favorite into the flower that bears his name.

## Figure It Out.

A man had sixty ducks for sale and divided them into two lots of thirty each. One lot was to be disposed of at three for \$1 and the other at two for \$1. In his absence his clerk sold the sixty ducks at five for \$2, realizing the sum of \$24. If sold according to instructions one purchaser would have got thirty ducks for \$15 and the other thirty for \$10, making \$25 for the lot. What became of the missing dollar?

## No Nonsense.

"The Elizabethan ruff is likely to return," said Ma Twaddles, looking up from the fashion paper she was reading.

"If he does," responded Pa Twaddles, with energy, "you set the dog on him. Do you hear?"

## Why.

"Oh," she said, "your conduct is enough to make an angel weep!"

"I don't see you shedding a tear," he retorted, and his ready wit saved the day.

## Same Old Way.

Robert—When I get into my new house I mean that everything shall go like clockwork. Richard—I see; the same as heretofore—tick, tick!

Madame Hester, the famous Prince Donna, who, after a tour through the States, was summoned to stand before the King at Buckingham Palace, has recently reaped great benefit from Bileans. In the course of an interview with a leading journalist, she said:—"I was often subject to liver trouble and indigestion, and the usual remedies seemed quite inadequate and gave me no relief. I saw a report about Bileans one day and thought I would give them a trial. The result of the treatment was as surprising as it was pleasing. I felt quite a new woman. Bileans are so delightfully easy to take, too, and one has not to go through a long weary course before reaping benefit. I am now recommending Bileans frequently to friends and patients." Bileans is a household remedy of an unvarnished merit. The reason

think that they should be preserved too. "Let me tell you, sir," said Irving, "that Mr. Toole is not only a deservedly renowned comedian; he is also a truly Christian gentleman. Toole often saved me from adversity, perhaps starvation, when I was unknown. If John L. Toole is not worthy to be presented to her most gracious majesty, neither is Henry Irving. I wish you good day, sir!"—London Standard.

Daily. All other days run daily. Sundays excepted.

WALTER RATHBUN, President. H. R. SHERWOOD, Superintendent. D. A. VALLEAU, Asst. Superintendent.

Here was the name "White" also engraved, the whole device bringing out the firm name of "McKinn, Mead & White" in connection with the world's famous men. It was in 1890, just before the building was completed, that the discovery was made and published. The list of names was changed.

**When Bernhardt was Fooled.**  
Sarah Bernhardt once fell victim to a sudden attack of homesickness while she was traveling in eastern Europe. She announced that she was going back to Paris immediately. Bernhardt was the next day on the route and Bernhardt's impresario at once sent the following telegram to his advance agent, who was then in the Roumanian capital: "Wire me immediately as follows: 'Nobility and leaders society preparing magnificent reception. Minister of fine arts will be represented station. Torch-light procession, massed bands. Wire exact hour arrival.' This telegram was duly sent and the impresario showed it to the actress, who forgot her homesickness in view of the magnificent reception awaiting her. When they arrived there were sixty solemn gentlemen in evening dress, with many decorations, on the platform, there were torches, flags and flowers, massed bands played the "Marseillaise" and the triumphal procession started for the hotel. "Are you not coming with us?" said the impresario to his advance agent, who showed signs of remaining at the station instead of going to the hotel. "No," he said, "I must look after the nobility and leaders of society. I am afraid they will bolt with their dress clothes." But the actress, so the story goes, never guessed that the sixty great men at the station were supers hired by the advance agent at 35 cents a head.

**Life Saving at Fires.**  
If lives are in danger at a fire it is a universal rule that life saving takes precedence over fire fighting. If fire escapes are lacking or seriously obstructed all hands devote their entire energies to the work of rescuing by raising ladders, by forcing a passage through smoke filled hallways or by other emergency means. Life nets are spread and held ready for those who have not the nerve to wait for their rescuers. Life saving consumes valuable time which could be applied to advantage in fighting the flames, and the probable necessity for expending this time, governed as it is by many considerations, plays an important part in studies of underwriters. Occasionally a ladder or window sash is used in emergencies for making rescues. These furnish thrilling incidents for the newspapers, but are less efficient, slower and a great deal more dangerous both to the firemen and the rescued than the plain or extension ladders.—Insurance Engineering.

**Praise and Flattery.**  
We must define flattery and praise. They are distinct. Trajan was encouraged to virtue by the panegyric of Pliny. Tiberius became obstinate in vice from the flattery of the senators.—Louis XVI.

**Two Girls.**  
It is just as easy to fall in love with a rich girl as it is to fall in love with a poor one, but it is generally easier to marry the poor one.

Be of good courage; that is the main thing.—Theodore.

**CASTORIA.**  
Bears the Signature of *Chas. H. Fletcher*  
The Kind You Have Always Bought

one has not to go through a long weary course before reaping benefit. I am now recommending Bileans frequently to friends and pupils." Bileans is a household remedy of unsurpassed merit. Their operation on the liver is just what is needed to transform an inactive, diseased organ into a healthy one. They also stimulate the digestive organs. When you remember that biliousness, indigestion, constipation, fever, dizziness, wind pains and headaches all arise primarily out of liver and stomach, cure these ailments in the safest possible way. They also cure deafness, anaemia, female ailments and liver chills, clear the blood of impurities, and are a boon to pale-faced girls and weak women. Of all druggists at 50c a box, or sent free from the Bilean Company, Toronto, on receipt of price.

### Water Pipes and Freezing.

Housekeepers as a rule do not understand why it is the hot water pipe is the first to freeze in very cold weather. They think that it ought to be the other way around—that hot water ought to withstand the low temperature longer than cold water will. That does seem reasonable, but a little investigation shows us that it is not. Hot water freezes more quickly than cold water for several reasons. In the first place, the boiling of water expels the air from it, and water will not freeze until it has parted with its air. In the second place, there is always a slight agitation on the surface of hot water, and this promotes congelation by assisting the crystals to change their position until they assume that most favorable to solidification. Then the particles in hot water divide into smaller globules by reason of the heat, and less resistance is therefore offered to the cold than in cold water.

### Healthfulness of Honey.

"Honey, one of the most nutritious and delicate of foods, should be eaten more than it is," said a cooking expert. "Bought in the comb, it is bound to be unadulterated, and this pure honey will keep its friends free from sore throat and bronchial troubles. I have not had a sore throat since six years ago I took to eating honey. My doctor tells me he often recommends honey, with excellent results, for diseases of the throat. Honey is excellent to use instead of sugar for sweetening cakes. It gives the cakes a most delightful flavor. It is also excellent in place of butter on hot biscuit, on toast and on buckwheat cakes. I know a number of women who use honey as a cosmetic. They apply it to the skin, rub it in well, then wash it off with hot water. The result is a finer textured complexion, a glowing color, a young, fresh look."

### Instinctive Piety of the Irish Gael.

As Dr. Douglas Hyde pointed out, "the Irish Gael is pious by nature. There is not an Irishman in a hundred in whom is the making of an unbeliever. God is for him assured, true, intelligible. When he meets a neighbor, instead of saying 'Bon Jour' or 'Good morning' he says 'God salute you.'" Indeed, all the ordinary invocations and salutations of the Irish language are governed by this religious feeling. "When he takes snuff from you he will say, 'The blessing of God be with the snuff of your dead.' If a sudden wonderment surprises him he will cry, 'A thousand laudations to God,' and if he is shown a young child or anything else for the first time he will say, 'Prosperity from God on it.'"—London Spectator.

### Lava.

Lava may be blown into opaque bottles of gossamer lightness, and the harder sort makes a beautiful green glass of half the weight and double the strength of ordinary glass. But it is not always the same. Every volcano pours out its own special brand of molten mixture, disagreeable to walk on, but sometimes yielding precious products, as pumice stone. Lava, like all things, decomposes under the touch of time, as the fertile plains of Sicily testify.

### Ancient Glass.

In the Slade collection at the British museum in London the most ancient specimen of pure glass the date of which can be approximately fixed is a small lion's head, bearing the name of an Egyptian king of the eleventh dynasty. That is to say, at a period which

### SUFFERING THE SURE PENALTY

Health Thus Lost Is Restored by Lydia E. Pinkham's Vegetable Compound.

How many women do you know who are perfectly well and strong? We hear every day the same story over and over again. "I do not feel well; I am so tired all the time!"

Miss Clara Beaubien

More than likely you speak the same words yourself, and no doubt you feel far from well. The cause may be easily traced to some derangement of the female organs which manifests itself in depression of spirits, reluctance to go anywhere or do anything, backache, bearing-down pains, flatulency, nervousness, sleeplessness or other female weakness.

These symptoms are but warnings that there is danger ahead, and unless heeded a life of suffering or a serious operation is the inevitable result.

The never-failing remedy for all these symptoms is Lydia E. Pinkham's Vegetable Compound.

Miss Clara Beaubien, of Beaufort, Quebec, writes:

Dear Mrs. Pinkham: "For several years I have suffered with a female weakness which proved a serious drain on my vitality, sapping my strength and causing severe headaches, bearing-down pains and a general worn-out feeling, until I really had no desire to live. I tried many medicines, but did not get permanent relief until I took Lydia E. Pinkham's Vegetable Compound. In two months I was much better and stronger, and in four months I was well; no more disagreeable discharge, no more pain. So I have every reason to praise the Vegetable Compound, and I consider it without equal for the ills of women."

For twenty-five years Mrs. Pinkham, daughter-in-law of Lydia E. Pinkham, has under her direction and since her decease, been advising sick women free of charge. Her advice is free and always helpful. Address, Lynn, Mass.

Newburgh, Sept. 26—Rev. J. F. Mears was in Picton on Sunday supplying for Rev. J. J. Rae, president of Bay of Quinte conference. Rev. Mr. Radcliff occupied pulpit of Methodist church here.

Helen, infant daughter of Mr. and Mrs. John Sharpe, died in Oshawa on Wednesday of last week. The remains were brought here on Thursday, and the funeral service held at the home of Mrs. Sharpe's mother, Mrs. Moore, on Friday afternoon. Rev. J. F. Mears conducting it.

George Shorcy and Bernard McCann were the battery for Tamworth in their ball game with Marlbank at Tamworth.

Miss Aleta Scriver and Miss Mary Warner spent Saturday and Sunday with Miss Jennie Brandon, Tamworth. A number from the village attended Tamworth show on Saturday.

Mrs. Harry Wood has purchased John Lowry's house.

Harry Ballard has rented the house owned by H. M. and W. Deroche, on Main street.

It is understood that E. W. Stickney is about to start his foundry business here again.

### RICHMOND MINUTES

S. by, Sept. 24th 1906

The Council met at Selby.

The members present were: Z. A. Grooms, Reeve; Fred Sexsmith, Chas. Anderson, E. R. Sills, A. F. McCutcheon. The Reeve presiding.

The minutes of the last meeting of the Council were read and confirmed.

The By-law for the assessment of the Otter Creek drainage works was read the second time.

Moved and seconded that the Council adjourn until 1.30 o'clock p. m. for the purpose of reading the By-law for the assessment of Otter Creek drainage works.

The Council resumed at 1.30 o'clock.

Moved by Fred Sexsmith and seconded by A. McCutcheon that the By-law for the assessment of Otter Creek drainage works be now read the third and last time and be signed and sealed and finally passed. Carried.

Moved by Chas. Anderson and seconded by Fred Sexsmith that W. G. Winters be re-appointed Collector for the year 1906 by furnishing satisfactory security at a salary of sixty dollars. Carried.

A By-Law was introduced and passed appointing W. G. Winters, Collector for the Township of Richmond for the year 1906.

Moved by Fred Sexsmith and seconded by Chas. Anderson, that on the petition of John Craig, that the clerk notify all parties on the south branch of the Hemp Fly Drain, to clean out the same within ten days otherwise the Township Engineer will be sent to clean it out at their expense. Carried.

A By-Law was introduced and passed striking the rates as follows: For County purposes 3 1/2 Mills on the dollar For Public Schools 5 1/2 Mills on the dollar, under Section 39 of the School Act of 1906, for Township purposes 3 1/2 Mills on the dollar.

The Council adjourned to meet on the 1st Monday in November at the hour of 10 o'clock in the forenoon.

A. WINTER  
Clerk

### MCINTYRE'S CORNERS.

A large number from here attended Napanee exhibition, and report a good time.

Mr. Fred Laidley is shipping a quantity of hay and oats at the station paying 33 cents for oats and \$8.00 for hay. Farmers are busy hauling to the station.

Mr. Dennis Boyce, of Belleville, visiting at James Boyce.

Mr. Thomas Prest at Napanee on Saturday last on business.

Mr. Frank Thomas, of Montreal, visiting Miss Lizzie Thomas.

Mrs. Ham and daughter Mabel, called on Miss Lizzie Thomas.

Rev. Mr. Roy and Rev. McTear, of Bath, called on Miss Lizzie Thomas.

Mr. Edward Smith and wife, visiting at Mr. Damon Snider.

Mr. John Dawson at his sister's Mrs. Lillian Dawson, of Fellows.

Mr. Austin Fraser, of Odessa, is the guest of Mrs. David Aylesworth.

Sporting Goods.

Guns, Rifles, Loaded Shells, Cartridges, Wads, Reloading tools, Fishing Tackle, Traps, &c.

### MADOLE & WILSON

### SELBY

Sept. 27—The rain which came on Wednesday night was much needed.

A number from here attended Picton fair.

D. Paul left for Queen's on Tuesday. Rev. E. Duke is spending a few weeks in Montreal.

Miss Ethel Arnold and William Ramsay, were quietly married on Wednesday, at Napanee.

MR. ALFRED PLEAU.

## PE-RU-NA STRENGTHENS THE ENTIRE SYSTEM.

Mr. Alfred Pleau, an expert machinist, 178 St. John Street, Quebec City, Can., writes:

"Two years ago, an accident necessitated my confinement for several weeks. The good health I had enjoyed was slipping away and there developed a complication of diseases. My physician said my case was one of general debility.

"Among the many ailments which developed was a serious attack of catarrh, which annoyed me considerably and kept me awake whole nights.

"I decided to give Peruna a trial and soon found it acting as a wonderful tonic to my system. The catarrh grew less severe and shortly after ward disappeared, as did also the various other maladies.

"I attribute my prompt relief and ultimate cure entirely to the use of Peruna and gladly recommend it."

### ENTERPRISE.

Potato digging is the order of the day. The crop is not as good as it might be in some localities.

Mr. Cornelius Clancy has disposed of his beautiful and convenient place to Mr. Levi Card, who has taken possession, and is busily engaged tilling it.

Mr. Edgar Kearns still continues very low, slight hopes are held for his recovery.

Quite a number from the village and surrounding country, attended the fair at Tamworth on the 22nd inst. But were put to some inconvenience, on account of the heavy downpour of rain in the evening.

The supply of milk going to our factory has fallen quite short of the average on account of the dry spell which dried up the pastures.

Our village has grown immensely during the past summer, we hope it may continue.

We are to have another line of railroad running adjacent to the village. We are sorry to say that Mrs. J. A. Scanlin is at present seriously ill. We hope for her speedy recovery.

Dame rumor says, we are to have

which can be approximately fixed is a small lion's head, bearing the name of an Egyptian king of the eleventh dynasty. That is to say, at a period which may be moderately placed at more than 2,000 years B. C. glass was made with a skill which shows that the art was far from new.—London Telegraph.

#### Puzzled.

The distinguished alienist looked worried. "No," he said to the reporter. "I can't give you an opinion as to the sanity of the prisoner." "But surely you have considered the case?" "It isn't that," replied the alienist; "but, you see, each side has sent me a retainer, and as these are the same amounts I am, of course, in temporary doubt."—Philadelphia Ledger.

#### A Cautious Doctor.

"Doctor, something is the matter with me. Sometimes my mind is a perfect blank, and my memory constantly fails me. I wish you would treat me!" "I will. But in view of the peculiar nature of your case I shall want to fee in advance."

None is to be done before who has not perfect self command. By the way.

Main street.

It is understood that E. W. Stickney is about to start his foundry business here again.

The new walks now being laid, are a great addition to the village.

The local tennis team play in Deseronto on Saturday.

The Eyeworth League convention of the Napanee and Tamworth districts is to be held in the Methodist church here on Wednesday, October 17th.

William Hope, Los Angeles, Cal., is here on a visit to his mother, Mrs. Hope and his sister, Mrs. G. A. Aylerworth, after an absence of sixteen years.

Mrs. William Dunn, Mrs. Merrill, Enterprise, and Miss Martin, Orillia, are visiting at W. B. Dennis'.

Miss Chant is visiting her aunt, Mrs. D. E. Rose, Tamworth.

Mrs. Sharpe, Oshawa, is spending a couple of weeks with her mother, Mrs. C. Moore.

Miss Stella Kennedy is visiting in Enterprise.

#### Refrigerators and Hammocks.

There is a lot of warm weather yet before us and it will pay you to improve this offer.

MADOLE & WILSON

weeks in Montreal.

Miss Ethel Arnold and William Ramsay, were quietly married on Wednesday, at Napanee.

Miss J. Anderson, Watertown, N. Y. is visiting friends in this vicinity.

Mrs. Driscoll and children left for Rochester, N. Y., after a few months stay here.

Miss Libbie Anderson, left on Wednesday for a two months' stay at Stirling.

L. Innis' baby, we are glad to say, is better.

A. Asseltine has moved in J. McGinness' house.

J. Bradshaw is moving on Mrs. Brown's farm, north of the village.

Miss Valteau is visiting friends at Battersea.

Visitors: Misses Tullock and Darie, at E. Anderson's; Mrs. Solmes and children at Rev. R. Duke's; Mrs. Brandon, at J. Quigley's; M. Hunt and wife, at W. Hunt's.

#### Clearing Sale.

In order to clear out the following lines at the close of the season, we will offer at cost for cash during August and September, our entire stock of gas stoves, gasoline stoves.

MADOLE & WILSON

We are sorry to say that Mrs. Jas. Scanlin is at present seriously ill. We hope for her speedy recovery.

Dame rumor says, we are to have another wedding in the near future.

**Vapo-Cresolene**

Established 1879

Whooping Cough, Croup, Bronchitis  
Cough, Grip, Asthma, Diphtheria

Cresolene is a boon to Asthmatics

Does it not seem more effective to breathe in a remedy to cure disease of the breathing organs than to take the remedy into the stomach?

It cures because the air rendered strongly antiseptic is carried over the diseased surface with every breath, giving prolonged and constant treatment. It is invaluable to mothers with small children.

Those of a consumptive tendency find immediate relief from coughs or inflamed conditions of the throat.

Sold by druggists.

Send postal for booklet.

Foot-rite Toe Freedom Toes

inches." Where? Everywhere in the ordinary shoe, which is but principally in the toes.

s are not made wide enough, nor high enough, nor long enough, ke the toes. They're simply leather splints, straight and stiff on le and round on the top, and tapering V-shaped to the front.

ow, tapering, squeezing, pinching, toe-deforming splint, man jams / or with vanity. What happens to those -oes. Corns, unions, s, and a few other choice pain-producers. Foolish shoe toes troubles. Ask your doctor.

adical reform in shoe toe construction. Their toes are built long, rmed precisely like the shape of the foot's fore-part. The toes

which inhabit them never touch the sides, nor the top nor the end, except by voluntary muscular action. They touch only the bottom on which they lie flat, and free to move at will in any direction. And the arched roof over them is not made of paste and cloth as in other shoes, which quickly collapses into a shapeless, ugly mass and presses the toes. It's a canopy of pliable sole leather which sustains its arched form stubbornly, relieving the toes from roof pressure and abrasion and maintaining the shoe's box toe handsomeness. If crushed in a crowded street car—no matter—they'll rebound into shape.

Ask the Foot-rite retailer in your town to show you Foot-rite Toe Freedom Toes. His name's below. You'll find his door swinging inward but never outward to find a more welcome store.

Anywhere in America, Canada or Great Britain—\$4.00 and \$5.00. Every pair Good-year Welter.

# THE RING OF SINCERITY

The True Man Would Rather Be a Sincere Sinner Than a Hypocrite.

"Good master, what good thing shall I do that I may have eternal life?" Matt. xix., 16.

Religion rises within; it is not applied from without. Therefore it is an individual matter, and its manifestations bear individual characteristics. There never yet were two living things exactly alike. Only a dead creed can be shaped into uniformity. A man's religion will be manly, a woman's womanly, a boy's boylike.

Yet, strange to say, the religion whose greatest teacher was greatest of all as a man almost universally has given emphasis to the womanly type of character. It too often has demanded of the men who would follow the man of Nazareth that they should conform to the type of Mary of Bethany, with the result of creating the impression in the world that in a man faith meant effeminacy.

But the men who long ago followed the great teacher were by no means weak or womanly. Clear cut conceptions of their rugged virility have come down to our day. The Master won men by His manliness. His life and words led them into nobler, stronger manhood. And men came, like Nicodemus and the rich young ruler, not juggling a promise of paradise or looking for the philosophy, but seeking His secret of the enduring, satisfying, full life.

The inquiry of the young ruler has in it the elements of every true man's religion;

## THE PASSION FOR TRUTH,

the desire for action, and the worship of the ideal. Like him, men seek the teacher who shall show them truth; they ask not so much for things to know as for things to do; they set before themselves the ideal of the life that endures.

Every true man seeks truth. To him he false whether in word or deed; the lie, the worst of all sins. No religion can meet his needs unless it sets his first of all, truth before tradition, before timeserving, at any cost.

The man who asked for the truth concerning himself, his past, this world, its story and laws, who refused to take kindly the legends of long ago no matter how venerable their testators, who turned to science saying, Show us the naked truth, was not seeking to destroy

religion; he was but giving expression to his own religion as a man.

It was not irreverence that made him bring the elaborate structures of past thinkers to crumbling ruins in the dust; it was but reverence for that which is holier than their tradition, truth, the object of his search. He overturns some ancient error, not to gloat at its falsehood and pretence, but to glory in the truth thus brought nearer.

The true man demands truth in the expression of religion. He rather would be a sincere sinner than a holy hypocrite. Men never are to be won to any faith by fooling them. But they will listen to any voice having the inimitable ring of sincerity. The preachers who are debating how to get men to church would answer their own questions if they would only be natural, forgetting professionalism, phrases, and phylacteries, and being just their own selves for a few months.

## THE RICH YOUNG MAN

Wanted to know what he could do; the man of to-day must express his faith in action. If religion only be catechisms and contemplations it never will content men. They were not made for that sort of thing exclusively; it takes a long while to train a man away from action and make him satisfied with the life of the ideal milliner minister, and fortunately the modern minister again is rebelling; he, too, demands room to move and do.

The finest, noblest things within us die if we continue to weep over this world's woes and lament its injustice without lifting a hand to soothe sorrow or right wrong. The business of the church in this world is to touch men with such emotions, fill them with such aspirations that they shall go out from the meeting to clean the market, to lift the burdens of the oppressed and build up the broken in heart.

There is a religion for a man; it has been writing its records not in priests' books alone, but in all the story of our progress, both in wars and in works of tenderness and good. It is the spirit that makes us forsake our sordid ways, endure hardships, strive, toil, and suffer that somehow we may serve our world, that leads us, often perhaps unwittingly, to follow him who went about doing good.

# THE S. S. LESSON

INTERNATIONAL LESSON,  
OCT. 7.

Lesson I. The Two Great Commandments. Golden Text: Mark 12. 30.

## THE LESSON WORD STUDIES.

Note.—The text of the Revised Version is used as a basis for these Word Studies.

Mark's Record of Passion Week.—Our lesson passage for to-day picks up the record of Mark's narrative where we stopped it in the lesson of Sunday, September 16, in which the triumph of Jesus over the Pharisees and Sadducees, answering their subtle questions concerning tribute money and the resurrection was recorded. The order of events of passion week as recorded by Mark it is well to keep in mind. It follows: Sunday—The Triumphal

40. And for a pretense.—Or, even while for a pretense. In verses 38-40 Mark has summed up very briefly Christ's rebuke of the Scribes which in Matthew is given in much fuller form, together with additional explicit warnings against the Scribes and Pharisees. (Comp. Matt. 23).

41. The treasury.—Money chests with trumpet-shaped mouths for receiving voluntary contributions of the worshippers were placed under the colonnades of the court of the women in the temple. These chests were thirteen in number and were referred to as the treasury of the temple.

42. Two miles.—The mile was the smallest copper coin in use. Its value was about two-fifths of a cent, which was approximately one-fortieth of the daily wage of an ordinary laborer. A contribution of two miles was the smallest amount which could lawfully be put into the temple treasury.

43. Cast in more than all they that are casting in.—A suggestion that God's standards of action and of value differ from those of men.

## PERSONAL POINTERS.

# MOST REMARKABLE FEAT

A PEDESTRIAN WHO WALKED 100 MILES IN A DAY.

A Wonderful Performance by Mr. Edward Weston at the Age of 68.

To walk at the age of sixty-eight, a distance of over a hundred miles within twenty-four hours is a feat of which anyone might be proud, and it is not to be wondered at, therefore, that to-day Mr. Edward Payson Weston, the only man of his age who ever accomplished it, is a happy man. Mr. Weston's little trip was from the City Hall, Philadelphia, to the City Hall, New York, a distance of 106 miles, which he completed in the remarkable time of twenty-three hours and thirty-three minutes. Just forty-three years ago the veteran pedestrian performed a similar feat, but, though a young man at the time, he took exactly twenty-three minutes longer in accomplishing his task, and this in spite of the fact that the two city halls were some four miles closer together than they are to-day.

Mr. Weston left Philadelphia City Hall at five minutes past twelve on a recent Wednesday, determined, if possible, to break his record of forty-three years ago. He wore knickerbockers, a white shirt, gait stockings, and a pair of strong leather walking shoes. His hat was the identical narrow brimmed straw which he has worn in all his pedestrian feats, while the light cane he carried was the one which has accompanied him in his record-breaking tramps during the last half-century. In a carriage, following the pedestrian were three Philadelphian doctors.

In his long tramp Mr. Weston took the same route that he did in 1863, walking to New Brunswick, N. J., a distance of sixty-five miles without a single stop. There he slept for thirty minutes, and then took the road to Newark, where he arrived at 9:14 p.m. From there he went to Jersey City, where the Pennsylvania Railroad had a ferry-boat at the slip awaiting his arrival. As soon as the old man made his appearance he was hurried on board, and the ferry was off in record time. Mr. Weston reached Cortland Street, New York, at 11:12 p.m., and immediately proceeded to the City Hall by way of Greenwich and Vesey Streets and Park Row. He only stopped a moment at the City Hall, for his goal was Fifth Avenue Hotel, which he had made up his mind to reach before midnight—accomplishing his object with a good margin.

At the Fifth Avenue Hotel there was such a tremendous crowd that the popular hero could scarcely make his way into the hotel. From the ferry, however, he had been accompanied by several policemen, mounted and on foot, and these guardians of the peace and order soon forced a way for the tired pedestrian, who was escorted to his bedroom by his physicians and a few friends. There he was subjected to a medical examination, after which he took a salt water bath and went to bed.

The following morning Mr. Weston rose at his accustomed hour—eight o'clock—and soon afterwards was seen by the writer, to whom he gave a few particulars regarding his latest feat. Mr. Weston is a tall, athletic-looking man, in spite of his sixty-eight years, and there was no trace of fatigue apparent in his cheerful countenance as he sat in the vestibule of the Fifth Avenue Hotel and talked about his pedestrian feats past and present.

"I felt so fresh at the end of my last trip," he said, "that I believe I could do the same journey with a night's rest. The most trying part of the trip was during the middle of the day, when the sun was beating on my head and almost making me fear a stroke. But it soon passed, and the cool of the evening greatly revived me. In places the roads

# THE DESIGNING KITTY FARQUHAR

Always when Professor Warburton came home he searched through all his pockets for his latch-key, failed to find it and seemed mildly surprised.

To-day, as usually, he muttered an abstracted "Dear, dear!" and went round to the back door.

In the kitchen he found a slim young person tugging frantically at a huge kettle the contents of which showed unmistakable signs of boiling over.

The Professor grasped the situation and simultaneously the kettle, and transferred the latter from the range to the kitchen table. Then he turned his attention to the guardian of the kettle who stood ruefully regarding a blistered finger.

The professor recalled now that his sister had mentioned at breakfast that she was expecting someone. Celia was always expecting people. They came in droves and swarms—or so it seemed to the professor, who liked quiet and solitude—filled the house with an unwelcome chatter and an unseemly swishing of silk petticoats, and in the end fluttered away again.

The professor had taken it for granted that the new arrival would be a guest. It was a relief to find her merely the new cook. Moreover, she seemed a distinct improvement over the old one, who had been, the professor vaguely recalled, a person built on the lines of a sack of meal.

He looked at her with increasing interest and approbation. She had thanked him prettily for his timely assistance with the kettle, and he felt it incumbent on him to convey to her that she was welcome in his household. But he hesitated, at a loss as to how he should address her.

"My good girl," he began, after a preliminary clearing of his throat.

"Kitty, sir."

"And a very nice name," said the professor approvingly. "Kitty, I trust you will like your situation."

Kitty veiled a pair of dancing brown eyes behind long-lashed lids and answered demurely, "Thank you, sir. Yes, sir."

Then the professor caught sight of the burned finger. "Oh," he cried, "you have hurt yourself."

"It's only a burn," said Kitty, in a tone of meek and patient resignation.

"But it ought to be tied up," the professor insisted.

He looked vaguely about the kitchen for something that might be made to do duty as a bandage. Finding nothing, he tore a strip from his handkerchief and wrapped it round and round the injured finger. When he had secured it with a length of string taken from one of the grocer's parcels the finger had attained such proportions that its owner was forced to fold the others in to the palm of her hand to make room for it; but the professor was satisfied.

"There is no hurry about luncheon," he said benignly. "And anything will do for me."

Kitty watched his tall, slightly stooping figure through the doorway. Then Miss Katharine Farquhar dropped into the chair beside the kitchen table and laughed till she cried.

She had just finished mopping her eyes when her hostess came in.

"Oh, you thought to take off the preserves," was that lady's greeting, "And they're just done and not a bit scorched. That's good. Well, cook's disposed of, thank heaven. She'll have to stay in the hospital six weeks at least, possibly longer. It's her knee-cap fractured, they say. Oh, the carelessness and ingratitude of servants—falling down the stairs and so on."

Jesus over the Pharisees and Sadducees, in answering their subtle questions concerning tribute money and the resurrection was recorded. The order of events of passion week as recorded by Mark it is well to keep in mind. It is as follows: Sunday—The Triumphal Entry and Subsequent Retirement to Bethany (11. 1-11); Monday—The Cursing of the Fig Tree, the Second Cleansing of the Temple, and the Retirement at Evening to Bethany (11. 12-19); Tuesday—The Lesson of the Withered Fig Tree, the Deputation of the Sanhedrin, the Parable of the Wicked Husbandman, the Questions of the Pharisees, Sadducees, and that of the Scribe, the Counter-question of Jesus, the Lesson of the Widow's Mite, and the Prediction of the Destruction of Jerusalem and the End of the World (11. 20-13. 37); Wednesday—Spent by Jesus in Seclusion at Bethany. The Compact of the Traitor (14. 1. 2. 10. 11); Thursday—The Events Connected with the Celebration of the Passover, the Agony in Gethsemane, and the Arrest of Jesus (14. 12-52); Friday—The Trials of Jesus, the Denial of Peter, the Crucifixion, Death and Burial (14. 53-15. 47); Saturday—Jesus in the Tomb (16. 1); Sunday (Easter Day)—Events Connected with the Resurrection (16. 1-20).

Verse 28. One of the scribes—One of those present during the discussion with the Pharisees and Sadducees, which had just preceded, and one, doubtless, who was pleased with the answer given by Jesus to those who sought to "take him in his speech." Apparently an earnest inquirer.

What commandment is the first of all?—A common question of debate among the Scribes and learned doctors of the law, and one of great importance in view of the superficial legal conception which the Jews had of the relation between God and man. They seem to have imagined that God kept some sort of a balance sheet on which was recorded the record of each man's obediences and disobediences with reference to each of the various commandments. The keeping of the all-important commandments was thus conceived as counterbalancing the omission of many lesser points of the law, and the concern of the Scribes was simply to get as large a balance as possible with Jehovah at the smallest expense of moral endeavor.

30. With or from. 31. And no man after that durst ask him any question. This explanatory statement is placed by Matthew after the coming question of Jesus recorded in the next verses. The expression "after that" refers to the entire conflict with the Pharisees and Sadducees and the subtle questions that had been put to Jesus by different persons on this same occasion.

32-37. These verses, while not included in our lesson text, should be studied as part of the lesson. They include the account of the manner in which Jesus still further augmented his triumph over the Pharisees and Sadducees by asking them the unanswerable question concerning David's relation to Christ. It will be well to read Matthew's account, Matt. 22. 41-46, which is somewhat fuller and records some details omitted by Mark.

38. In his teaching he said—Luke points out that it was "in the hearing of all the Scribes." Jesus proceeds to warn the people against their false religious leaders—these very men with whom he had been disputing, and who were still within hearing of his voice. They had come to "catch him in talk" and discredit him as a teacher in the eyes of the multitude. But they had been utterly routed, and were now forced to listen to a most scathing rebuke of the whole class of men to which they belonged. It was they instead of Jesus who were discredited as teachers in the eyes of the common people.

Long robes—The professional garb of teachers of the law.

Salutations in the market places—Formal salutations given in recognition of the honorable state or official position of the person thus saluted.

be put into the temple treasury. 43. Cast in more than all they that are casting in—A suggestion that God's standards of action and of value differ from those of men.

PERSONAL POINTERS.

Interesting Gossip About Some Prominent People.

Sir Lawrence Alma-Tadema's first great picture was exhibited at Antwerp, and was offered as one of the prizes in a lottery. The lucky winner was the King of the Belgians.

The oldest magistrate in the Empire has just died. Captain Edward Durnesq was made a J.P. in Tasmania in 1828—that is, two years before William IV. came to the throne. He had reached the great old age of 104.

Lord Cromer is such an industrious man in Egypt that he rarely accepts an invitation to dinner, in order to maintain his strength and to get through his day's work he has to go to bed early and to rise at about six in the morning.

The King of Siam has a bodyguard composed of 400 female warriors. At the age of thirteen they enter the Royal service and remain in it until they are twenty-five, when they pass into the reserve. Their weapon is the lance, and they are splendidly trained in the use of it.

Queen Alexandra enjoys the distinction of being the only Sovereign in modern times to wear the look as a floral emblem at a State function. The wild look, which flourishes profusely on the coast of Glamorgan, has been regarded as the national emblem of Wales, and it was as such that Queen Alexandra wore it at a Drawing Room which she held some years ago on St. David's Day.

One of the hobbies of the King of the Belgians is building. King Leopold, who spends almost as much time out of his country as he does in it, has several residences which he seldom or never visits, yet he is constantly adding to them. He has a fine palace in Brussels, but when within his own domains he prefers to spend his time in the country. His Majesty is the richest monarch in Europe so far as real estate is concerned.

Despite his years, which number sixty-two, Sir Charles Dilke is one of the most active members of the House of Commons. An enthusiastic sculler, he goes through a course of training every year. His week-ends during the Session he spends on the Thames at Shepperton, where, on Saturdays, accompanied by a powerful oarsman, he is frequently to be seen pulling hard in a double-sculler. Fencing is another of Sir Charles's exercises.

The full name of a bride married at Ham Common, near Richmond (Surrey), England, was Miss Lyonella Fredegunda Cultherga Ethelwytha Ideth Ysabel Grace Monica de Orellana Plantagenet Tollemeche. She is a niece of the Earl of Dysart. Canon Benham officiated at the ceremony, and in order to correctly give the bride's names during the service he had taken the precaution to write them down on a slip of paper, to which he referred.

Sir Evelyn Wood has said that one of his narrowest escapes happened to him in the Crimea. He was climbing over a parapet, when a private soldier forced his way in front of him, and turned round savagely when his officer, who was much exhausted, caught hold of the butt of his rifle in order to pull himself up. At that moment the man was pierced through the heart by a bullet from the Russian lines, while Wood, whose place he had taken, remained unhurt.

Lord Aberdeen's sons, the Hon. Dudley and the Hon. Archie Gordon, have strongly developed mechanical aptitudes and worked for a time as ordinary apprentices in one of the big shipbuilding yards at Aberdeen, being treated in exactly the same way and leading the same hard, healthy life as the other lads. Doubtless they have inherited their taste in this matter from their father, who is one of the most expert amateur locomotive engine-drivers in the three kingdoms.

the same journey with a night's rest. The most trying part of the trip was during the middle of the day, when the sun was beating on my head and almost making me fear a stroke. But it soon passed, and the cool of the evening greatly revived me. In places the roads were very rough and the walking heavy, but I kept up a good average of four and a half miles an hour, and soon after I started I felt sure I should beat my record of 1863. The doctors who followed me in the carriage were afraid that I might succumb, and were constantly pulling up alongside to have a look at me; but, bless you, I outwalked three pairs of horses, and sometimes they had to trot to keep up with me—and the veteran gave a hearty laugh. "The only diet I took on the journey," continued the pedestrian, "consisted of eggs and milk, and I consumed quarts of that refreshing beverage. You know I am a teetotaler, and I think it is due in a measure to my abstemious habits that I was able to accomplish the long journey with a minimum amount of fatigue. The only discomfort I felt was when the constant walking created a few water blisters on the soles of my feet, but they have already healed up, and I feel as right as rain. I took my foot while I walked, but when I arrived at the City Hotel, in New Brunswick, I threw myself on a bed which had been made for me on the floor, took a short nap, and then drank a refreshing cup of tea. When I left the hotel I felt as though I could accomplish twice the distance I had in front of me.

"The longest walk I ever accomplished was in 1870, when I walked 5,000 miles in 100 consecutive days. This was an average of fifty miles a day, and I assure you it is not easy to keep it up for more than fourteen weeks. But I did it, and, though at the end I was glad to take a long rest, the walking did not distress me very much. In 1874 I accomplished a very satisfactory bit of walking—better even than my journey yesterday—viz., 115 miles in twenty-four hours. Seven years before that I walked from Portland, Me., to Chicago, Ill., about 1,500 miles in twenty-five days. In 1874 I walked 500 miles in six days, and five years later I won the Astley belt from the English pedestrian by walking 550 miles in six days.

"I have always been fond of walking and I think it is the finest exercise in the world. A good long walk is better than a month in a gymnasium, and I believe it is a good deal due to lack of this kind of exercise that consumption and other kindred ills are so rampant. A man who takes daily walks in the country cannot fall a victim to any pulmonary disease, and if medical men would only preach this gospel, I believe thousands of valuable lives might be saved. I do not remember when I had a day's illness, and my good health I ascribe entirely to my fondness for walking. Although I am nearing the allotted span of life, I feel as lively as a school boy, and if I live to seventy I intend trying to beat my hundred-mile record—and I think I'll do it."

WOULD DO FOR OMELETTES.

Two Irishmen driving through the country noticed that many of the barns had weathervanes in the shape of huge roosters.

"Pat," said one man to the other, "can you tell me why they always have a rooster and never a hen on the top of them barns?"

"Sure," replied Pat, "an' it must be because av the difficulty they'd have in collecting the eggs."

CHEERFUL.

Some men would complain on losing a log, but Jinks didn't.

"How did he take it?"

"Said he had been thinking some of reducing his weight."

Religion when used as a cloak isn't so warm.

ed. That's good. Well, cook's disposed of, thank heaven. She'll have to stay in the hospital six weeks at least, possibly longer. It's her knee-cap fractured, they say. Oh, the carelessness and ingratitude of servants—falling down the cellar stairs just when she knew she was most needed?"

Kitty Farquhar laughed. "Poor thing," she said. "You surely don't think she did it on purpose." Then she asked, "Who was that gentleman came through here a few moments ago?"

"Mason, I suppose," said Mason's sister indifferently. "He probably forgot his latch-key. Generally he does."

"He was very kind," said Kitty. "He lifted the kettle off the range for me, and tied up my finger. I burned it."

Mrs. Hartman stared at her. "Mason lifted the kettle off the range for you, and tied up your finger?" she said. "Mason?"

Kitty begged to giggle. "I believe he thought I was the cook," she said. "He said he hoped I'd like my situation. And that there was no hurry about lunch; anything would do for him."

"Mason!" ejaculated Mrs. Hartman again. "Mason!"

"Celia," said Kitty Farquhar sharply, "what on earth is the matter with you? You act like a person in a trance."

"And I feel like one," said Mrs. Hartman. "Kitty, if Mason mistook you for the cook, you'll just have to be the cook, that's all."

"You're crazy, Celia Hartman," said Kitty, her voice rising in a shrill crescendo of astonishment. "I can't cook. I don't know how."

"That makes no difference," said Mrs. Hartman. "I'll try to stand it. And Mason never knows what he is eating anyway."

"But why, why," persisted the amazed Kitty, "should I be your cook?"

"Because," said Mrs. Hartman, "you are the only woman who has ever made Mason sit up and take notice. He saw that burn on your finger"—Mrs. Hartman's eyes were fixed on the very obvious evidence that such was the case—"and once I went around for two weeks with my arm in a sling and he never noticed it at all. I've had all sorts and conditions of women here to visit, and I don't believe he ever so much as learned their names."

"He said," observed Kitty, "that my name was a nice one."

"That settles it," said Mrs. Hartman, decidedly. "After that I'd simply not dare to present you to him as my guest and dearest friend. He'd be so embarrassed because of what he'd done, that he'd crawl right back into his shell, and we wouldn't be able to pry him out, not even with a crow-bar. Right here in this kitchen you'll stay, Kitty Farquhar, and let the good work go on."

"But," Kitty protested weakly, "it doesn't seem quite fair too—"

"Mason?" Mrs. Hartman finished. "Oh, yes, it is. He's fair game I tell you. Why, Kitty, a love affair would be the making of him. The man who hasn't been in love with at least one woman isn't human. And Mason is just barely aware that we exist."

Kitty Farquhar looked down at her bandaged finger and smiled a wise little smile. Professor Mason Warburton she thought, had been very much more than aware of her existence. And it is always pleasant to demonstrate that one can do what no one else can.

"Celia," she said, "I'll do it. But if you have to choose between starvation and dyspepsia don't you blame me."

II.

Professor Warburton no longer made search through his pockets for his latch-key. That was a needless formality. Nor did he ring the bell as his sister had once or twice intimated he might. He went direct to the back door. And to accomplish the distance between kitchen and dining-room require more time than to come from the college where he lectured.

He filled coal buckets and acquired a taste for splitting firewood—Mrs. Hartman had maliciously ordered it delivered in chunks. The two conspirators watched him with delighted giggles, and they received his somewhat

elaborate and overdone explanation to the effect that the exercise aided his digestion, with appreciative though surreptitious nudges.

Twice he asked his sister to replace a missing button on his coat, and occasionally his tie began to be approximately in the place where a well-regulated tie ought to be.

He gave Kitty books to read, and told his sister in confidence that, considering her lack of advantages, she seemed a remarkably intelligent young woman. Celia thought of the money that had been lavished on her friend's education and smiled, but said nothing.

In the beginning Kitty had every night conscientiously given Mrs. Hartman a resume of the day's happenings. Later on she grew exasperatingly uncommunicative.

"It's not half as much fun as I thought it was going to be," Celia complained. "Why can't you tell me what's going on?"

"There's nothing to tell," Kitty said. But she had the grace to blush hotly.

Mrs. Hartman's eyebrows went up. "Nothing to tell," she said. "And you two shut up alone together in the kitchen till all hours of the night?"

"We're just—reading," said Kitty, feeling herself put on the defensive.

"Well, it's dreadfully dull for me," said Mrs. Hartman, who seemed to have more than one grievance. "Mason at his best is about as lively as an undertaker in the discharge of his duties and he's no more company than the tables and chairs. I asked you here because I wanted someone to talk to, someone to go about with me, and you don't do a thing but shut yourself up in that everlasting old kitchen."

"You suggested it," Kitty reminded her. "It was your plan, you know it was."

"But I didn't suppose," said Mrs. Hartman, "that you'd be so terribly in earnest about it. Twice I've caught you studying, actually studying the cook book, and you're positively ruining your complexion over the range."

"I'm learning to cook," Kitty explained with dignity.

"But my dear child, it isn't necessary. As I told you before, I can stand it, and Mason never knows what he eats."

"The other night," said Kitty, "he said the dumplings were good, and they were like leaden bullets, only bigger. It's a sin and a shame to cheat him so. I'm going to make him dumplings that are dumplings."

Mrs. Hartman stared at her. She opened her mouth to say something, then thought better of it and closed it again. At last she thought she understood.

### III.

Professor Mason Warburton had just proposed to his sister's cook. It was quite within the bounds of probability that the young woman had anticipated the said proposal, and certainly she ought to have been, in a measure, at least, prepared for it. But now that it was come upon her she hesitated, and looked down, twisting her apron string between a nervous thumb and finger.

"But I'm not really a cook, you know," she murmured at last in a very small, shy voice. Her eyes after so damaging a confession refused to meet the professor's. "I—I'm just your sister's friend," she supplemented. "And I've been playing at make-believe." There was a hint of tears in her voice.

"That," said the professor magnanimously, "is a mere detail. So long as you are you, it doesn't matter who you are."

But Kitty appeared not to be so greatly comforted as she should have been. "I—I can't marry you," she said in a very low voice.

"Don't you love me—Kitty?" The professor's voice lingered caressingly over her name.

Kitty choked back a rising sob. "I do," she said. "And it's for that very reason I can't marry you. Oh, I've done such a hateful thing. You know that first day when you lifted the kettle off the stove for me and tied up my finger?"

## HOME.

### SOME GRAPE RECIPES.

**Grape Juice.**—Wash and pick from the stems a twenty-pound basket of blue grapes, crush and scald in an enamelled kettle, until the skins separate from the pulp. Strain through a jelly bag without squeezing. The pulp may be mixed with a quart of hot water and left to drip a second time. Return all the juice to the fire in a clean pot with from two to four pounds of sugar, according to taste, bring just to boiling point, skim thoroughly, pour into bottles or gem jars and seal while hot. If bottles are used soak the corks in hot water, drive them down tight with a heavy stick, cut the tops off flush with the top and dip in melted sealing wax.

**Grapes in Cream.**—To serve grapes in cream the fruit must be both ripe and sweet. Detach the grapes from the stems and seed them through a small slit cut in the side. They are then dredged with powdered sugar, and are covered with whipped cream. Another whipped cream recipe calls for the use of the grape-juice alone. To obtain the juice, boil the fruit in just enough water to keep it from burning, until the grapes are soft, then strain the juices and pulp through a fine strainer, and sweeten. This is made into a jelly with the use of gelatine. When thoroughly chilled it is removed from the mould and is covered with the well-beaten cream.

**Grape Sherbet.**—Any kind of grapes may be used in making the sherbet, the darker varieties giving, of course, the deepest color. Stem and wash thoroughly, place in a kettle with a cupful of water and heat slowly until the pulp will separate readily from the seeds. Turn into a colander and let drip, then press slightly, to obtain the tender part of the pulp. Measure, and to a pint add one pint of sugar, or rather less than this if the grapes are very sweet, and stir until dissolved. Add one cupful and a half of cold water, the strained juice of one lemon and freeze. When like mush open the freezer and stir in the white of one egg which has been beaten to a meringue with two tablespoonfuls of powdered sugar. Mix thoroughly and finish the freezing. Draw off a part of the brine, repack with more ice and salt, and set aside in a cold place for two hours to ripen.

### SELECTED RECIPES.

**Coldslaw.**—After making cabbage soup take the portion of cabbage which has not been used. Shave it into fine slips, put it into a deep dish and pour over a dressing made in the following manner. Beat up two eggs, add one gill of vinegar and water mixed, place it over the fire; when it begins to thicken, stir in a piece of butter the size of a small walnut, a little salt, and a teaspoonful of sugar, when cold, pour it over the cabbage, and stir it together. Before sending to table sprinkle with a little black pepper.

**Oyster Bisque.**—To the liquor drained from a quart of oysters add water enough to make a full quart of liquid. Bring this to the boiling point. Chop the oysters and turn them into the heated liquor, then put all in a double boiler to cook gently while you cook together in another saucepan a quart of milk into which a pinch of baking soda has been stirred, and a half-cup of fine crumbs. When the crumbs are very soft, stir in two tablespoonfuls of butter rubbed into two of flour, and when the mixture is smooth and thick, pour it, stirring constantly, into the oyster liquid. Have ready beaten the yolks of three eggs. Take a cup of the soup from the fire, and beat it gradually into the eggs, and beat them into the soup in the saucepan, season, and serve at once.

**Salsify Fritters.**—Scrape the stalks of a bunch of salsify, and grate them fine.

kitchens are spotless, who pride themselves upon the immaculateness of house and person, will throw greasy water and slops just outside the kitchen door so that always that spot is a matter of offence to the nostrils. Or they will pour dishwater and greasy cooking water down the sink day after day, month in and month out, without ever objecting to the odor always hanging about the sinks, or ever doing ought to mitigate this nuisance.

Worse than this, they do not seem to recognize the peril that they harbor in their very midst. In such places lurk germs of all kinds awaiting only the favorable moment to spread disease. Because you have lived years thus, do not belittle the danger. The menace is always there. It but awaits the appointed time of favorable conditions to lay waste.

And it is all so needless in this day of cheap disinfectants and knowledge of their use! There is absolutely no excuse for foul odors about house or buildings. Whenever they exist they can be promptly and absolutely suppressed with the least possible effort and at an expense not worth the counting. Better still, with them will die the germs.

I wish I could make all housewives realize the value of liberal use of disinfectants around their kitchen sinks and dooryards. It is one of the simplest, surest health measures of which I know.

### KEEPING ACCOUNTS.

Accuracy is in itself an accomplishment, and to those who are anxious to manage their affairs comfortably on a firm basis of integrity this precaution is indispensable as a protection against error.

One who keeps no accounts, who simply carries about with her a hazy recollection of amounts spent and amounts saved, soon will find herself involved in a labyrinth of perplexities. To recall with precision every detail of one's shopping expeditions, to balance outgo and income, without some simple system of bookkeeping involves an unnecessary degree of mental worry, and is an unwise waste of force.

One need not be an expert bookkeeper to set down every week in every month at the top of a page, the sums of money she receives from various sources—from her work if she be in business, from her profession if she be in art or literature, from father or husband if she be simply a lady living at home.

On the opposite page it is a simple matter to jot down the bills paid, the items at the several shops, the money given in subscriptions or charities.

Anybody who understands the first four rules of arithmetic can manage so uncomplicated a matter as the ordinary accounts of an ordinary family if she will only be methodical and adhere to her selected system, and observe a certain periodicity about the work, as for instance, never letting to-day's burden slip away upon to-morrow, and never leaving an unexplained deficiency no matter how small it is, until satisfactorily accounted for.

No greater check on spendthrift habits can be found than that which inheres in the conscientious keeping of accounts. The trifles run away with large sums. And until we really begin to watch with vigilance, we do not realize how the dimes and nickels aggregate into dollars.

### FIERCE FIGHT WITH EAGLES.

A chamois hunter named Hess had a desperate fight with eagles, recently, on a narrow ledge overlooking a precipice in the mountains above Engelberg, Switzerland. He had located an eagle's nest, and climbed up alone with the object of capturing the young birds. About thirty yards from the nest he laid down his rifle, which hindered his movements. As soon as he reached the nest, in which were two eagles, the parent birds swept down from a neighboring height and fiercely attacked

## ON THE FARM.

### FALL ORCHARD PLANTING.

I advocate fall planting of orchards for the following principal reasons: The selection of trees in the nursery can be made more nearly to meet my requirements, both as to choice of varieties and to character of soil. Setting can be done at a season when general farm work is not especially pressing. Then, too, the trees are in place and gaining a foothold months before they otherwise would be if spring set, writes Mr. Grenville.

Some men are afraid to plant in the fall, because they think they may not be able to get the job done, or that the trees will not get a root hold, or will die during the winter, or will be girdled by mice or rabbits. If planting cannot be completed or even if none can be set, the trees can at least be heeled in for the winter and be ready for earliest possible spring setting. This will insure the advantage of choice selection if nothing else.

Trees can be set at any season, even midwinter and midsummer and yet do well. The percentage of loss is slight where proper care is taken. I know of a large orchard in western New York, where planting continued until the first weeks of December. The owner had previously been an opponent of autumn planting, but now declares in favor of it.

As for girdling, there is no more danger and even where it is permitted, the loss will be less felt than if the trees are older. But there is no reason why it should occur at all. By previously having nothing on the land that bark-gnawing animals feed on, there will be no bait, and by protecting the trunks there will be no chance of attack, even when such animals are present. Numerous things, such as blood and grease, have been suggested as repellents, but a positive protector is safer. Stiff manila or oiled paper or wire cloth are the most popular protectors. These are cut so as to wrap the trunk from an inch or so below ground up to 20 inches or even more, where large rabbits run wild. If prepared by rolling around a hay-fork handle, they can be most easily applied. Each should overlap at least half way round the trunk, and should be tied at top, bottom and middle.

Heeling in trees consists in covering roots, trunks and part of the tops with soil. A trench is dug on an elevated well-drained light soil with a straight side at right angles to the prevailing wind and about as deep as the roots extend from side to side, the soil being thrown to windward. On the leeward side the earth is pared down to make a long, gentle slope, so the trees may lie nearly horizontally.

When placed in position, either in bundles, as received from the nursery, or separately, the soil is sifted well among the roots and packed down. Nothing is easier. If I could not see my way clear to plant in the fall, I would still have my tree and shrub order filled in autumn and heel in the plants as thus described.

### CORN FODDER.

The wide difference of opinion which exists in regard to the feeding value of corn fodder can be accounted for variously. The weather-beaten stalks in the husked fields are often eaten to the ground by horses, cattle and sheep, yet the properly cured corn plant contains far more nutriment. The forage part of dried fodder contains anywhere from one-third to one-half of the food value of the whole plant, making corn fodder not only a filler, but a nutritious forage.

Checked corn harvested late, with few leaves and heavy stalk, the substance of the plant having gone into the ear, possesses little feeding value

her name.  
Kitty choked back a rising sob. "I do," she said. "And it's for that very reason I can't marry you. Oh, I've done such a hateful thing. You know, that first day when you lifted the kettle off the stove for me and tied up my finger!"

The professor nodded.  
"Celia said you'd never noticed any girl so much before, and we—we deliberately planned for me to make you—make you like me. At first it was just for a joke, you know, but afterwards I began to—care for you, and then I wanted you to care for me and I tried harder than ever to make you. And now that you've done it, don't you see that I can't marry you, for you're only caring because I made you, and how do I know that it will last?"

Poor Kitty was sobbing outright now. The professor looked quizzically at her bowed head and heaving shoulders.

"Would you mind telling me?" he said, "just when you began trying to make me care?"

"The—first night when you come out into the kitchen, after dinner."

"Then," said the professor, "you began too late by, I should judge, about seven hours. By that time I was trying to make you care for me. Did you never little Kitty, hear of love at first sight?"

"Really?" said Kitty. "Oh, really?"  
"When I lifted the kettle off the stove and you thanked me," said the professor, "the mischief was done. Dear, do you want it undone?"

"Oh, no," said Kitty.—Pearson's Weekly.

#### PEACE AND WAR!

Blue the sky, in golden glory,  
Rides the sun right overhead;  
On the desert, still and gory,  
Lies a hero who is dead.  
With his face towards the foe,  
He received the cruel blow.  
And the world will never know  
How he died!

In the garden bright and sunny  
Plays a child with drum and fife,  
Gallant little Captain Bunny.  
Such a happy, joyous life!  
He's a soldier, like his daddy,  
One day will to battle go;  
Play on, then, you little laddy,  
Some day you must sorrow know.  
While you play, on desert sand,  
With a broken sword in hand,  
Gone to answer God's command,  
Lies your daddy!

#### NOT A CLOTHES PEG.

Peggie Newton had been a faithful household drudge for years, and not grumbled much when her wages were occasionally passed over; but as time went on, and her salary fell more and more into arrear, she ventured to ask for something "on account."

"Why, haven't I paid you your wages lately, Peg? How careless of me," her mistress said. "I'm sorry I have no money in the house just now; but here's a smart cloak that I've ceased to wear, and which is only a wee bit out of fashion. You'll take it in lieu of wages won't you?"

"No, ma'am, I'm sure I shan't," said Peg, wrathfully eyeing the faded old cloak. "A peg I may be by name, but I won't be the sort of peg that people hang cast-off clothes on—not if I know it."

#### PLANKS FOR YOUR PLATFORM

Industry is the key to success.  
Take time to think, plan, and act.  
You have a place in the world. Find it.  
There's no time to begin like the present.

One experience is worth more than ten theories.

The boat built to carry another man's cargo may capsize under yours.

No one has a right to make others unhappy in order to please himself.

Keep to the truth. Success lies in continuous effort along a certain line.

Let thoroughness characterize everything you do. You can win in no other way.

stirring constantly, into the oyster liquid. Have ready beaten the yolks of three eggs. Take a cup of the soup from the fire, and beat it gradually into the eggs, and beat them into the soup in the saucepan, season, and serve at once.

Salsify Fritters.—Scrape the stalks of a bunch of salsify, and grate them fine. Make a batter of two eggs, a gill of milk, and enough flour to make the batter of the desired consistency—about two tablespoonfuls, slightly salted. Stir in the grated salsify, and drop by the spoonful into deep boiling lard. Cook to a golden brown, then drain in a hot collander, lined with tissue paper, to free the fritters of superfluous grease.

Old-Fashioned Spider Cake.—An old-fashioned spider cake is really a milk biscuit dough baked or panned in a spider; the spider is a heavy iron skillet or frying pan with three short legs; a century ago it had also a heavy lid made with raised rim so that coals could be heaped on it. Then, with fire below and above it, the cake or biscuit cooked as readily as if in one of our modern ovens. In camp or when without such a cover, the spider could be propped in front of the fire, the blaze and open heat helping to brown the top. Take one quart of sifted flour; sift and mix with it two teaspoonfuls of baking powder and a scant teaspoonful of salt. Rub in two large tablespoonfuls of butter or any shortening and wet to a dough with sweet milk. Roll out in a round sheet which will fit in the spider or in any thick-bottomed frying pan. Grease the pan, lay in the cake, and stand over a moderate fire, covering the top to keep in a part of the heat. Watch closely and do not let it cook too fast. When browned evenly on the under side, which should take fully 20 minutes or more, slide the cake out on a cake pan, then carefully reverse and slide it back in the spider, covering as before until browned. Serve hot with plenty of butter.

#### STRAIGHT TALK TO HOUSEWIVES.

The astonishing thing to me in many of the farm homes which I visit is the indifference to unpleasant or positively offensive odors around the house or out-buildings, writes B. W. T. Housewives who are models of neatness, whose

nest, and climbed up alone with the object of capturing the young birds. About thirty yards from the nest he laid down his rifle, which hindered his movements. As soon as he reached the nest, in which were two eagles, the parent birds swept down from a neighboring height and fiercely attacked him. For twenty minutes a desperate struggle took place, Hess defending himself with a knife, expecting every moment to be swept off the ledge. At last Hess succeeded in killing the male bird and its mate flew away. Hess, though bleeding from severe wounds, arrived safely at Engelberg several hours later.

The albatross has been known to follow a ship for two months without ever being seen to alight.

Queen Maud has the reputation of being the wit of King Edward's family. On one occasion she was with her sisters at a public function and noticed a curious Pressman gazing at their every movement. Accordingly, she wrote something on a piece of paper, and, making a pretence of handing it to one of her sisters, dropped it. The reporter, of course, in great glee, picked it up, expecting to get a great scoop for his paper. Imagine his chagrin when he found written on it the commonplace remark: "My new boots pinch me horribly."

Sir James Vaughan, the well-known London magistrate, upon his retirement said his mind had become so blurred with the thousands of cases he had tried that he found it impossible to collect his ideas and reminiscences. "If I had only known shorthand," he observed, "what a readable book I could have written!" One rather amusing occurrence is well worth relating. A young and presumptuous barrister was disputing with Sir James regarding a certain matter. The magistrate maintained that his point of view was the correct one, whereupon the barrister exclaimed: "In that case, then, I am a liar!" "Well," remarked Sir James Vaughan, as he smiled sweetly over the court, "it is scarcely for me to contradict a personal statement of that kind."

one-third to one-half of the food value of the whole plant, making corn fodder not only a filler, but a nutritious forage.

Checked corn harvested late, with few leaves and heavy stalk, the substance of the plant having gone into the ear, possesses little feeding value from the roughage it furnishes. While the ear corn it contains is fresh and highly relished, a cheaper method of harvesting the grain would be by husking. Corn growing an abundance of forage with ears choked to half their normal-size by thick planting, cut and cured properly, gives a forage relished and cleaned up well by stock. Under such circumstances, practically all of the value of the green fodder is available as feed in the dried product.

It requires a large amount of care and labor to secure the year's supply of roughage in fine condition. The same amount of work spent in the harvest of the corn plant that is spent on other forage crops would give corn fodder a feeding value much higher than generally supposed.

A comparison of corn fodder with hays most commonly found gives it many points of advantage. Timothy, without question, is our most expensive roughage. Its freedom from dust, however, recommends it to the horseman. Otherwise, the yield is so light that for general use it is too costly. Even clover gives a light yield in comparison with corn. However, its high protein content, namely 6.8 per cent., is a redeeming feature. Corn fodder yields from two to three times as much dry forage as the hays, making its economy apparent at first sight.

#### FARM NOTES.

Cover up the grindstone when not in use. There is something about the heat of the sunshine that hardens it and spoils its grit.

There is nothing which more accurately gauges the thrift of a farmer than fields clear of weeds, and there is nothing that so widely advertises a farmer's want of proper pride in his calling as a place overrun with them.

There is no life which holds out so much in the way of comfort and independence to the man of average ability as that of the farmer; nor any business which in the long run will bring more sure returns. Those who hear of good incomes in the towns see only one side of the picture. They do not see the cramped house wedged in between others precisely like it, where the front view shows a sky line of red brick and chimney tops, and the rear a line of ash barrels.

Where live stock is kept fences ordinarily are necessary. The cost of a fence may be reduced by economy in the construction of a fence which promises some permanency. The farmer probably cannot produce or grow any part of the fence in paying quantities except the posts. This he can do often to his advantage for the posts constitute a considerable part of the expense. Steel posts have proved very expensive, nor has experience shown that they are durable in all localities. The cement post is partly an innovation, and while the claims for its durability are hardly verified as yet, this will also prove expensive at present prices of cement where gravel and sand are not at hand. A durable wooden post is still the best adapted for the widest range of service.

#### KING ALFONSO'S MAD BULL.

Not only is Alfonso King of Spain, but he is also supreme head of some thirty odd principalities. Being a posthumous child, he was indeed King with the first breath he drew. King Alfonso is a splendid shot with rifle and pistol. His nerve and excellent marksmanship stood him in good stead some two years ago, when, with a shooting-party, he was returning to Madrid. As they were walking along the road a savage bull in a neighboring field suddenly made a rush at the boy-monarch. Those with him were momentarily panic-stricken. Not so Alfonso. Quickly raising his gun, he laid the beast low with one well-directed shot.

#### JUVENILE DIABOLISM.

Hatching the plot.

Setting the trap.

The unsuspecting victim.

The disaster.

## BABY CONVICTS FATHER

SCRATCHED A MATCH ON SEAT OF TROUSERS.

Impulsive Act of Child Aroused Suspensions and Finally Led to a Confession.

By going through the motion of striking a match on the seat of his substitute for trousers, William Brutus Martin, aged 17 months, convicted his stepfather, Harry Yeatsman, of arson. The extraordinary testimony, given by a baby, who cannot talk, against his stepfather, was submitted to a jury in the High Court at West Reading, in England, and was so convincing that Yeatsman changed his plea to guilty, and the jury, without leaving their seats, sentenced him to serve twenty years in prison.

The charge against Yeatsman was that he set fire to his house, a small two-storey frame affair in the outskirts of Reading, in one of the workmen's colonies, while his wife, Sarah Yeatsman, was sick and asleep in one of the upper rooms, and the case of the Crown against him rested entirely on circumstantial evidence, supported alone by the evidence of the baby who could not talk.

### WIDOW HAD LIFE INSURANCE.

Yeatsman, a Londoner, appeared in Reading about three years ago and secured work as driver of a cab for a company. After about a year and a half he secured lodgings in a house owned by Mrs. Martin, then a widow of a few months with a baby in her arms. She had come of a family of farmers near Maidenhead, and her only experience in city life was in Reading as the wife of Job Martin, an oil and color man, who owned a small shop and did a fair business in the sale of paints and oils and brushes and in decorating houses.

Martin's death left her with about \$200 in cash, her little home, and a small amount left over from the sale of the shop after his debts were paid. Also her life was insured for \$800 in favor of her baby, that it might be cared for in case she died, and—as it developed later—her little home was insured for \$1,500 against fire. This, however, she did not know, being ignorant of business affairs.

Within a short time after Yeatsman came to lodge at the cottage of Mrs. Martin he began to take quite an interest in her—and in her affairs. He aided her in some small business matters pertaining to the final settlement of her late husband's estate. He examined her late husband's papers, explained their meaning to her, and assisted her in other ways. It appears also that among the papers Yeatsman discovered the fire insurance policy and the life policy.

### A BRIEF COURTSHIP.

The attentions of the cabdriver to the widow grew bolder. She was a handsome girl, and, being country bred, knew little of the wiles of a London caddy; so, after a brief courtship, they were married, and Yeatsman promised to care for her child as if it were his own.

After they had been married about five months Mrs. Yeatsman became ill suddenly. Her malady was not serious, but she was confined to her bed, and while she was in bed and asleep one Sunday afternoon the house caught fire. Yeatsman, bearing the baby in his arms, rushed from the blazing cottage and cried that his wife was asleep upstairs, that the stairs themselves were ablaze, and that her escape had been cut off.

That she would have perished seems certain, but at that instant Ned Tetcom, a gasfitter, climbed upon the porch of the cottage and, taking a short run,

the claim that day, as he had planned to do. Instead he reported to the company's lawyer, who, after a conference with the police, secured the arrest of Yeatsman.

The case was called before a jury, and the crown made a strong circumstantial case against the accused. The jury was taken to the Yeatsman house, the baby was placed on the floor of the living room, and the judge, at the suggestion of the crown's lawyer, mentioned the word fire, speaking the word plainly. The baby at once went through the pantomime and the court returned to the courtroom.

Before any further testimony could be heard Yeatsman asked permission to change his plea. The jury was instructed to return a verdict of guilty, and a sentence of twenty years' imprisonment was handed down.

"He did it exactly as I did," said Yeatsman. "He's a smart little beggar, and he remembered everything even how I scratched the match on my pants. I'll bet, though, if he knew he was sending his new dadda up he wouldn't have done it."

### LIFE.

Why all this toil for triumphs of an hour? —Young.

Life's a short summer, man is but a flower. —Dr. Johnson.

By turns we catch the fatal breath and die. —Pope.

The cradle and the tomb, alas! how nigh. —Prior.

To be is better far than not to be. —Sewall.

Though all man's life may seem a tragedy; —Spenser.

But light cares speak when mighty cares are dumb. —Daniel.

The bottom is but shallow whence they come. —Raleigh.

Thy fate is but the common fate of all. —Longfellow.

Unmingled joys here to no man befall; —Southwell.

Nature to each allots his proper sphere. —Congreve.

Fortune makes folly her peculiar care; —Churchill.

Custom doth often reason overrule. —Rochester.

And turns a cruel sunshine on a fool. —Armstrong.

Live well, how long or short permits to Heaven. —Milton.

They who forgive most shall be most forgiven. —Bailey.

Soar not too high to fall, but stoop to rise; —Masinger.

We masters grow of all that we despise. —Crowley.

Oh, then, renounce that unpoison self-esteem. —Beattie.

Riches have wings and grandeur is a dream; —Cowper.

Think not ambition wise because 'tis brave. —Davenant.

The paths of glory lead but to the grave! —Gray.

What's all the gaudy glitter of a crown? —Dryden.

The way to bliss lies not on path of down. —Quarles.

How long we live not years but actions tell; —Watkins.

The man lives twice who lives the first life well. —Herrick.

The trust that's given guard and to yourself be just. —Dana.

For live now how we may, yet die we must. —Shakespeare.

### "WASTERS" OF LIFE.

Sir Oliver Lodge's Plan for Dealing with Moral Invalids.

When Sir Oliver Lodge speaks all his hearers listen in the confident expectation of instruction and enlightenment.

When the topic is one of pressing social importance, the eagerness to listen is increased tenfold. Upon such a theme Sir Oliver touched at a recent lecture in University College, London. How to deal with the able bodied people, mental and moral invalids who are

## DEEDS OF ROYAL PEOPLE

KINGS AND QUEENS HAVE PERFORMED HEROIC ACTS.

King of Portugal Rescues a Wayfarer—His Queen Has Saved Many Lives.

Don Alfonso's recent courageous act in stopping a runaway horse in the Rua da Magdalena, Lisbon, reminds one that this is not by any means the first time a Royal personage has gallantly risked his own life to save that of one of his subjects.

It is not many years since, when driving in his capital, the King of Portugal saw a burly highwayman in the act of robbing and knifing a wayfarer. Before the rascal had time to escape the King had jumped from his carriage, struck him to the ground with his stick, and pinned him there while his coachman and footman secured his hands and feet. On another occasion King Carlos, who is a magnificent swimmer, jumped into the River Alcantara, rescued a drowning man just as he was sinking for the last time and brought him safely ashore; and, again, when he was witnessing a bullfight, he leaped into the ring and

### AT THE RISK OF HIS LIFE

distracted the attention of a fierce bull just as he was about to gore a fallen toreador.

Not less brave is King Carlos's beautiful Queen, who has probably saved more lives than any other Royal lady in Europe. Once she plunged into the Tagus and, battling with the strong current, rescued two children from drowning; and on a more recent occasion she saved a fisherman who was drowning in a rough sea off Cascaes—a feat which nearly cost her her own life, and in recognition of which the Kaiser presented her with the German medal for saving life.

Curiously enough it was near the same spot that Carlos himself was rescued when a boy. Near the fortress of Cascaes, on the Atlantic coast, is a chasm, known as Hell's Mouth, in which the waters of the Atlantic form seething whirlpools. Just beyond the chasm the young Carlos and his brother were bathing one day when they were caught by a wave which would certainly have swept them into the chasm had it not been for the presence of mind and daring of Queen Maria Pia, their mother, who rushed into the sea and saved her sons from destruction.

### ANOTHER ROYAL LIFE-SAVER

is King Oscar of Sweden, a man of enormous strength and absolutely fearless. His Majesty was walking in the streets of Stockholm one day when he saw a couple of runaway horses, attached to a carriage in which were a lady and her daughter, racing madly in his direction. The coachman had lost all control of the maddened animals and a terrible catastrophe seemed inevitable. As the horses drew near the King walked towards them and, with a leap, flung himself at their heads, seized the reins, and, after being dragged some distance, brought them, trembling and subdued, to a standstill. For this deed of heroism he received the medal of the French Humane Society.

The late King of Denmark performed a similar heroic act, to which there was an amusing sequel, by stopping a runaway cab-horse in the suburbs of Copenhagen. When the cabman realized that the danger was passed he turned to his rescuer and said, "I don't know who you are, sir; but I shall be proud to drive you home for nothing." "Thank you, my friend," was the smiling answer; "I think I had rather walk."

Twice at least the Dowager Empress of Russia saved her husband's life. Once, it is said, she saw

### PERSONAL POINTERS.

Interesting Gossip About Some Prominent People.

President Roosevelt and his wife can lay claim to a distinction which is enjoyed by few married couples. They were companions when they were tiny children.

Mme. Patti, who is a marvellous specimen of well-preserved powers, attributes her exceptional health to plenty of sleep—nine hours. Another celebrity who believes in that amount of slumber is Lord Avebury. Brain-workers need at least nine hours' sleep, he maintains.

A notable Welsh preacher is the Rev J. Puleston Jones, M. A. He has been blind since he was two years old; yet he prosecuted his studies at a local school and later on at Glasgow University. Subsequently he became a scholar of Balliol College, Oxford, where he graduated with honors in the School of History.

Lord Kitchener's father, who was rather a Spartan parent, was also a soldier, but in Ireland he turned his attention to breeding pigs as a source of income. Kitchener and his brother had to drive the pigs to market. They were sent off without breakfast, and had to do without that meal on their return if the pigs remained unsold.

Lord Kitchener once disguised himself as a native slave, in order to attend a meeting between a treacherous chief who pretended to be siding with the British, and the envoys of the Mahdi. He got back to camp by a clever but risky dodge of causing himself to be arrested as an Arab spy. Lord Kitchener used to be a great man at "making up" in his scouting days, and, of course he knows all the ins and outs of the native dialects and habits.

The Emperor of Austria belongs to that category of persons who throughout their lives never even suffer from headache. The approach of age is not visible. This miracle may be explained by his manner of life. The Emperor, who formerly smoked ten to fifteen strong Virginia cigars daily, now contents himself with two light ones; he drinks daily about two glasses of beer and some light wine; he sleeps much and great care is taken during his sleep that cold is avoided. His Majesty has lost only three teeth.

It was shortly before his marriage to Miss Alice Roosevelt that Congressman Longworth was quite unexpectedly presented at a reception to Mr. Samuel Longfellow, a brother of the poet Mr. Longworth, be it remembered, is nothing if not a modest man, and he was just then in a somewhat unsettled condition because of all the notoriety showered upon him by an inquisitive daily press. He did not know what to say, and so he said only, "Our names are almost similar, aren't they?" Mr. Longfellow smiled kindly. "Yes," he quickly quoted; "worth makes the man and lack of it the fellow."

The athletic career of Lady Constance Stewart-Richardson, better known as Lady Constance Mackenzie, has been full of glittering feats. In America she played polo with men, riding astride. In Somaliland she rode inland in a soldier's grey shirt and khaki trousers, and was only turned back by the military authorities for fear the Mullah might swoop on her. She can ride and drive most creatures that are put to saddle or harness. She is, in short, a lady of great beauty, vivacity, and spirits, and looks extremely well in kilts of Mackenzie tartan, which, until her marriage, at least, she usually affected in her Highland home.

The Empress Charlotte, who has suffered a painful accident from a fall, takes, like the Empress Eugenie, an Imperial title from an empire which no longer exists. Her story is the sadder of the two. Married as a girl to a gallant Austrian Archduke, her happy days were passed in that white palace of Miramar which hangs over the Adriatic. Then her husband's ill-star made him Emperor of Mexico, and after four years of an uneasy State a firing-party

be ablaze, and that her escape had been cut off.

That she would have perished seems certain, but at that instant Ned Telcom, a gasfitter, climbed upon the porch of the cottage and, taking a short run, leaped across the intervening space, clung to the window sill of the second storey window of the Yeatsman cottage and, after a brief struggle, drew himself inside. Once there, he fought his way through the smoke, carried the unconscious woman to the window, and dropped her into the arms of the men waiting below, then jumped to safety.

#### INSURANCE MAN SUSPICIOUS.

Naturally, Telcom was the hero of the neighborhood. The fire department extinguished the blaze after the house was badly damaged, neighbors took the family into their homes, and the incident seemed closed. It might have been but for the insurance adjuster, who, the day after the fire, made an examination of the premises. Yeatsman already having filed his claim. The insurance man's suspicions were aroused when he discovered that the insurance was paid up by the first husband and that the wife knew nothing of it. He discovered also, from talking with Telcom, that Yeatsman had thanked him suitably, and seemed sorry his wife had been saved.

It developed that the fire started in a closet under the stairs, and as there was no fire in the house, no electric wires, or combustibles in the closet, the origin of the blaze was a mystery. One of the firemen said he smelled oil when he first got into the house.

The strangest feature of the case was added by Mrs. Yeatsman, who, ignorant of the suspicions against her husband, said she was not overcome by smoke at all, but was entirely unconscious, although unable to move when the fire started. She said her husband had given her the medicine a short time before. She had dozed off immediately, and was awakened by the smell of smoke, but was powerless to move and seemingly unable to think clearly.

**BABY SHOWS HOW IT WAS DONE.**  
Yeatsman himself said he was lying down on the sofa in the living room, and the baby was playing around the room, when he smelled smoke, and, opening the door into the hallway, discovered the closet ablaze and the fire running up the stairs. He had grabbed the child and raised the alarm immediately.

The insurance adjuster incidentally discovered that Yeatsman had made arrangements to buy two cars and cub horses, and that he had no money beyond his wages.

The circumstances were suspicious, yet there was no evidence against the man—at least not enough to convict—but the insurance man was not satisfied. He delayed settlement and kept up his investigation, pretending to Yeatsman that it was only necessary red tape. He was aware that the evidence of the man who smelled oil and of the wife being drugged could not be supported convincingly.

He called finally, after weeks of delay, at the house, which had been repaired. Yeatsman was out, and he was asked to wait. Being a man of family and a lover of children, he put in the time playing with little Bill Martin, a sturdy small boy, who was just learning to talk, but who could run all over the neighborhood. Mrs. Yeatsman was with them in the living room, and she mentioned the fire. At the word fire the baby, who was playing on the floor, suddenly jumped up, ran to the door leading into the stair closet and, lifting his chubby leg, went through the motion of striking a match, throwing it into the closet, and shutting the door.

#### TWENTY YEAR SENTENCE.

"What does he do that for?" asked the agent.  
"I don't know," said Mrs. Yeatsman. "He does that every time we speak of the fire, and yesterday when he did it Mr. Yeatsman got so mad he slapped the poor baby hard."

The insurance agent did not settle

the blaze, and that her escape had been cut off. The lecturer took the illustration of workmen who enter a factory to take advantage of the organizing and administrative capacity of its head. On this analogy he considered the poorhouse, stripped of its stigma of disgrace and deterrence, should be made not merely a place for maintaining the impotent and aged in instruction and discipline for able-bodied wasters and failures.

By drifting under the organization and discipline exercised by the community they would acknowledge failure of a sort; and just the same disgrace, neither more nor less, would attach to them as that which attaches to a man who fails in business. Whether it was their own fault or their parents', or the fault of social conditions, Sir Oliver would not have us stop to enquire, but simply to imitate the wisdom of the medical profession, which does not seek to blame, but seeks wholeheartedly to cure. They are to be regarded as the patients of society, who, in their present state, are useless, and very possibly deserving of blame, but the one great urgent fact about them is that they have failed and need help.

In answering the question what sort of help is to be given them, the lecturer did not think it must be merely material help, though doubtless that would have its place. The chief need would be intellectual and moral help. They must be shown how to live, how to work.

#### 20 TONS OF MANNA.

##### Drop From Heaven in Turkestan to Great Awe of Villagers.

Samples of red manna, of which over twenty tons have just fallen from the skies in Turkestan, to the superstitious awe of the natives, reached the London Daily Mirror recently.

A Constantinople correspondent who sent a parcel of this remarkable substance, states that the manna fell in a district almost bare of trees, and that it was eagerly collected by the poverty-stricken villagers, who ground it into flour and made cakes of it. Ignorant of its perfectly natural origin, they regarded it as a gift from heaven.

As a matter of fact, manna is the result of the burrowing of a certain worm in trees. It is a regular article of commerce in the east, the manna ash tree being cultivated in Sicily.

But the manna that has just created so profound an impression in Turkestan is not quite the same. A high authority on Biblical natural history informed the Daily Mirror that the specimens were the work of a worm that only produces the substance under certain climatic conditions, which only obtain about once in every fifteen years. These worm-casts, when dry, are very light, and in the present case they were probably caught up by a whirlwind and carried away to a great distance.

The falling of a dense shower of these edible casts would naturally be regarded by the natives as a wonder.

"It is possible that the Israelites experienced this while wandering in the desert, and although the cause was perfectly natural to them it was in effect a direct interposition of Providence in their behalf."

The word "manna" means in Hebrew "I know not." In Turkestan the word has a similar meaning.

In Australia manna is obtained from a eucalyptus tree. It was formerly used medicinally in children's ailments.

Needles used to be made of bone, ivory, wood, and bronze. Needles made of steel were first used in Britain in Queen Elizabeth's time.

drive you home for nothing." "Thank you, my friend," was the smiling answer; "I think I had rather walk."

Twice at least the Dowager Empress of Russia saved her husband's life. Once, it is said, she saw

#### A STRANGE JEWEL-CASE

on the Emperor's dressing-table, and, on picking it up, found that it was unaccountably heavy. Her suspicion was aroused, and carrying it into her own room she placed it in a basin of water and sent for the Prefect of Police. An examination of the case proved that it was a most ingenious infernal machine of terrible power.

One evening when entering her husband's study the Empress heard a slight noise which she could not explain. With remarkable presence of mind she asked the Emperor to come with her to the nursery to say "good night" to the children, and as he left the room she locked the door. She communicated her suspicions to the Captain of the Palace Guard; the room was entered, and it was discovered that the lurking assassin had made his escape through the window.

It was to the presence of mind and to the brawny arm of Prince George of Greece that the present Czar undoubtedly owed his life fifteen years ago. The Czarevitch (as he then was) was riding in a jinrikisha at Kyoto, in Japan, when a fanatical native policeman attacked him furiously with a sword. The Czarevitch jumped down and tried to escape, but his assailant pursued him, and was on the point of dispatching him when Prince George, who had rushed to his rescue, felled the would-be assassin with a crushing blow of his stick.

#### ARMY'S RELIGION.

##### Secretary of War Haldane's Effort to Make it Creedless.

Mr. Haldane, the British Secretary of War, is making an effort to introduce into the army the principle of "undenominational religion," of which so much has been heard in connection with the debates on the Educational Bill.

The plan which Mr. Haldane has prepared with this object was detailed by him recently in opening the extensions recently made to the Soldiers' and Sailors' Home in Eccleston street, Piccadilly.

In a reference to the undenominational character of the work of the home, he said he agreed in thinking that men did not wish to be dragged into any particular creed.

"We have chaplains both in the Army and Navy," he continued, "but those chaplains are attached to particular denominations. With the Chaplain-General to the Forces I have been trying to devise a new element in War Office organization which may enable these representatives of varied creeds to recognize the breadth and reality of the common foundation of the work of all religions on which they meet."

"We have determined—we passed a proposition the other day—to form, as part of the regular organization of the army, a committee which shall look at the spiritual interests of the Army on a broad and comprehensive footing, on which all the churches shall be represented, and on which distinguished laymen who take, as I take, a strong view of the meaning and reality of these things of which I have spoken shall come also."

"The Chaplain-General will preside over the committee. Lord Roberts has agreed to join it, and I am going to issue invitations to some of my friends here and others that the churches generally may be brought together on the committee."

"This is an experiment. We shall see what comes of it, but I have deep confidence in that broad, common reality which underlies this view of things, and which aims simply at making things better for the soldier and sailor."

lant Austrian Archduke. Her happy days were passed in that white palace of Miramar which hangs over the Adriatic. Then her husband's ill-star made him Emperor of Mexico, and after four years of an uneasy State a firing-party shot him for a rebel against the country. His wife went to all the European Courts asking in vain for help from the cautious Sovereigns of Europe, lost her reason, and has been a maniac for nearly forty years.

Reference was recently made to the admission of a blind barrister, Mr. Neville Gilbert M'William, by the Supreme Court in Sydney. From an account of his career in one of the Sydney papers, it appears that he has been blind from birth; nevertheless he is a good player of chess and draughts, is a first-class swimmer, row's well, and is fond of sport of various kinds, including cricket and football. He plays the piano and possesses an excellent baritone voice. His sense of locality is said to be something extraordinary. For the brilliant success with which he went through the Arts and Law courses of the Sydney University he was much indebted to his mother. He is wonderfully expert with the typewriter.

#### TO ATTAIN OLD AGE.

##### General Booth Gives Several Pithy Precepts for Guidance.

Seven pithy precepts for the attainment of old age were given recently by General Booth, of the Salvation Army, in explanation of his surprising activity and vigor at the age of seventy-eight. He said:—

"Eat as little as possible. The average man eats too much. Instead of nourishing his body he overtaxes it, compelling his stomach to digest more food than it has capacity for."

"Drink plenty of water in preference to adulterated concoctions. Water is a wholesome nourishment."

"Take exercise. It is just as foolish to develop the mind and not the body as it is to develop the body and not the mind. Perform some manual labor; dig, walk, chop wood, or, if you can talk with your whole body, why, then, talk; but do it with all your might."

"Have a system, but do not be a slave to the system. If my hour to rise is 8 a.m., and at that time I haven't had sufficient rest, I take longer time."

"Do not fill your life with a lot of silly and sordid pleasures, so that when you come to die you will find that you have not really lived."

"Abstain from indulgences which overtax the body, and injure not only yourself, but the generations that come after you."

"Have a purpose in life that predominates above all else, that is beneficent to those about you, and not to your own greedy self alone. If there is one thing for which I am glad, it is that I have found a purpose which involves not me alone, but all humanity."

#### PROFESSIONAL TOOTH-STAINER.

The trade of tooth-stainer, followed in Eastern Asia, is as old a calling as any. The natives prefer black teeth to the whiter kind, and the tooth-stainer, with a little box of brushes and coloring matter, calls on his customers and stains their teeth. The process is not unlike that of blacking a boot, for a fine polish is given to the teeth. The pigment used is quite harmless.

**PEOPLE WHO LIVE IN NESTS.**  
Probably the lowest type of man is found among the bushmen of Australia. They are so primitive that they have no idea of building even the most rudimentary form of hut or shelter. Travellers from this part of the world tell wonderful stories of the nest-building people who inhabit the wilks. They find whole families of them nesting in the thickets like our ground birds, though their nests are not constructed so carefully and artistically as those of our feathered friends.

## DEATH OF CAPTAIN LOW

HE WAS KNOWN AS THE DEVIL OF THE ALABAMA.

Acquired a Captain's Certificate Before He Was 21—Sunk by the Kearsarge.

The death recently in Liverpool of Captain John Low, at the age of seventy-one, recalls the stirring events connected with the famous privateer Alabama, and the American Civil War. Captain Low was a native of Aberdeen. Adopting a nautical career, he obtained a captain's certificate before he was twenty-one. Proceeding to America, he joined the navy of the Confederate States. Meantime the Alabama, a vessel of about 1,000 tons, had been constructed at Laird's Yard, Birkenhead, and was acquired by the Confederate Government. Captain Low was one of those sent to man the vessel, his position being chief officer. The Alabama was launched on May 15th, 1862, and her completion hurried forward. Certain suspicions as to her real purpose began to be talked about. As the result of a judicial inquiry the British Government telegraphed to Birkenhead to have her detained, but they were a day too late, as she left the Mersey twenty-four hours previously. This was on July 29th.

### NUMBER INSTEAD OF NAME.

The vessel left Birkenhead without a name, there being only the builders' number, "220," on her. She proceeded to the Madeira Islands, where she took on board guns and ammunition from the steamer Bahama, sent from Liverpool for the purpose.

These were entered on the Bahama's papers as cargo, though they included two 30-pounders, with gun-carriages. Captain Semmes and other officers were on board the Alabama. Having thus been equipped for fighting, the privateer sailed forth on August 28th in her true colors, with the name Alabama painted on her bow.

Captain Low kept a log of the stirring events which followed. One entry described how, before they parted company with the Bahama, Captain Semmes mustered his crew, and having read the orders from the Secretary of the Confederate States' Navy, gave any of the men who so desired the option of returning to Liverpool with the Bahama. Few drew back.

### A FRIGHTENED PORTUGUESE.

While the Alabama was being coaled, two Portuguese officials, with a file of soldiers, approached her in a boat. Captain Low thus described the incident: "The two officials came on board, but the men who carried guns were compelled to wait in their boat. One of the officials was a thick, stout, little man with a large head and round shoulders. He became very much alarmed, more especially when he looked round and saw that we had cannon mounted, and by looking at he could see the gunner with his mate loading Enfield rifles and revolvers. He commenced talking Portuguese very rapidly, and became very doubtful about going any further on the deck, and seemed to be only anxious to jump back into his own boat."

The narrative adds that the British Consul came on board and told us we had caused a great deal of excitement on the island, the people believing we had come to take the place.

### LOOKED UPON AS PIRATES

The subsequent havoc played by the Alabama on the commerce of the Federal States, the sinking of one of their gunboats by her off the coast of South America, her ultimate destruction by the Federal man of war Kearsarge off Cherbourg, France, on June 19, 1864, and the protracted negotiations which ended in the British Government paying a heavy indemnity to the United States.

## THE TRICKS OF THIEVES

HOW SOME CRIMINALS BETRAY EACH OTHER.

Scheme of a Trio of Cardsharps to Do Another Out of His Money.

Some curious revelations as to the loyalty of criminals towards each other have recently been made in a London police-court. It was alleged by the prosecution that a gigantic forgery plot had been concocted, by which banks and private individuals had been defrauded of large sums of money, and one of the supposed conspirators was brought out of gaol to give evidence.

In a calm and business-like fashion the convict remarked that though one of the coups initiated by the gang was a complete success, resulting in a haul of over \$1,500, she reported to headquarters that it had failed to come off, and by this simple device was enabled to escape sharing the plunder with her associates.

A curious case of a trio of cardsharps "doing the double" on another was related to the writer not long ago. The victim had, by the exercise of his "talents," acquired a large sum of money. He was accordingly approached by three other scoundrels, with the pleasing information that they knew of an Australian millionaire, recently arrived in London, whom it was advisable to "rub down"—i.e., relieve of his money by trickery. Would the moneyed "sharp" join with the other three in performing the operation?

### CERTAINLY HE WOULD!

And all arrangements were made accordingly. The Australian was to be challenged to a quiet game of poker, and all would be well.

The originators of the nefarious little plan explained that the millionaire was to be allowed to win at first, so as to give him confidence; the rooking to begin at a given signal. As only one of the party—the sharp first mentioned—had any money, it was arranged that he should lose to the Australian till a sufficient degree of confidence was established, his losses to be refunded to him when the victim's money had been won and the sharing-out took place. Well, the game began, and, according to instructions, our friend with the money steadily allowed the Australian to win. When nearly all he had passed into the possession of the latter, a strange thing happened.

The Australian gasped, gurgled, dropped his cards, and fell to the floor in a fit. A doctor was called, the unfortunate millionaire conveyed to bed, and the party separated for the night. Not till some time afterwards did it dawn on sharp No. 1 that the "Australian millionaire" was also in his line of business, and that the whole comedy, fit and all, had been arranged for the purpose of getting his—the sharp's—evil-earned cash.

In Ireland the informer has been of the greatest use to the police. How many people have heard of the Irish conspiracy to steal the famous

### "STONE OF SCONE,"

which forms the seat of the Coronation Chair, from Westminster Abbey? This mad-brained project was elaborately prepared. Men were sent from America to work in conjunction with the Fenians in London, ample funds were provided, and the plot excited great enthusiasm.

It was arranged that some of the conspirators were to secrete themselves in the Abbey, overpower the police during the night, and pass out the stone through a window to colleagues stationed outside. The plot would inevitably have been carried out but for the unusual informer.

"From information received," detectives surrounded the Abbey, and the

Your Money Refunded by the dealer from whom you buy Sunlight Soap if you find any cause for complaint.

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way.

\$5,000 reward will be paid to any person who proves that Sunlight Soap contains any injurious chemicals or any form of adulteration.

Equally good with hard or soft water.

Lever Brothers Limited, Toronto

### LOTS OF WORK FOR THE LIVER.

Manufacturer, Scavenger, Filter, Life Preserver and Closed Door.

The business of the liver is to manufacture antidotes for poisons. It is a rendering establishment to which the little corpses that accumulate in the body are carried to be destroyed, just as in cities dead animals are gathered up by a scavenger and converted into useful things.

All the corpuscles of the body die every six weeks. Every second of our lives something like eighteen million of these red cells have to be disposed of, and the liver does part of the work of grinding them up and working them over into something useful.

The red corpuscles have potash in them, which is used for making bile. The bile is a kind of lye for making soap in the small intestines. The soap, like all good home made soaps, is disinfected; it is a splendid antiseptic and germicide.

The coloring matter is carefully saved out of these red cells, and sent back into the body to be used for dyeing the hair, tinting the skin and painting the dark chambers of the eye where the photographing is done.

If the liver does not do this work as efficiently as it ought these little corpuscles accumulate in the body. In other words, the body becomes a sepulchre and we carry about with us dead things that should have been discharged from the body through the bowels, the kidneys, the skin and the lungs, and should have returned to dust again.

The liver is a closed door which keeps poisons out of the rest of the body. The kidneys, skin and lungs are open doors to let the poisons escape from the body. When there comes such a flood upon the liver it cannot keep the door shut; it is forced open a little way and lets the poisons through into the blood.

Then the blood is not purified, the impurities go through and the body becomes filled with them. The brain becomes confused, dull, stupid, and the man feels bilious; the poisons get into the muscles and he feels weary and worn out; they get into the nerves and he has sciatica or lumbago; the nerve centres get irritable and inefficient and there is nervous exhaustion and perhaps melancholia.

All the food taken into the stomach is filtered by the liver before it is ab-

### WHITE BEAR MINE.

The superintendent reports during the month of August 214 feet of development work was done in the mine. Of this 97 feet were driven, extending the north and south drifts on the No. 3 ore body on the 850-foot level. Thirty feet were drifted in No. 4 ore body on the 850-foot level. Twenty-five feet of this drift was in ore of shipping grade. The ore was four feet wide, and the smelter returns averaged between \$16 and \$18 to the ton. 33 feet of drifting was done on the seventh floor of No. 3 ore body on the 850-foot level. Seventeen feet in length of this ore is 16 feet wide and the rest is 10 feet wide. The ore still continues in the face of the drift. Smelter returns show a gross value of between \$16 and \$19 to the ton. A raise was made for 25 feet on No. 2 vein, 850-foot level. Two veins of ore were found here, varying in width from six inches to eighteen inches each. These veins assay about \$37 a ton. The ore still continues on and up. Nine feet were driven north on No. 3 vein, 700-foot level. The whole face of the drift was shipping ore. The east drift on the 1,000-foot level was extended twenty feet. The Superintendent concludes:—"The outlook of the mine is very good." Smelter returns from August shipments netted the company over \$10 a ton. The President of the company, Mr. Thomas Mills, has been in Rossland during the past ten days, and has written that he has examined the workings, and that he is very much pleased with conditions as he found them, and that the mine would be on a permanent shipping basis before the first day of March next.

### MUSICAL WALKING STICKS.

Among the queer instruments in the Metropolitan Museum of Art, New York, are a cane violin and three cane flutes. The former is a peculiar, narrow instrument of small size, but perfect in every detail, made in imitation of a walking-stick and furnished with an ornamental knob handle. The strings are held by small iron pins and are turned with a key. When not in use a small bow slips within the stick and a round cover, held by metal bands, conceals the clever little instrument. The length of the violin is 2ft. 11in., and its greatest width is 1 1/2in. It is a German conceit, and dates from the nineteenth century.

Alabama on the commerce of the Federal States, the sinking of one of their gunboats by her off the coast of South America, her ultimate destruction by the Federal man of war Kearsarge off Cherbourg, France, on June 19, 1864, and the protracted negotiations which ended in the British Government paying a heavy indemnity to the United States, are all matters of history.

Captain Low frequently entertained his friends with tales of these stirring times. He stated that though the passengers and crews of vessels captured by the Alabama on the high seas were always treated with the greatest courtesy, there were some who looked upon them as pirates, and there was a general dread lest they might fall into the maws of her cruiser. Their surprise was great when they found on board the Alabama a courtesy and kindness reminiscent of a British or American liner.

#### PANIC-STRICKEN PEOPLE.

On one occasion the passengers on a captured vessel were very much alarmed, and Captain Low on going into the cabin found the women and children much scared. He succeeded in pacifying them, and they soon began to have the greatest confidence in him. On another occasion when the passengers were going away they begged Captain Low to give them some memento of their experience.

Captain Low was a fearless man, facing danger with such stolidity that he came to be known as "the devil of the Alabama."

On returning from the sea Captain Low went into business at Liverpool, and devoted his spare time to charitable institutions connected with the mercantile marine.

#### FUR ANIMALS IN CANADA.

There is no Sign of Exhaustion of the Supply of Skins.

American Consul Gabriel Randal of Dawson City, furnishes an interesting report of the fur trade of Northern Canada. He believes there is no immediate danger of fur-bearing animals being destroyed and declares there are vast unexplored regions in which fur-bearing animals abound. He writes:—

"Inasmuch as Northern Canada is frequently designated as the last great fur preserve of the world, it is worth while to study the character of the supply in these parts, its permanency, as well as the number and proportion of the skins obtained. Complete statistics are not available. However, some light is thrown upon the subject by a table, purporting to show the annual sale of the Hudson Bay Company. Large quantities of furs reach the market through other channels.

"For more than two centuries the fur trade has been vigorously prosecuted in Northern Canada, and yet the supply, save in the case of two or three varieties of animals, shows no formidable sign of exhaustion. The buffalo, whose hide was once an important article of commerce, has disappeared before the advance of civilization; the beaver can apparently only be saved from a similar fate by extraordinary measures of protection, so, too, the fur seal of the islands and waters of the Pacific. Sea otter and silver fox have been rare for many years. Fur buyers seem to agree that the fur-bearing animals of the north, with the exceptions noted, are not playing out. Vast extents of territory still remain approximately virgin and unexploited, and Indians are proving surprisingly careful in preserving game."

#### CURIOUS CAUSE OF BUSH FIRES.

The remarkable discovery has been made that many of the recent great bush fires in New South Wales and Victoria were caused by the phosphorus paste used to kill rabbits. The paste is laid down by the ton in all the rabbit-infested districts. As soon as the mixture dries it catches fire under the heat of the sun's rays and starts disastrous conflagrations.

in the Abbey, overpower the police during the night, and pass out the stone through a window to colleagues stationed outside. The plot would inevitably have been carried out but for the unusual informer.

"From information received," detectives surrounded the Abbey, and the whole thing ended in smoke.

It is only fair to say that occasionally one meets with shining instances of loyalty among criminals. For instance, at the trial of the forgers, Edward and Maud Willing, in London, the male prisoner did all he knew to shield Mrs. Hughes, the woman through whose instrumentality were obtained the signatures it was desired to forge.

The notorious French criminal known as the "Mouse" was arrested outside Mazas Prison, whither he had gone to convey food to one of his pals who was confined therein. Had the "Mouse" been content to leave his friend to his fate, he himself might have got off scot-free.

#### WALTZING FOR FOURTEEN HOURS.

The Italian champion waltzer, Signor Guattiero, recently offered \$200 to any dancer who should succeed in outwaltzing him. Five competitors took up this new challenge—three Frenchmen, one Italian, and one Russian. The match took place at the Tivoli-Vauxhall dancing-hall in Paris, when Signor Guattiero easily won. He started dancing at half-past ten in the morning, and waltzed for fourteen consecutive hours. Signor Poli-Luigi played the piano during the whole time, performing fifty-four different waltzes.

man feels bilious; the poisons get into the muscles and he feels weary and worn out; they get into the nerves and he has sciatica or lumbago; the nerve centres get irritable and inefficient and there is nervous exhaustion and perhaps melancholia.

All the food taken into the stomach is filtered by the liver before it is absorbed. That is why one can, with apparent impunity, take such things as tea and coffee, whiskey, beer, tobacco, etc. All these impurities are passed through the liver before they get into the general circulation. If they should go straight to the brain of the drinker would die shortly after taking his glass of whiskey.

When the liver is plump and healthy, full of glycogen made from the blood, it has a wonderful faculty of destroying poisons; but a starved liver cannot do this. That is why a glass of whiskey taken before breakfast does a man twice as much harm as if taken after breakfast.

A dose of medicine on an empty stomach is much more powerful in its effects than a simple dose taken when the stomach is full, for the reason that a full stomach furnishes the liver with material which it makes use of to fight poisons.

Willie—"Did you have a good time at the picnic?" Jimmie (small boy)—"Fine! Sis got into a wasps' nest, pa fell out of a tree when he was putting up a swing, and ma burnt her fingers making tea. Awful fun, I can tell you."

knob handle. The strings are held by small iron pins and are turned with a key. When not in use a small bow slips within the stick and a round cover, held by metal bands, conceals the clever little instrument. The length of the violin is 2ft. 11in., and its greatest width is 1 1/2 in. It is a German conceit, and dates from the nineteenth century. Like the cane violin, the cane flute is also of German make, but it dates from early in the eighteenth century. The flute is in C, and is made of a light wood, ornamented with turned bands of the same color, and finished with a knob. The lower joint is solid. It has six finger-holes and one flat brass key. The instrument is blown at the side like the transverse flute, and is an excellent sounder. It is 3ft. long, and it requires a close inspection to see that the cane contains a flute.

#### NOVEL RAILWAY TRAIN.

At the close of a banquet given by the Maharajah of Gwalior to the Prince of Wales, a centrepiece in the form of a temple and decorated with electric lamps and flowers was hoisted to the ceiling by pulleys, and revealed a perfect model railway on the table underneath. The locomotive and train were 8ft. long, and carried decanters, cigars, cigarettes and matches. The train was started by closing an electrical circuit. As long as this was closed by a spring the train moved, but the lifting of a decanter or box of cigars resting on the spring allowed the spring to act, thus breaking the circuit and stopping the train.

### WE RECOMMEND

# White Bear Mine Shares

**THIS MINE** adjoins (please note adjoins) The LeRoi—and is in a fair way now to repeat the history of that famous mine—About 250 tons were shipped (taken out in course of development only) in August—netting after paying for all transportation and smelter charges about **TEN DOLLARS** per ton.

The management, directors and shareholders deserve the greatest credit and the fullest measure of success for their persistency and courage. Do you realize what "Repeating the History of Le Roi" means? **FIGURE IT OUT:**

|                                                        |                  |
|--------------------------------------------------------|------------------|
| <b>\$100 Invested in Le Roi at 50, now worth .....</b> | <b>\$ 20,000</b> |
| <b>500 Invested in Le Roi at 50, now worth .....</b>   | <b>100,000</b>   |
| <b>1000 Invested in Le Roi at 50, now worth .....</b>  | <b>200,000</b>   |

You can buy the non-assessable White Bear now on the open market at about 70c per share. Send for reports and particulars and judge whether it will likely sell for one dollar per share in the near future. You are the architect of your own fortune—only the "might have beens" and "has beens" rate dolefully of LUCK in others. Use your own judgment, investigate and **MAKE YOUR MONEY WORK.**

## MEN'S UNDERWEAR.

If there is any one thing we are proud of it is our Assortment and Extra Value in Men's Underwear.

Some men want wool Underwear or nothing—other men wouldn't wear wool if they got it for nothing—So we've all sorts of good Underwear to suit and fit many men and many minds and forms.

All cotton, cotton and wool mixed, and all wool. We've every good fabric that's suitable for Good Underwear,—white and colors,—medium grade and luxurious—We fit the tall man, the small man, the big man, and the stout man.

We have the exclusive agency for "The Tiger Brand" Underwear which is acknowledged the best value of any brand made in Canada. To show you what confidence we have in this Brand, we invite you to buy a "Tiger Brand" 50s or 75c garment take it home, compare it carefully with any other brand sold at the same prices—if you are not satisfied it is better we will cheerfully refund your money—suits \$4 to 46.

"Penmen's" all-wool from 75c to \$1 75. Wolsey Brand, finest English make, (Unshrinkable) is known the world over. We have it in all sizes, \$4.50 and 5.00 per suit.

"Cuttee" extra fine all-wool, unshrinkable, \$5.00 per suit.

"Wright's" New York Health Brand, extra heavy and very fine wool fleece at \$1.50 per garment or \$2.75 per suit.

It would take too much space to describe all our different fabrics and styles so we'll sum it all up by saying—Come here for the Best of Underwear and for perfect satisfaction.

## J. L. BOYES.

## THE BEST FLOUR.

DAFOE'S NONESUCH  
DAFOE'S MANITOBA PATENT

By numerous tests by the best Bakers the above mentioned grades have been proven to be the best Flours in the market.

When buying Flour ask for Dafoe's, and patronize your home mill, thereby producing Bran and Shorts that you can purchase cheaper than the product of the Western mills, which has to be transported thousands of miles at great expense, and usually, when it reaches you, of inferior quality.

The grocer complains if the farmer or the mechanic sends to Toronto or to outside points for an article he can get at the home store just as good, but he does not hesitate to buy Flour from mills hundreds of miles away, and sell you an inferior Flour for more money than you can purchase the home product for, every bag of which is guaranteed.

CHOICE CORN MEAL and BUCK-WHEAT FLOUR always on hand.

FEED GRINDING a specialty, with the best feed mills known to the trade.

A full stock of the best ANTHRACITE COAL. Also in the market for the purchase of all kinds of Grain.

Ask for prices at the big Mill before purchasing your Flour, Feed or Coal.

### GRAND JURY PRESENTMENT.

The Grand Jurors of our Sovereign King Edward VII of this Court of Assize beg leave to report as follows:

That we feel much indebted to your Lordship for the lucid manner in which in your charge you set before us our duties as Grand Jurors.

That we join with your Lordship in congratulating the residents of this county in the absence of any serious crime.

That we have visited the goal and find everything in good condition as far as the duties of the Governor are concerned.

Your Grand Jury would recommend that the furnishings of Jury room be improved and that ink and writing materials be supplied. The chairs are better calculated for bar room furniture than for a Jury room.

We would also recommend that Electric Light connection be made with the jail as fixtures are installed and everything in readiness for the current.

All of which is respectfully submitted  
Dated at the Grand Jury room at Napanee this first day of October 1906.

Chas. Riley  
Foreman

Madden vs Smith—An action brought by Madden Bros against J. F. Smith & Son to recover \$1200 damage for loss by fire of their slaughter house and other buildings. The defendants paid into court \$600 to satisfy plaintiff's claim. Judgment for plaintiffs for \$650, with costs of action. Judgment to be stayed for 30 days. J. L. Whiting, K. C. and John English for plaintiffs. W. S. Herrington K. C. for defendants.

Baker vs Amey—An action for wages and work done brought by John F. Baker, of Millhaven, against the estate of the late Francis H. Amey. The following is the Judgment of His Lordship:—I direct Judgment to be entered in favor of the plaintiff for the sum of four hundred and fifty dollars with costs of action and upon defendants making title and completing conveyance to the plaintiff of the lands mentioned in the counter claim (being a house and lot in Millhaven) within 30 days or such further time as the Court may appoint their Judgment for defendants upon their counter claim against the plaintiff for \$150 without costs, otherwise counter claim dismissed without costs. Judgment stayed for thirty days.

H. M. Deroche K. C. and E. G. Porter for plaintiff and J. L. Whiting K. C. for defendant.

E. LOYST has large stock of flour, Royal Household and all other grades, all kinds of feed, large quantities at the lowest prices. He wishes to sell out in the next month. Salt, Coal Oil Groceries. Highest price for eggs cash or trade. A call solicited.

The four men arrested on fair day suspected of picking pockets, appeared before the Magistrate on Friday last, a number of witnesses were examined, and James Wilson was committed for trial, and the other three though undoubted crooks were let go for want of evidence.

William Wallace, brother of Mr. John Wallace, Napanee, passed away in Kingston General Hospital, on Sunday evening last, aged 71 years. Deceased leaves a wife, two sons, John and Wm. Wallace, who reside in the U. S., and two daughters, Misses Nettie and Eliza Wallace, Kingston. The funeral took place to the family plot in the Eastern cemetery on Monday.

At 4.30 o'clock Monday afternoon, occurred the death of Rev. Father J. D. O'Gorman, after an illness of several months of an incurable disease. The news of his death was heard with great regret, not only by his parishioners in Gananoque, Landsdowne and Howe Island, but by all classes of people throughout the province, for Father O'Gorman was widely known and greatly respected.

Robert Burke, a young machinist in the locomotive works, Kingston, met a shocking death at half-past nine Tuesday morning. He was in the erecting shop, in charge of the slotting machine, the largest in Canada, and on which he was most proficient. A job on which he was working was almost complete, and with his hand on the lever, he put his head underneath the slowly moving plunger to watch the finish. Before he was aware, the plunger was upon him and his head was forced against the steel table. The side of the head was fearfully crushed, and death was almost instantaneous.

## Rummage Sale.

The W. C. T. U. purpose holding their Annual Rummage Sale, the second week in November. This early notice is given with the hope that housekeepers will hold in reserve any second hand clothing or furniture that they may be disposed to donate. A committee of ladies will shortly canvas the town for such contributions. Proceeds of sale in aid of Deaconess work.

## Paints Oil and Glass.

Our import order of glass is now here and we are ready for the fall trade. Do not overlook the fact that we are the largest dealers in these lines and are gratified to know that the quality of the goods we have been enabled to furnish the public within the past has brought to us this large and growing trade. Elephant Brand of white Lead and ready mixed paints are guaranteed for quality.

**MADOLE & WILSON**

## Teachers' Excursion.

The teachers of Lennox & Addington with their friends, will join the teachers of Kingston and Frontenac County in an excursion to visit the schools of Toronto. Train leaves Napanee, Thursday morning, Oct. 11th, at 7.30 o'clock. Fare \$3.70. Tickets purchased on the train at Napanee, good to return on any train (except No. 4) until Saturday night. Those who intend going please notify the Secretary, J. E. Mair, before Monday night as an extra car will be provided, if necessary by the Agent at Kingston. Information regarding numbers must be sent him not later than Tuesday a. m.

## Take Care of the Eyes.

Don't read in a reclining position or in bed!

Don't use the eyes when they are tired or weak from illness!

Don't work longer than two hours without closing the eyes and resting them for five minutes!

Don't have colored shades on the lamps. Use white or ground glass. If you must have a colored shade let it be green!

Don't fail to consult an oculist if you find that your eyesight is growing dim or hesitate to wear glasses if you need them.

Impaired vision scientifically corrected at The Medical Hall—FRED L. HOOPER.

## A September Bride.

A very interesting event was the marriage on Tuesday of last week, at Centreville, of Miss Jane Dewey, daughter of Mr. and Mrs. John Dewey, Croydon, to Patrick V. Whelan, son of the late Thomas Whelan, of Napanee, but now of Fernie B. C. The ceremony was performed by Rev. Father McCarthy in the presence only of the immediate relatives of the bride and groom. The bride wore her travelling dress of Scotch grey, pleated skirt and smart short coat, with this was worn a white silk blouse, and jaunty Rob Roy hat in grey, caught at the sides with natures feathers. Instead of the customary bouquet, the bride carried a pearl Rosary. The bridesmaid was Miss Scanlin, Enterprise, becomingly attired in grey, while Mr. J. E. Scanlin acted as groomsmen. After the nuptial High Mass was celebrated, the party repaired to the home of the bride's parents, where a sumptuous wedding breakfast was served. The groom's present to the bride was a beautiful pearl and garnet ring, to the bridesmaid, a dainty pearl brooch, and to the groomsmen a pearl tie pin. Mr. and Mrs. Whelan go to Toronto, take the boat to Fort William, thus breaking the long journey by rail. They will spend a few days in Winnipeg on their way to the farther west where a comfortable home awaits them.

without costs, otherwise counter claim dismissed without costs. Judgment stayed for thirty days.

H. M. Deroche K. C. and E. G. Porter for plaintiff and J. L. Whiting K. C. for defendant.

## Wait for It!

## Old Stove Pipes made new

Sherwin-Williams new stove pipe enamel—both black and aluminum will make your old pipes look new. No smoke—no smell—no burning off—it simply shines. The Medical Hall—FRED L. HOOPER, Sole Agent for Napanee.

## Parish of Camden.

Yarker—St. Anthony's church was most beautifully and tastefully decorated by the ladies of the congregation assisted by the gentlemen for the Harvest thanksgiving service Sunday last. Beautiful cut flowers adorned the altar, and the tasteful arrangement of fruit and grain be a testimony to the gratitude of all hearts for God's bountiful Harvest. The choir were out in full force, Mr. Phillips singing a solo, Mrs. Wm. Skinner presided at the organ. Rev. Elwin Radcliffe preached on "Praise and Thanksgiving" the offerings \$8.00 was for the W. and O. Fund.

Newburgh—Sunday last was observed as a Day of Thanksgiving to God for a rich Harvest in St. John's church, the church was tastefully decorated and many samples of this year's vegetables and fruits, were in evidence. The organist and choir assisted by Mr. F. G. Miller rendered a very hearty and bright service of praise and thanksgiving, the Rev. C. E. S. Radcliffe conducted Divine Service. The offerings for the W. and O. Fund, \$1.00 was good.

Camden East. At the regular 3 p.m. Service at St. Luke's Church contributed \$2.33 for W. and O. Fund. The great Day here will be (D. V.) Thanksgiving Day Oct 18th when it is hoped that the debt will be cleared off and the Church be consecrated early in the spring.

## DESERONTO ROAD.

The steam engine belonging to Mr. Davis, en route for William Joyce's, met with quite a serious accident. In crossing the bridge near Robert Birrell's house the engine took a turn for the south and the railing not being sufficiently strong, it went into the ditch, however after some delay and expense the engine proceeded west and they are now threshing at Mr. Joyce's. They have several jobs in the neighborhood now waiting for them.

The following from this road attend the Picton Fair. Mr. and Mrs. John Hudson, sr., Mr. and Mrs. Bert Hudson, Mrs. Wm. Hudson, Mr. S. Sager, Mr. and Mrs. F. VanVlack, Percy and Lulu VanVlack, Mr. and Mrs. Allan Oliver and Miss Gerty Bowen.

Miss Emma Walker, of Thurlow visited last week at Mr. Levi Sager's. She was accompanied by her little sister Olive.

A. S. KIMMERLY pays highest price for choice Timothy Seed. Plenty of Bran and Shorts in stock, Liverpool Sax Salt, and fine barrel salt on hand. Cheap Sugars bought before advance. Five Roses Flour has no equal. Try our celebrated 25c Tea.

## LAPUMS WEST.

On Oct 2 death again visited our midst and this time claimed one of our most respected young people in the person of Miss Carrie Brown. She was 23 years of age and had been a sufferer for the past three years from a lingering illness. The funeral took place on Thursday from her late residence here to the Wilton Methodist Church where the services were conducted by the Rev. R. A. Wattam, after which the remains were interred in the Wilton Cemetery. The family at home have the sincere sympathy of everyone hereabouts.

Mrs. Wm. Gibbens, of Watertown, is spending a couple of weeks visiting her brother, Mr. H. E. Bush, here and elsewhere.

Wm. Lapum is staying at Levi Salisbury's, Bethel, for a few weeks. Mrs. F. Brown and Miss Florence Joyner, were calling on friends at Thompsonville on Tuesday.

Mrs. William Love is improving quite nicely after being confined to her bed for several days from the effects of a severe fall.

Miss Walker, the Deaconess engaged by the W. C. T. U. is expected to arrive in town next Monday.

Mrs. Nicholas VanAlstine was in Newburgh on Wednesday the guest of her daughter, Mrs. Wm. A. Boyce.

A number of the young lady friends of Miss Neta Smith, tendered her a surprise party on Friday evening last, in commemoration of her birth-day. The evening was enjoyably spent in games, etc. Refreshments were also served.

Mr. E. L. Kenny, of Ottawa, has taken Mr. Allen's place as teller in the Crown Bank, Mr. Allen going to the Odessa, branch.

Mr. Belfie, of Gananoque, has entered the Crown Bank here as junior.

Mr. Don Purdy and bride, nee Miss McCall, of Wooler, were visiting friends in town a few days this week, guests of Mr. and Mrs. H. E. Fralick.

Dr. Cartwright, of Buffalo, has rented Mr. Robert Light's house and will occupy the same shortly.

Mrs. J. Pratt was in Deseronto on Monday.

Mr. Allan Fraser has sold his house on the south side Dundas street to Mrs. Casey.

Mr. Robt. Howie and daughter, Mrs. Clancy, Fellows, were the guests of Mrs. R. Lawson, Deseronto, on Monday.

Mr. W. F. Hall leaves next week for the west.

Mr. and Mrs. Alfred Clark, Empey Hill, are spending a couple of months at his farm at Waskada, Man.

Mrs. Finkle leaves on Thursday next, to spend the winter in Providence, R. I.

Mrs. I. E. Eakins and H. Warner, left for Toronto to spend two weeks.

Miss Agnes Caton, of Toronto, was in Napanee, Saturday, on her way home to Thorpe,

Mr. and Mrs. C. D. Wagar, of Enterprise, were visiting friends in Napanee last Friday.

Mr. and Mrs. Byron Derbyshire, of Odessa, were in Napanee on Friday last.

Miss Veal, Trained Nurse, of Kingston, was calling on friends in Napanee, Friday.

Mrs. M. C. Bogart was "At Home" on Thursday afternoon.

## MARRIAGES.

RAMSAY—ARNOLD—On 26th Sept., at Napanee, William John Ramsay, Camden, to Miss Ethel Arnold, Richmond.

## DEATHS.

WALLACE—At Kingston, on Tuesday Sept. 30th 1906, William Wallace aged 71 years.

Mr. Ed. Kaylor has sold his speedy trotting horse, Iris K., to his brother in Winnipeg, and will be shipped to that city next Tuesday. It is said the price was \$1,000.

Picton, Oct. 3—Isaac Friar, a man about fifty years of age, was struck by a C. O. R. passenger train yesterday morning and so badly hurt that he died from his injuries last evening. Deceased was walking the track in Picton yard, and being very deaf did not hear the approaching train. He was unmarried.

THANKSGIVING DAY, OCTOBER 18th---This store will be closed all day.

## ODESSA FAIR.

The fair at Odessa, on Friday brought a great aggregation of people. The streets were "a sight," as this event is the popular thing of the year in the populous township. The exhibits were fine not only of the smaller things of growth, taste, or manufacture in the drill shed, but of fine animals on the grounds. The hotels could not accommodate more than a fraction of the crowd for dinner, so the villagers had the "meals at all hours" system in operation in a number of shops and houses. There was again a rendezvous of militia transport outfit, twenty-seven teams in all and Lieut. Col. Young, with Lieut. Col. Clyde, acting A. D. C., made inspection. Owners were paid the \$3 parade fee. Lieut. Col. Mabey offered two prizes for the best equipped outfits. The winners of these prizes were Messrs Clancy, of Thorpe, and Snider, of Ernest-town.

### PRIZE LIST.

#### CLASS 1—DRAUGHT HORSES

Judges—C A Anderson, L H Stover

# LINENS FOR THANKSGIVING !

Never has the Linen Department been in a better position to show all lovers of high class tablewear than this autumn and festive season 1906. We buy direct from the leading manufacturers of Belfast and Glasgow—we save you a middleman's profit by doing so. We carry one of the most select stocks of Table Linens, etc., in Central Ontario, and our prices will convince you as such. Prepare now for Thanksgiving, you may want a new Table Cloth or Napkins, D'Oylies, Centrepieces, Tray Cloths, Carving Cloths, or you may want a Drawn Work Table Cover, Shams, Side Board Scarf, Towels or Towelling, visit this section, if it were only to see the variety.

See the Special Window Display Monday and Following Days.

## Stylish Dress Goods....

This season's importations. Again we draw your attention to the advisability of seeing the newest Dress Fabrics. We are proud of the collection, which is of the most exclusive nature. If you are seeking information in regard to styles, materials etc., ask at the Dress Goods section—we are always pleased to inform you, whether you buy or not.

The newest styles in novelty blacks. The newest weaves, plain and fancy blacks. The newest Sheer weaves in silk and wool blacks.

The new Waistings are here. Fancy Cashmere, fancy Albatross and fancy Mohairs, in exclusive patterns.

A beautiful collection of Scotch, French, English and German Tweeds and Novelty Suitings, in plain effects, nobby cheeks and overchecks, shadow plaids, herring bone and fancy weaves, in weights adapted for any purpose, perfect shadings and color blendings.

## SATURDAY SPECIALS:

8 doz, only Leather Hand Bags (lined) with neat, small coin purse, in colors of brown, black, green and blue, warranted all leather and regular 75c quality. Special Saturday at 9.30 a.m.

5 doz. Children's and Misses' Camels' Hair 'Tams, just the thing for school girls, in colors of pale blue, brown, myrtle, grey, white, navy and red, sold in the regular way at 50c each. Saturday at 9.30 25c each.

one, warranted in leather and regular 10c quality. Special Saturday at 9.30 a.m.  
 5 doz. Children's and Misses' Camels' Hair 'Tams, just the thing for school girls, in colors of pale blue, brown, myrtle, grey, white, navy and red, sold in the regular way at 50c each. Saturday at 9.30 25c each.

## Staple Needs for Fall and Winter

The cool fall atmosphere has already been felt, heavier wearing apparel is now in demand. We have already made preparations for it, something extra and out of the ordinary, Cotton Shirts, Union Shirts, Grey, Navy and Stripe Wool Shirts, Military Shirts, and Druggist Shirts, Cottonades and Moleskins, Iso Canton Flannels. Tickings which are guaranteed featherproof.

## FURS OF QUALITY.

In the gowning of women, the method of development in so far as concerns the individual, is in truth secondary to the selection of Furs. Therefore the restige of this Fur Store, unquestionably the foremost, is something of which we may well be proud. Nothing worth having, either of Style or quality has escaped us, and we may say with assurance that this great display represents the last word of fashion as regards Furs, for this Fall and Winter. See them, enjoy them, save from them.

## READY-TO-WEARS.

TWEED COATS—for wearing now. The popularity of the long Tweed coats is assured—no wonder—most any woman looks well in one, and they're not only becoming but decidedly useful too. Our collection of Tweed Coats has been roundly admired, and the prices seem so low, not only in connection with value, but chiefly because the style is always so rich, distinctive, and elegant—Also the few Norfolk Gofers for Ladis in white, a complete range of sizes.

Ladies', Misses', and Children's Underwear, the noted Watson Unshrinkable brand, all sizes and prices.

## Linoleums and Oil Cloths.

House-cleaning time now in vogue, you may need a new floor covering for the dining room or kitchen of Linoleum or Oilcloth. This season's importations are very desirable, exclusive designs and patterns in all widths, especially 8/4, 12/4, and 16/4. New Crotonnes for lounge and chair coverings. New Draperies, Madras Muslins, Frilled Point-de-Sprit, Etc. Come to-day get our prices.

# MADILL BROS.

## Gettin' Wisdom

a comparatively easy task if you start it while you are young. Don't allow your children's eyes to be ruined for all time because "they look too 'ded' with glasses on."

We'll tell you the truth as to whether they need glasses or not, and charge you nothing for the telling.

Headaches in children are suspicious. We are also the best people to guarantee the quality of our frames, it being part of our Jewelry business to acquire that ability and knowledge.

(b)—W. Fralick, M. Root, H. Collier, A. Vanalstine, S. Cronk, M. Wolfe, R. Kelly, E. Kelly.

### EAST WARD.

JR. III—F. Pendell, R. Vanalstine, R. Lasher, D. Smith, E. King, H. Bruton, B. Murdoch, O. Knight, E. McMillan, J. Warner, R. Loucks, E. Loucks.

SR. II—H. Baker, M. Mills, G. Warner, V. Perry, M. Laird, A. Bland, J. Simpson, N. Root, N. Giroux, W. Duncan, J. Irving, JR. II—W. Dibb, K. Martin, A. Kelly, L. Trumper, E. Kelly, R. Vanalstine, C. Clarke, W. Kelly, J. Beck, M. Mills, A. Vance, F. Graham, D. Baker, D. Smith, B. Cornwall, L. Pendell.

SR. PT. II—C. Peocord, M. McCabe, R. Kelly, G. No ris.

Grade I—W. Cronin, J. Dibb, D. Hooper, F. Wagar, J. C. Trumppour, A. Morden, A. Wagar, H. Miller, S. Metzger, G. Root, M. Band, E. Couger, G. Wagar, G. Thompson, H. Ward, B. Cowan, W. Mowbray.

### LAPUMS WEST.

We are having a gentle foretaste of Winter this week, also plenty of rain.

Last Friday, still another of our older residence was laid to rest, in the person of Smith Peters. He had been an inmate of Rockwood Asylum for a number of years. The cause of death is said to be Heart Failure, he was about 65 years of age. Services were conducted at the house by Rev. Wattam, after which the remains were

All Medicines advertised in the Express fresh and good at Wallace's.

**LETTER TO THE EDITOR.**  
Bath, Oct 4th, 1906.

Editor of the Napanee Express.  
Dear Sir—It is often a difficult problem how to meet and dissipate intangible and vexing rumors, but I believe you can, and would be willing to help, by publishing this letter. With regard to one of our patrons, about whom there were reports that he was watering his milk, it seemed to me, on a mature and critical review of all the situation, that some other or modified explanation would be found. So, at an opportune time, on engaging the patron in conversation on our general business of dairying, while he at that time did not know of the reports hanging over him, or that I had a special object in my talking, I found that he, on account of his milk-stand being in a very warm situation, had devised a unique mode of getting and making the milk cold, as it had previously become sour. He drenched the milk-can inside and out with cold water from the well, and then pouring out the water, and when the warm milk was put in, he pumped a creamer full of cold water, and set it in the milk to cool it. These acts, to onlookers who might not be close by, might naturally tend to arouse, or even seem to warrant, the suspicion that water was being put into the milk. However, at our factory here, where there is every mechanical apparatus for testing the milk, and where the highest quality of cheese is made always right along, as is evidenced by the unflinching test of the high rate of sales that are made, Mr. Wood, our cheesemaker here, tells me that the milk has not been watered either in the case of the above-mentioned patron, or in the case of three others, whom some large imagination implicated with the first-mentioned one, presumably for the sake of making a big sensational tale, this latter fiction being made completely out of whole cloth. It is true that some of these laugh at the preposterousness of the idea of themselves being implicated in this, while others of them feel very deeply indeed in the matter. So that I regard it as no more than fair that this public elucidation of it should be made. And I might also say that the high reputation and standard of our Canadian cheese in our markets abroad is due to our rigid and careful Government supervision and inspection of it, and that everyone of us cannot be too cautious, so that we send our milk to the factory in its best purity, quality and strength.

(Signed) M. R. Rowse,  
Secretary Bath Cheese Factory.

# FEAR AND FAITH

## The Soul of Man Never Has Ceased to Cry Out for the Living God.

"Now, faith is the assurance of things hoped for, the conviction of things not seen."—Hebrews xi., 1.

To many faith simply means denying the reason and relying on emotion. They have what is called saving faith and are able to feel that the Almighty forgives their wrong doings, ceasing to be angry with them; their faith being perfect when it takes away fear of punishment. To these faith is that which they pay in the form of credence to whatever is ecclesiastically asserted in exchange for the complaisance of deity.

Those who deny all religion assert that it is founded on fear. There is enough in that assertion to give it the color of truth. Yet fear of the unseen is but the survival of savagery. Faith founded on fear becomes servile, debasing, superstitious.

What is there in God to fear? Is the Lord of life also the foe of our lives? Is the author of a world so fair and lovely, inviting us to joy and inspiring with feelings of pleasure, the foe of happiness? Has he made the world a paradise and planted in man's breast the seeds of kindness, gentleness and sweet thoughts only to glower over this world in hatred and to damn it with dread of himself?

All things that can be known argue the goodness of the unknown. As soon as a man learns to live with nature he loses his fear of forest, beast, and sea. Familiarity breeds confidence.

### AFFECTION AND REVERENCE.

Only the remote and unfamiliar fill us with dread. The city bred tremble in the woods at night, where the native feels himself amongst well loved friends.

In the same manner the fear or the divine, born of unfamiliarity, instead of being an evidence of reverence or of religion, becomes the mark of ignorance and cowardice. Rectitude of conduct resulting wholly from regulating oneself as under an all-seeing critical eye and in dread of a far-reaching devastating hand, cannot produce enrichment of character. Hatred never gave birth to holiness.

The souls that in all ages have lived nearest to things spiritual, that have most enriched the world with thoughts, whose inner visions pierced our outer clouds, seeing something of the glory of

the infinite, brought back no pictures of a face austere, of a cruel despot, or of aught for love or truth to fear.

True faith, instead of being a compromise to allay our fears of unknown tils and calamities, ever has been the fearless, reverent search for the face of the infinite. It does not say: "I believe that God will let me alone because I did those prescribed things"; rather it says: "I cannot be satisfied alone and apart from him, the source and sole satisfaction of all life."

Science with its passion for truth, art with its passion for beauty, ethics with its passion for rightness, are all but parts of true religion, the soul's passion for the infinite heart and mind in which all ideas of truth and beauty take their rise and find

### THEIR FULL REALIZATION.

The soul of man never has ceased to cry out for the living God; the religion of fear has given it no satisfaction. Its followers have been too busy building themselves shelters from the heaven they dread, shelters that become as leaden shields shutting out the eternal tenderness and beneficence. No man ever found the celestial city or its glorious king so long as he regarded his religion as a cyclone cellar.

To those who, with eyes of reverence, seek to find the good in all things here, believing that love is better and mightier than hate, that whatever is good, kindly, tender, pure, and ennobling in us, is but the reflection from the glory of the infinite, traces in our dust by which we find our way to him who inhabits eternity, these, through eyes of faith, have found a presence beyond description or definition.

Fear sets a-afire off a mighty monarch; faith finds near at hand one whom it calls "Father." Fear shrinks from the impending wrath, love rests in the unchanging goodness. Fear imagines a throne and flaming sword; faith has confidence in a better day ever dawning, in the triumph at last of right, in the reality of an incomprehensible love that sings in its joy, soothes in its sorrow, strengthens in its discipline, a life and love nearer and more real than any of the other facts of living.

HENRY F. COPE.

## THE S. S. LESSON

INTERNATIONAL LESSON,  
OCT. 14.

Lesson II. The Ten Virgins. Golden Text: Matt. 25. 13.

### THE LESSON WORD STUDIES.

Note.—The text of the Revised Version is used as a basis for these Word Studies.

A Longer Discourse.—Our lesson passage for to-day is part of a longer discourse of Jesus recorded in chapters 24 and 25 of Matthew's narrative. This discourse contains (1) a prediction of the fall of Jerusalem, (2) a prediction of the end of the world, (3) a group of parables related to these predictions and to each other. In the parable of the ten virgins the main point is the exhortation to Christian disciples to perpetual vigilance and watchfulness in view of the certainty of the end of the

## ENGLISH TIPPING HABIT

EMPLOYEES OF HOTELS AND RAILWAYS ARE UNDERPAID.

American Tourist Writes a Scathing Indictment to a London Paper.

An impressive letter, in which the system of giving and receiving "tips" is criticised as debasing in its nature, has been written to the London Daily Mail by an American tourist, Mr. M. F. Steele, from Liverpool, on the eve of his return to the United States. He says:

The average American "tips," but he has a profound contempt for any grown and able-bodied man or woman who accepts a "tip," and he despises a condition of society and business which allows hotel proprietors and railway and other companies to count upon the "tips" of their patrons to supplement the wages of their underpaid servants

## EXPERT CATTLE THIEVES

IN INDIA THE ART IS BROUGHT NEAR TO PERFECTION.

Various Paraphernalia Used to Assist Them in Carrying on Their Trade.

In the sparsely cultivated and practically barren tracts along the rivers Ravi and Sutlej, in the plains of the Punjab, are to be found perhaps the most expert cattle thieves in the world. There are several tribes in that neighborhood whose principal means of livelihood is cattle stealing. The male members are, in fact, brought up to it, and regard it as an honorable hereditary calling, while it is a rule among some of them not to allow a youngster to wear a pugri (turban) until he has shown himself to be a man by appropriating some one else's animal, be it camel, horse, bullock, cow, donkey, goat or sheep, writes Capt. C. H. Buck in Chamber's Magazine.

Cattle theft is more or less common throughout India, but it is brought to a fine art in the Punjab.

In the tract I have mentioned there are systems of depots and lines to which and along which animals are taken when stolen. The actual thief delivers an animal at one of the depots, and it is at once handed over to some one else, who passes it down the line, so that in a single night it can be taken away to a long distance. In exchange for one of these stolen animals the thief will later on receive another, which has been bagged perhaps a hundred and fifty miles away down the line.

The professional, among his other achievements, is able to track in quite a marvellous manner. He can read marks and signs on the ground as easily as an educated person can the words in a book, while he will recognize a person

### BY HIS FOOTPRINTS

just as an ordinary person would recognize another by his face or general appearance. For this reason he often finds it profitable to track animals stolen by others than his friends. A good tracker can sometimes follow the tracks of a thief and a stolen bullock or camel as far as fifty or sixty miles in a day, provided that they have passed across the open jungle and the thief has not been too cunning.

Animals are generally stolen in the daytime, when they are grazing, and at night when they are in a hut or some kind of enclosure. In the former case the loss is generally not discovered until the evening, when the herd is collected and counted before being driven home; and on such occasions the thief gets a long start, for the herdsman has to drive his other beasts home before he can give the alarm, and then when a tracking party has been formed it can only proceed slowly, for the tracks have to be followed by lamp or torchlight. In the latter case the theft usually takes place in the small hours of the morning, and is discovered a short time afterwards, so that the owner is close behind the thief, and has the whole day before him to follow up the tracks. It is really remarkable how a bullock can be removed from a yard without any one being wakened up, though persons are sleeping all round it, and there are plenty of dogs about. An old hand, however, can make a hole in a mud wall large enough for a bullock to pass through without making any noise, and he knows exactly how to entice the animal out quietly, after muffling its bell and placing leather shoes on its feet.

A thief when operating by himself will sometimes take an animal he has stolen for about ten miles, and then leave it for several hours tied up to a tree

### IN SOME SOLITARY SPOT.

If the tracking party arrives during

## HOME.

### SELECTED RECIPES.

**Tough Onions Made Tender.**—Cut large tough onions in 1/2-inch transverse slices and cook soft in salted water. They become tender and delicious. Then serve them with a cream sauce.

**Try this method of mixing mustard.** It will make delicious condiment: Slice an onion in a bowl, covering it with vinegar. Let this stand forty-eight hours, then pour off the vinegar into another bowl, add a little red pepper, salt, sugar and enough dry mustard to thicken to a cream. The proportions should be a teaspoonful of the pepper and salt and twice that of sugar, but tastes differ somewhat as to the quantity of sweet used.

**Fried Green Peppers.**—Cut open lengthwise, taking care not to let the seeds touch the sides. Take out the seeds, slice the peppers crosswise and lay in boiling water until it and they are cold. Drain and wipe the sliced peppers and fry in butter. Serve dry, as an accompaniment to fish.

**Baked Apples.**—One of the most wholesome dishes is a baked apple. It is delicious at breakfast as well as at supper. In fact, apples in almost any form are invaluable. For variety's sake try peeling the apples before baking them. Peel and core them, fill the hollows with spice and sugar, and bake long enough to give them a thin crust. Sometimes a bit of butter is placed on top of each apple before putting it in the oven. Serve them cold with whipped cream.

An excellent salad can be made by cutting two Spanish onions in slices, putting them in a large bowl, and pouring boiling water over them, letting the onions remain in the water for just one minute. Drain and plunge into ice-cold water, letting them remain for several hours. Prepare four long, green cucumbers by paring and slicing, and letting them remain in cold water for the same length of time. Drain the onions and the cucumbers, and place them in a bowl, pouring over them a French dressing.

**Calves' Liver a la Militaire.**—Cut in thin slices three-quarters of a pound of calves' liver; mince a button mushroom—or two, if very small. Fry these in a little salad oil to a golden brown color, then add the liver, thinly sliced. Season with pepper and salt. Cook for eight minutes, then sprinkle over all some very finely-minced parsley. Toss the pan about for another five minutes, so that the juice of the liver permeates the ingredients. Slip on to a very hot dish, and encircle with poached eggs.

**Florentine Fritters.**—Put eight tablespoonfuls of sifted flour into a basin. Moisten with just sufficient water to form a thick paste. Season with salt, and, when well mixed, add, one by one, the yolks of three eggs, stirring round and round gently till well amalgamated. Then add a teaspoonful of grated lemon-rind and a tablespoonful of skinned, dry raisins passed through a sieve. Now form the mixture into any fancy shapes preferred. Place in a frying pan, and fry in the best oil to a light golden-brown, and serve.

**Mushroom Toasts.**—Pare some mushrooms, and put them in a basin of cold water, to which add a few drops of lemon juice. Remove them carefully, to avoid the sediment. Place on a napkin for a couple of minutes, then, roughly mince them, and cook in a little butter. Season with pepper and salt and sprinkle over with grated Parmesan cheese. Cook till the mushrooms are tender, serve on small rounds of toast, or, according to an Italian authority, in diminutive cheese-flavored tartlets, and serve immediately.

**One way of Boiling Chicken.**—The chicken is cut up. As little water as possible is used in boiling, barely enough to cover it, and no more added. The

the fall of Jerusalem, (2) a prediction of the end of the world, (3) a group of parables related to these predictions and to each other. In the parable of the ten virgins the main point is the exhortation to Christian disciples to perpetual vigilance and watchfulness in view of the certainty of the end of the world and the second coming of Christ, and the equal uncertainty of the time when these things shall occur. The interpretation of the details and lesser incidents of the parable must be kept subordinate to this main purpose.

Verse 1. Then—The last day, just referred to in the preceding verses. The kingdom of heaven—Here, the company of all those who hope for salvation through Christ, some of whom, as the parable teaches, may hope in vain. It is the condition of the citizens of the kingdom "in toto" which shall be likened unto the condition of ten virgins, the ten again being simply a convenient number, as we might say a dozen or a score.

Lamps—Shallow bowls containing oiled rope or cloth, and fastened on sticks, making a rather crude torch.

Went forth to meet the bridegroom—According to the Jewish custom the friends of the bridegroom conducted the bride to her husband's home, before the door of which the bridegroom himself met the procession and in person conducted the bride across the threshold. In earlier times (comp. Judg. 14, 10) it had been customary for the principal wedding feast and celebration to be held in the home of the bride. From the imagery of our parable it is not quite clear from which home the group of maidens "went forth to meet the bridegroom." Some commentators insist that we are to think of the home of the bride as the scene of festivities, while others speak with equal confidence of the home of the groom.

2. Five—The number is not intended to indicate anything as to the actual or exact proportion of foolish and wise virgins. We note that Jesus does not say bad and good, but simply points out that five were prudent and exercised forethought, while the other five were imprudent and thoughtless with regard to the future.

4. Took oil with their lamps—That is, in separate vessels for use in case of an emergency.

5. The bridegroom tarried—A statement reflecting the true Orientalism of the scene, punctuality not being an Oriental trait.

They all slumbered and slept—There is no converse attached to their sleeping in itself.

7. Trimmed their lamps—which meanwhile had burned low. The trimming consisted in refilling them with oil and cleaning the wicks.

9. peradventure—Perchance, perhaps; it may be.

Not enough for us and you—The bridal procession and feast were still to be held and for these the light of the torches would be needed.

The door was shut—While they went to purchase oil the procession arrived and the guests entered the house. The door was then closed in order to avoid the danger arising from violent men.

13. Watch, therefore—This is the important point and principal teaching of the whole parable.

We know not the day nor the hour—"The Lord of that servant shall come in a day when he expecteth not, and in an hour when he knoweth not" (Matt. 24, 30).

#### REMARKABLE RAILWAY.

An up-hill railway, perhaps the most remarkable in the world, is the Oroya, in Peru. It runs from Callao to the goldfields of Cerro de Pasco. From Callao it ascends the narrow valley of the Rimac, rising nearly 5,000 ft., in the first fifty-six miles. Thence it goes through the intricate gorges of the Sierras till it tunnels the Andes at an altitude of 15,645 ft., the highest point in the world where a piston rod is moved by steam. The wonder is increased by remembering that this elevation is reached in seventy-eight miles.

and able-bodied man, or woman who accepts a "tip," and he despises a condition of society and business which allows hotel proprietors and railway and other companies to count upon the "tips" of their patrons to supplement the wages of their underpaid servants to a living scale.

In America the only able-bodied men who are habitually "tipped" are the waiters in hotels and restaurants. The first are, without exception, negroes, and the second are either negroes or foreigners. A "tip" offered to a native-born white American railway or other employe for a simple performance of his duty or a mere act of courtesy would be refused with scorn.

#### PETTY BRIBES.

How different here; it has been remarked that everyone in England below the rank of a lord or a bishop will accept a tip. My short experience pretty nearly confirms the remark. I have handed a "tip" to every person who has done me the slightest service or answered an inquiry, and in not a single instance has my "tip" been declined or been unexpected.

It seems to me that the average Englishman carries his hand back down, cupped and in position to receive "tips," and I cannot believe that any person who can bring himself to accept a "tip" has any sense of pride or self-respect.

In America the "tip" is regarded both by the giver and the receiver as a petty bribe. In its most innocent aspect, it is a bribe for more or better attention than the servant is paid for by his employer; or for a special service not accorded to other patrons. Undoubtedly a large class of Americans, especially those of the nouveau riche order, is striving to introduce the despicable practice of general "tipping" into America; and already it is notorious that some New York restaurant keepers have taken advantage of the practice to reduce the wages of their waiters below the living scale.

#### DIVIDED CASTE.

If the practice ever becomes general in America it will fix the division of caste there as rigidly as it is fixed in England to-day, and it will no longer be possible for such men as Andrew Jackson, Andrew Johnson, Abraham Lincoln and Andrew Carnegie to rise from the lowest stratum to the highest positions in the land.

A man must first possess self-respect before he can command the respect of others; no man can possess his own respect who has accepted the petty bribery of a "tip."

Every American of breadth and education wants to come to England to see the wonders of the past age and life, of which we can never have a counterpart in our country. There are few modern things that an American wants to see in England—the best he finds are importations from America; he wants to see your old castles and your cathedrals, relics of an age of religious superstition and civil vassalage. Every American who can spare enough or save enough money for the journey comes to see these things; and he is willing to suffer considerable inconvenience and discomfort in order to come.

#### MEAT FOR ONE MAN.

Statisticians estimate that twenty-two acres of land are necessary to sustain one man on fresh meat. The same space of land, if devoted to wheat culture, would feed forty-two people; if to oats, eighty-eight; potatoes, Indian corn and rice, 176; and if to the plantain, or banana, over 6,000 people.

#### INDIA'S SACRED FIRES.

The sacred fires of India have not all been extinguished. The most ancient which still exists was consecrated twelve centuries ago, in commemoration of the voyage made by the Parsees when they emigrated from Persia to India. The fire is fed five times every twenty-four hours with sandal-wood and other fragrant material, combined with very dry fuel.

A tiger when operating by himself will sometimes take an animal he has stolen for about ten miles, and then leave it for several hours tied up to a tree.

#### IN SOME SOLITARY SPOT.

If the tracking party arrives during that time it is quite content to recover the animal, and never bothers to go on tracking the thief; while if no one comes to the spot the thief concludes that the owner has been unable to follow the tracks, and he accordingly takes it away peacefully to some distant market. Most men who have to deal with cattle are clever in taking them across rivers, and can do so even when they are in flood. Cattle thieves are always expert at this, and frequently swim down the large rivers for many miles with their stolen property.

Cattle thieves provide themselves with various paraphernalia to assist them in carrying on their trade, and among other articles I may mention the leather shoes which they place round the hoofs of animals and the grass shoes they themselves wear; these are employed both to deaden the sound and to hide the tracks. They often have in their possession a set of branding irons and instruments for snipping animals' ears; while particular kinds of dye are kept for coloring the hair of animals which have distinctive markings. Thus an old buffalo with a white tuft on its forehead, a white tip to its tail, and four white coronets, will have none of these shortly after it has come into the hands of its new possessor. The sarrai or hidebag, which can be inflated, is used for sitting or resting on when crossing a river, while every thief of any standing possesses a large iron jimmy for forcing open doors of sheds and making holes through walls. One of the most curious things I have ever seen in the possession of one of these men was a rough but

#### SERVICEABLE TELEPHONE.

It consisted of a piece of twine some two hundred yards in length, and two bits of bamboo hollowed out to form cylinders about six inches long and three in diameter; over one end of each cylinder a piece of bladder was pasted, the centre of which the twine was attached by being passed through and secured by means of a knot. The owner of this interesting instrument stated that it was used by the thieves at cattle fairs. Several men would go to a large fair with a few animals of their own, and get with them into the enclosure. At night the cord would be passed from one side of the inclosure to the other, and one man would watch the patrol and give preconcerted signals in the shape of coughs and groans to his friends at the other end. The latter would then walk off with the cattle while the patrol was engaged in con- doliing with the accomplice, who would pretend to be very ill and in great agony.

A man who had lost one of his sheep was at first rather puzzled on finding that its tracks disappeared altogether at a spot where the ground was quite soft and took good impressions. On carefully examining the ground he perceived the tracks of a camel and noticed that it had sat down just where the sheep's tracks had ceased. Putting two and two together, he, with some friends, tracked up the camel and recovered his sheep, which had been lifted off its feet on to the camel by one of the men, placed across the saddle, and so carried off.

On one occasion a party of thieves actually managed to seize as many as twenty-nine camels, which they took through two districts to a place over two hundred miles away. They were there exchanged for a number of stolen buffaloes and bullocks, which were brought back for disposal in the home district. The difficulty incurred by the police in the investigation of this case and in bringing the offenders to trial may be imagined.

Tramp—"Yes, madam, I've been a solicitor for night twenty years." Mrs. Farnyard—"A solicitor?" Tramp—"Yes'm, I solicits bread an' meat."

tender, serve on small rounds of toast, or, according to an Italian authority, in diminutive cheese-flavored tartlets, and serve immediately.

One way of Boiling Chicken.—The chicken is cut up. As little water as possible is used in boiling, barely enough to cover it, and no more added. The object in having the water boiling hot

at first is that it immediately closes up the pores and keeps the natural juices from escaping. Only a few minutes of this rapid boiling is necessary. The heat may then be reduced and for the rest of the time it may be boiled gently. An hour is sufficient time to allow, unless the bird is unusually tough. All meats if boiled too long are rendered tasteless. Unless a fowl is very free from pin feathers it is advisable to remove the skin, as it is beneath the skin that most of the fat is to be found which renders even a tender chicken indigestible to weak stomachs. Half a cupful of flour added to the liquor for thickening makes a delicious gravy. Serve the chicken in a deep covered dish with the gravy poured over it and it will be found to be equal to any fricasse ever tasted.

#### A SIMPLE KNACK WITH PICKLES.

A friend who is famed for her excellent pickles gives her mode of preparing them, which is so simple that I pass it on. I should have said that she has two methods. When pressed for time she puts 1 teaspoon salt into a quart jar, fills it with pickles and cold vinegar enough to cover them, and if handy, she throws in a handful of nasturtium seeds, which give the whole a spicy taste. Then she covers them tightly, and that is the last of them until they are opened in the winter.

Her other method is to soak the pickles over night in salted water. Then she boils a little vinegar with whole spices added long enough to extract the strength from them, strains or not, as the time allows, puts a little of this liquid in each bottle and fills up with cold water. If it is barberry time and a few bunches are handy, she drops them in, here and there, to give a bright look to the whole. She pickles everything, from string beans to watermelon rinds, and finds a use for them all before the season is over.

Both these recipes are extremely simple, yet my friend informed me that her pickles are famed far and near for their crispness and flavor, and she never has any difficulty in keeping them.

#### HINTS FOR THE HOME.

Spots of acid on clothing may be removed, and the color restored by rubbing with chloroform.

If bedsteads creak with every movement of the sleeper, the slats should be removed and the end of each wrapped in a piece of old newspaper.

Where moths are troublesome scatter powdered bitter apple under the papers in the drawers and at the back of the wardrobe where the drawers slide in.

Ebonized furniture can be wonderfully renovated by rubbing the spots the way of the grain of the wood with finely powdered pumice-stone and oil. Afterwards polish with a dry, soft cloth.

A Hint About Eggs.—When the whites of eggs have been used for jellies and other purposes and the yolks are not wanted till next day, beat them up with a little warm water and put away in a cool place.

Whitening a Ceiling.—A ceiling blackened by a lamp can be much improved by applying a layer of starch and water. When this dries it will brush off, taking the greater part of the lampblack with it.

A hand lotion which many housekeepers have found of benefit is made as follows: Take ½ pint bay rum, two ounces glycerine and the strained juice of two large lemons. Mix and bottle. Use after washing dishes and upon retiring. Soft, white hands will result.

Extracting a splinter with the aid of steam may be a new idea to some. Nearly fill a wide-mouthed bottle with very hot water, place the injured part over the mouth of the bottle and press it slightly. The suction thus produced

will draw the flesh down and in a minute splinter and inflammation together.

**Canning Beets**—When you have small beets, those an inch in diameter can be used, boil, slip the skins, have scalding vinegar and water, half and half, enough to cover, bring again to the boiling point and can. Use fruit jars, for they must be air-tight to keep.

## POISON IN THE POT.

**Some Nations Are Ruined By Nature's Bounty.**

It is a most peculiar fact that the very food upon which a whole nation has come to subsist sometimes proves the bane and eventual destruction of that country. Look at Ireland and the potato! The Irish nation learnt to live upon the potato, growing the tubers in such enormous abundance that a very small acreage was sufficient to keep a whole family in food. Living, in fact, became too easy. Besides, the potato is not a complete food. It weakened the physique of the Irishman.

When the potato disease made its sudden appearance, and blackened and destroyed the crops of the whole island, the people had nothing else to fall back upon. The result was the ghastly famine which killed directly or indirectly nearly a million persons, and from which the Green Isle has never to this day recovered.

In much the same way the yam or sweet potato is destroying the negro race in the Southern States of America. The yam grows so easily that a half-acre patch, with a little fish and bacon, will feed a family for a year. Consequently, Sambo won't work, and after a time all ambition will disappear, and the colored man of the South will sink to a lower level than he has at present reached.

The banana has done much harm in Central America in exactly the same way. When a man has nothing to do, but scratch a few holes and plant slips of bananas which go on growing and bearing year after year, it is only natural that he takes life a great deal too easily for either his own or his country's good.

In Corfu the staple food of the islanders is maize, which they frequently gather before it is ripe, and which is carelessly stored in damp cellars. Consequently, the death-rate from that horrible disease, "pellagra," is terrible. Science has definitely proved that pellagra is due to eating damaged maize. The disease begins by a peculiar rash which appears in the spring, and which it is almost impossible to cure. With each successive spring it returns with increased virulence, until the patient's whole skin turns yellow, or even black. The nervous system is destroyed, and eventually the unhappy sufferer becomes delirious, mad, and eventually dies. At one time pellagra was the curse of Northern Italy, but great, and to some extent successful efforts have been made to stamp it out and teach the people not to live on maize only.

Sleeping sickness has for centuries ravaged Burmah and other hot countries where rice is the staple food. It is now definitely ascertained that this terrible disease is caused by feeding upon damaged rice. It was once epidemic in the Japanese army, but has been entirely got rid of by a change of diet.

In Northern India a sort of millet, which is the chief food of some millions of natives, has had the effect of steadily diminishing the population. There is some obscure poison in this grain which causes a peculiar disease. Professor Dunstan, of the Imperial Institute, has been conducting researches into the nature of this poison.

It is more than probable that future generations will truthfully declare that white bread has been the ruin of the English people. Our teeth are going rapidly, and it is more than suspected that the cause is the steel roller mill while flour which has been substituted for the good old-fashioned "seconds" of former days.

# ON THE FARM

## FROM PASTURE TO WINTER FEED.

There is a transition period each year that is trying to the milking cow. It begins when the frost kills the pasture grass and ends when there is no longer any hint of summer in the air. If the milker can be tided over this season she is safe for a good flow during the winter. If she falls off now it will be almost impossible to bring her back to normal later on.

As a result, the milk checks will dwindle just when they ought to swell. Winter milk at \$1.20 per hundred is worth more than summer milk under the best conditions. Therefore, keep the flow up. There are two ways of doing this, keep winter milkers or feed silage. If you can do both, that is better yet.

The cow that freshens in the fall, say in October or November, is ready to begin the winter in a robust condition. Her milking powers are not on the wane as is the case with spring milkers. She is ready to meet the natural setbacks of cold weather and dry feed with a good, strong constitution and a full flow of milk.

The old theory that silage fed milk is inferior milk is exploded. Systematic experiments have proved the contrary. The objections to the silo are scarce. It is not an expensive thing to build or operate and it fills many a want in the dairy world. Don't think that silage is a pure winter feed. It should be used whenever needed, winter, spring, summer and fall, especially in the fall.

This is the logical method of securing the best milk flow, furnish good pasture supplemented by silaging crops and silage and followed by silage and concentrates. But suppose that the silo is impossible. The only course left to the man who wishes to make a success of the dairy business with spring fresh cows is to depend upon silaging crops. Begin with good pasture, follow this by corn, sorghum, millet, or rye cut and fed green. It is well to begin the use of these feeds in August unless the year is either exceptionally dry or wet. In the first case, begin earlier, in the latter wait until the feed falls.

Use this green stuff until it is gone, and then begin on good bright clover hay. From the start these feeds may be accompanied by concentrates to good advantage; also bran, oats and corn ground together or corn and cob meal. The use of such feed will depend upon circumstances and the condition of the stock. Some dairymen advocate the use of pumpkins at this time. They are all right in their place, but their place is not the main part of a cow's ration.

Here is the main point in wintering milkers: Keep them so there are no poor periods. Avoid such by adjusting the feed and conditions. Furnish, as largely as possible, summer conditions all the year round. Grass is the natural food of the cow and if she can always have food of that nature she will keep at her best.

## TEACHING THE HEIFER TO MILK.

Breaking the heifer is an operation much dreaded by some; shirked by the men and forced upon the women. Or, perhaps, it seems to require the combined efforts of the whole household. It is our experience that if properly managed there is no need of dreading it. It is easily and quietly accomplished. We have broken several Jerseys and have cows that apparently never know how to kick.

In the first place the heifer should be perfectly tame, should never have known fear of her owner and should be accustomed to going into the stable. We prefer the winter, as the heifer is more

ment it receives before it is two years of age.

This is the best period of the year for culling the poultry. Many farmers and poultrymen have more young stock than they desire to keep over, and while the flocks are full is the best time for selecting those for next season. The pullets that will be the best layers are those that were hatched early. They should be well feathered in appearance, active and full of life. Such pullets should be kept growing from now on to the approach of winter in order to advance them on the path of maturity as rapidly as possible. They should receive no check, and should be well housed and fed.

## PERSONAL PARAGRAPHS.

### Notes of Interest About Some of the World's Prominent People.

Mme. Patti possesses an old doll called "Henriette," which was given to her when she was seven years old for singing nicely.

M. Roussiere, the now famous operatic tenor, was once a poor French blacksmith. In New York he is said to have received the princely salary of \$1,000 a night.

First Lieutenant von Franck, the oldest officer in the German army, has celebrated his 100th birthday at Charlottenburg. He is in full possession of his faculties.

Sir Edward Clarke has a great knowledge of medicine, as well as of law, and is regarded as a special authority on poisons. His favorite hobbies are boating and piano-playing.

The Pope is one of the most frugal of men. He receives annually a sum equivalent to \$100,000 for the upkeep of his establishment and his own personal expenses, but so few are his wants, that he does not spend more than \$1,000 a year on himself.

Sir Redvers Buller was urged by his relatives when he was a youth to devote himself to politics, but he announced that he would rather be a private in the regiment than be Prime Minister. Sir Redvers is fond of reading historical novels.

Habibulla Khan, the Ameer of Afghanistan, has considerable architectural skill, and is said to design his own palaces. Stone and marble enter largely into their construction, and they contain many beautiful things specially manufactured in Europe for the Afghan Court, including electric lights, pianos, and the phonograph. The Ameer's gardens are on a gorgeous scale, and when he entertains at night the display of fireworks in his grounds is extraordinarily brilliant.

The Duke of Abruzzi, who has at last conquered Ruwenzori, the highest peak of the Mountains of the Moon, "never before touched by human foot," has always displayed a passion for mountaineering and exploration. Before he was eighteen the Duke started on a tour round the world in an Italian warship. His successful ascent of Mount Elias, in Alaska, in 1897 was a feat never before accomplished, and in 1899 he made his famous voyage in the Stella Polare, when he got eighteen nautical miles nearer the North Pole than Nansen had done.

Lord Curzon was a perfect enigma to his masters when he was at Eton. He was always apparently wasting his time, and seemed to pay no attention whatever to lessons; and yet whenever he was called upon suddenly for an answer he was as ready as any boy who had been listening to the master's remarks, and could frequently give an explanation of a difficult matter when no one else could. A master said recently that Curzon gave him more trouble than any other boy, owing to his fondness for playing pranks in class, yet it seemed impossible to score him off.

Giovanni Segantini, the artist, who recently died, was known as "the painter of the Alps" on account of his fondness for depicting mountain scenery. He was born at Arco, in the

# AGING UNDER COST PRICE

## BRITISH PEOPLE ARE NOT TAXED TO DEFRAY EXPENSES.

**British Nation Have Best of the Bargain Made by King on His Accession.**

Neither King Edward nor the princes or princesses of his house cost the English taxpayer a single cent, and Professor Masterman was perfectly justified in declaring the other day at Cambridge that "John Bull got his monarchy below cost, and even made a profit on it." The fact of the matter is that the British Sovereign possesses by right of inheritance an immense amount of very valuable property, known by the name of "the Crown lands," which belongs to him ex-officio as a species of life tenant, much in the same way that the territorial magnates in England hold their ancestral estates. That is to say, the "Crown lands" cannot be alienated by the Sovereign for any period beyond the length of his reign, just as the owner of an entailed country place cannot lease it or otherwise dispose of it for any term beyond that of his own life, save with the legal consent of his immediate heirs. Following the example of his mother, the late Queen Victoria, and of his grand-uncle, King William IV., England's present ruler on his accession to the throne made a statutory agreement with Parliament and with the national treasury, whereby, in return for his surrender to the State of the major portion of the Crown property for the duration of his life he received in an undertaking from the nation to furnish him with a civil list of nearly \$3,000,000 a year and to provide adequate allowances for the princes and princesses of

## THE ROYAL HOUSE.

It was not the King and his family who made the best of this bargain, but the State. For, owing to the careful management and extraordinary development of the Crown property, coupled with the amazing growth in the value of building land during the last fifty years, the treasury is managing to net profits of as much as \$1,000,000 a year from the proceeds of the Crown property, after all the expenses of its management, the civil list of the King and Queen, and the allowances of the royal princes and princesses have been deducted. In fact, the calculation has been made that instead of Queen Victoria and her family having been a source of an expense to the national exchequer, they have since 1837 benefited the State to the extent of at least \$35,000,000—that is to say, they have relieved the taxpayer from the amount of fiscal burden, thanks to the bargain concluded by Queen Victoria near three-score and ten years ago, and renewed by King Edward at the time of his accession, in 1901. The agreement will come to an end at his death, as it is impossible for him to bind his successor. But there is every reason to believe that when the Prince of Wales becomes sovereign as George V., he will be led by motives of policy and expediency to agree to a similar arrangement. He will be perfectly justified, however, in exacting from the State as a quid pro quo for the Crown lands a considerably larger civil list than that now enjoyed by his father. For, large as are the revenues derived therefrom at the present moment, they are bound within the next few years to receive

## A PHENOMENAL INCREASE

by the falling in of the leases of large tracts of land in London, including the whole of Regent Street, with all the buildings thereon—that is to say, one of the most important thoroughfares in the fashionable shopping district. From this it will be seen that the English people can, thanks to their enjoyment of the revenues of the ably administered

generations will truthfully declare that white bread has been the ruin of the English people. Our teeth are going rapidly, and it is more than suspected that the cause is the steel roller mill white flour which has been substituted for the good old-fashioned "seconds" of former days.

### HOODOO NECKLACE.

All Its Owners Have Suffered From Misfortune.

A grim story of a fateful necklace lost on the eve of her death in the Summer Garden, St. Petersburg, by Mme. Andreef, who was cut down by her husband, is told by the Novoe Vremya.

It was an old piece of work by one of the best Parisian jewelers, and was sold first to the head of a French Court family, nearly all the members of which were guillotined during the Revolution. A few escaped to Brussels and were obliged to part with many fine jewels, among them the necklace in question. From that time they enjoyed good fortune.

The necklace, after changing hands about ten times, was sold for \$20,000 to a prince, who gave it to the ballerina, Tzukkii. For this act he was exiled from St. Petersburg. Tzukkii left the imperial ballet, and, finding her health failing, she went to her native countryside and abandoned the stage forever. Before doing so she sold the necklace.

A subsequent owner, the antiquary, Linivitch, died suddenly at Monte Carlo, and the next to gain possession of the jewelry was a gambler at Monte Carlo, who lost all his money. The sale of the necklace saved him from beggary.

Finally, it fell into the hands of Mr. Andreef, a broker on the bourse of St. Petersburg. He paid \$10,000 for it, and his wife was wearing it when, in a fit of anger, he killed her.

### SENTENCE SERMONS.

Hard licks make good luck. Godliness is manliness made perfect. Only an insignificant temper is lost easily.

The common task makes the uncommon hero.

Grumbling does not help your growth in grace.

We find in the world what lies in our hearts.

Many a cross disposition is mistaken for a divine cross.

The way to find life's gloom is to seek only your own glory.

Some of the best sermons ever given have come in soup plates.

You cannot chase away this world's gloom with a cast-iron smile.

The bitter tongue sends most of its poison back into its own heart.

Many a soul has chosen real sin because chastised for imaginary ones.

If men treated their stomachs better their souls would worry them less.

No one knows any more about heaven than he finds out by making others happy.

It will be hard to cash your repentance in heaven unless it is endorsed by reformation.

When a man looks on his religion as a ticket, he is apt to find himself on the wrong train.

When you meet a truth that is afraid of any other truth you may know you have found a falsehood.

The saddest failure is when a man stops at a small success when he was called to a great one.

If you cannot find your neighbor, you certainly cannot find your own way on the heavenly road.

The call to watch and pray does not mean to watch your neighbor while you pray for your own needs.

The master who looks for fruit will not be satisfied with a life that has nothing better to offer than an innocence of weeds.

A little child may know more of the language of heaven than the man who has digested the whole dictionary of pious phraseology.

we have broken several jerseys and have cows that apparently never know how to kick.

In the first place the heifer should be perfectly tame, should never have known fear of her owner and should be accustomed to going into the stable. We prefer the winter, as the heifer is more accustomed to being in the stable at that time, however, she should be tame enough to go into it at any time without fear. We try to be with her at the time of calving, as it seems to take away, in a great measure, her fear and anxiety for the safety of the calf, whereas if she is alone she fears for the calf when we come around later on. We are very careful not to frighten her.

We never touch her udder before she is fresh. In nearly every case she will resent it by kicking, and once started to kicking she may keep it up. We condemn the advice to accustom the heifer to having her udder handled, before calving. It is contrary to nature for a heifer to allow her udder to be meddled with. The first time we touch her udder is when the calf sucks the first time. It is natural then for her to want to be milked. The calf is allowed to suck on one side and we milk on the other. In a day or so the mother and calf are separated, but when milked, the calf is put with her for a few times, until she becomes accustomed to being milked. She is then considered to be broken. If her teats have a tendency to become sore, we grease them to keep them soft. Her teats must be gently squeezed at first and not pulled. It is very seldom a heifer kicks unless she is hurt.

### LIVE STOCK NOTES.

Give the hogs wood ashes, sulphur and salt; they will keep the digestive system toned.

Have at least a part of the cows to come in in the fall. This is better than to have them all have calves in the spring.

The concentrates for work horses can rarely consist wholly of oats, because of the cost. Rolled wheat and barley are excellent substitutes and preferably cornmeal, or corn and cornmeal may form one third to one half of the ration.

The best time to sell is when the market is ready and the fowls just right. Never wait for a chick to mature, and the largest profit is for the early ones. The earlier they are hatched, and of a size fit for market, the better, as the early chicks are luxuries.

It is the amount of milk a cow gives in a year that determines her value and not the quantity she gives in a month or two, while the grass is at its best; a good cow cannot give a uniformness of milk unless she is fed uniformly; her milk is made from the food and that must be of such quality as will produce the best flow of milk and keep up her condition.

Cross breeding in animals never has developed and never will develop anything reliable. It is true that where a Jersey bull is crossed on a shorthorn cow there may be a heifer produced that individually is a good dairy animal and also a fairly good beef animal, but when these cross breeds are crossed with each other, one never knows what he will get. Some will favor in appearance one breed and some the other, and rarely will one be produced that will be the equal of either parent. This has been the experience of those who have tried it. No man has ever yet lived long enough to establish a uniform breed of animals from cross-bred parents.

After ducks are three months old they grow but little, and it is probably better to sell them when young, as they will cost more in food than the difference in price.

If a horse breaks loose and eats his fill of grain, do not water him, but give him a dose of oil. If he is watered the grain will be washed into his intestines, there to ferment and give him trouble. The oil will clear him.

If you let the young stock stop growing you may not be able to figure up your loss in dollars and cents, but you may be sure it will not be a trivial matter to deal with. All the rest of an animal's life is determined by the treat-

ment any other boy, owing to his fondness for playing pranks in class, yet it seemed impossible to score him off.

Giovanni Segantini, the artist, who recently died, was known as "the painter of the Alps" on account of his fondness for depicting mountain scenery. He was born at Arco, in the Tyrol, on a slope of the Alps overlooking Italy. His parents were very poor, and at his mother's death, when he was only five years old, his father sent him to live with relatives at Milan. He stayed there for two years and then ran away, intending to tramp from Italy to Paris. One evening some farm people found the boy utterly overcome by fatigue and hunger, and, taking pity on him, gave him food, and then employed him in minding pigs. This not very savoury occupation greatly pleased young Segantini, and he amused himself by drawing portraits of his charges on stones and pieces of slate. Later on he went back to Milan, and there studied art.

Sir Thomas Henry Sanderson, who retired a few months ago, after having been for over eleven years British Permanent Under-Secretary of State for Foreign Affairs, always declared that the essential qualifications for a young man entering upon a diplomatic career were "the ability to remember all he hears and the sense to keep it to himself." A standing joke among those intimate with the Under-Secretary was that he never answered the simplest remark without carefully turning it over in his mind and examining it in all its bearings. On one occasion he met a well-known politician in the corridor of the Foreign Office, who called out genially, "A very fine day, Sir Thomas." "Is that so?" responded Sir Thomas, deeply meditating; "I will have inquiries made and let you know about it!" The King years ago dubbed Sir Thomas Sanderson "the Keeper of the Nation's Secrets."

Mr. R. D. Rockefeller, the "Oil King," is not very extravagant as regards "tips," though he cheerfully pays for extra attention when he thinks the service is worth it. Some time ago he suffered very much from rheumatic gout, and every evening a masseur visited him for professional purposes. The first night he called the oil magnate gave him an additional dollar, saying that the extra was owing to the inclement state of the weather. "And," he added, "every time it is wet you shall have an extra greenback." The attendant was highly gratified, and for the time being fine weather had no further attractions for him. If it was in the slightest degree damp, he would, on receiving his fee, remark: "Very dirty weather to-night, Mr. Rockefeller." And the man of billions would go to the window, study the atmosphere, and calculate whether the state of the weather called for an extra dollar. More often than not his opinion ran counter to that of the masseur, who had to cheerfully accept his legitimate fee and depart.

Mrs. Flynn—There you go—lendin' O'Hagan foive dollars after always sayin' you'd never trust a mon wid black hair and a red mustache.

Mr. Flynn—'Tis all right, darlint. Oi made him shave it off before Oi handed over the money.—Life.

tracts of land in London, including the whole of Regent Street, with all the buildings thereon—that is to say, one of the most important thoroughfares in the fashionable shopping district. From this it will be seen that the English people can, thanks to their enjoyment of the revenues of the ably administered Crown property, afford to pay considerably more than they do toward the maintenance of their reigning house without it costing the tax-payer a cent.

The expression crown lands covers a great variety of property. It comprises, as I just mentioned above, entire shopping and residential districts of London, salmon fishings in Scotland, over 100,000 acres of the finest agricultural land in England alone, huge forests—among them Windsor, Great Park and the New Forest—canals, mines of every description from those of gold in Wales to those of lead in the Isle of Man; salt works and an extraordinary number of feudal dues and rents, the very names of which are beyond the comprehension of even the Englishman of average education. Then there are quarries and royalties and forfeitures, treasure troves and a quantity of other sources of revenue, though the "deadand" was the forfeiture to the Crown of any chattel which had been the cause of the death, accidental, or otherwise, of a human being; and by way of illustration I may mention that if a carriage ran over a child and killed it, the carriage became

### ESCHEATED TO THE CROWN.

All these revenues derived from the Crown lands are paid, along with the other revenues of the State, into what is known as the Consolidated Fund. The first charge upon the latter is the interest of the national debt, the second charge is the civil list of the Sovereign and it is only after these two obligations have been met in their entirety that the balance becomes available for the expenses in connection with the maintenance of the Government. This shows better than anything else that the reigning house of England is in the eyes of the law not a stipendiary of the State, but a preferred creditor of the national treasury.

In conclusion it may be mentioned that the existence of the Crown lands dates from the dawn of English history, and Doomsday Book, compiled by William the Conqueror in the year 1085 A. D., shows that even in those days they comprised, in addition to all sorts of other property, royalties and fees, no less than 1,422 manors in England. In almost every century that has elapsed since then laws have been enacted by Sovereign and Parliament to prevent the alienation of Crown lands. Their management is vested to-day in the State Department of Woods and Forests and in the State Department of the Board of Works, at the head of which is J. Pierpont Morgan's nephew through marriage, Lewis Harcourt, who thus rather appropriately finds himself intrusted with the direction of what is probably the oldest trust in existence, namely Great Britain's Crown lands.

### UNIQUE LIGHTHOUSE.

The most extraordinary of all British lighthouses is to be found on Arnish Rock, Stornoway Bay, a rock which is separated from the Island of Lewis by a channel over 500ft. wide. On this rock a conical beacon is erected, and on its summit a lantern is fixed, from which, night after night, shines a light visible by the fishermen far and wide. The way in which this lighthouse is illuminated is this. On the Island of Lewis is a lighthouse, and from a window in the tower a stream of light is projected on to a mirror in the lantern on the summit of Arnish Rock.

Hawshaw Holmes: "I wish to be vaccinated." Dispensary Surgeon: "What's your business?" Hawshaw Holmes: "I'm a detective." Dispensary Surgeon: "Stand out of the line, please, and give somebody else a place. There's no danger of your ever catching anything."

## ADVICE OVER THE 'PHONE

DOCTORS WHO VISIT THEIR PATIENTS IN THAT WAY.

Nervous People Call Up Their "Medical Adviser" on the Slightest Provocation.

The writer recently met a certain well-known and highly respected New York physician who does a large and increasing practice over the 'phone. He is an extremely clever man, and so never risks sending advice when he feels that a personal interview is necessary. He is a surgeon as well as a physician, and recently when performing an operation in one of the big hospitals he was called up on the 'phone by a nurse in a children's infirmary, some three miles distant, who informed him that he was wanted immediately to attend a child who had dislocated his shoulder.

He could not leave his work, but he told the nurse to bring the child to the 'phone, and when she answered that the boy was in her arms he gave her minute instructions whereby she was able to put the dislocated shoulder back in its place. The whole thing took less than three minutes, and as soon as he learned that everything was "in order" the surgeon returned to his operation and smiled at the expressed surprise of his assistants.

"The 'phone," said the doctor in question, "has been of the greatest benefit both to the medical profession and its clients, and I do not know to-day how I should get through my work were it not for its aid. Not a day passes that I do not send advice to

### A DOZEN PATIENTS.

over the telephone, and in nine cases out of ten the results are as satisfactory as though I had seen them personally. Of course, where the complaint is a serious one, and much depends on personal observation, I do not risk sending advice over the 'phone, though even in such cases as these I know my patients so well when all the symptoms are wired to me by an intelligent nurse I am enabled to prescribe with perfect safety.

"Only last week I had a case which I treated almost entirely over the 'phone. The patient in this instance was a boy who had met with an accident whereby his right leg was fractured. After setting the limb and leaving him in the care of a capable nurse, I found it was quite unnecessary to see him for several days. The nurse telephoning me his symptoms each hour, so that I was able to follow the results of the accident just as carefully as though I were beside his bed. The medicines were made up in my own dispensary and forwarded by express messenger to the nurse with minute instructions, which were followed to the letter. The lad never had a relapse, and to-day he will be out of bed.

"Of course, in diseases which may have a sudden termination, sending advice over the 'phone is too risky, and no medical man, however well he might know his patient, would, in such a case, be justified in adopting anything but

### A PERSONAL ATTENDANCE.

I could tell you of one instance in which advice sent over the 'phone resulted in the patient's death—simply because the disease was one which required the closest attention; and this cannot be given without the presence of the doctor.

"The case was one of acute pneumonia—a disease which will take a sudden turn for the worse or the better in the twinkling of an eye. The patient had been progressing favorably, and the doctor had left him apparently comfortable and on the road to recovery, when the nurse noticed a sudden and

## WONDERFUL CREDULITY

WITCHCRAFT IN LONDON AS TOLD AT THE SESSIONS.

Woman Deserted by Husband Gives Up Money When Told He Would be Restored to Her.

The London Daily Graphic says:—An extraordinary story of witchcraft was told at the Clerkenwell Sessions on Saturday, when a Russian Jewess named Rachel Neuhans, aged forty, was indicted for having obtained £5 14s by false pretences from Mrs. Annie Samuels and £25 from Rosie Silberberg.

Annie Samuels, a charwoman, of Brunswick street, St. George's, giving her evidence in Yiddish, through the interpreter, said her husband deserted her twenty-one months ago. Recently the prisoner called on her and asked her if she would like her fortune told for threepence. She laid out some cards, and, apparently reading them, said:—"Your husband has deserted you. I have power to bring him back again. Give me 2s 6d. I can relieve you of all your troubles and restore your husband, so that you will have to work hard no longer." She believed that and paid the money. The next day the prisoner asked for 1s 6d for candles, which being burned

### IN A PECULIAR WAY,

with pins stuck all round them, would attract the husband to his home again. On another occasion she made mysterious passes with her hands over the fire, on which she had carefully deposited a red brick. The husband did not return, and the prisoner explained: "I must have more money. The more you give me the quicker I shall bring him home." She paid £5 14s in all. Then the prisoner insisted on having a night dress, some sheets and pillow cases. She was going to prepare these with a secret process, so that one night the witness would wake up and find her husband by her side. He would be wearing the nightdress and the pillowcases, which had been treated with something which had the wonderful power of preventing her husband ever running away again. (Loud laughter). Her husband did not come back.

In answer to Mr. W. H. Sands, defending, Mrs. Samuels said she believed the prisoner to be a good witch who could perform magic. The witness produced a capacious bag out of which she brought a medicine bottle containing a magic liquid for sprinkling about the room, a paper packet containing some clippings from the back of a black cat, and some pins which she had to sew into her chemise. All these things were supposed to be necessary to restore her husband. (Loud laughter).

Mr. Chester Jones (laughing heartily):—"This is the funniest case I have ever had before me.

Fanny Samuels, the witness' daughter, said that the prisoner provided powders and uttered mysterious words

### TO CALL HER FATHER BACK.

Mr. Chester Jones—A sort of incantation, I suppose?

Mr. Sands (cross-examining)—Did you see the performance with the black cat?

The witness—Yes, and she threw something into the fire. It came out with a squeak. I had a fright and I ran away. (Laughter).

Did she put the cat in the fire? A— I can't say what she did with the cat. Something was put on the fire.

Did the black cat frighten you? A— The squeak did.

You thought the prisoner a good witch? A— Yes; she showed us such miracles that she made us believe her. She produced a lot of Russian gold—handfuls—from her bosom, and said:—"I don't want your money. See, I have plenty of my own. All will be return-

## IN THE NORTHERN WILDS

FINE SUMMER SPORT IN NORTHERN ONTARIO.

Mingling of Civilized and Savage Customs on the Shores of Lake Temagami.

Far up in the north woods of Canada about 150 miles from Georgian Bay, beautiful Lake Temagami lies clear and deep in the heart of the pine forests with nearly 1,000 little wooded islands studding its limpid surface. Withdrawn from settlement by the Ontario Government, these islands have been constituted a perpetual wilderness resort for the sportsmen and a lasting delight to all lovers of primeval beauty.

The quaint old town of North Bay until this year marked practically the end of the civilized trail and of itself awakened scarcely more than a passing interest. To reach Lake Temagami it has always been necessary to make a tedious journey from North Bay partly by canoes and partly overland, but now the trip is completed on a little railroad train which drops the traveler at Temagami station and then goes puffing on its way through the pine woods up into the district where rich silver ore has recently been discovered and where even last summer prospectors were swarming over the rocks tapping with their little long-handled hammers.

At the station Lake Temagami unfolds itself to view and everything else is forgotten in the prospect of the royal sport it suggests. Covering an area of 100 miles and with nearly

### 3,000 MILES OF SHORE LINE

the section presents ample opportunity for getting back to Nature and knowing life in the primitive.

Directly across from the station about seventeen miles distant is Bear Island, the largest of the group and a little steamer plies busily from shore to shore.

With the unerring instinct of their race the Indians named the lake Temagami—deep water—and it verifies its cognomen with 400 feet or more of depths of crystal clearness. The Indians on Bear Island belong to one of the oldest of the Chippewa tribes and live by trading with the Hudson's Bay Company. Once a year they are paid a bounty from the government, the occasion is celebrated with a grand ball in the fire ranger's cabin and all the countryside turns out to assist, some of the Indians canoeing fifty miles to join in the merrymaking. In the rough little cabin a grizzled old chief sits solemnly scraping a fiddle or a chance visitor at the inn is pressed into service to furnish music for the dancers. The young braves and squaws caper about with stolid expressionless faces, while ranged around the walls on all sides the older squaws with bright, beady black eyes, watch the performance with unflinching interest, and the tiny round head of a little swarthy pappoose nods patiently from side to side, with dreams undisturbed by

### THE ANTICS OF ITS ELDERS.

Altogether it is a picture for the pen of the word artist, vivid with life and color. The little cabin of rough hewn logs, the low ceiled room with its dim flaring lights, rank perfume hanging heavy in the air, and the dusky braves and squaws with their pathetic incongruity of attire, all the dignity of a once noble race departed, sacrificed to civilization, made pitifully lawdry and cheap. Outside, the soft summer night drenched with the mystery of stars and of silence, the majesty of age-old forests, black with impenetrable shadows, the vastness of unfathomable spaces, the great fascinating wilderness of the north where the call of the wild sounds with mysterious, compelling force.

The fire ranger's cabins are really

## GENTLE ART OF TOUCHING

ABOUT THE WELL-DRESSED BEGGARS OF LONDON.

Methods of Living Without Working Practiced by Seedy Members of British Aristocracy.

Every day in every London police court one or more unfortunate persons are sentenced to terms of imprisonment for begging in the streets. They are rogues and vagabonds, generally very ill-fed and ill-clothed, without any occupation except that which is technically known as "pitching the tale," and thereby abstracting odd pennies from the benevolent, writes S. Piers in the London Mail.

But while the ill-dressed beggar is given the opportunity of considering the error of his ways in a stone cell on a Spartan diet, London, and especially the west end, abounds with well-dressed beggars equally without other occupation, equally dependent upon other people's money, but against whom the police have no power, and whom the officers of the Mendicity Society would probably greet with a respectful salute.

### MERELY BORROW.

They do not exactly beg, they merely borrow. But borrowing is a euphemism. They pay back on the Greek kalends. Verbally they "want a sovereign until to-morrow," but, as every school child knows, to-morrow never comes. While the whining beggar of the streets is a nuisance the experienced Londoner regards the affable, well-dressed gentleman who asks him casually if he "happens to have a sovereign about him" as being an infinitely greater and more expensive plague.

The successful borrower must be a man of ferocious imagination, dogged persistence, unflinching tact, and iron impudence. It is well always to adopt the method of the east end trader, and ask a great deal more than you are prepared to take. One recalls in this connection the famous Mr. Montague Tigg, who, after ambitious requests, was prepared to accept from Mr. Pecksniff the ridiculous sum of eighteenpence, and this was reproduced not so many years ago by a well-known aristocrat who was chronically impecunious.

### SLID DOWN.

He drove up one night to the country house of a relative and asked to see him on most important business. He explained that he wanted \$3,000 at once, and that ruin stared him in the face unless the sum was forthcoming. The relative was Scotch, and the borrower was a diplomat, and the result was that after half an hour's wrangling he left the house perfectly happy with £1 in gold and three shillings in silver.

One well-known character, who died a short while ago, lived quite comfortably for many years on borrowed money. On one occasion he explained that, after great self-sacrifice, he had accumulated £13 towards his rent, and that he wanted another £3 to make up the necessary sum; but if this £3 was not forthcoming his house would be sold up, and his wife and children turned into the streets, in addition to all his own self-sacrifice coming to nothing.

### SENTIMENTAL TOUCH.

It was a pretty story, and, told with the right dramatic emphasis, was an admirable source of income for several weeks, the gentleman working from bar to bar, and Bohemian club to Bohemian club, until the £3 had been obtained from every person with a banking account with whom he had a nodding acquaintance.

On another occasion, with tears in

doctor had left him apparently comfortable and on the road to recovery, when the nurse noticed a sudden and alarming change. She at once telephoned to the doctor, who sent some advice over the wire and said he would be up as soon as possible. But he was called away to a very urgent case and it was two hours before he was able to fulfil his promise. When he arrived the patient was dead.

"Many parents are extremely fidgety and nervous regarding their children—especially if they are very young—and I have been at times driven almost crazy during the night by the ringing of my telephone bell and the questions sent over the wire by anxious parents. Only the other night I was wrung up by a lady patient at three in the morning, she declaring that her baby had croup and was dying. I asked her if the child was coughing at that moment, and she replied: 'Oh, yes, doctor, something terrible.' Then I told her to bring the baby to the telephone and let him cough there once or twice, and I would soon be able to tell whether her fears were well founded. She immediately did as I told her, and in a moment I was

#### SCRAMBLING INTO MY CLOTHES.

for I could hear the infant crouping its little life away, and I knew that speed on my part was the only thing that would save it.

"I reached the house in record time, and, after three hours' constant attention, dragged the child out of danger, and to-day he is well. This was a case in which advice over the wire would have been useless, though had it not been for the phone the child's life would undoubtedly have been sacrificed, for long before the messenger could have reached me and I had answered the summons the disease would have accomplished its purpose.

"I have many consumptive patients, and men and women who are victims of other slow-killing diseases, whom I treat perfectly satisfactorily over the telephone. They inform me of the progress of the complaint, and I prescribe for them just as I would were I seated beside them and with quite as much skill. Some patients, of course, will not take advice over the phone, being prejudiced against the growing custom, and I never press them to do so. The fact remains, however, that I have many patients whom I sometimes never see for weeks together, and yet whom I am constantly attending to and advising by this method."

#### THE "NEVER CLUB."

**Members Never Work, Never Wash and Never Pay.**

"It has a bigger membership than any other club in London; its members are thoroughbreds, in that they are in no way associated with trade, commerce or industry; indeed any such contamination that may take place immediately disqualifies a member, exposes him to tortoise of all rights and privileges and summary expulsion from the club."

Thus spoke a London detective the other evening in describing the organization—which has ramifications in every part of London—of the "Never Club," which has been brought into notice by the conviction of one of its members at the Clerkenwell Sessions.

"How did it get its name? Because the members never did work, never do work, and never will work; also, they never wash, never pay; they never eat unless the food is begged or stolen; they never sleep unless in prohibited premises or outside.

"They are the loafers, the hooligans, who don't want to do anything but sulk through life. They are the cause of more trouble to the police of London than all other causes combined. We call them 'the nevers'—it is a slang term that fits them well.

"That's the Never Club, and it is growing amazingly in membership."

She produced a lot of Russian gold—handfuls—from her bosom, and said: "I don't want your money. See, I have plenty of my own. All will be returned when I have finished my work, but if you do not give me what I want I have the power to stop your husband from ever coming back."

Detective Sergeant Leeson said that during the five months the prisoner had been in London she had accumulated a large sum of money by these practices.

She was sentenced to nine months' imprisonment and certified for deportation.

#### 30,000 SLAVES RELEASED.

**Striking Evidence of the Benefit of British Rule.**

Major Coryndon, the Administrator of Barotseland, who has just reached England from northwestern Rhodesia, gives an interesting account of the changes which have recently taken place in that remote region.

Perhaps one of the most striking of recent events, the Major states, was the act of King Lewanika, who, during an imposing function, held at his capital a few weeks ago, formally abolished slavery throughout his kingdom, thus immediately releasing some thirty thousand serfs.

"Perhaps one of the most striking evidences of the rapid progress which is being made," said the Major, "will be found in the fact that on my journey home I travelled the whole way from Broken Hill to Cape Town by train a distance of 2,100 miles. When I first went to Barotseland the journey northward from Bulawayo was made by bullock wagon, the expedition through the thirdest land being a long and hazardous undertaking. In the space of a few years this has all been changed, and the trip is now accomplished in a few hours by train.

"When we came into the country there were 13 different tribes of different language all owing allegiance to Lewanika, whose representatives were stationed with each tribe. This main system had not been altered, and to-day every district commissioner in each district has with him a direct representative of Lewanika, who assists him in hearing native cases and advising on matters of purely native administration. There is not the least sign of disaffection among the Barotsi.

"So great is Lewanika's desire for development and progress that he has recently, by public proclamation, given the final deathblow to the ancient system of serfdom or domestic slavery, which is common in Barotseland as among other South African tribes, and he has freed every slave in his dominions.

"For this purpose he held a great function in July. It was a most imposing affair. Lewanika, in full uniform, took his place in the centre of the principal group, there being some 2,000 natives present. Around the chief were gathered the Government officials, all the white men in the neighborhood, including 25 missionaries, and the reading by the Prime Minister of Lewanika's decree was a never-to-be-forgotten conclusion.

"As a result, between 25,000 and 30,000 natives have obtained absolute freedom. Lewanika is also making a strong point in keeping guns, ammunition, and liquor out of his country, and the laws, which are very stringent, receive loyal support from him."

#### SHOT BY HIS OWN DOG.

A sportsman named Lecorbec was shot by his dog near Vannes, France, the other day, while out after sea-fowl. He stood in his boat holding the barrel of the gun, the stock of which rested on the bottom of the boat. As he was about to push off the dog sprang aboard and dashed against the trigger, discharging the gun and killing Lecorbec on the spot.

the great fascinating wilderness of the north where the call of the wild sounds with mysterious, compelling force.

The fire rangers' cabins are really milestones, marking the progress on the beat of these government patrolmen. The duty of the rangers is not only to patrol the country to guard against forest fires, but also to see that there are no infringements of the game laws among the sportsmen. These cabins or offices are located from 30 to 50 miles apart and each fire ranger makes the rounds from cabin to cabin on his beat, covering a given territory in a stated time, sometimes travelling nearly a week without the sight of a human face or the sound of a human voice.

#### THE SPORTSMAN'S PARADISE.

Temagami has been rightly named the Sportsman's Paradise, it is ideal in every sense of the word. Two men and a guide have an easy day's work landing from 25 to 30 black bass or pickerel at an average weight of three to five pounds. The law limits the salmon trout catch to four a day, a feat that is easily accomplished in from four to five hours, the speckled beauties often weighing over 25 pounds. The Sierrist party had a mighty tussle with one big gamy fellow who had no mind to be landed. With 400 feet of line out and the gaff hook left behind on shore it became a mere question of tact and diplomacy. An hour and a half of patient advance and retreat partially tired him out and a little more skillful manoeuvring towed him to shallow water, where E. R. Smith received him in a slippery embrace and hurriedly flopped him aboard.

Not the least of the pleasures of the sportsman's life at Temagami are the shore dinners, prepared by the guide and eaten with a relish which is never enjoyed at the most luxurious hotel in the country. Sitting cross-legged like a Turk on the softest of carpets of balsam boughs, delicious whiffs from the pines stinging the nostrils, the whirr of wings overhead and the swirl of rushing water murmuring over the rocks, the outside world with its cares and perplexities assumes an aspect of unreality, life is only a playday, adrift and adream.—Myrtle Tower Schnell, in the Buffalo Express.

#### RUIN MENACES ST. HELENA.

**Will be the Effect of the Removal of British Troops.**

Every white man resident on the island of St. Helena has signed a petition to the British Government protesting against the proposed withdrawal of the military garrison there, and a league has been organized in London to promote the action of the islanders.

"St. Helena has 4,000 inhabitants, of whom 200 are whites," said A. G. Wise, the secretary of the St. Helena League, the other day. "The garrison consists of 200 men, and if they go the sole defence of the islanders will consist of a police force of five natives.

"Moreover, the white inhabitants derive two-thirds of their livelihood from the garrison. The proposed abolition of the coaling station and the withdrawal of the garrison constitute a palpable injustice, in view of the fact that the white inhabitants, following a direct suggestion of the Government, imported a large number of expensive sheep and cattle from England.

"If the soldiers leave these animals will be useless to the inhabitants, who limit themselves almost exclusively to a fish diet. All who can afford to leave the island are planning to do so, and the rest will have nothing to live on.

"The result will be that the Government will be called on to support these poor people, and will have to pay for the development of the mineral resources, especially the manganese. The cable of the Eastern Telegraph Company passes through the island, and this makes it additionally important that the garrison, the cost of which is very small, should be maintained."

count with whom he had a nodding acquaintance.

On another occasion, with tears in his eyes, he explained that the next day was his wife's birthday. He had, ever since their marriage, given his wife a little present, but on this particular year times were so bad that he found himself without the means to do so. His poor wife would be terribly disappointed, and he himself felt, perhaps, more keenly than he had ever felt before, the bitterness of poverty.

This was also a most successful story, some men finding a sovereign, others half a sovereign, some even five shillings, the present which the husband desired to give depending upon his knowledge of the generosity and the income of the person to whom he "told the tale."

This particular man always spent his summers in small towns on the coast of France, where there was a casino, loans from successful gamblers making an appreciable addition to his income.

#### SUPPER SNATCHER.

Another man, some years ago, attained fame in the west end as the "champion supper snatcher." He would go into a restaurant soon after 11 o'clock, look round the room until he had found an acquaintance, whom he would go over to and effusively greet, standing and talking till the man, for very shame's sake, was obliged to say: "Won't you sit down and have something to eat?" This was practiced more recently by another individual who frequented one of the most expensive restaurants, and obtained lunches and dinners by the same method.

There are, of course, always, in a city like London, a number of happy-go-lucky, well-to-do individuals who are utterly unable to resist the cry of the impecunious.

#### TOOLS OF PARIS COINERS.

**Forty Young Men and Women Students Under Arrest.**

More than forty young men and women of good family, students from the Latin quarter, are lying in La Sante Prison, Paris, awaiting trial on a charge of uttering base coin.

They have as companions in jail six of the most notorious professional coiners of the Continent, whom the police were enabled to capture at the same time.

These wholesale arrests have created great perturbation in some of the most respectable families in France. One of the prisoners is the son of a deputy, and most of the others are sons or daughters of highly placed Government officials, magistrates, and legal luminaries.

The discovery of the far-reaching operations of the coiners was brought about by the frequent complaints of shopkeepers in the Latin Quarter. So many reports were received of the passing of spurious 20-franc and 10-franc pieces that a watch was kept, and suspicion fell on the students of the Law and Fine Arts School.

One of these were arrested, and from his story it appears that the students were enticed into the traffic by the gang of professional coiners.

It appears that a number of the students whose remittances had run out were one day discussing their financial difficulties in the garden of Luxemburg, when three well-dressed men, who were strolling near by, entered into conversation with them. These men appeared to be strangers to Paris, plied the students with questions about the city, and eventually invited them to drink at a neighboring cafe.

Afterwards there were continual meetings, apparently by chance, and eventually the three men made a proposal that four of the students should join them in circulating imitation gold pieces. These pieces were to be supplied to the students at a fourth of the face value.

# ADVERTISING UP-TO-DATE FIGHTING THE SAVAGES WHEN CALENDARS BEGAN HOBBIES OF RICH MEN

## AMUSING SAMPLES OF NOVEL AND STARTLING FORM.

Apparently the Limit to the Ingenuity of Advertisers Has Not Been Reached.

If there is any limit to the ingenuity of the advertiser it is quite clear that it has not been reached yet, for every week it takes some novel and startling form. A few weeks ago 100 fat porkers were driven through the streets of Chicago, each piggie bearing on his expansive side the legend: "—s pork sausages defy competition"; while last winter an enterprising shoe-dealer of Quebec, with every pair of shoes purchased at his shops, presented a pair of overshoes with an advertisement stamped in relief on the soles, so that, as each wearer progressed, every footprint he made left this legend in the snow: "—s rubber goods go to any length." More original still, perhaps, is the device of Mr. Pink, a Samoan hotel-keeper, who advertises his beer in white letters on the chests of dusky natives and on the soles of boys' feet, so that when they dive for coppers alongside the visiting mail-steamers, the conspicuous words, "Pink's Beer," are read.

### ON THEIR VANISHING FEET;

or the method adopted by a firm of carriage manufacturers at Ottawa, who engaged three very bald men to attend meetings, theatres, and so on, and to sit in a prominent position with an advertisement painted on each hairless cranium.

A firm of whisky-sellers in Ceylon not long ago engaged an aeronaut to make a series of balloon ascents, and during his aerial journeys to drop sample bottles of whisky far and wide, attached to miniature parachutes; while an ingenious tailor of Boston, Lincolnshire, England, has placed in his window ten large tortoiseshells, on the back of each is painted one letter of his name, and he offers a money prize to anyone who chances to see the tortoiseshells so arranged that the letters on their backs spell his name.

That was a clever device, too, of the New York theatrical manager who distributed cheques with a lavish hand, together with this message: "Dear Sir.—Assuming that your income be \$15,000 a year, and that you appreciate the fact that 'time is money', we enclose our cheque for 4 cents in payment for two minutes of your time at that rate, to be employed in carefully reading a

### BRIEF AND HONEST STATEMENT

of a few of the many original, new, novel, applause-winning features to be found in the new three-act musical farce to be produced for the first time in New York on Monday evening."

It was in New York streets that the following curious spectacle might be seen a short time ago. First there marched an enormous bottle labelled "Stagg's Columbia Relish," the motive power of which was a man concealed within the capacious interior, bearing aloft a banner with the words, "I lead the way." Behind followed a gigantic cruel-stand on wheels, with four bottles, one of which was empty; and the rear-guard of this singular procession consisted of two boys trotting in a couple of small bottles labelled, "Other people's sauce—we can't catch up."

The American tradesman is a genius for inventing what he calls "eye-startlers" to arrest the attention of passers-by; and thus, when you walk along a business street, you will read such notices as these: "Our kids are always good. One dollar and a half for twins" in a glove-shop window; "The silk-worms would die of grief if they knew that we were giving their produce away for next to nothing"; "These shirts ought to be next your heart."

## SIR F. LUGARD DESCRIBES THE METHODS EMPLOYED.

Young Lieutenant With Fifty Native Soldiers Destroys a Village and Releases Captives.

The war methods still required to deal with truculent African tribes are set out, interestingly in a number of despatches from Sir F. Lugard, published in the London Gazette. Operations in Northern Nigeria were rendered necessary by the predatory and slave-raiding expeditions of the warlike Munshi tribes. Lieut. Woods, who was left in charge of a detachment at Abinsi, decided on his own responsibility to attack a murderous village chief, who had a number of captives, one of whom he had murdered in cold blood. He was at the time preparing poison for his arrows in order to fight. A messenger sent to order him to release his captives was told that if he returned again his ears would be cut off and he would be made to eat them. Sir F. Lugard reports that the messenger somewhat naturally declined to take a further message, and Lieut. Woods attacked the village with only 50 native soldiers.

### CAPTIVES IN DANGER.

"The ju-ju in the village was covered with blood, and a human arm was found in a hut. The village was destroyed, and subsequently the captives were given up, after discussion by the Munshis as to whether or not they should kill them all. Seventy-two more captives were released, making a total of 118 out of 163, which was the number missing so far as known, in addition to 76 actually seen to be killed."

Incidentally, it is disclosed by these despatches that the disturbances which broke out at Sokoto while these operations were in progress "gave cause for very grave anxiety." Lieut. Col. Hasler was so advised by the High Commissioner, and, as it appeared quite possible that there would be a general religious rising throughout the protectorate, he called on his officers and men "for a special effort."

How splendidly that call was answered may be understood by the fact that No. 1 column marched 312 miles, the last 180 miles of which were over a very bad and rocky road, in 12½ days, while another column covered 83 miles in less than 48 hours.

### BARBAROUS TRIBES.

Operations in Southern Nigeria were carried on in a country very thickly populated "by tribes more barbarous and less intelligent than any hitherto met with." This country was split up into innumerable independent towns or communities, the chiefs of which were nearly always decrepit old men possessing little authority or control over their tribe, the real power being vested in the young men. The large quantities of arms of precision subsequently surrendered showed how very completely armed the population was.

The operations were brought to a successful conclusion, but were marked by a "regrettable incident" in the shape of the surprise, defeat, and retreat of a small force in the Kwale district, when all the three European officers were wounded, and there were 21 casualties out of a total rank and file of 70.

### AMONG THE SLAVE-TRADERS.

A special expedition was sent into the Fende-Ontsha Hinterland, a region in which slave trading and human sacrifices existed, and which was unknown country, closed to trade. The expedition covered 1,100 square miles of country, most of which had not been previously visited, and the most continued and obstinate resistance was met with, trenches and stockades being found ev-

## THE EARLIEST DATE FIXED IN EGYPTIAN RECORDS.

Egyptologists Put It Back to Year 4241 B. C. — How He Fixes the Time.

Prof. James Henry Breasted, of the University of Chicago, who just returned from an expedition to the upper Nile, has set back the first authentic date in the world's history 1,000 years. He has satisfied himself and a number of his scholarly intimates that records were set down in Egypt in the year 4241 B. C.

Recent excavations in the Nile valley by the University of Chicago Egyptian expedition, of which Prof. Breasted was the head, are the basis for his claim.

Beginning with 4241 B.C., which Prof. Breasted believes marks the beginning of the recording of the years, he finds a calendar was kept, not unlike that followed to-day.

### CONCLUSIONS OF SCIENTIST.

Prof. Breasted's opinions and proof which are labelled "The Oldest Fixed Date in History," in part are as follows:

"The Egyptians had early determined the length of the year as 365 days, not being aware of the additional quarter, or nearly a quarter, of a day. This convenient year they divorced from the phases of the moon, and divided it into twelve months of thirty days each, with an intercalary period of five days at the end of the year. This, the first practical calendar ever evolved by an ancient people, remained an achievement unparalleled in any other civilization.

### TRACES BACK CALENDAR.

"Now we know from a statement in Censorinus that some time in the period from 140-141 to 143-144 A. D., the calendar coincided exactly with the seasons, and that in one of the years in that period the rising of the Sothis took place on the first day of the calendar year. An entire revolution was completed at that time.

"That revolution must have begun 1,460 years earlier—that is, in 1320 B. C. The next earlier revolution must have begun in 2780 B.C.—that is, at about the beginning of the age at which we are first able to observe contemporary indications of the shift.

"Now, it is impossible that this calendar was first introduced at late as the twenty-eighth century B.C., in the midst of the highest culture of the Old Kingdom. Moreover, the five intercalary days at the end of the year, proving the use of the shifting year of 365 days, are mentioned in the Pyramid Texts, which are far older than the Old Kingdom.

### HOW HE FIXES IT.

"The calendar existed, therefore, before the Old Kingdom, but if this is true, we must seek its invention at a time when its sessions coincided roughly with those of nature, as they must have done at its introduction. This carries us 1,160 years back of their coincidence in the Old Kingdom; that is, the calendar was introduced in the middle of the forty-third century B.C. (4241 B.C.).

"This is the oldest fixed date in history. This fact demonstrates not only a remarkable degree of precise knowledge of nature in that remote age, but also stable political conditions, and a wide recognition of central authority, which could gradually introduce such an innovation."

"This confinement," said the long-faced prison visitor, "must distress you greatly." "Yes," replied the functionary.

## MILLIONAIRES AS FARMERS AND ENGINE-DRIVERS.

Modern Croesuses Love to Spend Their Hours of Leisure Away From Money-Making.

The hobbies of millionaires, like those of their less-dowered fellows, cover a wide range; but certainly the most novel of them all is that of Mr. Alfred Milard, an American banking Croesus, who is reported to spend much of his time, as head of the Omaha Humane Society, in the exhilarating sport of dog-catching.

It is a curious and interesting fact that many of the richest men of the United States love to spend their hours of leisure in farming of one kind or another; in fact, it is said that at least thirty of them are prouder of the corn they grow, and of their cattle, horses, or pigs, than of the millions they have acquired.

Mr. Theodore A. Havener, who has made a colossal fortune in sugar, has for some years spent his spare time in superintending his dairy-farm of 3,000 acres in New Jersey, and so skillful and successful is he that he draws a yearly net revenue of about \$25,000 from it.

### MR. JAMES J. HILL,

the millionaire railway magnate, practices his hobby on a much larger scale, for, in addition to his farm of 5,000 acres at North Oaks, in Minnesota, on which he has collected the best breeds of horses and cattle from all parts of the world, he has a grain-farm, in the same State, of 35,000 acres; and Mr. Edward Harriman, another railway king, has an enormous farm at Tuxedo, on which he breeds some of the finest cattle and horses in the world.

Mr. James R. Keene, one of the most daring and successful speculators in Wall Street, divides his interests, apart from his business, between his paintings and other works of art for his palatial house in New York. Mr. W. C. Whitney, the "traction magnate," finds his chief recreation in the Adirondacks where he has a

### FOREST OF OVER 33,000 ACRES.

stocked with moose, elk, and buffalo pheasants, grouse, and partridges which afford him and his many friends rare sport; while he has a much more costly hobby in his Fifth Avenue palace, which is a wonderful museum of treasures collected from all parts of the earth. Its tapestries alone are said to have cost \$1,000,000.

Mr. J. D. Rockefeller, the "king of millionaires," is a man of the simplest tastes, who spends his happiest hours in the company of his beloved violin or in an occasional solitary walk or drive. Mr. Iselin is an enthusiastic yachtsman, who has been amongst the most successful defenders of the coveted America Cup; and another millionaire who cultivates the same hobby is Mr. James Gordon Bennett, proprietor of the New York Herald, who some years ago was the first owner to cross the Atlantic in a racing yacht.

Mr. J. Pierpont Morgan, too, is a keen yachtsman, who spends all the time he can spare from his absorbing work of million-making on the sea. He is also a great dog-lover, and has spent at least \$5,000,000 in collecting some of

### THE RAREST ART TREASURES

in the world. Mr. C. B. Flint is among the most famous of big-game shooters, and spends many delightful weeks every year among the Rockies, on the Canadian hills, or amidst the broad plains of South America; while his sloop Gracie B has won more prizes than any other yacht in the United States.

Mr. William Rockefeller finds his chief pleasure in his billiard-room; Mr. George Gould, son of Mr. Jay Gould, is

notices as these: "Our kids are always good. One dollar and a half for twins" (in a glove-shop window); "The silk-worms would die of grief if they knew that we were giving their produce away for next to nothing"; "These shirts ought to be next your heart."

#### "HOW'S YOUR PULSE?"

announces one saloon-keeper. "Is your tongue dry? If so, look out my son, or you're a gone goose. —'s beer is what you want; insist on having it, and kick if you don't get it." But, perhaps, the most original of these "eye-startlers" is the following notice displayed in a saloon in Los Angeles, South California: "If your wife drives you to drink, this is the place to get it. Step right in."

The proprietor of a book-shop displays this hospitable notice: "All looks here. Come in and have a look. Come Early. Stay late. Make yourself at home." "Don't be afraid of of going trouble," pleads a hatter; "we have the hat to fill you if we know the exact shape of your head. Our young men are warranted not to get fixed. They want to give you a comfortable fit, so you come again"; while another announcement reads: "Jones's drygoods are mine. Everything that W. H. Jones had in his shop last week is in my shop to-day. I bought at rock-bottom and I will sell at sun-dollar prices."

As an amusing illustration of the rivalry of advertisers, not long ago visitors to the South Coast of England might have seen a large number of boards with this notice prominently displayed: "Try J——'s Blood Reviver"; while, by the side of each board was another, provided by a local undertaker, which continued the counsel thus: "And then wire R—— to take your funeral order."

#### GRIM LOVE LETTERS.

**Russian Generals Receive Death Sentences in Scented Notes.**

Insurance companies will soon be justified in refusing life risks of Russian generals, if their extermination is to continue at the present rate.

The latest advices from Warsaw are to the effect that the governor of the city, General Skalon, is a doomed man. The general is on terms of close intimacy with his chief of staff, Councillor Jatscheffski. Both gentlemen are ardent admirers of the fair sex. A day or two ago the general received a scented note in a lady's handwriting, requesting him to hand an enclosed letter to his chief of staff. The writer explained that she feared the note, if sent direct, might fall into the hands of some lady addressee's household. The general, suspecting a love intrigue, was much amused, and immediately sent for M. Jatscheffski, who, strange to say, reported having received an exactly similar letter with an enclosure for General Skalon. The two enclosures were then compared. They were identical, and announced that sentence of death had been pronounced upon them both by the revolutionary committee.

#### NICKELS FOR FRANCE.

**Copper Coins to be Recalled After December Next.**

France is going to do away with her coppers. From the beginning of next December copper money will gradually be withdrawn from circulation and be replaced by pennies and halfpennies in nickel.

The shape and size of the new coins have not yet been decided on, but the Minister of Finance is considering several types, and it is thought probable that the coins will be about the size of a shilling and a sixpence respectively. They will most likely be made with a hole through them, or with flat edges, so that they shall not be mistaken for francs by careless people.

pieces existed, and which was unknown country, closed to trade. The expedition covered 1,100 square miles of country, most of which had not been previously visited, and the most continued and obstinate resistance was met with, trenches and stockades being found everywhere.

Operations in the East African Protectorate were rendered necessary owing to the refusal of the Nandi tribe to move into the nerves allotted to them after previous fighting and the proclamation of an armistice.

The operations were carried on in high altitudes, and in cold and inclement weather, which caused 15 per cent. of the British officers to be invalided. The turbulent Nandis were taught a much-needed lesson, and other warlike tribes were properly impressed.

It is noteworthy that the Uganda railway was found of great use in connection with these operations.

And there are men who are willing to marry rather than go to work.

"This confinement," said the long-faced prison visitor, "must distress you greatly." "Yes," replied the facetious convict, "I find the prison bars grating." "Ah, life to you is a failure." "Yes. It's nothing but a cell."

To get the cream of railway humor you must go to Ireland. An Irish railway porter simply can't help being funny. Only the other day a zealous luggage smasher wrathfully pulled a gentleman out of a third-class carriage because he had a first-class ticket. "Cheating the company," he called it. It must have been a relative of his who walked down a platform, put his head into each carriage of a train, and asked, "Is there anyone there for here?" But even this genius was eclipsed by a brother on the line who, before the departure of an express, fiercely rang a bell and bellowed in gloomy warning: "This train stops nowhere at all."

quian mine, or among the green plains of South America; while his sloop *Grade B* has won more prizes than any other yacht in the United States.

Mr. William Rocketteller finds his chief pleasure in his billiard-room; Mr. George Gould, son of Mr. Jay Gould, is a keen fisherman and spends delightful days with the trout in the Adirondacks or on his famous lake in the Catskills; Mr. Chauncey Depew, the millionaire lawyer and senator, finds his chief enjoyment in attending dinners and in long tramps; and Mr. Cornelius Vanderbilt is as proud of his horses and horsemanship as of his riches.

Mr. John Jacob Astor is one of the best amateur engine-drivers in the world, and, as he has proved, can repair a locomotive as skilfully as he can drive it; and among other millionaires who make a hobby of engine-driving are Mr. Edward Green, president of the Texas Midland Railway, and Mr. Charles E. Pratt, who, to qualify for his hobby, served many months of apprenticeship in machine-shops, drawing the wages of a mechanic.

# INVESTORS

Are awakening to the possibilities of **profits** in the mining industry. **Watch the market now.**

### WHAT OTHER PAPERS SAY

Toronto Globe.

The expansion of Canada is the greatest event in the British Empire. This should end the complaint that Canada is not doing her share in the British syndicate of nations.

Montreal Witness.

The nomination of Mr. Hearst for governor probably puts New York out of the running for the democratic presidential nomination. There seems to be still an opening for a good fight if the right man could be found to step into the gap. But this surrender of the ruling New York wing of the party at the shrine of mammon is a wound that cannot be entirely healed.

Campbellford Herald.

The precautions taken in the early spring to discourage farmers from feeding turnips seem to have borne fruit. At the Cheese Board on Tuesday the salesmen were asked as to whether turnips were fed in the various factories, and it was found that five factories out of twenty-five which board cheese here feed turnips. Several factories which have used turnips for feed have stopped the practice, and it is now generally understood that the buyers will cut prices where the turnip flavor prevails. It is, therefore, to the advantage of factorymen not to feed turnips, leaving out of consideration altogether the damage to our reputation as a dairy Province.

Toronto Telegram.

The ideals of R. L. Borden are not numerous or extreme, but these ideals are right and firmly held. The great aim of R. L. Borden's public life is not to fill his own pocket. But why does not Mr. Borden surround himself with men who share his ideals and cherish his aims? If a leader is to be judged by the company he keeps, what will be the judgments recorded in the case of R. L. Borden by the company he kept on his historic tour of the west? The appeal of R. L. Borden to the west was that of a patriot statesman, and why were the patriots and missionaries he took with him to help regenerate the country so busy looking for hand-outs from Sir Thomas Shaughnessy and Mr. Donald D. Mann?

Winnipeg Free Press

The Manufacturers' Association has a perfect right, of course to advocate the erection of a tariff wall of prohibitive height. But when they try to pretend that while doing this they are at the same time upholders of the preference system, they are only making a mockery of the word.

Unless the Manufacturers' Association is prepared to announce its consent to such reductions in the present actual duties on

## DIED SUDDENLY OF HEART DISEASE.

How frequently does a head line similar to the above greet us in the newspapers. The rush, push and strenuousness of the American people has a strong tendency to lead up to valvular and other affections of the heart, attended by irregular action, palpitation, dizziness, smothered sensations and other distressing symptoms.

Three of the prominent ingredients of which Dr. Pierce's Golden Medical Discovery is made are recommended by some of the leading writers on *Materia Medica* for the cure of just such cases. Golden Seal root, for instance, is said by the UNITED STATES DISPENSATORY, a standard authority, "to impart tone and increased power to the heart's action." Numerous other leading authorities represent Golden Seal as an unsurpassed tonic for the muscular system in general, and as the heart is almost wholly composed of muscular tissue, it naturally follows that it must be greatly strengthened by this superb, general tonic. But probably the most important ingredient of "Golden Medical Discovery," so far as its marvelous cures of valvular and other affections of the heart are concerned, is Stone root, or *Collinsonia Can.*, Prof. Wm. Paine, author of Paine's Epitomy of Medicine, says of it:

"I not long since had a patient who was so much oppressed with valvular disease of the heart that his friends were obliged to carry him up stairs. He, however, gradually recovered under the influence of Collinsonia (medicinal principle extracted from Stone root), and is now attending to his business. Heretofore physicians knew of no remedy for the removal of so distressing and so dangerous a malady. With them it was all guess-work, and it fearfully warned the afflicted that death was near at hand. Collinsonia unquestionably affords relief in such cases, and in most instances effects a cure."

Stone root is also recommended by Drs. Hale and Ellingwood, of Chicago, for valvular and other diseases of the heart. The latter says: "It is a heart tonic of

## HANDLING THE APPLE CROP

In commercial orcharding, the business end of the enterprise, that of marketing the crop to the best advantage, is second only in importance to that of producing fruit of the best quality.

It is in this particular that there is the greatest need for improvement at the present time. There are hundreds of apple growers who can grow first class fruit to every one who can place it on the market when and where it will bring the best price. The growers who make the most out of their apples are those who keep in touch with the best markets at home and abroad. During the shipping season these men watch the market reports daily and unless prices are satisfactory they hold their fruit until good prices prevail. The great majority, however, of those who have apples to sell wait for some buyer to come along and sell for whatever he chooses to offer, usually from fifty cents to a dollar a barrel, or a lump sum for the crop on the tree. The latter plan is nothing less than gambling in apples, and in either case the grower seldom gets one-half what his fruit is really worth, if it were properly handled.

The remedy for this state of affairs and what is going to put the apple trade on a better business basis, is for the growers in each apple growing section to unite and form a co-operative association through which the grading, packing and marketing of the fruit may be accomplished.

During the past year a number of these associations have been formed in

at 10.30, connecting with G.T.R. noon train  
going East and West.  
**RETURNING**—will leave Napanee at  
p.m., connecting at Deseronto with Steamer

such cases, and in most instances effects a  
cure." Stone root is also recommended by Drs.  
Hale and Ellingwood, of Chicago, for  
valvular and other diseases of the heart.  
The latter says: "It is a heart tonic of  
direct and permanent influence."  
"Golden Medical Discovery," not only  
cures serious heart affections, but is a  
most efficient general tonic and invigor-  
ator, strengthening the stomach, invigor-  
ating the liver, regulating the bowels  
and curing catarrhal affections in all  
parts of the system.  
**Dr. Pierce's Pellets cure Constipation.**

**\$100 Reward \$100**  
The readers of this paper will be pleased to  
learn that there is at least one dreaded disease  
that science has been able to cure in all its  
stages, and that is Catarrh. Hall's Catarrh  
Cure is the only positive cure now known to  
the medical fraternity. Catarrh being a constitu-  
tional disease, requires constitutional treat-  
ment. Hall's Catarrh Cure is taken internally,  
acting directly upon the blood and mucous  
surfaces of the system, thereby destroying the  
foundation of the disease, and giving the  
patient strength by building up the constitution  
and assisting nature in doing its work. The  
proprietors have so much faith in its curative  
powers that they offer One Hundred Dollars  
for any case that it fails to cure. Send for list  
of testimonials.  
Address F. J. CHENEY & CO. Toledo, O.  
Sold by all Druggists, 75c.  
Take Hall's Family Pills for constipation.

**Stung to the Quick.**  
"Henry, you look very pale. What's  
the trouble?"  
"I was stung to the quick by an  
adder this afternoon."  
"How did it happen?"  
"Why, I dropped in at the bank, and  
the bookkeeper told me my account  
was overdrawn."

**Diamond Cut Diamond.**

**BARRET**  
A terrific wind and rain storm pass-  
ed through this vicinity on Monday  
and Tuesday of this week.

Farmers are now able to resume  
their fall ploughing, owing to the  
recent rains.

Mr. Herbert Armstrong had a husk-  
ing day on Wednesday eve.

Mr. Gordon Storrington is confined to  
the house with rheumatism.

Mr. Joseph Lasher is erecting a  
building in Napanee for our popular  
Merchant, Mr. C. H. Spencer, of Roblin.

The Stock-holders meeting on Thurs-  
day evening, was fairly well attended.  
The Government Inspector from King-  
ston being present, but little business  
was transacted, the meeting being ad-  
journed until the 18th Oct.

Rev. C. W. DeMill preached to quite  
a large congregation on Sunday last.

Our Sunday school closes the 28th  
of this month, we hope every person  
will be present until that date.

Mr. Anderson, the Inspector of  
Public Schools, visited our section last  
week.

To Mr. and Mrs. N. W. Smith a son.  
Mrs. Ezra Thompson, of Dauphin,  
Man., is visiting friends here.

Miss Eleanor West, of Utica N. Y.,  
is spending a few weeks under the  
Parental roof.

Mr. and Mrs. W. J. Winters are at  
Mr. L. Fox's.

**The Speed of Light.**  
Just think of it! Eleven times  
around this globe of ours in the space  
of sixty seconds! Can you imagine  
anything that moves with such remark-  
able speed? Sound travels only twelve  
and a half miles per minute and a  
rifle ball (if its speed were not dimi-  
nished by resistance) sixteen and a half  
miles. Light passes through a dis-  
tance equal to seven and a half revolu-  
tions of the earth in one minute, but  
electricity travels so astonishingly fast  
that it is able to complete the circuit  
of the earth eleven and a half times in  
sixty seconds.

**Oratory in the Commons.**  
One of the London weeklies laments  
the decay of oratory in the house of  
commons. An observer has classified  
the styles of parliamentary speaking  
thus: "Haw haw" style, the "hum and  
haw" style and the "he haw" style.  
The first, he says, is used by the  
haughty gentlemen who loiter in triumph  
on the treasury bench, the second dis-  
tinguishes the utterances of the keen  
and watchful gentlemen on the front  
opposition bench, while the third sort  
fairly describes the effort of the pri-  
vate member.

**She Suspected It.**  
"Why, Mrs. Parvenu, this is unmis-  
takably an old master," said the enthu-  
siastic caller.  
"That's just what I told John. I'll  
send it back to have it repainted and a  
new frame put on."

**Time and Trouble.**  
Ten minutes would get rid of lots  
of trouble that it takes hours to tell.—  
New York Times.

**CASTORIA.**  
The Kind You Have Always Bought  
Bears the  
Signature of  
*W. D. Little*

packing and marketing of the fruit  
may be accomplished.

During the past year a number of  
these associations have been formed in  
various parts of the Province and the  
prices obtained by some of them for  
last year's apples have made the grow-  
ers enthusiastic over this method of  
handling the crop.

An effective co-operative association  
for this purpose involves the selection  
of an honest, wide-awake business man-  
ager, and the erection of a central  
packing and storage house at the most  
convenient point for shipment.  
Through such an organization, boxes  
and barrels can be purchased whole-  
sale to better advantage than they can  
be obtained by single individuals; the  
grower can devote his whole attention  
to gathering the crop at the proper  
season and delivering it in good con-  
dition at the central packing house; the  
association relieves him of all care  
and responsibility in grading, packing  
and marketing; and with this work in  
hands of expert packers, the grade of  
fruit can be made uniform, and the  
packing can be done properly, which,  
in time, inspires confidence in the pur-  
chasing public. In short, the co-opera-  
tive system of handling the apple  
crop, under proper management, assures  
the consumer of a better product, and  
realizes to the grower a greater profit.

**Happy Days.**  
Fred—Mamma, our principal says his  
school days were the happiest days of  
his life. Do you believe that? Mam-  
ma—Certainly. He wouldn't say so if  
it were not true. Fred—Well, I sup-  
pose he played hooky and didn't get  
caught.

**Unsuspected Art.**  
"Did you know that forestry is real-  
ly a branch of art?"  
"No. How so?"  
"In its wood cuts, you know."

If a person determines early in life  
that a cheerful disposition is worth  
having and strives to obtain it and  
does so that person is a success in a  
fine sense of the word.

Many housewives think  
it cheaper to buy than to  
bake. That is because their  
baking isn't successful every  
time. Their failures run  
the cost up. Get  
**Royal Household  
Flour**  
and follow directions. The  
result will be light, whole-  
some bread or pastry every  
time. You pay a few cents  
more for Royal Household,  
but those few cents buy  
certainty and purity. Your  
grocer can supply you.

### Was From a Thumb Bite.

Perhaps the most portentous if innocent incident in the proceedings leading up to England's war with King Theodore of Abyssinia was—a thumb bite. The British consul was practically a prisoner at his court when Mr. Stern, a British missionary, called upon the "king of kings." The first mistake of the Englishman was to seek an audience immediately after the king had dined too liberally with his court. The second was his choosing as interpreters two utterly incompetent men. The inefficiency of this pair so angered the dusky monarch that then and there he ordered them to be beaten. Mr. Stern, "unable to bear the sight, turned around and bit his thumb." Now, he was not aware of it, but to bite the thumb is in Abyssinia a defiance and a threat of vengeance. The quick eye of the king caught the innocent menace, and he had the missionary also beaten. From that sprang the war, the defeat of the forces of the king and his death by his own hand in his ruined city of Magdala.—London Standard.

### The Eternal Wilderness.

We still have our "unmansified" places. And there shall come to us a wilderness here and another there where now there is none, for everything moves in circles, which is not at all a new discovery, and the man who today laments a dearth of the wilderness may live long enough to find himself one day wielding an ax as dull as the pen he now beavails with—and forty miles from a grindstone. We shall not remonstrate with the writers who are picturing us going to eternal smash for want of tall timber. Their work is not without its good effect in staying the denudation of our nearby recreation grounds, and we are content to watch the wily old wilderness creeping in from the rear of the advancing army of invasion, reaching out with sure, silent fingers and reclaiming her own, building anew her razed stockades and unfurling to the winds her defiant banners.—Recreation.

### The Ears of Insects.

Simply because a bee has no ears on the sides of its head it is no sign whatever that it is wholly without some sort of an auditory nerve. This is proved by the fact that grasshoppers, crickets, locusts and flies all have their ears situated in queer places—under the wings, on the middle of the body and even on the sides of their legs. The common house fly does its hearing by means of some little rows of corpuscles which are situated on the knobbed threads which occupy the place which are taken up by the hind wings of other species of insects. The garden slug or shellless snail has its organs of hearing situated on each side of its neck, and the common grasshopper has them on each of its broad, flat thighs. In some of the smaller insects they are at the bases of the wings and in others on the bottom of the feet.

### Way of One Man.

He was romantic, but bashful for his age. At twenty-five it is expected nowadays that a man should be matter of fact. She was his equal in romance, but a trifle older, old enough indeed to be a widow. The conversation had turned on the ever important subject of mothers-in-law. There was a lull in the argument. Gazing far, she sighed and said:

"Ah, me! I shall never have another mother-in-law!"

He looked at her with interest for a moment and then suddenly blurted out:

### A FAMOUS OLD HYMN.

#### Pathetic Origin of "Blest Be the Tie That Binds."

A pathetic and yet charming story is told of the origin of the well known hymn, "Blest Be the Tie That Binds," which was written by Rev. John Fawcett, an English Baptist, who died in 1817, having spent nearly sixty years in the ministry.

It was in 1772, after a few years spent in pastoral work, that he was called to London to succeed the Rev. Dr. Gill. His farewell sermon had been preached near Moinsgate, in Yorkshire. Six or seven wagons stood loaded with his furniture and books, and all was ready for departure.

But his loving people were heart-broken. Men, women and children gathered and clung about him and his family with sad and tearful faces. Finally, overwhelmed with the sorrow of those they were leaving, Dr. Fawcett and his wife sat down on one of the packing cases and gave way to grief.

"Oh, John," cried Mrs. Fawcett at last, "I cannot bear this! I know not how to go."

"Nor I either," returned her husband, "and we will not go. The wagons shall be unloaded and everything put in its old place."

His people were filled with intense joy and gratitude at this determination. Dr. Fawcett at once sent a letter to London explaining the case and then resolutely returned to his work on a salary of less than \$200 a year.

This hymn was written by Dr. Fawcett to commemorate the event.

### FASTING FADS.

#### They Should Find No Favor With Nervous, Anaemic People.

It is said by some physicians that a good deal of the insomnia, extreme thinness and general debility from which Americans suffer is due to the various fasting fads. Here a man goes without breakfast, there a woman makes a point of going hungry to bed. Another systematically omits a meal at noonday, and so it goes. Where people are constitutionally below par and in a position where they can only hope to maintain a fair degree of efficiency by keeping up their vitality such "stunts" are of questionable virtue. Sturdy, full blooded people, with iron nerves and digestions that can negotiate nalls, may try starving themselves with impunity perhaps. Thin, anemic, nervous people, on the other hand, generally need all the food they can eat and all the blood they can make. If such people would eat before going to bed they would generally see an increase in vigor, for the reason that while the wear and tear of the body were suspended digestion and assimilation would still be going on. In other words, the body would be making more tissue than it destroyed; hence an increase in blood, in weight and in health. At least that's the way one physician explained things to a woman of the pale, thin type who applied to him "all run down."

### A Humming Bird's Umbrella.

In front of a window where I worked one summer was a butternut tree. A humming bird built her nest on a limb that grew near the window, and we had an opportunity to watch her closely—in fact, we could look right into the nest. One day when there was a heavy shower coming up we thought we would see if she covered her young during the rain. Well, when the first drops fell, she came and took in her bill one of two or three large

## DRS. KENNEDY & KERGAN

The Leading Specialists of America. 25 Years in Detroit. Bank Security.

Nine out of every ten men have been guilty of transgression against nature in their youth. Nature never excuses, no matter how young, thoughtless or ignorant he may be. The punishment and suffering corresponds with the crime. The only escape from its ruinous results is proper scientific treatment to counteract its effects.

The DRAINS, either by nightly losses, or secretly through the urine, must be stopped—the NERVES must be built up and invigorated, the BRAIN must be the SEXUAL ORGANS must be vitalized and developed, the blood must be purified, its influence the brain becomes active; the blood purified so that all pimples, blotches and ulcers disappear; the nerves become strong as steel, so that nervousness, bashfulness and dependency disappear; the eyes become bright, the face full and clear, energy returns to the body, and the moral, physical and sexual systems are invigorated; all drains cease—no more vital waste from the system. The various organs become natural and manly. We invite all the afflicted to call. Pay. We treat and cure: Varicocele, Blood Diseases, Stricture, Gleet, Emissions, Urinary Drains, Spermatorrhoea, Unnatural Discharges, Kidney and Bladder Diseases.

CONSULTATION FREE. BOOKS FREE.

If unable to call, write for a QUESTION BLANK for Home Treatment.

## Dr. Agnew's Cure for the Heart

A cure that has stepped to the bedside of a sufferer in the clutch of death. A cure that has unloosed the grip and stopped the pain in 30 minutes and gently led the heart-wracked soul out from the darkness and despair to the brightness and happiness that comes to one whose heart beats true, whose blood tingles with life and vigor. Dr. Agnew's Cure for the Heart is not heralded as a miracle worker, but it has many miraculous cures to its credit.

Weak heart—weak blood—weak nerves travel hand-in-hand, and you find the symptoms in such sensations as palpitation, fluttering, shortness of breath, weak and irregular pulse, smothering spells, chilly sensations, fainting spells, swelling of feet and ankles, weariness, tired feeling; all these presage heart disorder and you cannot afford to neglect them. Dr. Agnew's Cure for the heart is a tried remedy—the sure remedy—the quick acting remedy—a real life saver.

Removed the Growth

He looked at her with interest for a moment and then suddenly blurted out "My mother died when I was very young!"

It was an inadvertence, but he could not draw back. She threw herself into his arms, and they have lived happily up to now.—New York Press.

#### The Sheep Drives the Wolf.

The wolf will perish, eaten up by the sheep. The sheep is not what a vainglorious folk have imagined. The sheep presses forward, irresistible driving before him lions and tigers driving before him man.

Man?

Yes, man. Ask those thousands of English, those thousands of Scotch, those thousands of Irish, who have been driven back into the sea by flocks of sheep, urged forward by certain noble lords and large proprietors.—

#### Amputation Avoided.

ZAM-BUK CURES EXTRAORDINARY CASE OF CHRONIC ULCER.

KINGSTON LADY CURED AFTER HAVING BAD LEG FOR FIVE YEARS.

A powerful example of the healing virtue of Zam-Buk is provided by the case of Mrs. Lizzie Gilmore, who resides with Mrs. Wathen in Princess street, Kingston, (Ont): "Five years ago," she says. "I bruised my left leg just above the ankle causing an ulcer which developed into a very serious wound. There was soon an ulcerated sore around my limb like a bracelet. The foot and ankle were swollen to nearly three times the normal size, and I had to give up wearing a shoe. The pain was terrible. I had medical attendance, and was also treated by a New York doctor, but I got no ease. Then I went into a hospital and was there for nine long months. While there it was at one time thought advisable to amputate the limb, but this was not done, and at the end of nine months I left the hospital. Soon afterwards the ulcer was as bad as ever, and as I thought of all the pain and suffering I had gone through I felt absolutely discouraged.

At this stage I read in the newspaper about Zam-Buk. I determined to make one more attempt to get a cure. The first few applications brought me the only relief from agony I had had for a long time. The swelling went down as I preserved with the Zam-Buk treatment and the ulcer took on a cleaner and more healthy appearance. All the poisonous matter was cleaned out by the balm, and the ulcer then began to heal. New pink flesh has now grown where before was a raw and inflamed sore. Eight boxes of Zam-Buk have done the work, I can now walk about and go up and down stairs and I cannot feel too grateful for what Zam-Buk has done for me. I deem it my duty to let others who suffer as I have suffered know of this excellent preparation."

Zam-Buk cures eczema, abscesses, ringworm, scalp sores, and all skin diseases by a process of clearing out the poisonous secretions and building up new healthy tissue. It is also a cure for cuts, burns, bruises, sore feet, chafing sores, chapped hands, etc. It stops bleeding, eases the itching and smarting of piles, and in a hundred ways is the handiest and household balm. All druggists sell at 50c a box or direct from the Zam-Buk Co., Toronto, on receipt of price (6 boxes for \$2.50). Send one-cent stamp and full name and address and a free sample box will be mailed to you.

the first drops fell, she came and took in her bill one of two or three large leaves growing close by and laid this leaf over the nest so as to completely cover it. Then she flew away. On examining the leaf we found a hole in it, and in the side of the nest was a small stick that the leaf was fastened to or hooked upon. After the storm was over the old bird came back and unhooked the leaf, and the nest was perfectly dry.—Exchange.

#### The Lost Golf Ball.

"Once in Scotland," said a professional golf player, "I saw a lost ball cause a great commotion. Over there, you know, a lost ball means a lost hole. Two professionals were playing, and one of them lost a ball in the tall grass. He searched for it a long time. Nearly half an hour passed. His opponent kept urging him to admit that the ball was lost and to forego a hole, but this the other refused to do. And finally, with a triumphant laugh, he pounced down, fumbled in the weeds and rose with a ball in his hand.

"Here's my ball. I've found my ball," he shouted.

"'Yer a liar,' said the other professional, 'for I've got it here in my pocket.'"

#### Rather Rough.

Above the stairway there flickered a candle, and then a deep voice called from the shadows:

"Katherine, Katherine, who is that sandpapering the wall this hour of the night?"

A long stillness and then: "No one down here, father, dear. I guess it must be next door."

The candle vanished and then from the gloom of the parlor:

"George, you big goose, I told you never to call on me unless you had been shaved!"

#### After the Fall.

"I always pitied Adam and Eve for being driven out of Eden in such insufficient clothing, just as winter was beginning."

"How do you know it was winter?"

"Why, it was just after the fall, wasn't it?"

The best education in the world is that got by struggling to make a living.—Phillips.

#### Beit's Generosity.

One of the many persons whom Alfred Beit, the diamond multimillionaire, had befriended repaid him with ingratitude and abuse. Later the ingrate fell on evil times. Though down in the gutter, he still had a little shame left and would not ask Mr. Beit for help. The South African diamond magnate sent for one of the unlucky one's friends and said: "Go and see So-and-so. Ask if he wants any help and give it to him, but don't let him think it is from me. I have had a difference with him, and perhaps it would annoy him."

#### Politics.

"Mornin', congressman. I"— "Well, it's old Jim Smith. Jim, how are you? Have a cigar, Jim."

"Thought I'd come around to tell you that I'd moved out of your district, but"—

"Indeed, Mr. Smith."

"You see, I wanted to find out if"—

"Yes, Smith."

"If you could use your influence to"—

"Sorry, my man, but I can't stop. Good morning."

Builders Hardware of every conceivable kind. Rathbun's Star Brand of Portland Cement, it pays to buy the best.

# Fruit-a-tives

OR "FRUIT LIVER TABLETS"

Fruit-a-tives will cure the worst case of Chronic Constipation and Biliousness.

Because Fruit-a-tives are the true liver tonic. They strengthen and invigorate the liver—make the liver give up enough bile to move the bowels regularly. The bile is nature's laxative.

Fruit-a-tives are the finest Kidney and Bladder Remedy in the world.

Fruit-a-tives reduce inflammation and congestion—relieve the over-supply of blood—enable the kidneys to rid the system of waste—and thus prevent the formation of uric acid. Fruit-a-tives take away that pain in the back—and quickly cure irritated Bladder.

Fruit-a-tives completely cure Headaches and Rheumatism.

Headaches and Rheumatism both mean poisoned blood. Either the skin, kidneys or bowels are not ridding the system of waste matter. Fruit-a-tives invigorate and strengthen these organs—start up healthy, normal action—rid the system of poisons—and purify and enrich the blood. That means away with Headaches and Rheumatism.

Fruit-a-tives are the ideal tonic for everyone.

Fruit-a-tives build up, strengthen, invigorate. They sharpen the appetite—steady the nerves—enable one to sleep well—and keep the whole system in perfect health. They are fruit juices, concentrated and combined with tonics and internal antiseptics.

50c. a box or 6 boxes for \$2.50. Sent on receipt of price if your druggist does not handle them.

FRUIT-A-TIVES LIMITED - OTTAWA.

The earliest known mention of shaving is in the Bible (Genesis xiv, 14), "And he (Joseph) shaved himself and came before Pharaoh." Shaving the beard was introduced by the Romans about 300 B. C.

## The Plausible Lie.

We resent calumny, hypocrisy and treachery because they harm us, not because they are untrue. Take the detraction and the mischief from the untruth, and we are little offended by it. Turn it into praise, and we may be pleased with it. And yet it is not calumny and treachery that do the largest sum of mischief in the world. They are continually crushed and are felt only in being conquered. But it is the glistering and softly spoken lie, the amiable fallacy, the patriotic lie of the historian, the provident lie of the politician, the zealous lie of the partisan, the merciful lie of the friend and the careless lie of each man to himself that cast that black mystery over humanity through which we thank any man who pierces it as we would thank one who dug a well in a desert. Happy that the thirst for truth remains with us even when we have willfully left the fountains of it.—John Ruskin.

## Trade's Sensitiveness.

German goods go where British goods might, but do not. Here is a case. The Russian joiner, not being a meat eater, has not much muscle and cannot use a heavy hammer. So he buys and uses the German light hammer made for him, while he has no use for the heavier one of English make.—London Post.

## Inns in Hungary.

Wayside inns in Hungary generally rejoice in very quaint titles. This one was called the Dropperin and had the usual sign outside—viz, a long pole with a wooden ring and a gigantic wine bottle suspended from it. The system of keeping the scores is primitive, but practical. The regular customers and the innkeeper each have a bit of wood called rovas, with the name of the person written on it, and every liter of wine consumed is marked by each making a notch on his respective bit of wood. When the score is paid off, both the rovas are burned. Consequently you hear the peasants inviting each other to ingyonroviasmorra, literally drink on my "knotch stick," which sounds most comical.—"Wanderings in Hungary."

## Cruel.

A cashier in the financial district of New York, on being advised by his physician to take a vacation not long ago, wrote the agent of a South American steamship line as follows: "As I am thinking of taking a trip to South America, please advise me immediately with particulars relative to rates, accommodations, and so on, to and from the various ports usually visited by tourists at this season of the year." The answer came by special delivery, marked private and confidential, "One of our steamers will sail for Valparaiso next Wednesday; shortest and quickest way out of the country."

## A Test For Seasickness.

Many people have a genuine curiosity to know if they would be sea sick in case they should take an ocean voyage. An easy way to put the matter to a test is to stand before the ordinary mirror that turns in its frame and let some one move it slowly and slightly at first, gradually growing faster, while you look fixedly at your own reflection. If you feel no effect whatever from it the chances are that you can stand an ordinary sea voyage without any qualm.

## Her Wisdom.

"Girls!" quietly called old but eminently astute Aunt Broadhead.

"Ma'am?" they replied as they flattered obediently to her.

"Always remember, girls, that when a man professes to have a 'fatherly interest' in you his own daughters need it, that your own father can sufficiently supply you with it and that is the oldest of all stories save one in the world."—Puck.

## An Experiment.

"Where are you going, Michael, so early?"

"Apothecary's; wife got sick last night."

"Doctor been there yet?"

"No. I found a prescription in the street when I was in town, and I'm going to have that made up and try it." —Fliegende Blätter.

## Conflicting.

Actor—I can't play all three of the parts you have assigned to me in this melodrama. Manager—Why not? Actor—Because in the first act two of them engage in a fight, and the third rushes in and separates them.

# FITS CURED

# Tired, Nervous Mothers

Make Unhappy Homes—Their Condition Irritates Both Husband and Children—How Thousands of Mothers Have Been Saved From Nervous Prostration and Made Strong and Well.

Mrs. Albert Mann

Mrs. Chester Curry

A nervous, irritable mother, often on the verge of hysterics, is unfit to care for children; it ruins a child's disposition and reacts upon herself. The trouble between children and their mothers too often is due to the fact that the mother has some female weakness, and she is entirely unfit to bear the strain upon her nerves that governing children involves; it is impossible for her to do anything calmly.

The ills of women act like a firebrand upon the nerves, consequently nine-tenths of the nervous prostration, nervous despondency, "the blues," sleeplessness, and nervous irritability of women arise from some derangement of the female organism.

Do you experience fits of depression with restlessness, alternating with extreme irritability? Are your spirits easily affected, so that one minute you laugh, and the next minute you feel like crying?

Do you feel something like a ball rising in your throat and threatening to choke you; all the senses perverted, morbidly sensitive to light and sound; pain in the abdominal region, and between the shoulders; bearing-down pains; nervous dyspepsia and almost continually cross and snappy?

If so, your nerves are in a shattered condition, and you are threatened with nervous prostration.

Proof is monumental that nothing in the world is better for nervous prostration than Lydia E. Pinkham's Vegetable Compound; thousands and thousands of women can testify to this fact.

Ask Mrs. Pinkham's Advice—A Woman Best Understands a Woman's Ills.

## The Average Man.

"The average man when he is a boy, a trifle involuntarily ruminated the old adage, 'Decides that when he grows up he will be a drum major or a bandit, triumphantly survive battles, shipwrecks and holocausts and gallantly protect innocence and beauty in distress. But the average boy when he becomes a man finds himself so busy satisfying the appetite of the always hungry mortgage, endeavoring to achieve but never attaining the eminence of being the head of his own household, chasing at the earnest solicitation of his many friends the political prominence which forever eludes him, selecting the particular brand of health fodder that will injure him the least, running after or away from something or other, getting off a few well chosen words, trying to collect or

Mrs. Chester Curry, Leader of the Ladies' Symphony Orchestra, 42 Saratoga St., East Boston, Mass., writes:

Dear Mrs. Pinkham:—

"For eight years I was troubled with extreme nervousness and hysteria brought on by irregularities. I could neither enjoy life nor sleep nights. I was very irritable, nervous and despondent.

"Lydia E. Pinkham's Vegetable Compound was recommended and proved to be the only remedy that helped me. I have daily improved in health until I am now strong and well and all nervousness has disappeared."

The following letter is from Mrs. Albert Mann, 154 Gore Vale Ave., Toronto, Ont.:

Dear Mrs. Pinkham:—

"I suffered a long time with serious female trouble having intense pains in the back and abdomen and very sick headaches every month. I was tired and nervous all the time and life looked very dreary to me and I had no desire to live until I began to take Lydia E. Pinkham's Vegetable Compound and to get some relief. My recovery was slow but it was sure and I have never regretted the money spent for the Compound as it brought back my good health."

Women should remember that Lydia E. Pinkham's Vegetable Compound is the medicine that holds the record for the greatest number of actual cures of female ills, and take no substitute.

## Free Advice to Women.

Mrs. Pinkham, daughter-in-law of Lydia E. Pinkham, Lynn, Mass., invites all sick women to write to her for advice. Mrs. Pinkham's vast experience with female troubles enables her to advise you wisely, and she will charge you nothing for her advice.

nearer equivalent than the English six pence, which is worth 2 cents more. It is one of the handiest of coins, being about as small as a silver piece can conveniently be. Being less in size and weight than the nickel, which is worth only half as much, it is vastly more convenient to keep and hoard, and that is one reason why it is becoming extraordinarily scarce in spite of the fact that more dimes are now turned out of the mints than ever before in the country's history. There is a rage for "dime banks," and some of these mechanical contrivances are so pretty so ingenious and so alluring that they force people to save dimes who have no earthly occasion to do so.—New York Mail.

# SUFFERED FOR YEARS WITH A COMPLICATION OF PELVIC DISEASES.

## Robust Women Who Owe Their Restored Health and Usefulness to Pe-ru-na.

Read the Letters of Gratitude From Women Who Have Been Benefited By Dr. Hartman's Advice.

A Multitude of Such Letters Are Received Every Year.

### A TYPICAL LETTER.

Mrs. Carry Peduzzi, Linstad, N. Dak., writes:  
*"I take pleasure in telling you that through your wonderful medicine I am entirely cured of catarrh of the stomach and pelvic organs."*  
*"I was so rundown on account of my illness that I could no longer attend to my housework. I could not eat or sleep and had terrible pain in my back."*  
*"I took Peruna and in five months I was well. I have not felt so well for a long time."*  
*"I wish everyone who is sick would take Peruna and thus recover their health."*  
*"I have Peruna in the house continually. I thank you for all that you have done for me."*

### A Medicine of Merit.

Miss Katie A. Washer, 1706 Prentice street, Louisville, Ky., writes:  
*"As my experience has been so favorable from the use of Peruna, I unhesitatingly state that I believe that it is a medicine of unquestioned merit for all the ills that we women suffer from."*  
*"I find that it strengthens and infuses new life into the system, and whenever I feel rundown or over-tired, a few doses of Peruna will strengthen me again."*

### Found a Friend in Need—Pe-ru-na.

Mrs. Florence Aitkens, 1104 Front St., Toledo, Ohio, writes:  
*"Peruna cured me of catarrh of the uterus. I took about four bottles when I noticed an improvement and five bottles cured me."*  
*"I do not know what I would have been like to-day had I not obtained Peruna, for I was in a terrible state."*  
*"I had pains all over and was cross and irritable. I was losing hope of ever being well again."*  
*"I am to-day a well woman after suffering for nine months. I cannot tell you how happy I feel, but you will know."*  
*"Peruna is the best medicine on earth."*  
*"My husband is now taking it and I will always keep Peruna in my house."*  
*"Peruna is the best friend I ever had. It cured me."*

MRS. CARRY PEDUZZI, LINSTAD, N. DAK.

MRS. FLORENCE AITKENS, TOLEDO, O.

MISS KATIE WASHER, LOUISVILLE, KY.

## America is the Land of Nervous Women.

The majority of women are nervous because they suffer from some form of pelvic catarrh.  
 The greatest obstacle in the way of recovery is that they do not understand that catarrh is the main source of their illness.  
 Women who are in doubt as to their ailments should write to Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio, who will give their letters prompt attention, without charge.

Miss Anna McGinn, 161 Plain street, Providence, R. I., writes:  
*"I wish to let you know of the good your medicine has done for me."*  
*"I had what the doctors called heart trouble. I had been doctoring for a year before I tried your Peruna."*  
*"I got a bottle of your Peruna and after a week's use of it I began to feel better. I could not eat, sleep, or work, but I have at last found that the medicine that will cure me is Peruna."*

POINTED PARAGRAPHS.

The only way some people know is their way.  
Hospitality is often nothing more than loneliness.  
A secret is never safe after some one knows you have it.  
If you are naturally rude it's pretty hard to disguise the fact.  
Are you so conceited that you believe people never talk behind your back?  
The trouble is some pushers are as liable to push on the wrong side as on the right.  
Watch your side issues. Don't give them so much attention as to ruin your main issue, which makes you a living.  
Don't be mad if you are interrupted when you are talking. It may have prevented you from saying something foolish.

Why They Got No Mail.

An official of the postoffice department at Washington tells of a new postoffice that was established in a certain small town. A native of the place, the proprietor of a grocery, was installed as postmaster. It was not very long before complaints were filed with the department that no mail was being forwarded from the new office, so an inspector was detailed to investigate the matter. When he called upon the postmaster and asked why no mail had been sent out, the former pointed to a large mail bag hanging up in a corner and said:  
"The mail's in that bag. I ain't sent it out yet because the bag ain't nowhere nigh full."

Clearing Sale.  
In order to clear out the following lines at the close of the season, we will offer at cost for cash during August and September, our entire stock of gas stoves, gasoline stoves,  
MADOLE & WILSON

"I pulled him to one side.  
"Would you stand there," I said, "and be burned to death?"  
"Was I burning?" he said, with a scared look. And he put his hand to the side of his face—the wrong side. Was it possible that he couldn't feel that horrible hurt?  
"Gentlemen, that man had no feeling in his face whatever. He told me that he had been operated on for the delourenx, and the operation, while it had cured the tic, had left his face dead to all sensation.  
"I had often read of the delourenx in English novels, but I thought it was a trifling disease. This chap said it was a facial neuralgia so painful that in the past 90 per cent of its victims either went crazy or killed themselves, but now there is an operation that gives relief.  
"Every victim of tic undergoes the operation; hence there are a lot of people walking the earth with no feeling in their faces. The condition is a dangerous one, because you are likely to get hurt without knowing it."

Sir Chas. Clifton Browne  
CURED OF BILIOUS HEADACHE BY BILEANS.

Sir Chas. Clifton Brown, who has toured considerably in Canada, interviewed at his Deal (Kent) residence, admitted that he had reaped very great benefit from Bileans.  
He said: "I have no objection to you stating that I found Bileans a very fine medicine for biliousness, headache and digestive troubles generally. I suffered frequently from bilious headache, and nothing that I have ever yet tried did me as much good as Bileans. I believe they are a good thing and worthy of success."  
In those last few words Sir Charles aptly summarizes Bileans: "A good thing." They are compounded from purely vegetable essences, and are the best possible remedy obtainable for headache, debility, dizziness, indigestion, etc. They also operate gently on the bowels, curing constipation, piles, etc. They correct female irregularities and ailments, pains in the lions and bearing down pains. They tone up the whole system and enable it to throw off colds, chills, rheumatism, etc. Anaemic and pale-faced women and girls will find them a veritable boon. Of all druggists at 50c a box, or post free upon receipt of price from the Bilean Co., Toronto; 6 boxes for \$2.50. Send one cent stamp for sample box.

## ARTHUR GOODRICH. AUTHOR OF "THE BALANCE OF POWER."

Arthur Goodrich, author of "The Balance of Power," comes from Connecticut. He was educated in New Britain schools and entered Wesleyan University in 1895. Like many of the younger writers of this generation, he edited his college "Lit." He also sang on the Wesleyan Glee Club, and managed it during one of its most successful years. He also led the men of his class in scholarship and took special honors in English. On his graduation from Wesleyan he was appointed University Scholar in English at Columbia University, where he spent a year in graduate study. He joined the staff of the World's Work at that magazine's beginning and was its Managing Editor for three years. Two years ago he went abroad as foreign editorial representative of The American Magazine and The Outlook Magazine. He has meanwhile contributed to many of the leading monthlies here and abroad. He is twenty-eight years old. At present he holds an important editorial position with The Outlook Publishing Company; he is a church-soloist in a well-known New York choir; and

# KAI WANG;

## A TALE OF SOUTHERN CHINA.

### CHAPTER XXXIX.—(Continued).

Much as he hated to fire, the necessities of the case demanded it, and Dr. Jack knew enough of those with whom he was in conflict to believe they would meet with little or no mercy should they fall into their hands.

There was small choice when it came to making a selection—all Chinese looked alike to Evans at that particular moment.

Still, he knew there were always certain elements in a mob that serve as leaders, and could such be individualized and shot down, the chances of a break in the assault would be made considerably brighter.

Hence his practiced eye at once roved along the vanguard, searching for a shining mark.

There was a grim satisfaction in the thought that at least the guard of the palace would offer splendid chances for advancement on the morrow, if their lead sped true to the mark.

Having discovered one fellow who gave evidence by his dress and manner of being in authority among the advancing host, the doctor gave him the benefit of the suspicion.

Probably the said patriot never realized the extent of the honor conferred upon him by this distinctive preference, but that was no concern of Dr. Jack's, whose conscience rested easy under the conviction of having done his duty.

Plympton was a modest man. He had been waiting for Jack to take the initiative, and no sooner had the doctor's weapon spoken than he hastened to get in.

Nor was Larry willing to be left in the lurch.

His weapon could sound just as loudly as those wielded by his larger companions, and, if well handled, would serve out medicine just as bitter to those who took the dose.

It was only a question of aiming straight.

The sudden rattle of firearms put quite a new phase upon matters. It was a sound for which these Chinese fighters had the greatest respect, and, besides, the execution accomplished in their midst served to further arouse both their fears and their anger.

Unfortunately, their forward rush was not in the least hindered by the leaden rain that had begun to rattle among them, much as nuls fall upon the dead leaves when a fierce gust of autumnal wind shakes the chestnut trees.

Thus, the gaps were being rapidly closed, and our friends had no means of preventing it.

There are occasions in some lives when time can only be measured in heartbeats, when eternity looms up so close at hand that even mortal eyes may almost look beyond the black river Styx to the immortal shores that await their coming.

Such a moment was upon this little company now, as, breathlessly, they stood their ground and awaited the inevitable shock of battle.

The deadly bullets continued to go forward, and none could fail to find its mark in the mass of onrushing human beings; but they did not stay the advance one iota, and Dr. Jack knew the worst was upon them.

particular as the man at the mint who weighs gold dust.

As he fired, the tall soldier pitched forward just as Jack calculated, and the coveted sword was cast at his very feet.

Eagerly he snatched it up. To him it meant another frail bulwark between Avis and death.

Lord Rackett saw the performance of this act, and in his heart applauded, being not unwilling to profit by the example set if fortune allowed him the opportunity.

Perhaps the blade might have done yeoman service in the hand of the big Briton, for he was really in better physical condition to wield it than Evans, who had suffered keenly from wounds and imprisonment; but the doctor's nerve would carry him a good way, and any who came in contact with the edge of the weapon he now firmly grasped would have cause to regret the fact.

This little incident might not have much of a bearing upon the result, save that it might possibly delay the inevitable end for a brief space of time.

Even seconds were worth something, with Kai Wang hastening to the scene of carnage as fast as his legs could carry him—Kai Wang, who had succeeded in his astonishingly bold feat of interviewing the powerful Dowager Empress in her royal apartments, and presenting such strong arguments for her imperial consideration that when he left again he bore with him her signet ring, together with a document officially signed and sealed by her own hand, whereby Dr. Jack Evans and his little company of friends were to be granted the utmost consideration upon condition that they quitted Peking within twenty-four hours—and woe to the wretched retainer of Her Majesty who would dare to raise a finger against them after his ears had heard this august proclamation and his servile eyes had been gladdened by a sight of her own magic signet ring, which she had been pleased to temporarily trust in the keeping of her faithful and devoted subject, Kai Wang, mandarin of the first degree, wearer of the yellow jacket, and henceforth proud owner of the peacock feather, that signified his being held in high esteem at court.

No one could ever know what magic he used to overcome the scruples of the Empress, who had hitherto looked upon Kai Wang, just as she did Li Hung Chang, as one to be feared and yet worthy of honor.

Secrets of state are not to be lightly declared abroad, and Kai Wang never revealed what transpired during that period he spent in earnest consultation with the august ruler.

Perhaps she gladly welcomed the chance to win him to her side as an ally; perhaps she had begun to see the folly of endeavoring to fight against the fates that decreed China's open-door policy to the civilized world. However that may be, Kai Wang won all he asked, and was even now on the way to carry the glorious news to his friends, when the sounds of strife filled him with a dread lest he should after all arrive too late with his precious news.

Of course, he did not—that is a foregone conclusion in the mind of the observing reader; but it was a very close shave, and had Kai Wang been in any

point. Even Chinese railway trains will not stand in the way of Russian vengeance, it seems.

So the delectable and wise Kai Wang arranged a little excursion of his own, and in disguise the party was secretly conveyed to Tien-Tsin by road vehicles, instead of train. Here a vessel was secured to undertake the passage of the Grand Canal, and, under Kai Wang's guidance, they scoured the hundreds of miles of fertile territory through the provinces of Chili, Shan-tung and Kiangsu, until at length their destination on the great Yang-tse-Kiang was reached, where they boarded an English steamer for Hong Kong.

It was a journey never to be forgotten, and the peace and glorious rest did much to build up Dr. Jack after the severe strain that had begun to sap even his iron constitution.

Once at Hong Kong, and the danger was all in the past. Evans had played for high stakes, and, as in other like circumstances, had won his game through a rare combination of boldness and the special favor of Providence.

He solemnly promised his adoring spouse that it was the last time he meant to take any chances in the name of fortune; he had enough and to spare, and life should really be too precious to a man who was blessed with such a charming and devoted wife, to be so lightly risked.

In the new possessions of his native country, the sunny Philippines, he planned to invest great sums in coffee plantations, and, following the calm pursuits of peace, hoped to finish his days in an atmosphere quite at variance with the hurly-burly scenes that had marked so much of his career.

Kai Wang is still in Canton, and his power among the mandarins seems to grow. Some say he will soon be a viceroy; but politics in China no European understands, so that his future is beyond prophecy.

Lord Rackett has endeared himself to Jack and his wife, nor will Larry ever forget how the big-hearted Englishman risked his life to make the amende honorable when Dr. Jack's widow appealed to his manhood.

The End.

## SOME STRANGE CLOTHES

### WOODEN COATS, GLASS DRESSSES, AND PAPER WAISTCOATS.

Peter Gruber Possesses an Entire Suit Made of Rattlesnake Skins.

Herr Schaeft, a native of Baale, Switzerland, has just taken out a patent for paper waistcoats, which he will be able to place upon the market at four cents each. These garments, which can be folded into a sufficiently small compass to enable them to be put into an ordinary waistcoat pocket, are, it is said, much warmer than the everyday article, in place of which they can be worn.

Glass has on more than one occasion been employed in dressmaking. Miss Elene Jaqua, of Brooklyn, N.Y., possesses a dress made of spun glass, while some years back a M. Pierre Buse might have been seen walking the streets of the Belgian capital wearing a green coat woven from the finest threads of glass. His hat, too, was made of green glass, and he wore earthenware sabots. The other portions of his costume were of green silk.

Many kinds of skin are common enough for purposes of dress, but that of the rattlesnake is alone effected by Peter Gruber, of Rochester, New York, who possesses an entire suit made of this material. In its manufacture 125 skins were used, and the effect is heightened by the skillful blending of the skins of the four kinds of snake—black, brown, yellow and grey. The buttons consist of rattlesnake heads. Mr.

the reading mountains here and abroad. He is twenty-eight years old. At present he holds an important editorial position with The Outing Publishing Company; he is a church soloist in a well-known New York choir; and he is vice-president of a Connecticut manufacturing concern which he helped to reorganize a few years ago. "The Balance of Power" is his first novel.

Mother (to little daughter)—"I am surprised Ethel, that you should talk so impertinently to your father. I'm sure you never heard me talk that way to him." Ethel—"Well, you choosed him, and I didn't."

A Sure Cure for Headache.—Bilious headache, to which women are more subject than men, becomes so acute in some subjects that they are utterly prostrated. The stomach refuses food, and there is a constant and distressing effort to free the stomach from bile which has become unduly secreted there. Pardee's Vegetable Pills are a speedy alternative, and in neutralizing the effects of the intruding bile relieves the pressure of the nerves which cause the headache. Try them.

He offered to act as her escort, but she declined the offer. "You are as full of airs as a hand-organ," he spitefully declared. "Possibly," she retorted; "but all the same, I don't go with a crank."

Father—"Ah, Tommy, you don't know when you're well off. I wish I were a boy again." Tommy (who has recently been chastised)—"So do I. Little than me, too."

No one need fear cholera or any summer complaint if they have a bottle of Dr. J. D. Kellogg's Dysentery Cordial ready for use. It corrects all looseness of the bowels promptly and causes a healthy and natural action. This is a medicine adapted for the young and old, rich and poor and is rapidly becoming the most popular medicine for cholera, dysentery, etc., in the market.

#### EDWARD VII'S ROYAL RELATIONS.

The German Emperor is his nephew, Princess Ena, Queen of Spain, is his niece. Four other nieces of his are the Crown Princess of Rumania, the Tsarina of Russia, the Crown Princess of Greece, and the Crown Princess of Sweden. The Queen of Norway is his daughter. His Majesty is also closely related by marriage to the Kings of Greece and Denmark, who are his brothers-in-law, and to the Tsar of Russia and King of Norway, who are nephews of Queen Alexandra.

#### IN EVIDENCE.

"Yes, sir," the barler prattled, as he shaved the patron. "Iv'n it might, high these days. All kinds o' prices ha-gone up so it's hard for us workin' men to even git enough to eat."

"Yes!" groaned the victim: "I judge, however, that you find onions cheap enough."

Some men couldn't hear the voice of conscience through a megaphone.

George—"The ring doesn't seem to fit very well, Clara. Hadn't I better take

the deadly bullets hurled at me forward, and none could fail to find its mark in the mass of onrushing human beings; but they did not stay the advance one iota, and Dr. Jack knew the worst was upon them.

Armed with some decent sort of weapon in the shape of swords, he and Lord Rackett could still have put up a good fight against the Chinese rabble.

Without such accessories, however, they would be able to make a lame resistance at best, and very shortly one of the steel blades wielded by their enemies must do its work.

Desperate men never give up until the last breath is gone from their bodies.

This does not apply to civilized nations only. When Kitchener scattered the legions of the Khalifa, around Khar-toum and Omdurman, some of the badly-wounded dervishes, feigning death, would sacrifice their last atom of strength in a vicious endeavor to stab some Egyptian or British soldier who chanced to draw near, knowing at the same time they would be hacked to pieces immediately after.

This cannot be called true bravery, but is simply an exhibition of vindictive desperation, a desire to die in a blaze of glory, a spirit of slaughter such as animates the jungle tiger.

Animus more lofty than this animated those who shielded Avis Evans with their bodies.

They had not sought this conflict and would have avoided it, if possible, by every honorable means in their power.

When forced reluctantly into the fight, nothing was left to them but to take up the gage of battle and accept the dreadful consequences.

The rush of the assailants carried them over the intervening space so rapidly that they swung up against cur friends about the time the firearms of the latter were two-thirds empty.

The scene that ensued almost baffles description.

Certain it is that never could it fade from the memories of those who participated in the desperate hand-to-hand struggle, should favoring fortune allow them to live through it.

Avis, brave girl, crouching there, white-faced but heroic to the last, believed she lived years in those brief seconds of time.

She had passed from the depths of profound woe to sudden joy at finding her Jack in the land of the living; and now came still another kaleidoscopic change, whereby it seemed fated she should be a witness of his bloody death.

At least, thank Heaven, she would not be far behind him when he crossed the dark river. There was consolation to her loving heart in the knowledge that together they would pass into the unknown world, loyal companions in death, even as they had been in life. His arm had been a tower of strength to her here; perhaps it might also help her over difficulties in the Beyond.

#### CHAPTER XL.

The confusion had, if anything, grown more intense by this time.

Still, the shouting was all on one side, not a sound breaking from the lips of the three who battled for their lives with the desperation of despair.

They had nothing to shout for, and thought best to save their breath for the finishing struggle.

It appeared to be at hand.

Dr. Jack had one ambition. This was to possess himself of a sword which one of the onrushing Black Flags swung valerosly about his head—a sword that was certainly not of Chinese manufacture, and had evidently seen a German or Russian forge.

He laid his plans accordingly.

It may have been a little matter, but in his eyes just then it assumed a certain magnitude.

Accordingly, he singled this fellow out for a display of his warmest affection, nor did he mean to shoot too soon, and thus baffle his own hopes.

Well did he time his effort, nor was he the least out of the way. Even in such matters Dr. Jack was seen to be as

arrive too late with his precious news.

Of course, he did not—that is a foregone conclusion in the mind of the observing reader; but it was a very close shave, and had Kai Wang been in any way delayed even for a minute he might have found a different welcome.

His coming was dramatic enough to please even a Frenchman. While the melee was at its height, a shrill voice sounded above the cries of the combatants. What it said Dr. Jack did not quite know, but there must have been a royal mandate in the demand, for those in the immediate vicinity of the newcomer ceased their noise and shrank away from the man who wore the yellow jacket of authority and who brandished a document which bore the revered seal of the Dowager Empress.

Almost like magic Kai Wang crushed the riot, and then, facing the sullen crowd that reminded Lord Rackett of tigers cheated of their prey, he read the orders of the Empress.

That document and that ring were insignias of life and death to those present. The man who dared to defy their power in the least had better make his peace with the gods, for as sure as the sun arose in the east his head would be minus a body ere the same glowing orb set.

And our friends, hardly able to realize what a blessed deliverance had overtaken them just in the nick of time—how they squeezed the honest hand of Kai Wang—oh, that was a proud moment for the progressive wizard. He could not have felt better had he received an order for a thousand gross of the most costly family gods, payment on delivery.

At least there was no discounting the wonderful authority contained in the document, and in the signal ring fashioned like a dragon of gold with diamond eyes.

The janizaries of the palace knew it too well to doubt the evidence of their eyes.

It is perhaps human to desire a connection with a winning house.

These leaders had but a brief time before been hotly panting for the blood of the intruders, yet no sooner were these parties placed under the protection of the great female ruler of China than they were one and all as equally desirous of constituting the especial guard of honor that was to see them out of the royal palace and beyond the encircling walls of the mysterious Forbidden City.

It was a real pleasure to Dr. Jack to grant them this privilege, and with one arm around his devoted and now happy wife, and the other holding the captured sword trophy, he traversed the passages, crossed the grand palaver chamber, amid the stares of astonishment on the part of mandarins and others still gathered there, and finally breathed the fresh outside air.

It was the grandest night in his whole life, and never had the pure atmosphere seemed so utterly delicious as when inhaled after his weeks of dungeon life.

Larry clung tenaciously to the unwieldy lantern, which he swore should follow him through life, since it must be the good genii that brought about such a glorious ending of what had threatened to be a calamity.

It may be safely assumed that our friends were rejoiced to see the outside of those forbidding walls again.

They issued forth through the ordinary channel, a gate that was heavily guarded, and went at once to the hotel.

Here in the morning a consultation was held, where the advice of British and American officials was sought, and it was finally concluded to leave Peking at once, since the papers bearing upon the great railway concession, for which London bankers were to pay Dr. Jack a million pounds sterling, were already at Hong Kong in safety.

The wonderful Kai Wang did not cease his vigilance, and, through him, our friends learned of a subtle plot, engineered, of course, by the baffled Russian, Petoskey, as a last resource, whereby they were to be attacked and overwhelmed by a great force of Tartars while on the way to the shipping

this material. In its manufacture 25 skins were used, and the effect is heightened by the skilful blending of the skins of the four kinds of snake—black, brown, yellow and grey. The buttons consist of rattlesnakes' heads. Mr. Gruber's hat and stick are also covered with the same material.

#### BOOKS BOUND WITH HUMAN SKIN

are rare, but the possession of Signor Goffredo is surely unique. It consists of a coat made from the tanned hides of criminals and others, which this eccentric gentleman has been at no inconsiderable trouble and expense to collect. No fewer than fifty-seven bodies have contributed to this gruesome garment, whereof, that the whole may be in keeping, the buttons, carved to represent death's heads, are cut from human bones.

Madagascar can boast of a factory where the experiment of making spiders' silk is being tried, so that ere long dresses of that material may be common. They are not that yet, but one at least is in existence. This, which is owned by the daughter of a New York millionaire, employed thirty-six skilful silk-workers in its manufacture from many thousand webs. Its somewhat sombre hue is relieved by a quantity of jewels, gems to the value of \$12,000 scintillating on the bodice alone.

#### A FRENCH COLLECTOR

possesses a small square made from the hair of Margaret, Countess of Lennox, mother of Lord Darnley, which is valued at \$6,000. The dress owned by Frau Weisse, of Berlin, though, of course, not so valuable, is composed of like material, being made entirely of women's hair, which, at no little cost, was purchased from peasants who, for a consideration, were ready to part with their luxuriant locks to gratify the eccentricity of an open-handed lady.

Mrs. Edwards, an American actress, possesses a dress valued at \$15,000, which was given to her on her marriage by an Indian Rajah. It is made of beetle-wings, whereof over 15,000 of a lovely iridescent green were employed ere the gown was ready for its fair wearer. Many wealthy women have, it is said, endeavored to procure a duplicate, with, however, no success, as the rarity of the beetle has hitherto precluded the accomplishment of their desire.

Among the effects of Herr Binder.

## The Better Way

The tissues of the throat are inflamed and irritated; you cough, and there is more irritation—more coughing. You take a cough mixture and it eases the irritation—for a while. You take

## SCOTT'S EMULSION

and it cures the cold. That's what is necessary. It soothes the throat because it reduces the irritation; cures the cold because it drives out the inflammation; builds up the weakened tissues because it nourishes them back to their natural strength. That's how Scott's Emulsion deals with a sore throat, a cough, a cold, or bronchitis.

WE'LL SEND YOU A SAMPLE FREE.  
SCOTT & BOWNE, Chemists, Toronto, Ont.

who died some years back at Munich, was a curious coat made of

#### SMALL PIECES OF WOOD,

none above an inch in diameter, fastened together by gold and silver wire. Not only is the garment curious, but it is a veritable work of art, for cuttings from almost every known tree were used in its construction, and the variously-colored woods have been made to blend with no little taste.

Very stiff and uncomfortable must this coat have been to wear, but less so, perhaps—being of a lighter material—than a similar garment made in the early eighties to the order of a Brazilian, who had such a liking for gold that he, on special occasions, wore a coat made of plaques of this precious metal. Naturally, he only appeared thus bedizened in the privacy of his family, by whom he was at length persuaded to convert his sartorial eccentricity into coin of the realm.

#### BLOOD TROUBLES.

Cured Through the Rich, Red Blood  
Dr. Williams' Pink Pills Actually  
Make.

Thousands of women suffer from headaches, backaches, dizziness, languor and nervousness. Few realize that their misery all comes from the bad state of their blood. They take one thing for their head, and another for their stomach, a third for their nerves. And yet all the while it is simply their blood that is the cause of all their trouble. Dr. Williams' Pink Pills cure all these and other blood troubles because they actually make new rich, red blood. Mrs. J. H. McArthur, St. Thomas, Ont., says: "Dr. Williams' Pink Pills have done me a world of good. For about eighteen months I was a constant sufferer. I was terribly run down and the least exertion left me fagged out. I slept badly at night and this further weakened me, and finally I had to give up housekeeping and go boarding as I was quite unable to do any housework. I took doctor's medicine but it was of little or no benefit. One day a neighbor told me how much benefit she had derived from Dr. Williams' Pink Pills and advised me to try them. I sent and got three boxes, and by the time I had used them I could feel a change for the better. Then I got four boxes more, and before they were all gone my health was fully restored. To see me now one would not think I had ever been sick for a day, and I can honestly say I owe my renewed health to Dr. Williams' Pink Pills."

Dr. Williams' Pink Pills are the greatest cure there is for the weakness and backaches and sideaches of anaemia; all the distress of indigestion; all the pains and aches of rheumatism, sciatica and neuralgia, and the weakness and ill health that follows any disturbance of regularity in the blood supply. Sold by all medicine dealers or by mail at 50c a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

#### TURKISH GRAFT TRAGEDY

THE SULTAN HIMSELF IS FINALLY INVOLVED.

Beating, Imprisonment and Death in Struggle for Private Advantages.

Bit by bit there has been revealed at Constantinople one of the most absorbing, dramatic and impossible stories of true life that ever stepped out of the pages of the Arabian Nights and wandered by some mischance into the present day and hour. The principal char-

acter. Those entrusted with the enforcement of the law in Constantinople never think of troubling important officials for such a trifle as the death—accidental or otherwise—of a rival's serving man.

The fray had been fought almost beneath the walls of the imperial palace itself and the yells of the combatants had reached the Sultan's ears. He demanded a report. It then became a question who had the biggest pull with the Sultan. Abdurrezzak's proved the stronger. It is said that Redvan was saved from banishment only through the influence of his mother, who held an important position in

#### THE IMPERIAL HAREM.

He lost the favor of his royal master, which meant, of course, that it would not be long before he would be deprived of his job, too.

This did not satisfy Abdurrezzak. He summoned a family council of the Bedr Khans to determine what further steps should be taken to punish the man who had slain a member of the clan and insulted its dignity by attacking the house of its leader with a mob of the lowest menials in Constantinople—scavengers. In the deliberations the leading part was taken by Abdurrezzak's uncle, Ali Shamil Pasha, military governor of Scutari, a man infamous even in Constantinople for his brutality and unscrupulousness.

Ali Shamil demanded a life for a life. Nothing less than the death of the prefect, he declared, could atone for the loss of the Kurd and the insult done the Bedr Khans. By his vehemence he carried the more timorous members of the council with him. The vote for Redvan's death was unanimous.

Abdurrezzak, the suave and polished master of ceremonies, the adept in all the intricacies of Oriental etiquette, lost no time in carrying the sentence into effect. He ordered one of his servants, who had taken part in the fight against the scavengers, to make the necessary preparations for the murder of Redvan. This man engaged three other Kurds to help him, and they were taken into Abdurrezzak's service at fifteen mid-jidies (\$12.50) a month. Assassins are cheap in Turkey.

Redvan had a country villa at Guez Tepe, a village in the Scutari district, with a station on the Anatolian Railway, and it was decided to kill him on his way from the train to his villa rather than in Constantinople.

#### THE SPARSE POPULATION

and the fact that the local troops were under the command of Ali Shamil would, it was thought, render the commission of the murder easier. The four Kurds were dispatched to Guez Tepe after Abdurrezzak had provided revolvers, cartridges and money, and had personally pointed out Redvan to them and given them their instructions.

It was no secret that the Behr Khans had sworn vengeance to the death against Redvan. It is probable that through his police spies he obtained something more than an inkling of the precise nature of the plot against him. He appealed to the palace for protection, but the Sultan still frowned upon him. Then, Turk like, he resigned himself to his fate, after making his will and disposing of most of his property.

One evening, just after he had left the train at Guez Tepe and was on the way to his villa, he was set upon by the four Kurds. To make sure of his death, they fired nine bullets into him before they took to their heels. Apparently he had made no special plans for their escape, depending on the influence of the heads of the Bedr Khans to get them off scot free. They were arrested after a short chase and lodged in one of the local guardhouses.

Ali Shamil tried to induce the police officer in charge to release them. Failing in this, he exercised his authority as military commander of the district to get them lodged in the barracks. Then he provided them with good fare and cigarettes and told them they needn't worry a bit, he would see them through.

Of course, the Sultan heard of the murder. He sent for Abdurrezzak. Re-

## Advantages.

Bit by bit there has been revealed at Constantinople one of the most absorbing, dramatic and impossible stories of true life that ever stepped out of the pages of the Arabian Nights and wandered by some mischance into the present day and hour. The principal characters in the drama were, on the surface, polished, cultivated men who might have been received in society anywhere—Constantinople, London or Washington. Underneath the surface they proved to have been contemporaries of Othello and Iago.

The drama, of which probably we have not seen the last act, has already resulted in the murder of the prefect of Constantinople, the execution of the master of ceremonies at the palace, and of his uncle, the military governor of Scutari, and in the practical extinction of one of the great princely houses of Turkey.

It all began in a trivial fashion a few months ago, when Ahmed Aga, factor for the rich and powerful Redvan Pasha, prefect of Constantinople went to live in Shishli, a suburb of the city, not far from the Yildiz Kiosk, and as luck would have it, in the same street with Abdurrezzak Pasha, master of ceremonies at the imperial palace. Redvan used his office to

## FEATHER HIS OWN NEST,

by methods not altogether unknown in this country. The bakers' guild, for instance, paid him 250 Turkish liras a day to be "protected" when they violated the law against the selling of bread under weight. Ahmed was the man who ran the graft department for him. Naturally, he saw to it that he got a good rakeoff for himself. And thus came about that he could afford to live in style in a big house in a swell street near the palace.

But despite the fact that the neighborhood was a fashionable one, the street, like most of the streets in the capital, was wretchedly paved. Ahmed used his pull to get that part of the street in front of his house repaved at the city's expense. Abdurrezzak sent him a message requesting that the pavement be extended to his own house. Ahmed wanted to know what there was in it for him. The response was not satisfactory. Then Ahmed discovered that the funds apportioned for street improvement had been exhausted, and the master of ceremonies would have to wait until an additional appropriation had been obtained, or pay for the extension of the pavement out of his own pocket.

Ahmed was a Turk of humble origin, while Abdurrezzak Pasha was head of the great and powerful Kurdish family of the Badr Khans, which, 50 years back, under the leadership of Abdurrezzak's grandfather, had organized such a formidable revolt against the government that the Sultan of that day had found it expedient to obtain peace by bestowing some of the best billets at his disposal on the chiefs of the Badr Khan. BY THE BEARD OF THE PROPHET, Abdurrezzak swore, he would teach Redvan's insolent upstart underling a lesson. On some pretext he decoyed Ahmed into his house, had him unmercifully bastinadoed, and placed him in ignominious confinement.

Ahmed managed to get word of his sorry plight to his chief. Redvan was not the man to leave one of his staunchest followers in the lurch. He did his best to induce Abdurrezzak to set Ahmed free. He even offered to pay a big sum (C. O. D.) for Ahmed's release. But Abdurrezzak's desire for revenge was stronger than his cupidity. He refused to let Ahmed go. Then Redvan took the law into his own hands. He armed a number of the city scavengers with clubs and revolvers and set them to effect Ahmed's deliverance. A lively fight took place between the scavengers and Abdurrezzak's servants. One of the Kurds was killed and several of Redvan's men were wounded, but Ahmed contrived to escape in the confusion.

No public inquiry was held into the matter, though everybody knew of the

officer in charge to release them. Failing in this, he exercised his authority as military commander of the district to get them lodged in the barracks. Then he provided them with good fare and cigarettes and told them they needn't worry a bit, he would see them through.

Of course, the Sultan heard of the murder. He sent for Abdurrezzak. Relying on the strength and influence of the Badr Khans to secure his immunity, the master of ceremonies boldly avowed his responsibility for the murder. He acknowledged that it had been committed by his servants at his orders, and his only regret was that his official duties at the palace had prevented him from

## AVENGING IN PERSON

the insult that the prefect had put upon him.

There followed a severe struggle between the Badr Khan faction at the palace and the rest of the imperial entourage, as to how the matter should be dealt with. Abdul Hamid has enemies enough in his domain, and he did not want to add to their number by taking any decisive steps against a house so powerful as that of the Badr Khans. He summoned a council of his principal ministers. With one accord they urged the necessity of taking vigorous action to vindicate the supremacy of his own authority. Otherwise, they pointed out, his own prestige would suffer irremediably, and the Badr Khans would be regarded as the real rulers of the empire.

This decided the wavering Abdul Hamid. Convinced that relentless severity was his best policy, he acted with promptitude. Three days after Redvan Pasha met his death Abdurrezzak, Ali Shamil and all the leading members of the Badr Khans were arrested one night and lodged on board a ship. The four actual assassins were tried and hanged. Their defense throws an illuminating light on the state of society in Turkey. "We were ordered to kill Redvan Pasha, and if we had not killed him our master would have killed us."

Meanwhile, the leaders of the Badr Khans were conveyed to the fortress of Tripoli, where they were tried in secret on the double charge of high treason and murder, and all save one were condemned. But before Ali Shamil was executed he gave a sensational exhibition of the savage that lurked beneath the veneer of twentieth-century civilization. While undergoing examination in the presence of his judges he sprang at the procurator-general and killed him like a weasel by biting him in the throat.

And all these tragic happenings resulted from Ahmed Aga's refusal to use his pull to lay a stretch of new pavement in front of Abdurrezzak's house!

it back and have it made smaller?" Clara—"No, George; an engagement ring is an engagement ring, even if I had to wear it round my neck."

## AFTER TEN YEARS.

Mr. G. L. Stephenson, of Peterborough, says: "For over ten years I suffered constantly with Piles, first itching then bleeding; pain almost unbearable; life a burden. Tried everything in vain till I used Dr. Leonhardt's Hem-Roid.

I had taken but a few doses when I began to notice an improvement. Now I am completely cured."

A \$1,000 guarantee with every box of Hem-Roid. \$1. All dealers, or The Wilson-Fyle Co., Limited, Niagara Falls, Ont.

## THE HUNT OF BIG GAME.

The northern part of the Province of Ontario is the mecca for the sportsman and hunter. Deer and moose abound in the several districts that are reached by the Grand Trunk Railway System including "Aluskoka," "Lake of Bays," "Maganetawan River," "Lake Nipissing," "French River," "Temagami," "Georgian Bay," and several points on the Ottawa Division between Scottia Jet and Algonquin Park. Last year nearly 12,000 deer and 300 moose were taken out of this territory and from reports received this year, the supply is as great as ever. All hunting districts easy of access. Full particulars in "Haunts of Fish and Game," an illustrated publication giving all information, game laws, etc., sent free, on application to G. T. Bell, General Passenger Agent, Montreal.

## ENOUGH SAID.

Citiman—Do you know Sharpe? Subbuss—Oh! he's a real-estate agent. Citiman—Yes, but do you know anything about his character? Is he honest? Subbuss—Haven't I just told you what he was?

The superiority of Mother Graves' Worm Exterminator is shown by its good effects on the children. Purchase a bottle and give it a trial.

"I wish I was half as beautiful as Miss Brown," remarked the fair Edith to Mr. Green. "Well, you are, you know," replied Green thoughtlessly. Then he wondered why she suddenly rose and left him.

Death Comes to All.—But it need not come prematurely if proper precautions are taken. "An ounce of prevention is worth a pound of cure," and to have prevention at hand and allow a disease to work its will is wickedness. Dr. Thomas' Electric Oil not only allays pains when applied externally, but will prevent lung troubles resulting from colds and coughs. Try it and be convinced.

## DID NOT IMPRESS HIM.

A practical joker recently made his first trip to Niagara Falls, and a guide that he hired was trying to impress him with their magnitudes.

"Grand!" suggested the guide. "Grand," acquiesced the tourist stolidly.

He seemed to be interested, but not at all impressed.

"Millions of gallons a minute," explained the guide.

"How many a day?" asked the tourist. "Oh, billions and billions," said the guide.

The other looked across and down and up, as if gauging the flow, and then turned away disinterestedly.

"Runs all night, too, I suppose," he remarked nonchalantly.

The guide never recovered.

## FLUENT, BUT NOT CONVINCING.

Wiggles—Did you have any difficulty in speaking French while you were in Paris?

Waggles—Oh, no; I didn't have any difficulty at all in speaking it. The difficulty was in getting people to understand it.

Over two thousand farms in Ontario. Send for our List.

## REMARKABLE PRINTING PRESS.

The University Press at Oxford, England, is the most remarkable printing establishment in the world, as well as one of the oldest. It is what you might call self-contained, and if everything else pertaining to printing were blotted off the face of the earth tomorrow the University Press would go right ahead as if nothing had happened. It makes its own type and its own ink; burns its own charcoal for making the ink, makes its own paper, and so on. The workmen in the Press are as interesting as the establishment itself. In many instances son has succeeded father down the centuries in his employ, as naturally as if the son was his lordship and the father an earl and the position an entailed estate.

Corns cause intolerable pain. Holloy's Corn Cure removes the trouble. Try it, and see what amount of pain is saved.

"But," said the merchant to the applicant, "you don't furnish any reference from your last place." "You needn't worry about that," replied the man with the close-cropped head and prison pallor, "I wouldn't be here now if it hadn't been for my good behavior in my last place."

Office Boy—"Want to see the guv'nor? What name shall I say?" Visitor—"Herr Schweitzsalsburghausen." Office Boy—"Oh, I shan't have time to pronounce all that. I'm leaving at the end of the week."

To Those of Sedentary Occupation.—Men who follow sedentary occupations, which deprive them of fresh air and exercise, are more prone to disorders of the liver and kidneys than those who lead active, outdoor lives. The former will find in Parmelee's Vegetable Pills a restorative without question the most efficacious on the market. They are easily procurable, easily taken, act expeditiously, and they are surprisingly cheap considering their excellence.

"Tobacco smoking," said the traveler, "is so common in Holland, that it is impossible to distinguish one person from another in a room full of smokers." "But supposing you want to speak to someone present, how are you to find it out?" "Ah, in such cases a waiter is sent round with a pair of bellows, with which he blows away the smoke from the face of every person until the right one is found."

## For Family Colds

A reliable cough and cold cure should be always in the house ready for use the moment the first symptoms appear.

It is always easier, cheaper and better to check a cold in the very beginning. It is safer, too.

Shiloh's Consumption Cure, the Lung Tonic, has been tested for thirty-three years, and tens of thousands of homes in Canada and the United States to-day are never without it.

A dealer writes: "Shiloh's Consumption Cure is without doubt the best remedy for Coughs and Colds on the market. Once used, my customers will buy no other."—L. Easley, Nanawewa, Ont.

If it were anything but the best would this be so? Try it in your own family. If it does not cure, you get back all it cost you. We take all the chances. Neither you nor your dealer can lose. Isn't that fair? 25c. is the price. All dealers in medicine sell.

# TWO STRIKERS SHOT DEAD

## MacLaren Mills, Buckingham, Quebec Scene of Murderous Affray.

### THE DEAD.

THOS. BELANGER, labor leader.  
XAVIER THERRIEU, striker, Buckingham.

### FATALLY WOUNDED.

Detective Peter Pecard, Montreal.  
Detective Herbert Verner, Montreal.

### SERIOUSLY WOUNDED.

James Kiernan, policeman, Buckingham.  
Albert Leyotte, detective, Montreal.  
Frank Kiernan, Chief of Police, Buckingham.  
Isidore Renaud, striker, Buckingham.  
Edward Miner, striker, Buckingham.  
Baptiste Clemow, striker, Buckingham.  
Felix Fauvalle, striker, Buckingham.  
Xavier Tremblay, striker, Buckingham.  
Adelard Hamelin, striker, Buckingham.  
Louis Gervais, striker, Buckingham.  
Felix Lacelle, striker, Buckingham.

### THE OUTBREAK.

Buckingham, Que., Oct. 8.—One of the most disastrous affrays in connection with a labor dispute occurred this afternoon in this town, 20 miles down the river from Ottawa. A pistol battle took place between the strikers of the Jas. McLaren Company, Limited, lumbermen, and a detachment of police, and as a result two of the strike leaders are dead in the morgue, two special constables are at the point of death in St. Michael's Hospital, nine men are seriously wounded, and a score are slightly injured.

About a month ago the men employed in the lumber and pulp mills of the James McLaren Company, Limited, demanded an increase of 25 cents per day each. The firm replied that, having carried on its business enterprises the greater part of the summer under great difficulty and largely increased expense by reason of the lowness of the water in the Lievre River, they did not feel warranted in entertaining the demand. Accordingly, on Sept. 15 the employees of all the mills refused to work any longer, whereupon the mills were closed down and the men paid off.

This morning it was decided to move an accumulation of logs which were obstructing navigation in the river. A few of the men who had stood loyal to the firm were engaged for this purpose. They were accompanied by about 40 constables, who had been specially

engaged as watchmen of the McLaren property.

### ATTACK WAS PLANNED.

The attack upon the police had been planned in the morning. When the non-union men commenced to move the logs the strikers assembled in force. Thomas Belanger, president of the union, and another of the officers, named Charette, went forward and asked to be allowed to speak on behalf of the men. Mayor Verequillee, who is superintendent of the works, shouted back, giving consent. Belanger made a violent harangue on behalf of the strikers, and declared that they would resort to violence unless the moving of the logs was stopped. Mayor Verequillee, in reply, said the company would not recognize the union and that hereafter the mill would be an open shop.

Belanger and Charette then returned to their fellows, and, after a conference, the strikers dashed down the hill yelling at the top of their voices and hurling stones. Belanger and Hamelin were in the lead, and as soon as the rush began Belanger waved a revolver and shouted "Come on, men, show them what we are made of." The strikers had advanced about fifty yards when a shot grazed the head of Constable Kiernan. The specials fired their revolvers in the air over the heads of the advancing mob, but when the bullets from the revolvers of the strikers began to fly around them they took steady aim.

### TWO LEADERS FELL.

Belanger was one of the first to fall, and a few seconds later Theriet dropped. For 20 minutes the sanguinary feud continued. Men had dropped on both sides. Seeing how serious had been the struggle, the strikers pulled off.

The townspeople had in the meantime commenced to gather, and the work of removing the dead and injured was speedily carried out. Fearing a possible renewal of the trouble, requisition was made upon Col. Hodgins, D.O.C. of No. 4 District, for the services of the military, and shortly after 8 o'clock to-night 66 men of the G.G.F.G. and 35 men of the 43 Rifles left Ottawa by special train. Col. Hodgins was in command of the force, the officers with him being Major D. Cameron, Major Morrison, and Capt. Cunningham.

form such work most satisfactorily after one or two experiments.

A very pleasing way to serve the salad is as follows: Cut good-sized boiled beets into symmetrical cups and let stand in seasoned vinegar over night. With a pair of sharp scissors (reserved for such purposes) cut the lettuce into shreds, just before the dinner is to be served. Allow a tablespoonful of chopped walnut meats for each cup and mix with lettuce, toss lightly in a French dressing, and fill into the beet cups. Garnish with a star of golden mayonnaise. The red, green and yellow combination looks very pretty and is as palatable as it is handsome.
